## The Utility Car & Truck

NOWHERE is the Ford more enjoyed and appreciated than in this country.

It has brought to the settler a constant means of escaping the monotony of farm life in isolated districts and has enabled him to add to the benefits of farm life the advantages of being always within easy reach of his market.

Not the least important feature of having a Ford is that anyone can handle it for it is the safest and easiest of all cars to drive.

QUEEN ALEXANDRA.

Carriage on Carpet of Snow.

**[THROUGH ABERDEEN'S AVENUE.]**

London, Nov. 30.—The carriage of the late Queen was borne to-day along from Woodford Aerodrome to the West Ferry station where they were conveyed to a train by special train. Many of the country folk walked miles to witness the departure of the carriage from the station of Woodford Park.

After a short service in the church a procession was formed, the King, Prince of Wales, the Duke of York, Prince Henry and Prince George, who will hold the coffin, the Queen and other members of the royal household, the country troops, the bands and the great numbers of public men accompanying the carriage.

The coffin will arrive in St. James' Palace, tomorrow. The Kings of Norway, Denmark, and the Italian queen are thought to attend the funeral tomorrow.

A BRIAND CABINET.

Finance Problem Solved.

**[THROUGH ABERDEEN'S AVENUE.]**

Paris, Nov. 30.—M. Herriot's conversations with the Socialist leaders have been very sympathetic with the result that they have decided to participate in a coalition government headed by a Socialist party meeting to deliberate the financial conditions of the country.

It is expected that the Socialist Government will be formed in the near future.

ANGLO-GERMAN TRADE.

Tariff Differences Examined.

**[THROUGH ABERDEEN'S AVENUE.]**

Berlin, Nov. 30.—It is generally expected that the Anglo-German trade agreement will be signed in the near future.

The agreement will be signed in the near future.

**NEW EDUCATION METHODS.**

**The Dalton Theory.**

(By "L.O.B.")

It is hardly admitted that the Dalton Theory has become one of the most rapidly progressing of the world. The theory plays one of the most important parts in the development of the country, and this fact has been recognized by the Government of England. It has recently issued a new programme, which will give the Department in fully co-operation with the State to the responsibility. New schools are to be opened and the Dalton theory is to be the key.

As explained in the previous issues, the Dalton Theory opens up an entirely new era of education, which is fast getting a very rapid development. The Dalton Theory is really widely used in the United States and in the United Kingdom, and in the United States it has become a part of the education of a child's thought, and in the United Kingdom it has become a part of the education of a child's thought, and in the United States it has become a part of the education of a child's thought.

**OVERSEAS EDUCATION.** Many parents today in Kenya and other parts of the world are being advised—either in English or in their own languages—to apply the Dalton method to their children's education. This is a method which is not to be confused with the Dalton method of the Dalton Theory. It is a method which is not to be confused with the Dalton method of the Dalton Theory. It is a method which is not to be confused with the Dalton method of the Dalton Theory.

**TEACHERS' EDUCATION.** Many parents today in Kenya and other parts of the world are being advised—either in English or in their own languages—to apply the Dalton method to their children's education. This is a method which is not to be confused with the Dalton method of the Dalton Theory. It is a method which is not to be confused with the Dalton method of the Dalton Theory.

  - Medical Apparatus
  - Motor Cars, Motorcycles, Motor Buses, etc.
  - Refrigerators
  - Power, Lighting and Heating

There is a free trade scope for the child, and the child who is not gifted with the average amount of brain and intelligence. Education today is a mass method, and as such the greatest error which is committed in schools, used. Let each child have the best chance and let us see equally with his contemporaries. The Dalton Theory does this, and it is certain that the child who is not gifted with the average amount of brain and intelligence, and the child who is not gifted with the average amount of brain and intelligence, and the child who is not gifted with the average amount of brain and intelligence.

**OBITUARY.**  
**Mr. F. Strawbridge.**  
We regret to announce the death of Mr. Frederick Strawbridge, who died in Hospital on Saturday, December 1st, 1938. Mr. Strawbridge was the Chief Factory Inspector for the Colony, and had been in the Medical Department since 1913. He had done much good work during his period of service, and was particularly successful in his work as a great loss to the Department. He was a member of the Order of St. Michael and St. George, and was a member of the Order of St. Michael and St. George.

**NEW FRENCH CABINET.**

The first composition of the French Cabinet, announced on Sunday, December 1st, 1938, is a cabinet which is not to be confused with the Dalton method of the Dalton Theory. It is a cabinet which is not to be confused with the Dalton method of the Dalton Theory. It is a cabinet which is not to be confused with the Dalton method of the Dalton Theory.

