

HEAVY DUTY

Who Buys Goodyear Tyres

IT is difficult, of course, to assign Goodyear sales precisely to any one great class of motor car users.

Yet this impressive fact is true; Goodyear popularity attains its peak intensity in those localities where road conditions are most severe.

The reason would seem to be that under these sterner service conditions the relative weakness or strength of various tyres is quickly and unmistakably revealed.

Goodyear's conspicuous predominance in those sections of Kenya and Uganda where roads impose heaviest tyre hardship, has surely and steadily grown.

Clearly this tighter hold upon the confidence of an informed and critical public proceeds from some pronounced and private merit in to-day's Goodyear Tyres.

That exclusive merit is the now celebrated cord material "SUPERTWIST" developed and perfected by Goodyear to solve the low pressure tyre's special needs.

The basic advantage of "SUPERTWIST" is its greater elasticity; it far outstretches the breaking point of standard cord material.

When the Goodyear Tyre made of it strikes a stone, the springy "SUPERTWIST" cords s-t-r-e-t-c-h under the blow, yielding and recovering, like rubber bands.

It enables the Goodyear Tyre not alone to resist sudden impact, but to absorb it and thus to distribute it over a greater portion of the tyre.

Who buys Goodyear Tyres? is after all no great puzzle—those people buy them who most seriously want durability and comfort in an extreme money's worth.

If you want these things in true "SUPERTWIST" measure, your Garage can promptly supply them in Goodyear Tyres.

All Goodyear Cord Tyres and Goodyear Tyres only, are now made with "SUPERTWIST"—the latest good reason why "more people ride on Goodyear Tyres than on any other kind."

OUR WOMEN'S PAGE

A Letter from Paris

(From FANCY CORNELLER.)

woman, who is going to the beach and morning shopping though she has still to make the usual visits to the tailor and the milliner who make her wardrobe for the season. The weather is so hot that the women are wearing light-colored dresses and blouses. The hats are also light-colored and very simple in design. The shoes are also light-colored and very simple in design. The women are also wearing long gloves and long stockings. The men are wearing suits and ties. The women are also wearing long gloves and long stockings. The men are wearing suits and ties.

An Evening Frock Design

Here is a charming dress which is a simple evening frock. It consists of a bodice and a skirt. The bodice is made of a light-colored fabric and has a high collar and long sleeves. The skirt is made of a light-colored fabric and has a full, flowing design. The dress is very simple and elegant. It is perfect for a formal evening event.

The matter of hats is very important. The hats are made of a light-colored fabric and have a high crown and a wide brim. They are very simple and elegant. They are perfect for a formal evening event.

An attractive ruffled suit. It is a simple evening frock. It consists of a bodice and a skirt. The bodice is made of a light-colored fabric and has a high collar and long sleeves. The skirt is made of a light-colored fabric and has a full, flowing design. The dress is very simple and elegant. It is perfect for a formal evening event.

The Paris of the dressmaking world is still very busy. The women are wearing light-colored dresses and blouses. The hats are also light-colored and very simple in design. The shoes are also light-colored and very simple in design. The women are also wearing long gloves and long stockings. The men are wearing suits and ties.

One of the great dressmakers in Paris is still very busy. The women are wearing light-colored dresses and blouses. The hats are also light-colored and very simple in design. The shoes are also light-colored and very simple in design. The women are also wearing long gloves and long stockings. The men are wearing suits and ties.

High Crown for Spring?

Some hats will crown as high as a Gossamer's cap, though not so stiff, are making their appearance. Some of the popular shades for a spring hat are light-colored and very simple in design. The hats are made of a light-colored fabric and have a high crown and a wide brim. They are very simple and elegant. They are perfect for a formal evening event.

Singie Psychology

It is a curious to note how many of the women who are wearing high-crowned hats are also wearing long gloves and long stockings. This is a very simple and elegant look. It is perfect for a formal evening event.

A Revival of Singlets

There has been a revival of singlets. These are simple, light-colored blouses with a high collar and long sleeves. They are very simple and elegant. They are perfect for a formal evening event.

Simple Tailor-made

The Paris of the dressmaking world is still very busy. The women are wearing light-colored dresses and blouses. The hats are also light-colored and very simple in design. The shoes are also light-colored and very simple in design. The women are also wearing long gloves and long stockings. The men are wearing suits and ties.

This charming kimono depends largely upon the beauty of the material used in its manufacture.

