MOTURING TOPICS

THE CAPE-RAND RUN.

Record Holders of the Past.

The pioneer effort to establish a record from Cape Town to Johannesburg was made some seven or eight years ago by J. Gallien, in 1910, in a Buick. He was followed by Mr. T. Smith, Motor Editor of the Cape Times. The first was encountered en route, but the time set up stood as a record through in 42 hours. There were two drivers on this occasion, Mr. Dave Orens, Mr. Harry Bonthuis and Mr. Peter Hunt.

The next attempt on the second day, after being in way on the Rand, was carried out by Prof. J. S. van der Merwe, in a Buick. This was set up in one driver record. Then came H. P. Row's record in 1924, in a Buick. It was made in 24 hours, 20 minutes, setting up a time record of 28 hours on similar cars.

Then in November, 1924, the Standard made a successful attempt on the record set up by H. P. Row, and dashed through from Cape Town to Johannesburg, in half weather, in 28 hours 25 minutes, beating H. P. Row's record of 2 hours 42 minutes 47 seconds. On this occasion the record-holder, Steve E. van Rooyen and L. Fick, took turns at the wheel, and H. P. Row's one driver record still stands.

There were many subsequent attempts on the record, but all of these were abandoned. The first in 1924 H. P. Row's was "a hot shot" at the record but was off the attempt 25 miles from Johannesburg, after driving for one hour with a hot axle.

It was some time before an English car when Captain J. F. F. van der Merwe, who piloted a Buick. The car was off the attempt 25 miles from Johannesburg, after driving for one hour with a hot axle.

Easy Starting.

A FEATURE OF TRIUMPH MOTORS.

It is the opinion of many motorists that the fitting of a decompressor is a small, lightweight engine, and few therefore, fit one. First the Triumph Company hold various, and the engine is not starting at all, and the valve on the compression stroke. The kind one is returned in the box when the engine has started.

The Triumph starts in a better spirit, has excellent idling, and the valve on the compression stroke is a feature of the machine of the engine.

It is 27 1/2 in. W. De Luxe through 24 in. The new decompressor takes the form of a block projecting just above the timing gear case on the left-hand side of the engine crankcase.

The kind one is returned in the box when the engine has started. The kind one is returned in the box when the engine has started. The kind one is returned in the box when the engine has started.

decompressor can ease the compression, and leave the cylinder sealed on the explosion stroke, and the engine starts easily without all the bother of holding the valve open.

It is the opinion of many motorists that the fitting of a decompressor is a small, lightweight engine, and few therefore, fit one. First the Triumph Company hold various, and the engine is not starting at all, and the valve on the compression stroke. The kind one is returned in the box when the engine has started.

Cycle Skidding.

MADE TOO MUCH OF BOBBY BY RIDERS.

Nothing in the world real terror in motor-cycling is a solo machine. In the old days the single-tracker motor-cyclists were used to ride on a grassy road but this is no longer the case, and the motor-cyclists are now riding on a road surface.

It is the opinion of many motorists that the fitting of a decompressor is a small, lightweight engine, and few therefore, fit one. First the Triumph Company hold various, and the engine is not starting at all, and the valve on the compression stroke. The kind one is returned in the box when the engine has started.

It is the opinion of many motorists that the fitting of a decompressor is a small, lightweight engine, and few therefore, fit one. First the Triumph Company hold various, and the engine is not starting at all, and the valve on the compression stroke. The kind one is returned in the box when the engine has started.

but it was never so absolutely important from this we can get very near it.

It is the opinion of many motorists that the fitting of a decompressor is a small, lightweight engine, and few therefore, fit one. First the Triumph Company hold various, and the engine is not starting at all, and the valve on the compression stroke. The kind one is returned in the box when the engine has started.

An Irrefutable Fact.

A car or truck of sound design, built of the best material and by the best craftsmen is the cheapest, EVEN if the initial outlay is higher.

WHY?
Because that car keeps going without expensive maintenance.
In your OWN INTERESTS call and see the NEW, **MORRIS CARS & TRUCKS** AT **Mitchell Cotts & Co.** Theatre Royal Arcade, NAIROBI.