**Sand's Ointment.**  
Sand's Ointment is a medicine which is not to be confused with the Dalton method of the Dalton Theory. It is a medicine which is not to be confused with the Dalton method of the Dalton Theory. It is a medicine which is not to be confused with the Dalton method of the Dalton Theory.

**EAST AFRICAN STATES.**

The following appears in the Kenya Times: "The Hon. Mr. J. H. Wilson, Minister of the East African States, announced in the House of Representatives on Saturday, December 1st, 1938, that the Government had decided to grant a grant of £100,000 to the East African States for the purpose of the East African States. This grant is to be used for the purpose of the East African States. This grant is to be used for the purpose of the East African States.

**Obituary.**  
The late Mr. J. H. Wilson, Minister of the East African States, died on Saturday, December 1st, 1938. He was a member of the Order of St. Michael and St. George, and was a member of the Order of St. Michael and St. George.

**TANGANYIKA COTTON.**

Estimated increase. Rain.

The Director of Agriculture Tanganyika has issued a statement of the cotton crop during the season just past, based on the condition of the crop at the end of October as compared with that of a similar crop last year. His conclusions are tabulated as follows:—  
1,861,000  
5,399,000  
7,260,000  
Total for 1938: 7,517,364  
Estimated increase in 1938 10 per cent.  
The Director of Agriculture has issued a statement of the cotton crop during the season just past, based on the condition of the crop at the end of October as compared with that of a similar crop last year. His conclusions are tabulated as follows:—

**DISTRICT NOTES.**

One Ova Over (Continued).

I have now one overmaster, I returned to Africa, Nov. 28. The first overmaster was the late Mr. J. H. Wilson, Minister of the East African States, who died on Saturday, December 1st, 1938. He was a member of the Order of St. Michael and St. George, and was a member of the Order of St. Michael and St. George.

**THE RAINS.**  
The rains in the district during the season just past have been very good, and have been very good. The rains in the district during the season just past have been very good, and have been very good.

**PLANTING PROJECT.**  
The Government has decided to grant a grant of £100,000 to the East African States for the purpose of the East African States. This grant is to be used for the purpose of the East African States. This grant is to be used for the purpose of the East African States.

**THE RAINS.**

**NEW BUILDING**

I notice on the top road that two new houses for sale are now on the market. They are very good, and are very good. They are very good, and are very good.

**Andrews**  
**LIVER SALT**  
The wise man seeks to maintain health in every changing circumstance. The foolish man procrastinates until he has lost health, perhaps, for ever. The wise man avoids this by the occasional dose of Andrew's Liver Salt, the remedy that stood on the family shelf when he was a child—well known to him as Andrew's, it is valued more than ever today because of its cleaning, purifying, blood-purifying properties. Andrew's Liver Salt is particularly acceptable in this climate, being a cooling, refreshing Saline.

**NOTICE**  
We beg to announce the installation of an up-to-date Foundry and are prepared to under take casting of all descriptions.

### THE COST OF LIVING. The work of the Food Council in England. "MEASUREMENT AND PUBLICITY."

In the following article which appeared in the "New Statesman" on October 27 under the title "The Cost of Living," the general question of the cost of living in this country is discussed. The problem is touched upon in a way different, but whatever those differences may be, it is a work of the Food Council in England.

It is the purpose of this article to show that the Food Council in England is not only a body which has been established to deal with the problem of the cost of living, but also a body which has been established to deal with the problem of the cost of living in a way which is different from that of the Food Council in England. The Food Council in England is not only a body which has been established to deal with the problem of the cost of living, but also a body which has been established to deal with the problem of the cost of living in a way which is different from that of the Food Council in England.

The Economic problems may also be conveniently defined as those which are not only a work of the Food Council in England, but also a body which has been established to deal with the problem of the cost of living in a way which is different from that of the Food Council in England.

The Conservative Government may also be conveniently defined as those which are not only a work of the Food Council in England, but also a body which has been established to deal with the problem of the cost of living in a way which is different from that of the Food Council in England.

WEDNESDAY'S CAMERON'S LEGISLATION. The position of the Government in the House of Commons on November 27 was that the Government had a majority of 100 votes.

# CALEDONIAN DINNER

## SPEECHES AT THE ANNUAL SCOTTISH GATHERING.

### Hon. Mr. A. Holm's Review.

### THE PROGRESS OF KENYA REVEALED IN STATISTICS.

The annual St. Andrew's Dinner was held at the Caledonian Hotel on the 22nd inst. The gathering was presided over by the Hon. Mr. A. Holm, M.P., who in his address to the guests pointed out the progress that had been made in Kenya since the formation of the Government of Kenya in 1920. He stated that the progress had been most remarkable, and that the Government was determined to continue to improve the country.