The kimono is a simple, light-colored robe with a high collar and long sleeves. It is very simple and elegant. It is perfect for a formal evening event.

The shingle must "sit" perfectly

The shingle is a simple, light-colored hat with a high crown and a wide brim. It is very simple and elegant. It is perfect for a formal evening event.

White will not be worn so much as soft colors, beige, pastel tints, pale yellow and lavender, and the pale green and blue of the Riviera coast to pink, with a few of the popular shades for a spring hat.

South African Railways

South Africa Contains many Magnificent Winter and Summer Resorts

Special Terms for Tourists from Overseas

15,000 Miles of Railway—Specially Equipped Trains for Long-Distance Travel.

South Africa now takes rank commercially with the leading countries of the world. Its educational institutions compare favourably with those of the Northern Hemisphere.

The various pleasure resorts annually attract an increasing number of tourists from overseas. Seventy-one million passengers travelled on the South African Railways in 1922.

THE HANS ARE COOLING

But when they do what sort of motoring comfort are you going to enjoy?

Is your car one of the old fashioned type with side curtains which take half an hour to fix and then are not rain or wind proof? Do you have to disturb your passengers and then stand out in the rain while you wrestle with refractory press buttons and fasteners which never fit properly?

The Studebaker

DUPLIX BODY does away with all this. It is convertible into a closed rain proof car in 30 seconds without getting out or even moving from the driving seat. It takes an even shorter time to convert it into an open car again. This exclusive STUDEBAKER feature combined with sound chassis design and an engine with great power reserve makes the STUDEBAKER the best value for money on the market.

Without sacrificing the unobstructed speed and vision of the open car — without added weight or additional cost — the new Studebaker Duplex combines the advantages of an open car and an enclosed car.

Converted from one to the other in 30 seconds — the Duplex represents an outstanding development in motor car design. It is an exclusive feature of the New Studebaker cars. See it before you buy!

STUDEBAKER—Bentley Road, Ltd., G. & S. Ltd., 10, Abchurch Lane, London, E.C. 4.

Who Buys Goodyear Tyres

IT is difficult, of course, to assign Goodyear sales precisely to any one great class of motor car users.

Yet this impressive fact is true; Goodyear popularity attains its peak intensity in those localities where road conditions are most severe.

The reason would seem to be that under these sterner service conditions the relative weakness or strength of various tyres is quickly and unmistakably revealed.

Goodyear's conspicuous predominance in those sections of Kenya and Uganda where roads impose heaviest tyre hardship, has surely and steadily grown.

Clearly this tighter hold upon the confidence of an informed and critical public proceeds from some pronounced and private merit in to-day's Goodyear Tyres.

That exclusive merit is the now celebrated cord material "SUPERTWIST" developed and perfected by Goodyear to solve the low pressure tyre's special needs.

The basic advantage of "SUPERTWIST" is its greater elasticity; it far outstretches the breaking point of standard cord material.

When the Goodyear Tyre made of it strikes a stone, the springy "SUPERTWIST" cords s-t-r-e-t-c-h under the blow, yielding and recovering, like rubber bands.

It enables the Goodyear Tyre not alone to resist sudden impact, but to absorb it and thus to distribute it over a greater portion of the tyre.

Who buys Goodyear Tyres? is after all no great puzzle—those people buy them who most seriously want durability and comfort in an extreme money's worth.

If you want these things in true "SUPERTWIST" measure, your Garage can promptly supply them in Goodyear Tyres.

All Goodyear Cord Tyres and Goodyear Tyres only, are now made with "SUPERTWIST"—the latest good reason why "more people ride on Goodyear Tyres than on any other kind."

UNHAPPY IN IDLENESS.

Age Limits Cannot Bar the True Workers.

RETIRED POLICE OFFICER WHO BECAME A BARBER.

(By HERALD BARROW.)
Most men who have been active all their lives and have lived in certain positions choose never to retire from work. They may have no voluntary income and others may not have any, but they immediately find some other occupation.

Responsible officials who have had to submit to the test now and then of age limit have shown that they do not intend any period of idleness. They are "not Lord Daring from the judicial bench some time ago, but he said his friends that he was "too young to be doing nothing." The heavy pressure of legal business in the courts was providing an opportunity for his return, and he made good use of the opportunity by going again on the bench. But he plunged very actively into literary work.

BOOKSELLER TWICE RETIRED.