READ THESE!! THEY TALK!!

"Please find enclosed cheque for Shgs 218/7s, please acknowledge and oblige. This is my tenth payment, only two more and I am finished. My Car is as new as the day that I bought her and I am proud of her too."

"It may be of interest to you to know that, I have just returned from the run to Mombasa and back via Mushi and that my 'Chevy' Car still gives the utmost satisfaction. We travelled without any trouble whatsoever, the car taking all gradients and dougas with the utmost ease, our return 31 miles to the gallon, and on the outward 31 miles to the gallon. Everytime I recommend a 'Chevy'."

The above letters were both unaltered and are genuine.

Can you say the same!

Powerful—Smooth—Silent

The performance of Dodge Brothers New Motor will be a source of wonder to you. In smoothness, in quietness, in rapid acceleration, in fuel economy, you would naturally assume could be found only in cars of much higher price.

Power has been increased by 15%, the pickup is 15% faster and all these four results are secured at a 20% saving in fuel.

You will appreciate, too, the standard gear shift, the easier steering, the new transmission and more than a score of other new features.

The new motor, the improved chassis and the new and unique tires all make a new car. See it and drive it at your earliest opportunity.

Prices From £295.

COMMUNICATIONS AT THE COAST.

"Mombasa-Tanga Line" Not Justified.

COUNCIL STATEMENT.

The question of establishing direct telegraphic and telephonic communication between Mombasa and Tanga, which has been indicated strongly by the committee, was raised in the Legislative Council on Tuesday at Mombasa when the Hon. Col. Robertson, Minister of Posts and Telegraphs, asked the following questions—

(1) If the Government-General were prepared to accede to the request put forward by the Mombasa and Tanga Branch of the Coast Area to provide direct telegraphic and telephonic communication between Mombasa and Tanga.

(2) In a case where the cost of the proposed line to Tanga would not exceed £20,000.

(3) As what figure does the Government-General estimate the revenue from such a line.

(4) Is it correct that the charges for intercepting traffic for the purpose of such a line between Mombasa and Tanga would not exceed £1,000 per annum?

(5) If so, does not the Government-General think the expenditure would be justified by the benefit accruing to the community to be served?

The Hon. the Postmaster-General replied—

(1) I am not prepared to reply to the question of whether it is desirable that a direct telegraphic and telephonic line should be established between Mombasa and Tanga, but I am prepared to state that the estimated cost of such a line would not exceed £20,000.

(2) It is estimated that the revenue which would accrue to the Government from such a line would not exceed £1,000 per annum.

(3) The whole of the actual figure of costs of the proposed line are not yet known, but it is expected to be received shortly. It is, however, roughly estimated that the charges for intercepting traffic for the purpose of such a line would not exceed £1,000 per annum.

(4) The estimated cost of such a line would not exceed £20,000.

(5) Having regard to the circumstances generally, I am not satisfied that the expenditure would be justified.

THE EAST AFRICAN STANDARD
Nairobi Times and Uganda Argus
FRIDAY, SEPT 16, 1927

History Repeats itself.
That the problems of white settlement in the Eastern and Central African countries are very similar in character has long been recognized; indeed it is the increasing realization of this fact which has engendered serious consideration of the idea of closer cooperation between the territories concerned and which has led to the appointment of the Heron Young Commission whose task will be to bear views on the spot and later recommended as to the practicability or otherwise of the suggestion put forward. Not least important among the questions to come before the Commission will be that which has to do with unofficial representation in the various Legislative Councils. In this connection it is of interest to note the demand which has been made in the Legislative Council of Northern Rhodesia that the Government should appoint a representative to the Council to represent the interests of the European community in the territory.

and over again he has demonstrated that he has the best good of the country at his adoption of heart and he may be assured that representation on the part of the settler community will be followed with interest and goodwill by official British in other parts of Africa.

NEW MEDICAL INSTRUMENT. Wireless Invention.

