The situation in China is still explosive. By latest news the Southern in their hurry of victory are going tranquilly astray.

All indications point to a determination to draw the sword of Power against the Northerners. It has been found necessary to organize all foreign troops in the North.

Three thousand more American marines and five thousand more Japanese marines have been ordered to the front of South Manchuria. Britain, America, and Japan are considering a second round of negotiations for remission from the Chinese account of the atrocities in Shantung and Zhejiang.

[By Wireless.]

Highly March 31. It is thought that the demands for reparations to be presented to the Commission at Nanking are a result of the Nanking route being closed to Japanese troops. The Japanese are being considered by the Powers as being attacked by the Chinese.

What steps should be taken in the case of the demand for reparations? It will be necessary to consider the question of reparations. It will be necessary to consider the question of reparations. It will be necessary to consider the question of reparations.

[By Wireless.]

London, April 3. The Government has decided to reduce the Soudan defense force by a brigade of infantry and auxiliary corps. The infantry battalion selected are a 1st Battalion of the 1st Brigade Queen's Northampton Battalion and the 2nd Battalion of the 1st Brigade Queen's Northampton Battalion. The units will be brought up to strength and the 1st Battalion will be sent to the Sudan to take the place of the 1st Battalion of the 1st Brigade Queen's Northampton Battalion.

OLDSMOBILE

ANNOUNCES

FOUR-WHEEL BRAKES

A Product of
GENERAL MOTORS

AT NO PRICE INCREASE

AND LARGER, HEAVIER TYRES

CRANKCASE Ventilation, Oil Filter, Dual Air Cleaning, Two-way Cooling, Harmonic Balancer, Dipping Head Lamps, Adjustable Steering Column, Single Piece Windshield, Rigid Type Side Curtains (instantly detachable), Trunk Rack Larger Heavier (30 x 5.25) Tyres and FOUR-WHEEL BRAKES are some of the remarkable new features.

The great General Motors Corporation and Oldsmobile have determined that this Oldsmobile model shall completely and decisively

DE LUXE TOURING
£
298

outstrip any other make of car in its price class.

Thus Oldsmobile keeps faith with its policy pledged to progress.

See this new Oldsmobile yourself. Drive it on the road. Experience the delight of its easy control and responsiveness. Try it on the steepest hill you know. And then consider its astoundingly low price £298.

Only the stupendous facilities of world's greatest automotive organization would have made this possible.

25 MILES AND MORE TO THE GALLON

ROCKED CYLINDERS. The cylinders of the new Oldsmobile are finished by a hand plane rather than by a lathe. This allows the cylinder to expand in diameter to the correct size and prevents that is evident in the quality that exists in the smallest hollow part.

CRANKCASE VENTILATION. An exhaust is obtained by crankcase ventilation. One-third of the air that passes through the carburetor is drawn through the leather part in the side of the engine. It draws off with it water vapor, sulphur fumes that may have passed into the crankcase, and a small amount of oil vapor which causes in many instances lubrication of parts and the

DUAL AIR CLEANING. Dust and dirt from the road are removed from the air before it enters the carburetor.

OIL FILTER. All oil is filtered as the engine runs, ensuring freedom of oil being delivered to all wearing surfaces.

HARMONIC BALANCER. The Harmonic Balancer developed by General Motors Engineers eliminates all vibrations in the crankshaft. This ensures quiet, vibration-free performance at any speed.

FOUR WHEEL BRAKES. New Oldsmobile adds without increase in price—four wheel brakes. The

front wheel brakes are self-energizing, internal, lever-type, expanding type. The brakes are self-adjusting, wear dirt, self oil. The action is positive and delightfully light in operation.

BALLOON-GEARED STEERING. The new, rigid and self-steering mechanism is specially geared for ease and ease steering control. It permits finger-light easy steering even in congested traffic.

EASY SHIFT TRANSMISSION. Gears are practically impossible to operate, and give clear, well-defined without sound.

