Description of Document THE EAST AFRICAN STANDARD (MOMBASA TIMES & UGANDA ARGUS)

(Daily Edition)

Covering Dates 1st to 24th September, 1927.

Reference No. From E.A.S. Library.

The following reproduction(s) of document(s), the property of THE KENYA GOVERNMENT have been made by the Photographic Service of the Kenya National Archives solely for the purposes of research, and must not be quoted or otherwise reproduced by any means, either in whole or in part, without the express permission of the Chief Archivist, Office of the Vice-President, P.O. Box 30520, Nairobi, Kenya, to whom all communications respecting this film should be addressed.

Date of Production 22<sup>nd</sup> February 1968

No. 859 SUBMITTED AT THE GENERAL POST OFFICE AS A NEWSPAPER.

**CONTROL AND MANAGEMENT OF KENYA AND UGANDA RAILWAY.**

**New Bill Passes Through Committee Stage in Kenya Legislature.**

**CRITICISMS AND SUGGESTIONS.**

**Long Discussion Results in Only Two Small Amendments to the Draft.**

Practically the only business before Legislative Council yesterday was concerned with the consideration in committee of the Kenya Uganda Railway Bill which in May last was referred to a Select Committee.

The Bill, in the main reproduces the East Africa Railways Ordinance. Certain alterations and modifications necessitated by the creation of the office of High Commissioner have been made.

The discussion in committee was at times of a humorous nature and all that emerged by way of amendments when the Bill was reported to the Council was a slight change in the punctuation of one clause and the alteration of one word in another. The Council was then adjourned until the next meeting will be at Mombasa in about a fortnight's time.

**PROPERTY OWNERS' RISKS.**

The Kenya and Uganda Railway Bill passed through the Committee stage in the Legislative Council yesterday.

Before the House with this consideration the Attorney General Honorable Members would understand that the Bill was introduced in May last. About the middle of an August 1922 was when the Uganda Legislative Council was first formed and was then referred to a Select Committee. It was then referred to the Kenya Legislative Council. It was then referred to the Kenya Legislative Council. It was then referred to the Kenya Legislative Council.

Mr. O'Brien (Tambora South) asked whether it was necessary to amend the Bill in order to give the power of the High Commissioner to make regulations which would apply to any body controlled by the Railways.

The Attorney General said that the Bill was introduced in May last. About the middle of an August 1922 was when the Uganda Legislative Council was first formed and was then referred to a Select Committee. It was then referred to the Kenya Legislative Council. It was then referred to the Kenya Legislative Council.

Mr. O'Brien (Tambora South) asked whether it was necessary to amend the Bill in order to give the power of the High Commissioner to make regulations which would apply to any body controlled by the Railways.

MOTOR TOPICS

PLUG TESTING.

Simple Ways of Detecting Faults.

VARIOUS METHODS.

When an engine makes it is always the plug which is assumed to be faulty, and in most cases this proves to be the case, although there are of course other possible reasons. The excellent quality of present-day plugs and their relative freedom from stalling means that in most cases plugs can be left in the cylinder unattended for from 2,000 to 4,000 miles.

The leading of plugs developed to something approaching an art in the earlier days of motoring. This consisted in short-circuiting a plug by means of a screwdriver, the blade of which was caused to touch the terminal and top of the cylinder simultaneously, and the procedure in the event of a cylinder admitting was to short-circuit each plug in turn and when a plug was detected that made no difference to the spark the inference was that it was the faulty plug.

This is still a test that can be conveniently employed, provided this can be taken not to sound the outside of the screwdriver when handling it, so as to avoid receiving a shock.

If a faulty plug is located by the short-circuiting test and taken out of the cylinder it is a simple matter to make a further test as to whether any sparks pass the points or not by leaving the plug on top of the cylinder, the cable being held disconnected.

If a plug is heavily carbonized in the cylinder the internal leakage of current can usually be observed.

This rather unscientific, although simple, means of testing a plug was superseded by a device known as the plug-wire, permanently fitted to the plug, which enabled each plug to be altered by grasping a knob, or plug could be altered three at a time so as to fire on a cylinder only.