Selection from a Vertical Red.
The latest word in surgical instruments comes from Russia and was demonstrated at the Music Exhibition at Frankfurt in Germany. It consists of a vertical rod over which there is slipped a handle attached to the instrument and communicating with a lead speaker.

The performer stands by the instrument and when the current is turned on moves his hand towards and away from the rod. The former's hand moves towards the rod the higher becomes the note and the farther the hand moves away from the rod the lower becomes the note. A Russian professor who invented the instrument played several pieces on a piece of music simply by moving his hand. The sound is similar to that which you and the audience say that the sound registers in the wireless waves, converted into audible music for a deplorable in local speaker while hand and body vibrate to the music.

Hurricane at Sea.

TERRIFYING TIME ON AN ATLANTIC LINER

There was no unusual crew and grateful passengers arrived in New York. The Atlantic liner, which was damaged by the hurricane and still gave her way at a velocity of 10 miles an hour, 20 ft. high, crashed into the decks of great ships, which for all it could do, capsized.

The British liner, *Martha Washington*, was a day late. As she had 400 passengers on board a great deal of misery was caused. She struck a submarine in Louisiana and in Washington the sailing became heavy. In her path, she saw the passengers that night in power and was seen to be damaged. All bodies were hurried down, and the survivors were rescued by floating that they required to be taken to the shore. It was found that the ship had struck the submarine and that the latter was the cause of the catastrophe.

SPEDING UP LAND TRANSACTIONS.

Explanation of Past Delays.

EFFECT OF NEW MEASURE.

"STANDARD" SPECIAL CORRESPONDENT.

Mombasa, Tuesday.
Several measures were advanced a step in the Legislative Council today when second readings were taken.
The Colonial Secretary moved the second reading of the Supplementary Appropriation Bill which has explained certain expenditures actually incurred in 1926, nearly all of which was covered by supplementary provision or supplemental small accounts.
The Treasurer seconded and the motion was adopted.

Crown Land Grants.

The Attorney-General moved the second reading of the Crown Grants Extension Bill. He explained that the present law required a lot of work on the part of the country in the signing of documents relating to grants, mortgages, leases and other instruments of this nature to lands reserved to the Crown. He said that the Bill was intended to simplify the law and to save the Government the expense of employing lawyers to draw up the documents which are now drawn up by the Government.

The Hon. C. C. Atkinson (Mombasa) seconded and the motion was adopted.
The Hon. C. C. Atkinson (Mombasa) seconded and the motion was adopted.
The Hon. C. C. Atkinson (Mombasa) seconded and the motion was adopted.

seriously thought some sort of explanation was due, either the suggestion of delay. He said that he would like to see that the Land Department and on his own behalf to see that the delay to which Hon. Members had very properly referred were not, by his knowledge, due to any lack of staff on the part either of the Department or of himself. He said, further, that he always signed those documents without delay although the task involved a great deal of time.

The delay was due to his opinion on the fact that the documents had to be sent to the Land Office and to the Secretary of the Department and on his own behalf to see that the delay to which Hon. Members had very properly referred were not, by his knowledge, due to any lack of staff on the part either of the Department or of himself. He said, further, that he always signed those documents without delay although the task involved a great deal of time.

Water Works.

The Attorney-General moved the second reading of the Water Works (Amendment) Bill, which is to enable the construction of works in navigable and tidal waters to be properly regulated. He said those works by common law a public right to navigation in tidal waters and that right could not be interfered with except on the authority of the Legislature. What was proposed by the Bill was that the Government should order on the Director in Council powers to regulate and control the construction of any such works. Amputation of the Bill would render it unnecessary to go to the Legislature for special legislation in such cases where the Government had no power to regulate the construction of any such works. He said that the Bill was intended to give the Government the power to regulate the construction of any such works without the necessity of going to the Legislature for special legislation in such cases where the Government had no power to regulate the construction of any such works.

The Hon. C. C. Atkinson (Mombasa) seconded and the motion was adopted.
The Hon. C. C. Atkinson (Mombasa) seconded and the motion was adopted.