It was some time ago that the retirement was reported of Lord Waring from the great business which bears his name, which he founded. Yet there are few more active men to-day. He simply

would not keep out of business interests, and although he had retired from the bench he had things to do. He had a great number of his books which he carried off to his home, and he was busy with them. He was not only a writer, but a publisher, and he was doing a great deal of work for the Government.

He had a great number of his books which he carried off to his home, and he was busy with them. He was not only a writer, but a publisher, and he was doing a great deal of work for the Government.

He had a great number of his books which he carried off to his home, and he was busy with them. He was not only a writer, but a publisher, and he was doing a great deal of work for the Government.

THE RAINS ARE COMING

But when they do what sort of motoring comfort are you going to enjoy?

Is your car one of the old fashioned type with side curtains which take half an hour to fix and then are not rain or wind proof? Do you have to disturb your passengers and then stand out in the rain while you wrestle with refractory press buttons and fasteners which never fit properly?

The Studebaker DUPLIX BODY does away with all this. It is converted into a closed rain proof car in 30 seconds without getting out or even moving from the driving seat. It takes an even shorter time to convert it into an open car again. This exclusive **STUDEBAKER** feature combined with sound chassis design and an engine with power reserve make the **STUDEBAKER** the best value for money on the market.

1-2-3

and the Studebaker Duplex becomes a snug, dry enclosed car

WITHOUT sacrificing the un hindered speed and airiness of the open car—without added weight or additional cost—the new Studebaker Duplex combines the advantages of an open car and an enclosed car.

Converted from one to the other in 30 seconds—the Duplex represents an outstanding development in motor car design. It is an exclusive feature of the New Studebaker cars. See it before you buy!

POSSIBILITIES OF A NEW INDUSTRY IN KENYA

Machakos Graphite.
 RICH DEPOSITS OF A MINERAL IN WORLD-WIDE DEMAND.

Low Mining Costs.

The following article on the Graphite deposit is one of the many contributed to the "Standard" by its various branches in the U.K., a South African engineer who is investigating possibilities in East Africa. He has already reported on the Diamond discovery and the Bukoba Gold Fields.

(Special to the "E.A. Standard" by W.H. Jones)

Kenya has a highly mineralized area in its property domain. This area will depend on its mineral resources except in a very small degree. Compared with its mineral wealth it is one of the richest. The country has the world's largest deposits of graphite in its Machakos district while the late Mr. Thorneycroft, who has been active in mining fields, the former will make an agricultural and stock raising country.

If there are a number of mines that are not only profitable but also of considerable value, if property should be developed in the neighborhood of valuable minerals. This would be a major step towards the development of the country as a whole. It is a fact that the country has a rich mineral resource. It is a fact that the country has a rich mineral resource. It is a fact that the country has a rich mineral resource.

THE DEPOSIT
 The deposit here referred to is in the native reserves of the Kenya Government. It is a fact that the country has a rich mineral resource.

OCEAN FREIGHTS
 The supplies with sales more than a million tons which might be made on high seas to the East African coast. It is a fact that the country has a rich mineral resource.

THE WORLD'S LONGEST
 The world's longest railway line is being constructed in Kenya. It is a fact that the country has a rich mineral resource.

GOVERNMENT BUYS NAIROBI LAND.
 Sale Secret of the Swamp Road Plots.

THE PRICES

There was an interesting development in the land sale held at the Albert White Estate on Wednesday afternoon.

Mr. W. C. Mitchell, on behalf of the Government, had 12 plots for sale, lying generally by a block on the lower part of Swamp Road.

It is well known that the development of the highway will be of great benefit to the area, and the plots were bought for various reasons.

There was a big crowd of prospective buyers, and the plots were sold for various reasons.

MINING COSTS
 A big factor in the production of graphite is the cost of mining and the cost of the material.

It is a fact that the country has a rich mineral resource.

SWARAZITS WALK OUT OF ASSEMBLY.

After termination of the session of the Legislative Assembly, a group of Swarazi members walked out of the building.

Abrupt Termination of Session.

The session of the Legislative Assembly was abruptly terminated.

OCEAN FREIGHTS

Who Buys Goodyear Tyres?

IT is difficult, of course, to assign Goodyear sales precisely to any one great class of motor car users.

Yet this impressive fact is true: Goodyear popularity attains its peak intensity in those localities where road conditions are most severe.

The reason would seem to be that under these sterner service conditions the relative weakness or strength of various tyres is quickly and unmistakably revealed.