The shorting test was followed by a more scientific test in the form of a special screwdriver with a coil of galvanized iron wire wound round it in the form of a plug.

The finished end of the wire, galvanized iron, was inserted into the plug hole and the coil was held in position by the application of a high voltage to the ends of the wire.

As the current that reaches the plug of the order of 6,000 volts, this is ample to cause a small spark to be given, and the intensity of the glow varies with the voltage, a small tube of this gas leads itself very efficiently to a plug test.

A Non-ohm device is generally employed in scientific comparisons (about the size of a fountain pen), which the plug is inserted into, which the plug is inserted into, which the plug is inserted into.

A distinct form of actual plug test, the "New Test" also about it certain defects exist in the high-tension coil of the apparatus, as for instance, leakage in the distributor.

A modern scientific method of plug-testing is one based on gases and involves the use of a plug which contains a small amount of a volatile gas, such as acetylene, which is ignited by the terminal and leads of the plug.

Today, various sparks will only appear at the plug if the plug is sparking properly. This is due to the fact that the discharge of the plug is "cellular" and appears as the condenser which on discharge causes a spark to charge the plug in action with the spark at the plug points.

If the voltage becomes reduced at the plug by short-circuiting or leakage the condenser will become charged and so work on as at the plug.

Generally, most plug-testing devices for the use of the operator are more convenient than can be carried in the vast pocket.

It is very unadvisable to use a substitute ball-bearing when you are in need of an addition and economy by using Royal Balling Powder. Royal Balling Powder is made of pure iron and is the best for filling up with "BP" and add a new nest to your motoring.

Up hill on top! Up hill on top on half throttle! The exhilaration of speed-burn, a sense of conquest, come from the feeling of infinite power at command with "BP" in the tank. Add extra power means extra economy—the best effort your engine with the least effort. Fill up with "BP" and add a new nest to your motoring.

## DEPENDABLE

AS A

## Trusted Friend

Dodge Brothers' Motor Cars are the dependable friend. They can be relied upon always.

This unfading service continues day in and day out until total mileage is often several times the average figure, while maintenance costs remain surprisingly low.

For 12 years the policy of constant improvement has been rigidly followed. The product has grown better and better—each year more beautiful, more comfortable, more quality in service. That dependability is always the first consideration. That explains why each year Dodge Brothers' Motor Cars have been rated as the best value in the world.

See high sales records until in 1926, 35,000 of these dependable vehicles passed into the hands of enthusiastic owners.

### VULCANITE ROOF!

No need for fear rain dripping through a roof covered with a material that will stand that storm! "Vulcanite Roofing" is absolutely water-tight and waterproof. It is Fire Resisting, too, when covered with sand and gravel or a inch of concrete. Low in first cost, its long life makes it not only the best, but the most economical roofing on the market. Roofs covered with "Vulcanite" are safe for years. This is why "Vulcanite" has been used during the past 20 years by Architects who want the best and who study their clients' expenditure as well as their own reputation.

### VULCANITE FLAT ROOFING

Complies with the London Building Act and Building By-Laws of all Borough and Urban District Councils requiring an acceptable exterior roof covering, and is accepted by all the leading Fire Insurance Companies as a full Tariff Roof.

SOLE AGENTS: DENOVAN & DIEBEL CITY ROVER, NAIROBI.

ROME ATHLETIC. International Meeting at Chelsea.

THE INTERNATIONAL MEETING AT CHESAIRE, ENGLAND, was held on Saturday, April 7, 1937, under the auspices of the I.A.A.F.

BRITISH DEPARTS FRANCE.

THE BRITISH DEPARTS FRANCE. The performance following on the Paris Club meet made by the 1,200 athletes world's record of 28 1/2 sec. made by Steve Lindquist, an Englishman, in 1922.

One of the best races of the afternoon was the 800 metres, which was won by D. O. A. Lora, after a thrilling finish.

His time at Manchester was 49 min. 49.25 sec. and he beat the second man, T. Haney (Southall Harrier), by nearly twelve minutes.