THE RAILWAY BUDGET.
An Optimistic Review by the
General Manager.
FUTURE DEVELOPMENTS.
Proposed Loan to Link Up Kenya and
Tanganyika Lines.

Legislative Council passed several hours on Thursday afternoon the Railway Budget which was sponsored by Mr. King in his characteristic lucid and analytical style.

Contrary to expectation the General Manager read a much better financial position plan than was expected. He pointed out that although a deficit appeared on paper, actually at the end of the year there would be a surplus of £250,000 to carry forward to the credit of the Government Road Fund Account. This would meet the bill of heavy expenditure in expenditure.

ELECTED MEMBERS' CRITICISMS.
(STANDARD SPECIAL CORRESPONDENT)
Mombasa, Thursday.—The Legislature met this morning at 10.30 a.m. for the opening of the session. In the House of Representatives, the General Manager's Budget was discussed. The House was divided into two main sections, the first dealing with the Budget and the second with the proposed loan to link up Kenya and Tanganyika lines.

The General Manager's Budget was discussed by the House of Representatives. The House was divided into two main sections, the first dealing with the Budget and the second with the proposed loan to link up Kenya and Tanganyika lines.

DOCTOR GIVES HIS LIFE TO SCIENCE.
Fatal Experiment with Anaesthetic.

By WILKINS.
Rugby, September 14. How a doctor gave his life for science was told at the inquest which was held at Manchester-today in the death of Sidney Rayson Wilson, eminent anaesthetist.

Dr. Wilson was found dead by his wife. He had a mark round his mouth and it was evident that he had been experimenting with anaesthetics.

Witnesses deposed that he was accustomed to administer anaesthetics to himself alone in his study and to make notes as far as possible of his sensations. He kept the notes in a book which he carried with him and which he consulted before his experiments were principally directed to invent a mixture of oxygen and gas and oxygen which would support conscious persons but that persons might be compelled to everything they would do.

A verdict of accidental death was returned.

PRINCE'S BUSY TIME IN CANADA.
"A Wonderful and Eventful Trip."
THE HOME COOKING

By WILKINS.
Rugby, September 13. The Prince of Wales and Prince Philip were today back in England from their visit to Canada. Their arrival here at the Port of Southampton and at Waterloo Station was a grand occasion. London was deluged with rain, but the Prince and Princess were met by a large number of well-wishers. The Prince was met by the Mayor of London and the Princess by the Duchess of Devonshire. The Prince and Princess were met by a large number of well-wishers.

THE WHITE SLAVE TRAFFIC.
GENEVA DISCUSSION.
Plan for Suppression of Commercialised Vice.

The Relation Between Wage and Morality.

THROUGH BETTING AGENCY.
Geneva, September 15. A German act passed for an agreement between the League of Nations and the League of Nations was today discussed at the League of Nations. The League of Nations was today discussed at the League of Nations.

IRISH FREE STATE'S DAY OF DESTINY.
Polling for Momentous General Election.
RECORD VOTE?

THROUGH BETTING AGENCY.
Dublin, September 15. Although the polls in today's momentous general election for the Irish Free State opened slowly, there is every prospect that most people will vote for the Government. The Government is expected to win a record vote.

SATURDAY, SEP. 1, 1929

A Commercial Congress.

The eleventh Congress of
Chambers of Commerce of the British
Empire opens its third session
today at Cape Town. From among
all parts of the world delegates
are now on their way to attend
this business year's parliament
which meets every three years in
some fairly accessible part of the
Empire for the discussion of a
great variety of problems inter-
esting to commerce. The last year
was used in its most unpropitious
sense because as parliament in
official publications dealing
with the objects and activities of the
Federation, the delegates will
include some of the world's com-
mercial bankers, manufacturers,
industrialists and merchants to
gather with experts in shipping,
transport and Customs tariff ques-
tions.
To be more significant of the
all-embracing character of the
Congress it is only necessary to
think of the nature of the British
Empire and to recall that nearly
all the constituent countries are
represented. Thus Chambers of
Commerce, either as associations
or more frequently by individual
members, or as in the case of
East Africa by both Chamber of
Australia New Zealand Africa
Newfoundland, India, West
Indies, West Indian British
North Borneo, Federated Malay
States, Straits Settlements—these
are only a few names in a long
list of countries and places whose
commercial communities have been
drawn to participate in the work
of a Federation which
returns an average for a frank
exchange of views and which by
means of the mutual confidence
and the mutual confidence
of an opportunity to
mutual respect, and by
personal contact with representa-
tives from all parts of the Em-

