Nail Bags from C.O. for French Packet.

Explains reason why they were
not sent by French packets

(Matter.)

Mr. Read

I had not heard of the special business before.
The distinction between 'ordinary' or 'local' mails
and 'despatch bags' is new to me and there is
no reason why it should be maintained as far as
our mail matter goes for ~~local~~ local matter is
not included for despatch by these foreign ships
but is sent direct by British packets. As you know
we use bags only when the mail matter cannot
go into an envelope. There is therefore no
reason why we should not continue to use these
French boats when they are cheaper than other
lines. To explain to PRO

I think that you had better go + tell someone at the P.O. + discuss it personally. 16/3/06

Mr. Read,

I saw Mr. Rowland today, who says that no difficulty will arise if we write PRO officially that our mails to Uganda are to be by the next available

James letters marked to go by British
what. I must a draft.

The R.C. letters I left in bag on this
occasion when I would have passed out
most of the covers only. I explained to the
General