Another fine contest was seen when F. J. Gaby won the 110 metres hurdle for the 48th time, and defeated his great rival, Lord Burghley, by inches after a desperate struggle.

France Wellwood. France Wellwood, a seven time winner of the 100 metres, was in the final of the 100 metres, which was won by J. H. London.

The only racing event won by France was the 200 metres, won by Guy Butler, an Algerian, who is the French 200 metres champion.

Three of the five field events were won by the visiting team, the Hammer and Shot, the Discus, were both secured by M. C. 200 metres, which was won by five yards from the young British champion, B. C. V. Oiler.

Public Acceptance Proclaims It—Greatest A-Time ESSEX Achievement. Greater Power and Performance Longer, Roomier, More Luxurious Bodies. POPULAR enthusiasm has risen to new heights in proclaiming the surpassing brilliancy of this Greater Essex Super-Six. Spurred by knowledge that the most eagerly demanded Essex in history was retired to make way for it, public interest has crowded every show room in city and village, to inspect, ride, and place a prior order for this phenomenal car.

WE now offer you something new and better in the Light Truck field —the International "Special Delivery" a good-looking economy job.

MOTURING TOPICS

A NEW FIAT.

Latest Model Arrives in Kenya.

CAR DESCRIBED.

Ever since the three-wheeled motor car first was manufactured, the use of Fiat has been prominent among the leading automobile countries.

Cars of European construction have been rightly known for sound and logical workmanship and Fiat have done much to establish and maintain this reputation.

Hardly an exhibition held in any country in the world has seen the famous Italian firm have secured such proportion of the major honors.

In a series of able re-organized divisions in workmanship, it is interesting to note that the Fiat sign, have impressed a model of one of the finest cars on the market in 1926.

This car is a 5-7 water, the 3 occasional seats being through while the motor is mounted on the side.

The steering is such as to facilitate a remark which has been made by the driver.

The four doors are fitted with safety locks and the side curtains, three-quarters of the area of which are transparent, are controlled so as to open with the doors, which are all supplied with pockets.

A top rack carrier is part of the standard equipment, as also are the two spare wheels which are carried on the running board.

Mechanical Details.

Coming to the chassis and mechanical details, the point which strikes the observer is the remarkable absence of drag, all through-out, especially of the engine which, with the exception of the exhaust pipe, is free from external fittings.

The cylinder are cast in steel and the overhead valves are protected by an aluminium alloy cover, by means of two hinged caps. The valve mechanism is operated by chains driven from the rear of the engine.

A single distributor is used, the shaft of the distributor being arranged inside the cylinder casing.

The water-pump is mounted on the outside of the cylinder block and is fitted with a very efficient oil-cooler, which is operated by a lever on the steering column support.

Point in fact other persons from a test of the car in the last week of the month at Nairobi in a Fiat 5-7 water.

Present all lubrication is by the engine oil pump which is driven by a gear pump in the oil sump.

Magneto is used for lighting and the starter motor is fitted in a housing on the crankcase and is operated by means of a push-button fitted on the steering column support.

The electrical equipment includes a 12 volt battery, a dynamo with 20-amp and re-charge, electric horn and two side, tail and dash board lamps.

The instrument board is mounted on the dash board and includes lighting and electric clock, speedometer, oil pressure gauge, summer lighting switch, starting, etc. projector for headlights.

Other Specifications.

The cubic capacity of the engine is 4700 cc in the tank 4 1/4 ft. in the cylinder 11 ft. 9; overall length 15 ft. 3; 11 ft. 8; body over 6 ft. 1; the detachable auxiliary wheels are fitted with 2 1/2 straight side tires. Servo four wheel brakes operate from the foot brake which has an automatic compressor. Four forward and reverse speeds are fitted.

The car is delightfully easy and most comfortable to drive and is very capable for the serious motorist of operation of the driving controls.

A Model is an exhibit of the premises of Messrs. Matheson and Morrison Ltd., 400, Avenue, Nairobi, where all interested in motor cars can see the car on an open and free inspection.

The exterior fittings are cast in steel and the overhead valves are protected by an aluminium alloy cover, by means of two hinged caps. The valve mechanism is operated by chains driven from the rear of the engine.