pire. This year's Congress is
possible speaks volumes for the
vision of those people who con-
sidered the idea of a Federation on
this kind and for the energy and
enthusiasm displayed in the pre-
liminary work of the Federation
and the objects of the Congress will
be to provide an opportunity for
delegates from representative
discussions and decisions upon
many questions affecting their
commercial and industrial and
agencies when leading mem-
bers of British Chambers of Com-
merce, may come into personal
contact. Such a statement we
are inclined to think very on the
right of modernity for our part
clearly and necessarily the de-
tails will discuss commercial
and industrial conditions and
the value of impressions gained
from other parts of the world in
the various countries being visited
by the Congress committee and
of importance. The secretary
of the British Chamber of Com-
merce, who has been appointed
to be the secretary of the Con-
gress, will be present. It is
to be expected that the meeting
will be one of the most interest-
ing and successful in the history
of the Federation.

Under the Standard Clock.

A Rough Passage.
The Council held had a very
rough passage across the Lake this
morning.

Council Adjourned.
The Council adjourned for the
month in a session which was
held at Nairobi.

Coming to Kenya.
The Council of the East Africa
Society, which is expected to
visit the Standard in Nairobi this
month.

Chambers.
Another of the very popular
chambers of commerce will be held
at Nairobi in the month of
September. The Chamber of
Commerce will be represented
by the Chamber of Commerce and
Industry, Nairobi.

A Betrayal.
The Standard's London corre-
spondent writes that an engage-
ment has been broken by the
Standard's London correspondent
Miss H. H. Edwards, formerly
journalist.

An Evening Meeting.
The Standard's London corre-
spondent writes that an engage-
ment has been broken by the
Standard's London correspondent
Miss H. H. Edwards, formerly
journalist.

The Aero Club.
The Secretary of the Aero Club
of Kenya has received from
London a copy of the report of
the Royal Commission on the
Aero Club of Kenya. The report
is a very valuable contribution
to the history of aviation in
Kenya and is well worth a
study by all those interested
in the development of the
Aero Club of Kenya.

The Standard has received
from the British Consulate in
London a copy of the report of
the Royal Commission on the
Aero Club of Kenya. The report
is a very valuable contribution
to the history of aviation in
Kenya and is well worth a
study by all those interested
in the development of the
Aero Club of Kenya.

THE CHANNEL TUNNEL SCHEME

Works at French Terminus Disappear.

A BRITISH OBJECTION.

Paris, Aug. 25. No plan in France... has ever been so completely visited in the last few days than Cape Gris Nez. Not for its holiday attractions, but because it harbours the only, but because interesting, connection with an old scheme for building a channel tunnel are being swept away.

built up on the military advantage which the Channel Tunnel would give to France should there be war between the two nations.

Modern Buildings. One is rather surprised to find visitors to Paris this year leaving the ordinary conventional paths of sight-seeing and visiting and interests for themselves. The old landmarks here their admirers, naturally, but so many new "delights" and one of the most interesting—especially to American eyes—are the new examples of architecture which are gradually cropping in, especially on the outskirts of the city.

POULTRY NOTES.

Observations on a Year's Work.

I have just finished my first year of poultry farming in Nairobi and have been interesting myself on the work throughout the year.

