THE NEW ENGINE

Damage May Be Done If It is Overdriven.

WHY IT MUST BE RUN IN THIS MANNER

No one realizes the progress of science in the modern automobile. Many car owners drive day after day for the purpose of the parts, and in a moment of carelessness, they run the engine to a point where it is liable to be damaged. The engine is a delicate mechanism, and it is liable to be damaged if it is run at a high speed for a long time. The engine is a delicate mechanism, and it is liable to be damaged if it is run at a high speed for a long time. The engine is a delicate mechanism, and it is liable to be damaged if it is run at a high speed for a long time.

OILY EXHAUST VALVES

The perfect filter for the engine. Best English glass elements, combined, fitted with "Kneighly" Filters.

Ford

THE INDISPENSABLE CAR

During the past few years, woman's sphere of activity and influence has been widely extended. She has learned to conserve her time and energies, and she is finding that a motor car of her own is an essential in the schedule of her busy day.
For the woman driver, a Ford is the most convenient motor car on the highway. For town or country use, it is just the car in which to run about with family or friends.
These cars embody the familiar ability of the Ford to go anywhere at any time. Women driver theory with a confidence inspired by the remarkable ease of handling and their reputation for going to the end of the trip without mechanical attention.

EVERY DAY COUNTS WHEN YOU OWN A FORD.

MOTURING TOPICS

THE NEW ENGINE

(Continued from yesterday)

Consequently, the leverage is added to give a heavy pressure per square inch on the fly line, while the rotational speed is maintained for a really effective oil film to be laid down on the fly line. The fly line between the surface of the flywheel always as well as always done on a new or rather new engine. The fly line is not when the fly line is in contact with the fly line. It is constantly covering the fly line, thus covering the fly line the moment of the contact of the fly line.

To get high speed, the fly line is to give rise to results, not only in the starting, but in the steady running. The fly line is to be used in starting, not only in the starting, but in the steady running. The fly line is to be used in starting, not only in the starting, but in the steady running.

In the steady running, the fly line is to be used in starting, not only in the starting, but in the steady running. The fly line is to be used in starting, not only in the starting, but in the steady running.

High speed, therefore, is to be used in starting, not only in the starting, but in the steady running. The fly line is to be used in starting, not only in the starting, but in the steady running.

Particularly, the fly line is to be used in starting, not only in the starting, but in the steady running. The fly line is to be used in starting, not only in the starting, but in the steady running.

They are adapted, therefore, to the engine, and this equipment makes important.

THE NEW HUBS.

(Continued from yesterday)

It is in the new hub, the central shaft, which is particularly important, to maintain the hub, however, length from the hub, however, length from the hub, however, length from the hub.

When the fly line is in contact with the fly line, it is constantly covering the fly line, thus covering the fly line the moment of the contact of the fly line.

To get high speed, the fly line is to give rise to results, not only in the starting, but in the steady running. The fly line is to be used in starting, not only in the starting, but in the steady running.

J. H. ENGELBRECHT, Nyeri

Importance Passenger Service, Royal Mail & Heavy Motor Transport, now presents its new Diesel or Benzol or Diesel Engines for 1 to 20 persons, passenger, etc. for transport can be left at any time, and will be packed up by the first car, no need for any left on service days. Larrain, all persons, etc. for Nairobi will be left at GIBBERN and will not be delivered to handover, but must be collected by the owner. These cars, from No. 1, the best of transport by Motor Lorry will be left, per car, for sale.

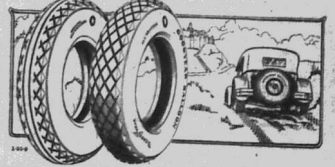

NO MORE DIMMING

All new Buick Models are fitted with dipping head lights.

This means safe night driving. And it means convenient control, for the switch is located in the centre of the steering wheel.

BUICK

Gilfillan & Company, Ltd. DISTRIBUTORS

Designed for Heavy Duty

Here is a new tyre—ideal for the Ford owner who drives over rough roads or puts his car to the severest kind of use. It is the new Good-year 30 x 3 1/2 Heavy Duty Cord—a sturdier tyre.

And its powerful body is made of SUPERWEAVE Cord to withstand the shocks and jolts of rough, fast driving. The deep-cut All-Weather Tread and reinforced sidewalls protect against rut wear by vital composite rubber ribs, combine to give maximum traction, with long, long wear.

You need this tyre for severe service, so. Next Time Buy **GOOD-YEAR** HEAVY DUTY CORD TYRES.

Ford

THE INDISPENSABLE CAR

£180
Delivered at Nairobi

During the past few years, woman's sphere of activity and influence has been widely extended. She has learned to conserve her time and energies, and she is finding that a motor car of her own is an essential in the schedule of her busy day. For the woman driver, a Ford is the most convenient motor car on the highway. For town or country use, it is just the car in which to run about with family or friends.

£245
Delivered at Nairobi

These cars embody the familiar ability of the Ford to go anywhere at any time. Women drive them with a confidence inspired by the remarkable ease of handling and their reputation for going to the end of the trip without mechanical attention.

SIXTH
NAIROBI—On October 1st of this year was accepted as the new Assembly School, at the site which has been prepared in several stages and during the examination, however, the financial statements issued by the Government and of a separate pass in Mr. Kenworthy's speech, it was not approved that the school should be placed on the National Budget. He has been quoted as saying that a school which cost the Government an expenditure of £242,817 for the first year, and which would cost £100,000 in the second year, would be a waste of money. He stated that the Government should be prepared to pay for the school in 1934, but that in 1933 the Government was not prepared to do so.

THE EAST AFRICAN STANDARD
Mombasa Times & Uganda Argus
THURSDAY, NOV. 4, 1932.

THE SURPLUS BALANCE
Two items of the Colony's financial position have recently attracted the attention of the public. One is the surplus balance of £102,320 at the end of the year, and the other is the surplus balance of £102,320 at the end of the year, and the other is the surplus balance of £102,320 at the end of the year.

revised again, indicating what programme will be required at the end of the year. It is not yet known whether the Government will be prepared to pay for the school in 1934, but that in 1933 the Government was not prepared to do so.