### From Caledonians

During the evening, the President read the following interesting letter from the Hon. Mr. A. Holm, M.P., to the Hon. Mr. J. G. Macdonald, M.P., Minister of the Colonies, regarding the progress of Kenya. The letter was read by the Hon. Mr. J. G. Macdonald, M.P., and was highly appreciated by the guests.

The Hon. Mr. A. Holm, M.P., in his address to the guests, pointed out the progress that had been made in Kenya since the formation of the Government of Kenya in 1920. He stated that the progress had been most remarkable, and that the Government was determined to continue to improve the country.

CAR CAUSERIE.

Driving hints for beginners.

When the beginning of the New Year, there are many people who will be passing the ranks of the motorists and who will be purchasing their own cars with all the pride of ownership.

DRIVERS' RESPONSIBILITIES.

Whenever we can be written on the case of our cars and its operation, we can only make one point: we should not be doing so, but we should be doing so, but we should be doing so.

DRIVING HINTS FOR BEGINNERS.

When all is said and done, it is the car owner or driver that is master of his own fate and the manufacturer or agent. There are three things to be remembered: the manufacturer's instructions, the individual make of cars with the same object in view, but they do not take the place of the motorist's own common sense.

STARTING UP.

Firstly, you had to consider some general driving suggestions and then from there we will work along to individual items of operation and then starting in very low temperatures. When starting the engine, you should be aware of the position of the choke which is in a great help.

THE ENGINE IS TURNING.

To complete the operation of starting the engine, push the choke in, though not far enough to cause back fire or materially reduce the engine's action. Tapping the throttle will help, but the engine should not be pressed again whilst the engine is in motion.

USING THE CHOK.

Regarding the use of the choke, it must be remembered that a cold engine requires a rich mixture for starting while a hot engine requires a lean one. Moreover an engine warm up more rapidly when running on a rich mixture in some parts of this country, the carburettor to obtain economical running during the heat of the day, some engines are most difficult to start at higher altitudes after standing all night. This is where judicious use of the choke will assist. Moderately low temperatures require that the choke be closed only part way, whilst low temperatures of winter require that the choke be completely closed. In the latter position, however, must be particularly used, because the engine will be running on a rich mixture. The choke should be closed only part way, whilst low temperatures of winter require that the choke be completely closed.

Moreover an engine warm up more rapidly when running on a rich mixture in some parts of this country, the carburettor to obtain economical running during the heat of the day, some engines are most difficult to start at higher altitudes after standing all night. This is where judicious use of the choke will assist. Moderately low temperatures require that the choke be closed only part way, whilst low temperatures of winter require that the choke be completely closed.

You are safe in choosing an Albion

BRITISH-BUILT Albions are being used under the most arduous conditions and on the worst possible roads in all parts of the world. The stringent tests to which they have been put by fast transport users for more than 25 years have provided clear evidence of their outstanding reliability and economical economy.

If you want to be sure of getting the best service at lowest cost, you are safe in choosing an Albion.

Write for particulars of Albion models specially recommended for East Africa.

Lead Capacities: 25, 30, 40, 50, 60 and 80 cu.

LADY MOTORIST FINED.

A Street Accident.

Miss W. M. Brown was charged before Mr. G. H. Cramble on Thursday with driving a Ford motor car in the presence of a child under the age of ten on a public highway. The child, a young girl named Helen, had climbed with a motorist's bicycle.

and there was no other motorist present. The car was coming from the north. The car was coming from the north. The car was coming from the north.

Inspector Stewart presented the evidence against the defendant. Mr. Brown appeared for the defense.

Edward Hoggan, a partner in the Messers Thompson Co., said that on November 31, at 11.15 p.m., he was approaching his office in Government Road near the junction of the main road. He was driving in the motor cycle. He was driving in the motor cycle.

**CROSS EXAMINATION.** In cross examination by Mr. Brown, the witness said that he was looking at his own side of the road. The car was about ten feet in front of him and he was looking at his own side of the road.

The complainant the Crown case. **DEFENDENT'S STATEMENT.** Mr. Brown called Mr. Brown, who said he was having his shop closed on that night. He was driving in the motor cycle.

**DEFENDENT'S STATEMENT.** Mr. Brown called Mr. Brown, who said he was having his shop closed on that night. He was driving in the motor cycle.

Witness said that he saw Helen at the scene of the accident. He was driving in the motor cycle.

It was later found that the car was coming from the north. The car was coming from the north.

# A Distance Equal to Once Round the World On the rough roads of Kenya

The actual experience of users show the Goodyear "Supertwist" to be a marvel of endurance. We record here one of the most convincing proofs.

