**WHITE LEAD** and **WHITE LEAD** are the best for the purpose.

**WHITE LEAD** and **WHITE LEAD** are the best for the purpose.

# LIGHT LOCOMOTIVES

## LANZ 12-15 B.H.P. CRUDE OIL LOCOMOTIVE.

The light weight in the forest, between the rows in sugar and sisal estates, etc., this locomotive is far cheaper than the use of oxen or boys. In a day's work it will haul only 2 to 5 gallons of crude oil. It will pull 30 to 45 tons on the rails, and will take 15 tons up a 2 per cent grade. Its net weight is 12 tons, which may be increased by 22 cwt. of water on the truck by a 2 per cent grade. In its use it is quiet, easily and quickly repaired on the track by a few boys. It is not constructed to a native with confidence. It draws up to 1500 lbs. of water, and is only 200 lbs. in height. A single order for all of these locomotives was recently received from India where they have given great satisfaction.

## SENTINEL PATENT LOCOMOTIVES.

80 to 400 H.P. 5; to 50 tons.

The heaviest such steam locomotives are unrivalled. The 50 H.P. model will pull a load of 145 tons at 5 miles per hour on the level, and a much greater.

In actual practice these locomotives have been proved to effect savings of 50% in fuel, 50% in repairs, 50% in time, and to haul 20% more load, weight for weight, than the conventional type of engine.

They are made for coal, wood or crude oil as fuel. With coal, which we import, the average Sentinel locomotive is in use in nearly 20 different countries. The Company in Egypt built with great satisfaction.

There is in this country an assured of efficient service and supplies of spare parts always at hand from the sole agents.

Rheumatic pains for both axle and all Lucas spares and fittings on application to Capital Garage

# CEMENT

Always contact may prove to be unavailing in us. A few shillings might be saved in this way, but you run the risk of ruining a job.

Usually you purchase port cement that a dealer who has a cheap foreign cement, is making a large profit—he is not concerned with your results.

Established dealers will offer you one of those unobtainable best cements—guaranteed by the Manufacturers. A lot continues to be supplied for EACH AFRICAN SETTLEMENT.

## BRITISH BRANDS

"MALTESE ORBS" "ANCHOR BELLBENT" "HAND" "NINE ELMS" "LIGHTHOUSE" "WHITES" "BIRNBOURN" "PETERS"

"SPHONTORE" is dearer but is vastly superior to ordinary cement.

Manufacturers Representatives: KETTLES-ROY, LTD., 10, Abchurch Lane, London, E.C. 4.

## LIFE POLICIES.

We can show you the most favourable and most popular policy offered in this country, very reasonable—unobtainable policy.

THE NATIONAL MUTUAL LIFE ASSOCIATION OF AFRICA, LTD., 10, Abchurch Lane, London, E.C. 4.

## TRADE PROPERTY IS AT HAND.

British Business With the Colonies.

It is a common and dangerous error to believe that a period of trade depression will set in and that this effect has been experienced by the British Colonies. The fact is that the demand for goods from the Colonies is not only steady but is increasing. This is due to the fact that the Colonies are becoming more and more self-sufficient and are producing more and more of their own requirements. This is a very good thing for the Colonies and for the British Empire as a whole.

General description of work in the Colonies. The work is of a very varied nature and includes the production of a wide range of goods. This work is done in a very efficient manner and the quality of the goods is of a high standard. The work is done in a very efficient manner and the quality of the goods is of a high standard.

Responsible offers are being made by leading exporters of special sections, which, for the first time, are being offered at 40 per cent of the retail price. This is a very good thing for the Colonies and for the British Empire as a whole.

Imperial Conference. The Imperial Conference is a very important body and is responsible for the welfare of the British Empire as a whole.

British Government's Statement. The British Government has made a statement regarding the welfare of the British Empire as a whole.

How ATMAN SHIP MISSED ELECTROCUATION. This is a very interesting story and is well worth reading.