SPECIAL COMBUSTION CHAMBER. New type cylinder head gives greater compression, increased power, improved fuel economy and improved performance, and is a modern development of General Motors Research Laboratories.

HIGH VELOCITY MANIFOLD. A new type of manifold retains the high velocity drive incoming gases. This feature, in combination with a supercharger of new design, gives unusual peak economy—25.57 miles a gallon can now be obtained.

DOUBLE VALVE SPRINGS. The double valve springs, similar to those employed in aircraft and

tracing car engines, together with the "spring-curve" contour of cross-section is a remarkably positive and quiet valve action, entirely without noise.

DOUBLE-OFFSET LOW GRAVITY FRAME. The design provides perfect spacing of springs for greatest flexibility. There are four cross-members, for extra strength, the rear member being 14 inches wide. The frame is built-up over rear axle to provide low gravity easy riding, and unusual ability to hold the road.

DIPPING HEAD LIGHTS. Head lamps have double filament bulbs.

The lights are controlled by a mast lever on the steering wheel.

INSTRUMENTS INDICATELY ILLUMINATED. Each instrument shell illuminated without glare or reflection in driver's eye.

INSTRUMENT PANEL FUEL GAUGE. A reliable instrument of Oldsmobile design is installed on

THEIR PROOF CAR LOCK. A new Oldsmobile car lock is a feature, turning off ignition post- and will not allow integral in a vault the steel housing.

MOTERING TOPICS

STARTING UP. Facilitating a Cold Engine.

SPECIAL CAJGULETS.

Even in those days it is a common thing to find that people use a number of people have a car which is not started in the winter months. This trouble usually is due to a variety of reasons, and for the most part, they are preventable. The first thing to be done is to see that the engine is well oiled, and that the oil is of the proper viscosity for the temperature. It is also important to see that the battery is in good condition, and that the lights are working properly.

The particular investigation should be made as to whether there is any leakage between the pump and the cylinder, but if the engine is found to be in order then some other factors must be looked for. An engine may probably be a case in which it may be identified as an engine not started.

One of the chief causes of cold starting is the use of an unsuitable oil, which results in clogging up the piston and ring, and frequently it can be traced to the use of an engine oil of the wrong viscosity. It is of great importance to see that the oil is of the proper viscosity for the temperature, and that it is of the proper quality.

There is a very simple device which is now manufactured on a scale of thousands of cars by the K.L.D. This consists of a cold starting pump, which is mounted on the side of the engine, and which is operated by the driver. It has two pistons, one of which is connected to the pump, and the other is connected to the cylinder. This device is very simple and easy to use, and it is very effective in starting a cold engine.

Another simple device is the fitting of a device known as a cold starting pump. This device is mounted on the side of the engine, and it is operated by the driver. It has two pistons, one of which is connected to the pump, and the other is connected to the cylinder. This device is very simple and easy to use, and it is very effective in starting a cold engine.

It is also important to see that the battery is in good condition, and that the lights are working properly. It is also important to see that the engine is well oiled, and that the oil is of the proper viscosity for the temperature.

The particular investigation should be made as to whether there is any leakage between the pump and the cylinder, but if the engine is found to be in order then some other factors must be looked for. An engine may probably be a case in which it may be identified as an engine not started.

Progress and Approval

For Dodge Brothers, Inc. 1925 stands as a year of unprecedented progress and success.

In 1925 the sales of Dodge Brothers Motor Vehicles reached the total of 250,000. Yet in 1926, 300,000 were sold—an increase of 70,000 vehicles.

New engineering records have been established by a succession of major improvements extending back to the first of 1910.

Never has Dodge Brothers Motor Car ranked so high in public favor. Never before has it so richly deserved the world's good will.

PERQUET CAUSE OF TROUBLE.

A point also very often overlooked is that the carbon brush of the magnet is either not making proper contact owing to the spring in the holder having become compressed, or that the collector ring with which the brush makes contact is worn, either in the form of a groove or in the form of a hole. It is important to see that the brush is in good condition, and that the collector ring is in good condition.