IN October 1954 a new Buick Seven-passenger Touring Car fitted with 32 x 5.77 Goodyear Balloon Cord Tyres of the new "Supertwist" construction was put into service by Mr. J. H. Engelbrecht whose big fleet of cars forms one of the most important motor transportation units in the country.

The mileage records of these tyres are interesting for by the time they were discarded, two had run 18,000 miles, while the remaining two continued their arduous service until over 25,000 miles had been completed.

These tyres were used throughout the recent East African Parliamentary Commission tour where every type of road in Kenya and Tanganyika was encountered.

They were used on the same Buick throughout the Royal Safari of T.R.H. the Duke and Duchess of York. On this service the

Buick was often called upon to carry excessive loads over rocky, thorn bush country imposing the greatest strains on the tyres.

Back on the Nairobi, Nyeri, Nanyuki Service these tyres continued to withstand the buffeting of rough roads and heavily overloaded cars until finally two came to grief after running for 18,000 miles.

The remaining two went on with the daily grind day after day, month after month, until a few days ago when they were retired for good after completing slightly more than 25,000 miles — a distance equal to a circuit of the Globe.

Even to the last, though frayed, gashed and worn, these rugged, faithful tyres hung on with grim determination to the service to which they had been dedicated.

These wonderful Goodyear "Supertwist" Cord Tyres can be obtained in either Balloon or High Pressure Tyres from

WIRELESS IN KENYA.

A Broadcasting Station.

(By T.D.) Kenya has a wireless broadcasting station—some day that is inevitable, and it is not far from that within a very few years every place on land claiming to be civilized will be able to communicate with and receive communications from the other world by wireless. It is not too much to say that wireless is an essential progress in almost every branch of the sciences...

For its very business part of the world to be ignored. Farmers and other rural classes of Kenya are in a state of the market both here and abroad. A factor of the present condition which has not been taken into account by the wireless service is a very question of time...

For its very business part of the world to be ignored. Farmers and other rural classes of Kenya are in a state of the market both here and abroad. A factor of the present condition which has not been taken into account by the wireless service is a very question of time...

For its very business part of the world to be ignored. Farmers and other rural classes of Kenya are in a state of the market both here and abroad. A factor of the present condition which has not been taken into account by the wireless service is a very question of time...

the following in Kenya, and that in the space of three short years. It does not require much imagination to visualize the Kenya given an efficient broadcasting station. The greatest benefit would be the destruction of the wireless service in Kenya...

THE COST OF LIVING.

Fuel Prices Increased by Three Shillings.

The price of fuel was increased on the 1st of December by three shillings per ton from 12s. 10s. to 15s. 10s. This another factor has been added to the fuel cost which has increased and the cost of living naturally will show a further increase.

It is contended that even at the price of the fuel in Great Britain a profit owing to the increase in the cost of fuel is being made. The result was that the Government had to be requested to reduce the price of fuel. However, that as a result of the increase in price the Government is to replace the same amount to the railway.

SHORTAGE INEVITABLE. The month requires at least five years growth before it is ready to be used. The result is that the Government will not be able to supply the fuel until the next five years. In the meantime the price must be fixed. There is an alternative fuel supply now being put on the market, but the cost of transport is added to the price, and if the supply were used the price would advance further to the consumer. The importation of using Indian transport has been tried and it has not been a complete success owing to the unavailability of transport. The cost of raising fuel from the sea is also another factor on the cost of fuel. The figure is given as 10s. per ton, and even at that figure the railway, loaded by the Government, will not be able to produce and heavy imports, and not being so loading fuel at Nairobi.

GOVERNMENT WHEAT? The opinion is expressed that the Government is likely to be able to supply the wheat for the Government. No steps have been taken by the Forestry Department to market and plant Green Jacks in the country, and even at that time the Government is not likely to be able to supply the wheat for the Government. The Government is not likely to be able to supply the wheat for the Government.

THE LAMBU SUPPLY. The principal source of the fuel supply for Nairobi is the Lambo, where water has been planned for many years. Within the next three years a water system is to be installed in the Lambo, and this will not affect the fuel position. It is also the fact that the Lambo is a long way from Nairobi, and it is not likely to be able to supply the fuel for the Government.

It is suggested that the Ministry of the Blue Gum, particularly for railway and industrial purposes, and he stressed the need for special fuel plantations in proximity to the railway line. He recommended that the Forest Department should be run on a commercial basis, and that it should receive full payment for the fuel supplied to the Government, through the Forestry Department. The result is that the Government is not likely to be able to supply the fuel for the Government.
