AFRICA PROTECTORATE

No. 500

Sir,

In obedience to instructions contained in your despatch No. 294 of July 7th, I have the honour to transmit herewith a memorandum from the Manager of the Uganda Railway replying to the questions raised in the letter addressed by Messrs. Rendel and Robertson to the Crown Agents for the Colonies on the subject of the water supply at Makindu.

I have the honour to be,

Sir,

Your most obedient,

humble servant,

(In the absence of H.M. Commissioner)

Principal Secretary of State

for the Colonies

Downing Street

London, S.W.

Manager's Office.

NAIROBI, 5th September 1905.

57

MEMORANDUM.

I regret the error I made in my previous letter in which I stated that 2 cusecs = 52,000 gallons per hour; it was a slip in writing which I omitted to detect.

The whole scheme had been somewhat modified which accounts for the other discrepancies mentioned by the Consulting Engineers.

In the light of their latest remarks I have again altered the arrangement so that we can be sure of getting the necessary power.

The figures to be worked to now are:-

Total virtual head to be overcome - 170 ft.

Total water to be delivered - 1250 gallons per hour.

Total clear head available between bottom of supply tank and tail water after allowing for floods - 10 feet.

Total minimum water available - 44,900 gallons per hour.

When sending out the plant I shall be much obliged if the Consulting Engineers will send the necessary plans showing the way in which it should be erected.
