THE ADDRESS: K. McIVOR & Co., P.O. 397, MOMBASA.

APPROVED BY THE GOVERNMENT OF KENYA.

PRINTED AND PUBLISHED BY THE PROPRIETOR AT THE OFFICE OF THE AFRICAN STANDARD, 90, NASSAU ROAD, MOMBASA.

Subscription Rates: Single Copies 1/-; 3 Months 3/-; 6 Months 6/-; 12 Months 12/-.

MOTOR TOPICS

Kept Lubricated. At 40 MILES PER HOUR. CAR CAUSERS.

A COMMONS FAULT WITH OVERHEAT.

Feat of Packard Car Built in 1903.

It is a fact that the transmission and differential of the average road car are worn to such an extent that they are almost always found to be the cause of the trouble. The most of these troubles are invariably found to be due to bad lubrication.

THE HISTORY OF THE MODEL.

New Miami, Florida, recently a motorist, G. P. Mallon, was arrested for driving his car at 40 miles an hour. Ordinarily this would not be considered an extraordinary feat for a road car, but in this case it was a feat because the car was a 1903 Packard. The car was built in 1903 and was the latest model of that year.

Third Party Buys.

It is interesting to note that a car is being bought by a third party. This is a new development in the car business. It is a car which has been used for a long time and is now being sold to a new owner.

When a car is driven at a high speed, the engine and other parts of the car are subjected to a great deal of strain. This strain is caused by the friction of the air and the resistance of the road. If the car is not properly lubricated, the friction will be increased and the engine will overheat.

The car was built in 1903 and was the latest model of that year. It was a Packard and was built in Miami, Florida. The car was driven at 40 miles per hour and was not stopped for a long time.

There is a difference between the wear of a whole and the wear of a part. The wear of a whole is caused by the friction of the air and the resistance of the road. The wear of a part is caused by the friction of the part itself.

Our service stations are not equipped with the latest of the latest. This is a fact which is being recognized by the car owners. They are looking for service stations which are equipped with the latest of the latest.

During the last several days of the last year which is being mentioned, 1,000 cars were covered and an average number of the gasoline consumed was about 100 gallons. This is a fact which is being recognized by the car owners.

There is a difference between the wear of a whole and the wear of a part. The wear of a whole is caused by the friction of the air and the resistance of the road. The wear of a part is caused by the friction of the part itself.

The Motor Industry.

STILL NUMBER ONE AS A "NEW INDUSTRY."

For years, "Old Florida" has had the honor of the building of the Packard Motor Company here. The car was built in Miami, Florida, and was the latest model of that year.

There is a difference between the wear of a whole and the wear of a part. The wear of a whole is caused by the friction of the air and the resistance of the road. The wear of a part is caused by the friction of the part itself.

The 1920 annual report of the General Motors Corporation has this to say about the motor industry: "It is still considered by the motor industry to be the most important of all industries."

Only a very short time was required to put in the engine mounting in the 1920 model. This is a fact which is being recognized by the car owners.

There is a difference between the wear of a whole and the wear of a part. The wear of a whole is caused by the friction of the air and the resistance of the road. The wear of a part is caused by the friction of the part itself.

The car was built in 1903 and was the latest model of that year. It was a Packard and was built in Miami, Florida. The car was driven at 40 miles per hour and was not stopped for a long time.

Parfins as a Fuel.

When Better Automobiles Are Built, Buick Will Build Them.

Question No. 12

RECEIVING ATTENTION AT THE MOMENT.

Question No. 12

Question: Why can Buick "set the pace" for motor car improvement?

The possibility of employing kerosene as paraffin in fuel is a question which is being recognized by the car owners.

When Better Automobiles Are Built, Buick Will Build Them.

Question: Why can Buick "set the pace" for motor car improvement?

WILLIAM SUGAR, 100, Market Street, Nairobi.

Question: Why can Buick "set the pace" for motor car improvement?

ANSWER:

Because Buick has the largest engineering staff of any automobile manufacturer. And because practically every motor car improvement is offered first to Buick because of Buick's dominant position in the industry.

Gillilan & Company, Ltd.

207, Market Street, Nairobi.

"STANDARD" FEATURE PAGE

I have been requested by the editor of the Standard to publish in my name the "Constitution and Rules of the Kenya Club" as revised on March 7, 1926.

The Club shall be called the "Kenya Club." The objects of the Club shall be to encourage the keeping, breeding and rearing of all kinds of thoroughbred dogs by promoting and accepting those and taking all other necessary and profitable steps to produce and exhibit such animals in Eastern Africa.

THE PRINCE'S INTEREST
This interesting note was shown in the exhibit in the cinema for "Highbanks" in the morning.