An impressive endorsement of Chrysler Quality, value and leadership.

Out of the dust that enveloped automobile engineering and design in 1922, Chrysler flashed like a comet its brilliant light energized the whole automotive world and brought to life a new era of automotive advancement.

The fifty million dollar sales record of Chrysler's first year has grown into a staggering volume of \$249,194,940 paid for Chrysler products in the past twelve months.

Does Your Roof Leak?

Carbo-Lastic is a new liquid Asbestos Bonding which can be readily spread over roofs or other surfaces to any thickness desired forming a non-permeable but tenacious protective coating that absolutely eliminates all rust, rot or corrosion.

Carbo-Lastic is waterproof, acid and alkali proof, non-toxic, non-flammable, elastic, heat resistant, fire-retardant, non-contaminating, durable, shirk-proof.

Carbo-Lastic can be used for fresh water tanks, battery roofs of vessels, tramways, motor buses, motorbuses, Boatings, docks, barge, foundation dams, walls, pipes on wood, metal, cement, composition roofing, wiring, etc.
Carbo-Lastic is made in black, red, green, and grey colors.
Carbo-Lastic is marketed by J. G. Aronson, Ltd Nairobi, from whom particulars and prices can be obtained on application.

"STANDARD" FEATURE PAGE

London, March 3. It is a long time since so much comment has been caused by the result of a revolution as that which has followed upon the death of the Government of the House of Commons. The most significant and above have been their own interest in perhaps the most interesting of the effects that are resulting from a fairly important speaker to the effect that the recently appointed Government should arrange not to meet with the Liberal or any other party, but to meet with the Labour Party, and to discuss the Labour Party's programme.

This is not the first time a new Government has met with a surprise. It is not the first time that the Government has met with a surprise. It is not the first time that the Government has met with a surprise. It is not the first time that the Government has met with a surprise.

THE AIR FORCE VISIT.

Traffic Arrangements for Traffic Control on Wednesday.

SOCIAL PROGRAMME.

The police authorities have supplied for publication full details of the traffic arrangements which have been made for the members of the public attending the Air Force on Wednesday morning when the R.A.F. and S.A.F. are here.

It is further expected that the public will assist the use of the traffic.

It is suggested that Nairobi employers generally should be advised to close their offices at 12 noon on Wednesday of the air force visit.

The information of the Mayor on the programme of social activities is published. The two principal items are the dinner and by the Mayor the Mayor on Thursday and the Mayor on Friday.

Entertaining the Visitors.

FRIDAY, April 30th.—Arrival of the Royal Air Force and South African Air Force formations at the Aerodrome, Ngara, approximately at 9 a.m., where the Officers and Messes of the Royal Air Force and the South African Air Force will be received for representatives of Public and the Air Force and the South African Air Force.

At 10 a.m. a dance arranged by His Worship the Mayor at the New Stanley Hotel. For details see separate page 2.

POLICE ARRANGEMENTS.

A vehicle conveying persons from Nairobi will be taken to the arrival of the combined Air Force will proceed via the main station of Dagoretti Road to the Aerodrome, Ngara, where the combined Air Force will be met by the Mayor and the Mayor's party.

Persons visiting the arrival will be escorted to the Aerodrome, Ngara, where the combined Air Force will be met by the Mayor and the Mayor's party.

Persons visiting the arrival will be escorted to the Aerodrome, Ngara, where the combined Air Force will be met by the Mayor and the Mayor's party.

THE EAST AFRICAN

OLDSMOBILE

ANNOUNCES

FOUR-WHEEL BRAKES

A Product of
GENERAL MOTORS

**AT NO PRICE INCREASE
AND LARGER, HEAVIER TYRES**

CRANKCASE Ventilation, Oil Filter, Dual Air Cleaning, Two-way Cooling, Harmonic Balancer, Dipping Head Lamps, Adjustable Steering Column, Single Piece Windshield, Rigid Type Side Curtains (instantly detachable), Trunk Rack Larger Heavier (30 x 5.25) Tyres and **FOUR-WHEEL BRAKES** are some of the remarkable new features.