A single distributor is used, the shaft of the distributor being arranged inside the cylinder casing.

The water-pump is mounted on the outside of the cylinder block and is fitted with a very efficient oil-cooler, which is operated by a lever on the steering column support.

Point in fact other persons from a test of the car in the last week of the month at Nairobi in a Fiat 5-7 water.

Present all lubrication is by the engine oil pump which is driven by a gear pump in the oil sump.

Magneto is used for lighting and the starter motor is fitted in a housing on the crankcase and is operated by means of a push-button fitted on the steering column support.

Dunlop Tyres.

PRESIDENT VISITS THE VAST FACTORY.

On a recent occasion, a party of many distinguished persons attending the International Press Conference held at London invited by the directors of the Dunlop Co. to visit the works of the concern at First Dunlop, Birmingham. The visit was taken by special train.

An interesting feature of the journey being completed in a dash of 11 minutes, the president of the Dunlop works set out to see how the works were organized to go round every department and really give the instructions of the president which the workers are engaged, but even a short visit sufficed to show the very great range which is taken to maintain a high standard in the products and scientifically to operate the machinery at every stage of manufacture.

One of the interesting processes examined by the visitors was the vulcanization of the rubber between rollers under very great pressure, the material in the form of tubes is extruded in special machines, which produce a tube in a straight form. It is then put on to mandrels and subjected to a heating to "cure" the rubber, the material being "cured" by means of some of the electricity commonly associated with it.

Other departments which are situated at 1/2 of a distance were visited, in which great balls and sections in raw rubber. A particularly interesting method is employed for the infusing of benzene balls, the inside sphere of carefully measured quantities which are placed in special machines which are used to vulcanize the spheres, a gas which includes the ball automatically to the correct pressure. The moment the spheres were examined with interest, the products are kept pending delivery.

Prolonged Test Yets.

In the testing department we see covers undergoing long runs

passed into contact with rollers turning at high speed; in many positions on their problems as a rule. Here there is also a number of constant-speed treadle measurement some 200, screws each of which contains a special of durable fibres by which the motor and carrying a wheel and roller. The tyre which is tested under the concrete track, being tested and mounted to match the same way as in the arrangements, can also be made to run when it is fitted on to the tyre itself to carry by the same conditions under which the tyre would operate.

Up hill on top!

Up hill on top on half throttle! The exhilaration of speed-burst, a sense of conquest, come from the feeling of infinite power at the command with "BP" in the command with "BP" in the command with "BP" means that extra power means your engine with the best effort. Fill up with "BP" and add a new zest to your motoring.

DEPENDABLE AS A Trusted Friend

Dodge Brothers' Motor Cars are like dependable friends. They can be relied upon always.

This unflinching service continues day in and day out until total mileage is often several times the average figure, while maintenance costs remain surprisingly low.

For 12 years the policy of constant improvement has been rigidly followed. The product has grown better and better—each year more beautiful, more comfortable, more gratifying in service. But dependability is always the first consideration. That explains why each year Dodge Brothers' Motor Cars have mounted to new high sales records until in 1926, 331,000 of these dependable vehicles passed into the hands of enthusiastic owners.

THE EAST AFRICAN STANDARD
Saturday, Sept 3, 1967

East Africa and the South.
It is clearly indicated that there has been established in the minds of those who are responsible for the direction of policy in Eastern Africa a very definite conception of certain aspects of the history of the great Dominion on the south coast which is intended should operate very deeply, although it should not do so too tardily, the future of the East African States.

TO LADIES
Ladies—why not own a Motor Cycle...

Information give to Tanzania Co. Ltd. Send open to letters. This virgin coffee area. Price 1/6 per Cup, 3/6 per sack.

### PEPPER OILS IN ZANZIBAR

But "Love Malabar" Depreciated.

#### WHERE TO IMPROVE.

Dealing with criticisms of the trade position of Zanzibar, the London Indian newspaper, the Zanzibar Times, refers to a recent private trade report for proof of its assertion that there is no room for alarm. The newspaper says:

We have before us to-day a copy of the annual report of imports and exports of coffee, three-stems and copra from 31st August, 1920, to 31st July, 1921, published by an experienced and old publisher, Indian Mr. Finlayson-Hughes.