A KENYA GARDEN.
Another View by Margaret Peterson.
Within a Kenya garden group things were very busy and the only one working for the sake of the group. The only one working for the sake of the group.

All about the Dutch way of thinking the natives have long regarded the Dutch as a people who are not to be trusted. The Dutch are a people who are not to be trusted.

REPORT OF WOOL.
The Woolly Association of New South Wales has proposed the proposal for the formation of an association under Government control.

A Ruin Meeting.
There is a place in the sun named "The Ruin Meeting." It is a place where people go to meet and discuss the future of the colony.

THIS DAILY—SEPT 4, 1923

MATIVE HOUSING.

In February last the Government proposed the acquisition of the sites of thirty thousand pounds for the construction of quarters for African employees of the Government who were resident in Nairobi. A scheme was prepared and submitted to a Select Committee of the Legislative Council, with details of the cost of the types of buildings proposed. These plans did not meet with the entire approval of the Select Committee and the sum of ten thousand pounds was substituted for the £30,000 originally proposed. It was explained that the requirements for the last three years have not kept at the same time. It was pointed out that the cost of the buildings originally proposed worked out at approximately two hundred and fifty pounds per unit, exclusive of general for any central recreation room as before for the improved. Following the discussion on this item the question was again referred to a Select Committee by resolution. The plan was approved at the meeting of the Council. In consequence, the Select Committee decided to refer the Government's proposals to the Government. It was stated that the Government should be of a similar nature to those provided by the Uganda Railway. The similar proposals, majority of recent buildings

PAY—AS—YOU—RIDE.

adds to the difficulty of eventually finding a satisfactory solution. The situation has admittedly been relaxed and partial measures have been taken to improve matters. The Native Location is being developed, the Uganda Railway and the Municipality have negotiated more satisfactory schemes and now the Government proposes to deal with the bulk of the problem with which it is most intimately concerned. Private employers of labour are also doing a great deal to help their own interests. The Government is to be commended for the steps it has taken to improve matters. The question requires more general treatment than the provision of sanitary accommodation for what must be but a fraction of the population—namely in regular employment. The Municipality will be well advised to press forward its schemes for Municipal works for the utmost of its financial resources with a view to improving the sanitation and control of disease. But its endeavours must be greatly restricted unless the average cost of construction of quarters for Africans can be reduced for the high cost both in materials and labour. The Select Committee's report should be obtained anything approaching an adequate return on the investment. In all schemes of African housing intended to meet the requirements of the general population, the cost should be charged on dwellings, instead of the more costly method of the present. The Select Committee's report should be obtained anything approaching an adequate return on the investment. In all schemes of African housing intended to meet the requirements of the general population, the cost should be charged on dwellings, instead of the more costly method of the present. The Select Committee's report should be obtained anything approaching an adequate return on the investment. In all schemes of African housing intended to meet the requirements of the general population, the cost should be charged on dwellings, instead of the more costly method of the present.

of labour who are employed to improve the living conditions of their servants. It is to be hoped that the present specifications approved by the Government to a general improvement in the position.

UNDER THE STANDARD CLOCK

Stony Hill.
Stony Hill Station was one of the best of the roads in the number 1.

Price of Milk.
Milk is being sold at a price of 1/6 per gallon. This is a price which has not been reached for some time.

Mail Arrival.
The mails arrived from London on the 1st inst. and were found to contain a number of interesting items.

Water.
The water supply is being improved by the installation of a new pump at the reservoir. This will ensure a steady supply of water to the town.

Archie's Law.
Archie's Law is being enforced in the town. This will ensure that all buildings are built to the highest standards.

The New Council.
The new council has been elected and will meet on the 1st inst. This will ensure that the town is governed by the best of men.

"STANDARD" FEATURE PAGE

SEPTEMBER.

The Final Scene in Summer's Pageant.

IN ENGLAND.

(BY "M.C.D.")

As the wonderful month draws to a close, the English people are looking back on a year of autumnal splendour and golden sunshine and people shudders, that gather on the dim sides of pine woods.

The silver gleam of a myriad fire leaves. Through the haze and afternoon country folk may see wandering along peacefully and wandering again as they gather the dew-drops of a perfect dawn.

There is when the summer is over a time of waiting. The last long season begins as it were to end. The birds of autumn, September morning, are still in the air.

The harvest moon rises and the golden glow of the harvest moon is seen. The golden glow of the harvest moon is seen. The golden glow of the harvest moon is seen.

The great glory of the autumn is when the sun is in the zenith. The sun is in the zenith. The sun is in the zenith. The sun is in the zenith.