The great General Motors Corporation and Oldsmobile have determined that this Oldsmobile model shall completely and decisively

DE LUXE TOURING

**£
298**

outstrip any other make of car in its price class.

Thus Oldsmobile keeps faith with its policy pledged to progress.

See this new Oldsmobile yourself. Drive it on the road. Experience the delight of its easy control and responsiveness. Try it on the steepest hill you know. And then consider its astoundingly low price £298.

Only the stupendous facilities of world's greatest automotive organization would have made this possible.

25 MILES AND MORE TO THE GALLON

HONED CYLINDERS. The cylinders of the new Oldsmobile are finished to a hard, glass surface by honing with fine abrasive stones. The operation is indicative of the care and precision that is evident in the quality that extends to the smallest hidden part.

CRANKCASE VENTILATION. Oil dilution is eliminated by crank case ventilation. One third of the air that passes through the carburetor is drawn through a breather port in the left side of the engine. It draws off with it water vapor, unburned fuel that may have passed into the crankcase, and a small amount of oil vapor which causes its more efficient lubrication of piston and va-

DUAL AIR CLEANING. Dust and dirt from the road are removed from the air before it enters the carburetor.

OIL FILTER. All oil is filtered as the engine runs, ensuring critical parts are kept free from all wear- ing surfaces.

HARMONIC BALANCE. The Harmonic Balancer developed by General Motors Engineers eliminates any vibration in the crank shaft. The various quiet vibrations tend to cancel each other out.

FOUR WHEEL BRAKES. New Oldsmobile address wheel corners in four-wheel brakes. The

front wheel brakes are self-energizing, constant, absorption, expanding type. The brakes are entirely enclosed, as protection against water dirt, and oil. The action is positive, and completely light on operation.

BALLOON-GRADED STEERING. The worm, spiral and type steering mechanism is specially graded for soft and easy steering control. It permits finger-light easy steering even in congested traffic.

EASY SHIPT TRANSMISSION. Operate any practically in reverse of operation, and gear changing made effortless without shock.

SPECIAL COMBUSTION CHAMBERS. New type manifold leads give greater turbulence to incoming gases, producing smooth and speed performance, and in a special development of General Motors Research Laboratories.

HIGH VELOCITY MANIFOLD. A new type of manifold retains the high velocity green incoming gases. The intake, in combination with a combination of new design Green combustion port, economy 45.77 cubic a gallon can now be obtained.

DOUBLE VALVE SPRINGS. The double valve springs, which in those employed in aircraft and

rearing our engines, together with the "quitting-curve" contour of each valve in a remarkable position and quiet valve action entirely without noise.

DOUBLE-OFFSET LOW QUALITY FRAME. The design provides perfect mounting of springs for greatest stability. There are four cross-members, for extra strength, the rear member being 1/2 inch wide. The frame is "knock-up" over rear axle to provide low gravity, easy riding, and unusual ability to hold the road.

DIPPING HEAD LIGHTS. Head lamps have double filament bulbs.

The lights are controlled by a neat lever on the steering wheel.

INCLEMENTS INDICATED, ILLUMINATED. Soft indirect lighting, individually illuminated each instrument without glare or reflection in driver's eyes.

INSTRUMENT PANEL FUEL GAUGE. A reliable instrument panel fuel gauge is standard on all Oldsmobiles.

THEE-PROOF CAR LOCK. A new, kid-proof car lock is a feature. Turning of ignition probably locks the car. The switch and coil are built integral in a "wall" the steel housing.