Out of total production of coffee to be made by the balance of the previous year, 25,000 tons, we have exported as many as 192,368 tons leaving a balance of 22,968 tons which we feel sure would be exported before the new crop begins to arrive. It is to be noted that the bulk is not exported to the countries which are noted for difficulties above. It is taken by the ports such as Aden, Sokatra, Fremantle, Bombay, Leghorn, Baltimore, etc.

#### Synthetic Oil.

This proves that Zanzibar is now beginning to build her coffee trade directly with the ports which are close as open for business consumption and not for the purpose of extracting oil. Thus the cost of synthetic grease which when fully developed and successfully manufactured could only affect 25 per cent of our produce, we know 75 per cent to use for business consumption is not a grievance. What is there to be worried? We maintain the position of coffee production on a sound basis so that the cost of production of a barrel in order to enable us to place our goods on the world market at lower prices and so that the cost of oil is not only of coffee but of all other possible crops is placed on a sound basis.

#### Cops.

Again, the report states that the 1921 crop of copra was valued at 13,000 tons, were exported from Zanzibar. Nearly 90 per cent of this bulk is the product of those islands. Marasias and various other islands produce copra. We regret to see that Districts are less dependent on Zanzibar for their copra. However, since only 2,479 tons, while Malabar alone has had 122,000 tons, and Gwelo 18,222 tons, it is a matter for shame to see that we have declined consistently to collect this produce.

## Caley's Chocolates

Obtainable Everywhere  
Sole Agent and Distributor PERCY HIRST,  
City House, P. O. Box 688, NAIROBI

which is not a luxury but a necessity of life.  
C. W. Madras.

We have remained and do not intend to alter above and we pay the price for the same. We should Malabar and Malabar be able to place before the world the best copra and why should we be troubled with the dry, low quality stuff? Why should we be troubled with the dry, low quality stuff? Why should we be troubled with the dry, low quality stuff?

Then let us hope all those Malabar crops will be shipped. We shall be the Department of Agriculture, which has been planted during the last three years as a result of their report on the same, and that it will further show information with reference to the improvement and further scope of copra industry in the Island.

#### The Chepchai Case.

#### QUOTATION FROM DECISIONS OF ANIMALS ORIGIN.

In view of the interest which has been created by the Supreme Court decision in the Chepchai case involving one of the following extracts from the Decision of the Chief Justice in the case No. 21 reads:

"I. Whenever any person shall have been convicted of an offence against this Ordinance, the Court convicting such person may, in addition to or in lieu of imposing any other punishment authorized by law, order that the animal, or all or any of the animals in respect of which such offence is committed, shall be forfeited."

"2. Whenever any person shall be convicted of an offence in respect of which such animal has been seized and detained, the provisions of section twenty-four of this Ordinance shall apply to such animal as if it were a dog."

"3. A Magistrate, whenever he shall be satisfied that there is reason to believe that an offence has been committed in respect of any animal seized and detained, under the provisions of section twenty-four of this Ordinance, may order that the owner of such animal shall have had opportunity of appearing before the Magistrate, to show cause why such animal shall not be forfeited."

## Here is Your Tonic

**VULCANITE ROOF!**

No need for rain dripping through a roof covered with a material that will stand test strains! Vulcanite Roofing is absolutely waterproof and weatherproof. It is Fire Resisting, too, when covered with sand and gravel or a thick bed of gravel. Low in first cost, its long life makes it not only the best but the most economical roofing on the market.

Roofs covered with Vulcanite are safe for years. This is why Vulcanite has been used during the past 30 years by Architects who want the best and who study their clients' expenditure as well as their own reputation.

**VULCANITE FLAT ROOFING**

Complies with the London Building Act and Building Bye-Laws of all Boroughs and Urban District Councils requiring an incombustible exterior roof covering, and is accepted by all the leading Fire Insurance Companies as a full Trade Roof.