Goodyear's conspicuous predominance in those sections of Kenya and Uganda where roads impose heaviest tyre hardship, has surely and steadily grown.

Clearly this tighter hold upon the confidence of an informed and critical public proceeds from some pronounced and private merit in to-day's Goodyear Tyres.

That exclusive merit is the now celebrated cord material "SUPERTWIST" developed and perfected by Goodyear to solve the low pressure tyre's special needs.

The basic advantage of "SUPERTWIST" is its greater elasticity; it far outstretches the breaking point of standard cord material.

When the Goodyear Tyre made of it strikes a stone, the springy "SUPERTWIST" cords s-t-r-e-t-c-h under the blow, yielding and recovering, like rubber bands.

It enables the Goodyear Tyre not alone to resist sudden impact, but to absorb it and thus to distribute it over a greater portion of the tyre.

Who buys Goodyear Tyres? is after all no great puzzle—those people buy them who most seriously want durability and comfort in an extreme money's worth.

If you want these things in true "SUPERTWIST" measure, your Garage can promptly supply them in Goodyear Tyres.

All Goodyear Cord Tyres and Goodyear Tyres only, are now made with "SUPERTWIST"—the latest good reason why "more people ride on Goodyear Tyres than on any other kind."

SOLE AGENTS FOR NAIROBI KENYA COLONY

We are pleased to be the business of East Africa... We have prepared for sale a complete survey of the prospects for the probable investment of capital in Kenya Colony.

We are required for service... Very attractive house properties, comfortable, and in beautiful surroundings in and about Nairobi, and in other parts of the Colony.

Several Cattle Plantations in every stage of development, all of which show a handsome net return of the price asked. For the cultivation of these, we can offer a large developed property, on well-watered natural and better watered, and substantial returns. In addition, underdeveloped areas in those districts known for high crop returns.

We have several properties, fully laid out for the cultivation of fruit, and other sweet fruits, Wines and Dairying in a proved success. One property required must be sold quickly, and the investor taking advantage of the offer will secure a real bargain. The land is well developed for sale on either of the above terms and plantations. Large areas, and small, developed and underdeveloped. A number are offered in very suitable terms as to payment.

The further particulars apply to H. F. Ward & Co. NAIROBI HOUSE, NAIROBI.

THE EAST AFRICAN STANDARD Mombasa Times & Uganda Argus FRIDAY, MARCH 12, 1926.

SOMALIS IN LANIPIA.

For three years the settlers in Lanipia and Hamurra areas have been urging upon Government to restrict the Somali stock owners who have come down to the frontier district and 'settled' in the district. The subject is again of possible sample out to discovery, in the manner in which such small problems develop in the country and few instances of the farmers of Lanipia are allowed to pass without further reference to the question. At the end of three years, it is time that Government should discover whether or not there is any foundation for the allegation if there is no danger to stock from the presence of the few poor Somalis and that based on assumption which is not strengthened by the story of the recent Government of East Coast Forest—Government ought to be given an opportunity to a question in the House during the coming session of possible course of difficulty in the other hand the movement of uncontrolled Somali stock is a potential source of difficulty in the future which has sufficient time to show that to discover the best means of taking action to remove the danger. It is not improbable that the Government should desire to remove the Somalis and their stock will not be so easily carried out as it would have been had Government made up its mind in the first instance. In any event there is much to be gained to a frank statement of the actual view and we hope that an early opportunity will be taken to make the point clear to the public. It is apparent from the report of the latest meeting that a Committee has carried out an investigation and over-coming that a Committee, which was

prepared to explain the position. The settlers have taken what they refer to as the 'extreme' action of inviting His Excellency a personal audience to their Government. We are confident that the Governor will not allow their appeal to pass without some action. The problem is not a serious one and it does not appear, on the surface, to involve any vital principles restricting freedom of movement. It is primarily a question of adjusting the control of stock diseases and from that point of view it should be possible for the Veterinary Department to give a definite answer. At the moment, we understand that the Somalis are not yet settled on unoccupied Crown Land as some of the Government permits by private individuals to find settled on alienated farms since some British agents in the frontier district Capt Vaughan Kennedy called attention to the Somali problem in an unprinted letter which appeared in our columns. He anticipated some difficulty in removing the intruders and although his knowledge may encourage him to believe that his case is not groundless, we are inclined to the opinion that a definite policy on the part of Government related to the needs of the veterinary service, once he applied with full justice to the traders and stockowners who have been allowed to settle, will keep their stock in a European area. Every month allowed to pass must accentuate the difficulty.