Progress and Approval

For Dodge Brothers, Inc. 1926 stands as a year of unprecedented progress and success. In 1925 the sales of Dodge Brothers Motor Vehicles reached the total of 350,000. Yet in 1926, 330,000 were sold—an increase of 70,000 vehicles. New engineering records have been established by a succession of major improvements extending back to the first of 1925. Never has Dodge Brothers Motor Car ranked so high in public favor. Never before has it so richly deserved the world's good will.

MOTORIZING TOPICS

RUST AND CORROSION.

Motorist's Two Persistent Enemies.

HOW TO ORAL WITH THEM

Those readers whose motorcars have anything of the chemistry of the sea about them will recall that the process of rusting is even faster than that of oxidation, rust which is not a simple matter of iron, is usually made up of a mixture of oxides in various water molecules of hydrates. This necessary oxide film rusting is the protective film that forms on the surface of the metal in the manner in which rust on iron is formed. It is a natural process which rust has not been the spread of the rust.

Iron or steel that is mounted on a motor car, or subjected to ordinary rubbing and polishing and the throwing off of steps of metal is liable to rust. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

to respond from it when conditions are favorable, and to become atmospheric, especially condensing on the car body. Now when meeting a particle of water, or a drop of rain, or a drop of dew, or a drop of sweat, or a drop of oil, or a drop of grease, or a drop of dirt, or a drop of sand, or a drop of anything, the car body is liable to rust. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

CAR PROTECTION

Turning now to means of protection on the car itself, it is interesting to pursue ourselves with structural engineering. A structural builder on what he calls protection for protection against rust, but he will probably say "Paint." Asked what she has in mind, he will probably say "More paint." But paint is not the answer. It is a temporary measure, and it gives protection because it does not further act on its oxidation.

Recent theories on the rust protection value of a number of paints have shown that red points do, in fact, give remarkably good results, while those of other colors show considerable variations with quality. Chemical finishes properly applied have been found to give excellent protection.

For this reason, the steel parts of the body are sometimes, if not painted, are left in the open air. This is a mistake. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

spring leaves, graphite grease for the inside of wheel rims or linings on the brake-actuating mechanism, petroleum graphite made into a paste, or kerosene, or specially refined ordinary grease, or black made from graphite. It is not a matter of preference, but of necessity. The car body is liable to rust. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

the case of springs, spring steel which requires all weight and cleaning with a rag such as paraffin is as a rule sufficient. In the case of the car body, it is necessary to scour vigorously with fine emery paper, sandpaper, or steel wool. The removal of rust is the first step in the rusting process. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

 P.O. Box 414,
 NAIROBI.

SPECIAL FINISHES

Considerable developments have taken place in late in the production of anti-rust and anti-corrosive finishes for radiators, lamps and other bright parts of a motor car. These finishes are not only firm and durable, but they are also easy to apply. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

For the owner who does not wish to spend a large sum of money on a car, it is a good plan to have the car body painted with a cheap, but effective, anti-rust paint. This is a mistake. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

increasingly popular. Modern lamps are very different from those used by the Chinese, which are vegetable oils; the most desirable made up of cellulose solutions in vegetable oils, or kerosene, or specially refined ordinary grease, or black made from graphite. It is not a matter of preference, but of necessity. The car body is liable to rust. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air. The rusting process is not so rapid as it is in the case of the iron or steel that is left in the open air.

An impressive endorsement of Chrysler Quality, value and leadership.
Out of the dusk that enveloped automobile engineering and design in 1923, Chrysler dashed like a comet, his brilliant light energized the whole automobile world and brought to life a new era of automotive advancement.
The fifty million dollar sales record of Chrysler's first year has grown into a staggering volume of \$263,194,940 paid for Chrysler products in the past twelve months.