Firstly, I have tried a good many systems of housing, but the more open a house is the better the results. As long as there is protection from heavy rain and vermin the birds require very little shelter. Of course, owing to a limited area I am obliged to house my birds, and I am convinced that the more freedom birds obtain the better it is to obtain good results. It is more especially true in the case of young chickens, I find five ranges practically as good as ten for those with no vermin. The older birds, provided they are given plenty of green food, will do well in semi-closed pens. This last year owing to lack of pens, I have been obliged to place young chickens (weaned) of different ages in one pen.

Even when feeding is done separately and all chicks given opportunity to obtain their fair share of food, this is a mistake. I have seen birds in different houses, aged over three days do not make the progress they should do. This course, next year I will have seen

and keep the chicks in three brooding pens, and one brooding pen I shall obtain quicker growth.

SIZE OF FLOORS.—Barns have proved that a small floor with one or two more satisfactory than a large floor with two or three small pens of chickens and Lagers have put up an amazing record, nearly 100 per cent of fertile egg. Larger floors will not make any sense as yet.

Feeding for fertility is of course an important matter, and the Brooding pens from the Lagers Poultry Farm has proved of value. My brooding pens are fed as follows:

Morning: Cooked ground food mixed with one part Bone, two parts Linnseed (or Mungo) and two parts Linnseed Meal (by measure); small quantity of Bone Meal or Green Bone. The feeding book is fed similarly, but the Brooding Meal is omitted.

Meal is added twice a week.

Evening: Six parts peas (crushed meal), four parts meal, one part bone, by measure. Chopped raw green food mid-day to all birds.

Young stock is fed in the morning on cooked ground food with meal, porridge and bread and milk, a little bone and bone meal, and dried fish with meal meal, or middling mixed meal, added twice a week. Chopped green food with the addition of meal at noon. The stock grain fed at night: Seven parts green food, all birds, once a week and occasionally boiled fish.

For quantities of food to supply 100 birds the system is followed as

as much soft food as they will clean up by 11 a.m., and one handful of grain for each adult bird in the morning.

I am going to try the individual pens and shall be sending back grain before the birds, all the time and shall be sending back the same idea this will prove very satisfactory to me.

EGG PRODUCTION. The very dry season has lowered egg production to an appreciable extent. February, March, and April, giving the best per cent of fertile eggs since June-September was the smallest output for the year. Fertility has been on the increase throughout the year. This is attributed to the great part of the ration, and careful attention to brooding.

HATCHINGS. Have naturally improved with improvement in fertility. Eggs from my own birds proving much more satisfactory than those obtained from outside sources.

Hatching was practically completed during June, owing partly to the excellent supply of young stock for available accommodation and partly to the desire to get clear of chick-pox.

REARING. This has been very difficult this year, owing to the prevalence of chick-pox. At about three weeks old the chickens appear very liable to contract the disease. It has been a very virulent form and has occasioned severe losses. Many birds which have recovered are stunted in growth. I am now making a practice of drawing the heads of all chicks under three months old, with vaccine and sulphur, once a week. This

has had decidedly good results and I have had no further outbreaks. I feel that if I can keep these outbreaks out, I shall be able to stand a good chance of getting rid of the infection altogether.

GENERAL REMARKS. Owing to the very dry weather the grass on the runs has dried up. I am gradually replacing with Karyga grass which withstands the drought very much better.

In the chicken-pen outbreaks last year, the best of the most, green-bone meal, and the Austrians have recently recovered. Eggs are decreasing in size, this is probably a result of the drought, as it is also the lack of food on the runs. Birds have been lacking in several pens, but I am endeavouring to overcome this by planting banana plants. These are to be protected by wire netting, otherwise the birds eat the stems and the plants fall down.

MOULTING. We have had moulting continuing practically throughout the year. Some of the best may be the worst moulted. I have never before experienced such heavy moult in this country. It was extremely difficult to get birds in sufficiently good plumage for the Nairobi Show.

This coming year I am going to try a new system and endeavour to confine the moult to certain months, partly of having birds dropping feathers all through the year. This practical moult has been especially evident with the Lagers. It has not interfered with egg production to any serious extent, but the appearance of old birds has suffered considerably.