At the Cape Colony. This is a very interesting story and is well worth reading.

A Uganda Preacher. This is a very interesting story and is well worth reading.

At the Cape Colony. This is a very interesting story and is well worth reading.

**A PETROL TRIAL**

**Chicago Trial**

**Recent Performance by Honorable Sir RANDY DURBAN**

The motorist who grumbles about the small mileage to the gallon is very ignorant to discuss the Honorable Sir Randy Durban. The fact has proved by the petrol test over from the Grand Canyon made by Sir R. J. Durban in the six-cylinder Plymouth motor.

On 12th of month of April Mr. Honorable Sir Randy Durban, of an average of over 40 miles to the gallon. It was an amazing performance, not only will come to the attention of a reasonable petrol consumer. It is the only time that the Honorable Sir Randy Durban has ever achieved such a record. It is the only time that the Honorable Sir Randy Durban has ever achieved such a record.

The record made by the Honorable Sir Randy Durban is very definitely that of the most successful petrol consumer on the part of Mr. Honorable Sir Randy Durban. It is the only time that the Honorable Sir Randy Durban has ever achieved such a record. It is the only time that the Honorable Sir Randy Durban has ever achieved such a record.

**WAS WEATHER?**  
Mr. Durban was perhaps unfortunate with regard to the weather conditions immediately preceding the commencement of the test. In the southern portion of the Grand Canyon it had snowed and rain had fallen. Indeed the Honorable Sir Randy Durban had to stop at several points along the route because of the weather. The roads were heavy, much water was being blown up and at intervals the Honorable Sir Randy Durban had to stop. The weather was very unfavorable to the test.

No one can say, therefore, that the conditions were favorable. In spite of this, however, Mr. Durban completed his action, and when he reached the Grand Canyon the automobile registered 407 1/2 miles, and this with three passengers. This is a remarkable achievement for a six-cylinder Plymouth motor.

**FIXED SEALS.**  
In connection with the automobile made by the T.A.C. with the 6-cylinder Plymouth motor, the Honorable Sir Randy Durban had to stop at several points along the route because of the weather. The roads were heavy, much water was being blown up and at intervals the Honorable Sir Randy Durban had to stop.

After lunch it was agreed to continue testing the car until the half-past twelve had been reached. With Mr. Durban on extra "trough," a hour of the longest part of Durban was made with a gradient of one in ten long slopes. But the car was not yet done.

Mr. Durban is to be stated, two conditions should be stated. One condition was that the car should be run on a road which was not too steep. The other condition was that the car should be run on a road which was not too steep. The Honorable Sir Randy Durban had to stop at several points along the route because of the weather. The roads were heavy, much water was being blown up and at intervals the Honorable Sir Randy Durban had to stop.

It was decided to continue the test until the half-past twelve had been reached. With Mr. Durban on extra "trough," a hour of the longest part of Durban was made with a gradient of one in ten long slopes. But the car was not yet done. The Honorable Sir Randy Durban had to stop at several points along the route because of the weather. The roads were heavy, much water was being blown up and at intervals the Honorable Sir Randy Durban had to stop.

**LOCAL FILM CHECKS PULL OUT**

One of the services undertaken by Messrs. Gillies & Co., Ltd., is to check up on the time of the last consumption of petrol. These tests are carried out on the following conditions: The petrol supply pipe from the petrol tank is disconnected from the engine. The vacuum tank is disconnected from the engine. All the petrol in the petrol tank is poured into the vacuum tank and leaving the vacuum tank connected the car is run on the road until it stops. The petrol tank is checked the distance traveled, but covered by the petrol. During the past week several cars were tested with the following results:

**LOCAL FILM CHECKS PULL OUT**

One of the services undertaken by Messrs. Gillies & Co., Ltd., is to check up on the time of the last consumption of petrol. These tests are carried out on the following conditions: The petrol supply pipe from the petrol tank is disconnected from the engine. The vacuum tank is disconnected from the engine. All the petrol in the petrol tank is poured into the vacuum tank and leaving the vacuum tank connected the car is run on the road until it stops. The petrol tank is checked the distance traveled, but covered by the petrol. During the past week several cars were tested with the following results:

## OUR PICTURE PAGE.

# McCormick-Deering

## Triple-Power TRACTORS

FOR more than seven months McCormick-Deering Tractors have been operating in various sections of the country under every possible condition of soil and weather. Operated by European and native drivers these Tractors these tractors have returned fuel and oil consumption figures to their owners that are amazingly low.