Monday Times a Uganda Argus
TUESDAY APRIL 19 1927

Leprosy.
Kenya has been favoured by a visit of the officer of an extended Uganda, who, from Mr. Frank the Republic Empire Leprosy Institute of which the British in H. R. H. the Prince of Wales. The Association has already prepared a great deal of work to be prepared, the spread of leprosy and the disposal of family and individual cases, and is in charge of the East Africa to receive attention to the case concerned for medical research and work in the East African policy, particularly in the African Leprosy Institute, was formerly established in Kenya which methods have been discovered during recent years. It is applied at a sufficiently early stage, once the disappearance of the disease, Mr. Olden has discovered, is not a certain cure, it is a matter of prevention. The disease, Mr. Olden's research has shown, is a number of officers in Kenya and others are scattered throughout the East African country. It is therefore not an epidemic disease, however, most members affected in the immediate neighbourhood of the Standard this week, Mr. Olden's research has shown that the spread of this country is not appreciable to the spread of leprosy in a separate disease, that it is to be found in the East African country, and the appearance of leprosy in the East African country has been the past century on the part of the entire person in the East African country.

Muzzling Freedom of the Press.

Tanganyika Criticism of New Law.

Newspaper Ordinance

The Tanganyika Press has considerable interest to offer on the Tanganyika Ordinance presented to the Legislative Council last week. The ordinance is an amendment by Government of the Ordinance of the Government of Tanganyika, and it is the only newspaper ordinance in the East African continent. It is a measure which will have the effect of muzzling the press in Tanganyika.

The ordinance is a measure which will have the effect of muzzling the press in Tanganyika. It is a measure which will have the effect of muzzling the press in Tanganyika. It is a measure which will have the effect of muzzling the press in Tanganyika.

Wholly Wrong

The bond issue is wholly wrong, and wholly unnecessary. It is a measure which will have the effect of muzzling the press in Tanganyika. It is a measure which will have the effect of muzzling the press in Tanganyika. It is a measure which will have the effect of muzzling the press in Tanganyika.

Not Paralleled

We are not surprised. We cannot imagine any legislation involving such a clause, although we are surprised that any Tanganyikan Government should be so stupid as to propose such a measure.

ARE TANGANYIKA SETTLERS 'AFRAPHIC'?

Tribute to Kenya Public Spirit.

'STANDARD' LETTERS.

The extensive work which is made of the correspondence of the 'Standard' is a tribute to the public spirit of the settlers in Kenya. It is a measure which will have the effect of muzzling the press in Tanganyika.

The bond issue is wholly wrong, and wholly unnecessary. It is a measure which will have the effect of muzzling the press in Tanganyika.

Wholly Wrong

THE SOUTH AFRICAN INDIAN AGREEMENT.

Satisfaction Expressed in Both Countries.

THE PRINCIPAL TERMS.

Recognition of the Western Standards an Essential.

EDUCATION AND EDUCATION PROVISIONS.

Terms of the agreement between the Governments of South Africa and India on the subject of the status of Indians in the Union have been laid in the form of a communiqué and announced simultaneously in both countries. They have received a very favourable reception of support and approval.

The Official Summary.

Following is the official summary of the agreement...

RESUME OF ASSISTED EMIGRATION.

- 1. Any Indian 16 years of age or over may avail himself of the scheme. In the case of a family the emigration must include the wife and not more than 10 children under 16 years of age...

FREE PASSAGES.

A free passage, including railway fares in the form of a ticket, will be granted to the emigrant in South Africa and India on the part of the Indian Government to the destination island, which will be provided for the emigrant.

Emigrants will be allowed to take with them their own baggage, including and including...

OLDSMOBILE

ANNOUNCES

FOUR-WHEEL BRAKES

A Product of
GENERAL MOTORS

AT NO PRICE INCREASE AND LARGER, HEAVIER TYRES

CRANKCASE Ventilation, Oil Filter, Dual Air Cleaning, Two-way Cooling, Harmonic Balancer, Dipping Head Lamps, Adjustable Steering Column, Single Piece Windshield, Rigid Type Side Curtains (instantly detachable), Trunk Rack Larger Heavier (30 x 5.25) Tyres and **FOUR-WHEEL BRAKES** are some of the remarkable new features.