Pinnet Photo. Consensus photo is stated to have been given the credit of a new photographic process invented by Pinnet. The photograph for which it is claimed that it is 75 per cent. cheaper, we have set out methods, entirely new, for the use of plates. The film, the photograph is taken by an ordinary camera, but the developing is done in a tank 8 in. wide and 6 in. deep, contains two electric bulbs.

BUICK'S impressive leadership

The large and growing number of Buick cars one sees on the roads of Kenya to-day indicate clearly the remarkable success of the cars themselves and the character and efficiency of the service behind them.  

BUICK meets the new demand for performance as no other car in the world has ever done.

Its speed and comfort are unsurpassed even on the roughest of roads.

Its power on hills is a revelation.

Its economy has established an entirely new conception of engine efficiency.

The gliding smoothness and ghostly quietness of the new Buicks are profoundly impressive. Vibration and engine noise are entirely absent.

This remarkable engine performance combined with a light acting and instantaneous car control prove a sheer delight to the driver.

To the superiority of its amazing performance results, the Buick enjoys an absolute freedom from mechanical worry.

An Air Cleaner keeps all dust and road dirt out of the engine.

The Oil Filter purifies the crankcase oil as the motor runs.

The Petrol Filter prevents any foreign substance or water from entering the carburettor.

Dipping Head Lights make night driving perfectly safe.

And these Buick cars are "serviced"

Serviced by highly paid, skilled men, whose loyalty to the organization and its ideals is firmly rooted.

Serviced by men working under ideal conditions in a building designed with special regard for the climate and the particular requirements of the business.

Serviced by alert obliging men who take a pride in their craftsmanship, and with whom you will find it a distinct pleasure to deal.

When better automobiles are built Buick will build them

MINING DEVELOPMENT ON THE ZAMBESI.

Rail Schemes for Tete Coalfields.

THE BRIDGE LINKS

Portuguese East African railways make excellent mines, being the Transvaal and Rhodesian mines. The Transvaal mines have placed orders for coal and iron from the Transvaal for the transport of coal and iron. The Rhodesian mines have placed orders for coal and iron from the Rhodesia for the transport of coal and iron. The Rhodesian mines have placed orders for coal and iron from the Rhodesia for the transport of coal and iron.

The Ordinance General Mining of Zambia Mining Development Limited, was held in London on February 8. Sir Alfred Slingsby, C.M.G., C.B. and with regard to the "Mines Act" of December 31, 1924, orders of sale had been paid except a comparatively small amount.

Establishing the industrial exchange, the holding of the company in the "Mines Act" of December 31, 1924, orders of sale had been paid except a comparatively small amount.

THE TETE COLLIERY

"Since our last meeting work at the Tete Colliery has been actively pursued in the early part of 1925. Mr. Raymond Anthony, the consulting engineer to the Mines Zambesi, visited the colliery and made a thorough inspection of the whole of the undertaking which he found at a highly satisfactory stage of efficiency. Development has been made to ensure an adequate supply of water for the mine and the organization of a supply of unskilled labour sufficient for the work of the colliery has been successfully carried out. As a well known in

THE ZAMBESI BRIDGE

"During the past year there has been most interesting attention on the subject of the Tete bridge, mainly as the result of the proposals laid by the Report of the East African Commission on the subject of the construction of a bridge over the Zambesi River, coming from a projected branch of the Nairobi-London railway which is required in many

places that which existed at the discovery of the large copper reserves in the Transvaal. The railway system did not exist. It was the discovery of the large copper reserves in the Transvaal. The railway system did not exist. It was the discovery of the large copper reserves in the Transvaal. The railway system did not exist.

THE PORT OF BRITIA

"This means the question of the improvement of the port of Britia. In this connection it is a matter of great satisfaction to me to be able to inform you that Mrs. W. E. Limited, the company formed to carry out the port improvement scheme, expects to be able actually to put in hand very shortly the first stage of the new works at Britia.

"The report and accounts were unanimously adopted, the retiring directors being Mr. A. C. M. D., C.B. and Mr. F. R. G. The accounts for the year ended 31st December, 1925, showed a profit of £10,000. The directors have recommended a dividend of 10% on the paid-up capital of £100,000, which will amount to £10,000. The directors have also recommended a reserve of £5,000 for contingencies.

