SOUTH AFRICA PROTECTORATE

No. 222.

(Enc. 1.)

I have the honour to submit herewith a copy

of a despatch with enclosures from the Acting Manager

of the Uganda Railway reporting the collapse of the

wall of the dry dock at Port Florence.

2. The occurrence is most unfortunate as it will

cause considerable delay and necessitate an expense

which was not estimated for in erecting the S.S. "Clement

Hill". The repairs to the dock are being undertaken

and will be discontinued as rapidly as possible. The cost

is roughly estimated at two thousand pounds.

I have the honour to be,

With the highest respect,

My Lord,

Your Lordship's very obedient,

humble servant,

Principal Secretary of State  
for the Colonies,  
1 Downing Street.

U.M.C. A.W.

Manager's Office,

MATROSIL, 27<sup>th</sup> April 1950, M.Y. 06

SIR,

FAILURE OF PORT FROTHEN DOME.

I have the honor to report for your information that I received a telegram on Saturday the 21st instant from [redacted] or Way and Works who was at Port Frothene that the dock wall had failed. I at once called [redacted] report and in forwarding it have little to add beyond remarking that there can be no doubt the failure is due to abnormal pressure of water and the saturation of the soil around the back of the dock wall.

So that as it may we have to face the repair which must go on at once and the Engineering Department is now preparing a design and arrangements to do so. No provision has obviously been made to meet an expenditure of this sort and it must go in under the provision made for general head "Maintenance".

The occurrence is unfortunate in that it will somewhat delay the erection of the "Gladwin Mill" which was to have been built in the dock while we must now go on a slip the provision of which was not contemplated. The strengthening of the dock will call for a considerable quantity of cement more than arranged for and an amount is now being ordered with a request that a hoist be sent out early.

I have the honor to be,  
SIR,  
Your obedient servant,

Sd/- C. LANDFORD.

ADM. Manager,  
Dyakha Harbour.

Mr. GO. TIBBETTS,  
Port Advisor, Dyakha,  
MATROSIL.

No. 1004/100.

Sir,

The Superintendent of Way & Works,  
Uganda Railway.

To,

The Acting Manager,  
Uganda Railway.

NAIROBI, 26th April 1908.

Sir,

Failure of Dock.

I have the honor to forward the following regarding the failure of the dock at Port Florence.

The dock was ~~empty~~ dry on the 17th April.

During the night of the 18th ~~was~~ very early in the morning of the 19th the south half of the dock for a distance of 110 feet from the entrance moved inward towards the dock about 6" in the worse place. A large crack extended along the level of the lowest altar through which a considerable amount of water poured. On examination of the collapse I at once ordered that the water should be let into the dock so as to equalise the pressure and prevent total collapse; this was done and no further movement has taken place. The figure (1) will show the section of the wall which moved forward and figure (2) proposed means of strengthening.

FIG. 1.

FIG. 2.

The causes of collapse are at present doubtful, the section of wall in figure (1) is quite capable of bearing the pressure of the mud bank at its back. However owing to heavy rains a large quantity of water may have drained off the hill behind the dock and collected in a basin behind the wall thereby giving a pressure equal to still water. To withstand this the wall will have to be ~~the~~ thickened as shown in figure (2). The same may happen to the north wall so that will have to be strengthened in the same way. For 100 ft about 80,000 c. ft. concrete will be required at a cost of 18 annas a ft. which is £1,000, heavily imbered excavation will be required behind the wall, and the total estimate for repairs will not be much under £2,000. It will take from three to four months before the dock can be used again if everything goes satisfactorily. It is impossible to make a true estimate of the cost until the trench is dry and the causes of collapse are more apparent.

I have the honor to be,

SIR,

Your obedient servant,

sd/- A. P. CHURCH.

Officiating Superintendent,

Railway and Works,

Uganda Railway.