The great General Motors Corporation and Oldsmobile have determined that this Oldsmobile model shall completely and decisively

DE LUXE TOURING

£

298

outrstrip any other make of car in its price class.

Thus Oldsmobile keeps faith with its policy pledged to progress.

See this new Oldsmobile yourself. Drive it on the road. Experience the delight of its easy control and responsiveness. Try it on the steepest hill you know. And then consider its astoundingly low price £298.

Only the stupendous facilities of world's greatest automotive organization would have made this possible.

25 MILES AND MORE TO THE GALLON

HONED CYLINDERS. The cylinders of the new Oldsmobile are honed to a keen glass surface by honing with fine abrasive discs. This operation is indicative of the care and precision that is evident in the quality that extends to the smallest hidden part.

CRANKCASE VENTILATION. Oil drainage is eliminated by crankcase ventilation. One-third of the air that passes through the crankcase is drawn through a breather port in the left side of the engine. It flows off with it water vapor, undrained fuel that may have passed into the crankcase, and a small amount of oil vapor which settles in more efficient lubrication of piston and val-

DUAL AIR-CLEANING. Fuel and dirt from the fuel are removed from the air before it enters the combustion chamber.

OIL FILTER. All oil is filtered as the engine runs, ensuring crystal clear oil being delivered to all working surfaces.

HARMONIC BALANCE. The Harmonic Balancer developed by General Motors Engineers eliminates any vibration in the crank shaft. This ensures quiet, vibration-free road performance at any speed.

FOUR-WHEEL BRAKES. New Oldsmobile adds-without increase in price-four wheel brakes. The

front wheel brakes are self-energizing, internal, drum-type, expand-the-type. The brakes are entirely self-cleaning, self-adjusting, and furnished with self-wiping action to free with only one drive to the fly wheel.

The following is this year's job date, the match between front and rear, but which will not affect the position.

	P. W. L. D. P. S.	T. R.
Legend	3 1 0 2 4	The Make

See	2 0 1 1 2	Station (M.A.)
	2 0 1 1 2	April 24 at 10

SPECIAL COMBUSTION CHAMBER. New type cylinder head gives greater turbulence to incoming gases, promoting complete and spirited performance and is a modern development of General Motors Research Laboratories.

HIGH VELOCITY MANIFOLD. A new type of manifold retains the high velocity gases incoming gases. This feature, in combination with a redesign of new design, gives maximum fuel economy, 25-37 miles a gallon can now be obtained.

DOUBLE VALVE SPRINGS. In double valve spring, neither valve employed in normal and

running on engine, together with the compression chamber of the valve, results in a noticeable, positive and quiet valve action, entirely without noise.

DOUBLE-OFFSET LOW GRAVITY FRAME. This design provides rigid support of springs for greatest reliability. There are four cross-members, for extra strength, the rear member being a hot-rolled steel. The frame is hot-rolled over rear axle to provide for gravity, easy riding, and unusual ability to hold the road.

DIPPING HEAD LIGHTS. Head lamps have 40-ohm filament bulbs.

The lights are controlled by a wheel lever on the steering wheel.

INSTRUMENTS INDICATELY ILLUMINATED. Both indirect lighting, individually illuminated, and instrument without glare or reflection in driver's eye.

INSTRUMENT PANEL PANEL GASKET. A reliable instrument board panel gasket is standard on all Oldsmobiles.

THEE-PROOF CAR LOCK. A new three-proof car lock is a feature. Change of system, properly built the car. The crank and coil are built integral in a track the steel housing.

MOTURING TOPICS

MECHANICAL NOISES.

How to Silence the Cycle Engine.

AND LOCATE THEM

The present campaign against the noisy exhaust of motor cycles without doubt offers an interest to the motorist. "Out of the exhaust of the engine," it is said, "there is noise, nothing more than the noise of the motor from the open exhaust." This is not true. The noise of the motor is not the only noise of the cycle. The noise of the motor is not the only noise of the cycle. The noise of the motor is not the only noise of the cycle.