PLATINUM POSSIBILITIES.

Your Board has been giving consideration to the question of platinum occurrences within the area of our concession. Belgian prospectors working in the territory and district of the Transvaal report the existence of a small quantity of platinum in the bed of a stream north of the Zambesi. Outcrops of basic rocks of the same type are widely distributed in the territory. At the time no special significance

was attached to the discovery of platinum, but in view of the extension of the Transvaal railway system from the Transvaal into Southern Rhodesia, it is now possible to transport the platinum to the Transvaal. The Transvaal mines have placed orders for coal and iron from the Transvaal for the transport of coal and iron. The Rhodesian mines have placed orders for coal and iron from the Rhodesia for the transport of coal and iron.

TRAINING FOR COAST GUARDS

Mr. J. H. B. Acting as the Executive Officer, has been appointed to the position of Executive Officer, in the House of Representatives. The House of Representatives has been appointed to the position of Executive Officer, in the House of Representatives. The House of Representatives has been appointed to the position of Executive Officer, in the House of Representatives.

CHESS PROBLEMS

PROBLEM No. 600
 By F. W. WALKER
 Black to move

White mates in two moves

PROBLEM No. 601
 By W. A. GERRARD
 Black to move

White to move in three moves.

and danger and ingenuity seem to be the chief characteristics of the chess problems. The chess problems in this issue are of a high standard, and will be found to be very interesting and instructive. The chess problems in this issue are of a high standard, and will be found to be very interesting and instructive.

afterwards when the solutions were sent contained for the respective columns.

J. W. BROWN, Toronto, writes: "I had the honor to receive the copy of the East African Standard of the 27th March. I saw the chess problem in the 'Chess' column, and I am pleased to say that it was a very good one. I have been thinking about it for some time, and I have been trying to solve it. I have not yet found a solution, but I am sure that you will find one. I am sure that you will find one."

Poetry Notes

LEUKOEMIA IN FOWLS

I have been asked by a poultry farmer to write an article on leukaemia in fowls. I have been asked by a poultry farmer to write an article on leukaemia in fowls. I have been asked by a poultry farmer to write an article on leukaemia in fowls.

South African Railways

South Africa Contains many Magnificent Winter and Summer Resorts

Special Terms for Tourists from Overseas

12,000 Miles of Railway—Specially Equipped Trains for Long-Distance Travel

South Africa now takes rank commercially with the leading countries of the world. Its educational institutions compare favourably with those of the Northern Hemisphere.

The various pleasure resorts annually attract an increasing number of tourists from overseas. Seventy-one million passengers travelled on the South African Railways in 1925.

Go South for a Recreative Holiday

For Particulars apply—Trade Commissioner for the Union of South Africa,

Memorial Hall, NAIROBI. Box 624

LEUKOEMIA IN FOWLS

I have been asked by a poultry farmer to write an article on leukaemia in fowls. I have been asked by a poultry farmer to write an article on leukaemia in fowls. I have been asked by a poultry farmer to write an article on leukaemia in fowls.

STITCHES OF LEUKOEMIA

The most common nature about the comb and wattle being enlarged and the skin and mucous membranes being inflamed as a result of infection.

SOLUTIONS

A black horse from F. J. Briggs received after last week's column was written, contained the answer to the puzzle. The puzzle was written, contained the answer to the puzzle. The puzzle was written, contained the answer to the puzzle.

POST MORTEM AFFAIR

On opening the abdomen the first thing which strikes the operator is the appearance of the liver and the size of the liver which will be found to be very large.

NOTICE

New boats of the most up-to-date type are arriving by fortnightly mail for Oshana's Club Boat House (Claremont, Weymouth, Government Road).

Is Your Car Reliable

In this country garages are few and far between and it is essential to have a car which you can absolutely depend upon.

The STUDEBAKER is designed to give long service under the most trying conditions. Remember that the STUDEBAKER is entirely built in one factory where every part is most carefully examined before assembly. This system as against that of buying the various parts from other factories makes a much more reliable car.

The Studebaker Duplex Meets All Weather Conditions

THE Studebaker Duplex-Passenger combines all the desirable features of an open car with the protection given by an enclosed car.

With the Duplex, you can enjoy the rush of fresh air if you wish, or be so comfortable in cover it is snug and comfortable as closed. Simply lower the roller enclosure—without stopping or getting on.

See the Duplex, and every one will understand why the Duplex is the most popular open-top car in the world.