These tractors in the hands of owners (not in special demonstrations) have proved themselves so outstandingly efficient - so remarkably reliable - and with a reserve power so pronounced that everywhere farmers are turning to McCormick-Deering Tractors.

While it is not surprising, it is gratifying to us to know that the rapidly mounting sales denote a preference for McCormick-Deering Tractors that is based upon actual and practical everyday field work and not upon the results of special demonstrations or high-powered salesmanship.

South African Railways and Harbours

TROUT FISHING IN SOUTH AFRICA

In the past ten years Trout culture has made considerable headway in South Africa. Many mountain streams, ideally situated, offer sport of the highest class to followers of the "gentle art."

For particulars apply to: TRADE COMMISSIONER FOR THE UNION OF SOUTH AFRICA, MEMORIAL HALL, NAIROBI.

HITS FOR MOTORISTS IN NAIROBI

A Reforms of the Police Regulations.

A reference to our advertising notices today reminds motorists of a number of existing police regulations and gives a few new ones.

The Commissioner starts off with new rules. His motor regulations are not without respect to motorists in this respect, which are considered a regular nuisance to auto motorists.

These restrictions are to remain in force unless a complaint is made. A provision is made that when such a complaint is made it will be referred to the Commissioner.

The Government of Kenya is a public use, and the plaintiff was ordered to pay costs. The case was heard in the Masai Reservation, and the judgment was given in favor of the plaintiff.

## CORRESPONDENCE

**THE Editor.**—I am pleased to see that you have published the views of the Editor of the "East African Standard" regarding the proposed constitution for Kenya. It is a matter of great importance, and I believe that your publication has done much to bring the public into touch with the facts of the case.

**THE LABOR PROBLEM**  
**KENYA QUARTERS**

**The Editor.**—I am pleased to see that you have published the views of the Editor of the "East African Standard" regarding the proposed constitution for Kenya. It is a matter of great importance, and I believe that your publication has done much to bring the public into touch with the facts of the case.

We wish that letter after reading the letter written by Mr. Murray, he was a fool.

It is hard to suppose the Editor of the Standard is a man of the least of intelligence. The fact that he has written the letter, to add to all that has been said in the office in the ordinary manner, is a sign of a man of no intelligence.

It is a pity that the Editor of the Standard should be so stupid as to write the letter.

It is a pity that the Editor of the Standard should be so stupid as to write the letter.

**THE TRAGEDY OF THE TANGANYIKA BRIDE**

By Mrs. H. H. Mead

Her Death

Particulars of the death of Mrs. Hill, the young Tanganyika bride, who was killed in a motor accident, is given in the Standard of the 2nd inst. It appears that Mrs. Hill, who was a native of the United States, was killed in a motor accident while driving to her home in the city of London.

**Kenya Arts & Crafts Society**

## THE MIND OF THE NATIVE

### Scientific Study Recommended by a Psychologist.

Primitive Stagnation and the Control of the Human Appetites.

Dr. H. G. Gordon of Kern, in an exceedingly interesting lecture on "The Mind of the Native" delivered in Nairobi on Tuesday evening under the auspices of the Kenya and Uganda Literary Society, pointed a new arena of thought in African studies.

Dr. Gordon has a thorough investigation conducted by a group of scientists before Kern can be made aware of the value of a native policy can be related.

The native population there is a psychological point of view on the mind of the native, and the control of the human appetites.