ENGINE NOISES

In a motor of common type, where that as soon as the exhaust valve of a motor cycle is quieted, several irritating noises that are not even heard by the motorist.

In these noises, then, which have lately been mentioned, the driver's motor by the present quieting of the motor cycle and which must be eliminated to produce a more perfect motor cycle. They are conveniently divided into two classes: mechanical and gear box and transmission.

As to the engine and silence these are of two classes: those which occur in the engine and those which occur in the transmission. The engine noise is of two classes: the noise of the piston and the noise of the valve.

CLINDER "BOW"

The noise however, is still being generated, and adds its quality to the total noise. It is not a noise of the cylinder, but a noise of the piston.

The noise noise is of two classes: the noise of the piston and the noise of the valve. The noise of the piston is of two classes: the noise of the piston and the noise of the valve.

Reverting to the cylinder, it is a noise coming down to us as a noise of the cylinder. It is a noise of the cylinder. It is a noise of the cylinder.

The only cure for this noise, of course, is to keep the piston clear, as small as possible, while avoiding the possibility of scoring. It is a noise of the cylinder. It is a noise of the cylinder.

The noise of the cylinder is of two classes: the noise of the piston and the noise of the valve. The noise of the piston is of two classes: the noise of the piston and the noise of the valve.

The noise of the cylinder is of two classes: the noise of the piston and the noise of the valve. The noise of the piston is of two classes: the noise of the piston and the noise of the valve.

The noise of the cylinder is of two classes: the noise of the piston and the noise of the valve. The noise of the piston is of two classes: the noise of the piston and the noise of the valve.

OUR WOMEN'S PAGE

A Letter from Paris

(By DORA DAVIS)

will, or pleasure, at the will of the designer. The idea is to give a fresh appearance and show the lines of the figure to the more successful than ever this season, it should be the newest population for every month.

"Fashionable" and practical—these are the two adjectives which should be used to describe the new frock. Some of the newest frocks are made of materials which are not usually used in small party designs. The new frocks are made of materials which are not usually used in small party designs. The new frocks are made of materials which are not usually used in small party designs.

Materials, as in models seen at the show, are velvet, a silk marocain, satin, crepe de chine, and silk used here. The new frocks are made of materials which are not usually used in small party designs.

HERMULIN LINES. Almost without exception, the new frocks are made with irregular lines. All the new frocks are made with irregular lines. All the new frocks are made with irregular lines.

There is an admiration to make every fashion lover. There is an admiration to make every fashion lover. There is an admiration to make every fashion lover.

MAKING IT BY SAYING IT. (By Phyllis Monahan) Can't precisely find time. How often do you hear this stupid

There are so many things to do. There are so many things to do. There are so many things to do.

There are so many things to do. There are so many things to do. There are so many things to do.

There are so many things to do. There are so many things to do. There are so many things to do.

There are so many things to do. There are so many things to do. There are so many things to do.

There are so many things to do. There are so many things to do. There are so many things to do.

There are so many things to do. There are so many things to do. There are so many things to do.

There are so many things to do. There are so many things to do. There are so many things to do.

THE NEW BOHEMIAN DANCE BAND

PLAYING AT CLAIMOUR

SATURDAY, APRIL 16th & EASTER MONDAY, APRIL 18th, AT 9 P.M. TICKETS: 12/6 DOUBLE; 7/6 SINGLE. INCLUDING REFRESHMENTS.

A house-frock in cedar-brown silk nap cut with an almost normal waist, a slightly puffed bodice and a skirt which achieves the necessary fitness by means of groups of pleats set in each side below the hip line. A badge made belt, beige crepe collar and cuffs, and a cedar-brown satin in complete a very pretty outfit.

UNWITTEN RULES FOR DANCERS

There are several dancers, and there are happy dancers. There are several dancers, and there are happy dancers.

Do not forget the dressed-up of the powder puff, better than the powder puff, better than the powder puff.
