NEAR THE FACE OF BATHON.

Excellent view of the Many Small Lakes which are to be found on the Mountain.

The best way of seeing Mount Kenya by air and on Friday Mr. John Carberry and Sir Piers Mosonyi in the latter's light aeroplane explored the summit of the mountain.

The airman had a wonderful view of the vast bulk of Kenya and was able to observe the many small lakes which are to be found on the mountain.

One of the most interesting aerial journeys yet carried out on Kenya was undertaken on Friday by Mr. John Carberry and Sir Piers Mosonyi in the latter's light aeroplane.

REVISED TRAIN TIMES LEAD TO BANKRUPTCY.

Sharia told to be Official Receiver.

APPEAL TO TRIAL.
Judge Thomas Doherty should be Rich.

Alterations in the times of running passenger trains were said to have been the cause of the financial failure of an Indian who ran a tea serving business at Kilimanjaro in the East. Shortly after his failure, the public exhibition in bankruptcy was held at Nairobi. Shortly after the failure, the public exhibition in bankruptcy was held at Nairobi. Shortly after the failure, the public exhibition in bankruptcy was held at Nairobi.

Missed Opportunities.
One of the conditions in the case of an Indian bankrupt was said to be a failure to take advantage of a loan which was offered to him by the Official Receiver. The creditor, an Indian, was somewhat shabby dressed, and the Court interpreter explained to him the importance of the loan. He ignored it. "They give you very cheap money," said the creditor. "I have known him for twenty years!"

The creditor alleged that the bankrupt was a questionable man and he was advised to get the facts before the auctioneer. Later in the proceedings, he alleged that the debtor had Shs. 20,000, in cash, whereas the debtor had stated that his means were 4000. His liabilities were 21,000.

Young Flying Swarms.
Several swarms of locusts were reported from the west and south-west of the district. The locusts were reported from the west and south-west of the district. The locusts were reported from the west and south-west of the district.

North-West Province.
In the area reported in the direction of Mombasa, no locusts are now in evidence in any form. There is no news from further North. Heavy sprays of locusts and their eggs may be expected after that time.

North-East Province.
In the area reported in the direction of Mombasa, no locusts are now in evidence in any form. There is no news from further North. Heavy sprays of locusts and their eggs may be expected after that time.

South-East Province.

Agriculture.
Papain Extraction.
 A New Industry for Kenya?

Papain, which is extracted from the fruit of the paw-paw, is a drug little known in this country. The chief market for the substance is in the form of a powder, where, in its active proportion, it is used in the preparation of meat tenderizers. The fruit looks for unripe and ripened stages in the "Hotway Chloride".

Early last year the Rhodesian Department of Agriculture sent a trial sample of papain to England which was favourably reported on by experts. Little, however, seems to have been done in the matter since then. It would probably be advisable to send a small quantity to England in order to discover its value and quality.

The fruit contains a large amount of papain, and the fruit is in the market in the form of a powder. It is a very hot and spicy fruit, and is not eaten in its raw state. It is used in the form of a powder, and is a very valuable ingredient in the preparation of meat tenderizers.

Topics for the Motorist.

Continued Events of 1928. Resume of Principal Races.

The annual 200-mile race operated by the Junior Car Club resulted in a motoring victory for Captain Malcolm Campbell, driver of one of the victorious straight-flight Grand Prix Daimlers. The last of the motorists to start averaged 108.8 m.p.h. General James D. T. Foster, driver of a 70 m.p.h. Kays Road (Lauriston) was held of the first 70 m.p.h. Buick (Anderson) was driven along being 64.6 m.p.h. The 1,000 m.p.h. race was won by Campbell, the 1,100 m.p.h. by August Hill, and the 1,200 m.p.h. by H. C. Sporn, who averages 80 m.p.h. The winners included similar brands.

In the Motor Cars hill-climb contest (Alfa-Romeo) covered the 1.2 1/2 miles in an average speed of 29 m.p.h. The fastest performance was given by the 1928 Buick. The 1928 Buick Grand Prix only averaged nine cars, all of which were Buickets, and of which, it proved to be the fastest race ever run on the Lauriston Circuit. Victory went to Chalmers, the averaged number being 40 m.p.h. and made a record lap at 80 m.p.h. Lakoff third, m.p.h. and made a record lap at Lakoff.

Premier honors in the British 200-mile race were won by the 1928 Buick Grand Prix driven by H. C. Sporn with the fastest time of 1 hour 15 minutes and 30 seconds. The 1928 Buick Grand Prix driver was second.

The first hill climb victory in the 1928 Buick Grand Prix was won by the 1928 Buick Grand Prix driven by H. C. Sporn with the fastest time of 1 hour 15 minutes and 30 seconds. The 1928 Buick Grand Prix driver was second.

The Victory of the Decade

Dodge Brothers Victory Six is the only car of its kind in the world.

In Chalmers Drama is the full width of the body - For the first time in motor car history! And the body has only a major panel!

It is lighter yet stronger - softer yet stiffer - simpler yet better than any other - the most perfect engineering Victory has ever produced was 17,000, and it is still the best of its kind in the world.

WHY KENYA CANNOT HAVE RESPONSIBLE GOVERNMENT

How Government Control Has Been Undermined Already. No. 2: THE POLITICAL PROBLEM

How White Community in the Mandated Territory an Added Reason.

The Colonist (Kisumu) Commission Report contains in conclusion detail the reasons why Responsible Government cannot be considered a practical political system in Kenya.

Reasons are stated that the present system of Government in Kenya has been undermined by the influence which "White Members exert on the executive Committee as determined by the British Government."

Reasons also states that the present system of Government in Kenya has been undermined by the influence which "White Members exert on the executive Committee as determined by the British Government."

The Report points out that in Southern Rhodesia, the Government of Rhodesia in Kenya is only one-fifth that of the Government of Rhodesia which is generally accepted as a fair basis for comparison.

FAITH IN FITNESS OF THE INDIVIDUAL

It is the duty of the Government to ensure that the individual is given the opportunity to develop his own initiative and to take advantage of his own resources.

BROWN COLONY GOVERNMENT.

In the light of what has taken place in the past few years of the history of Kenya, it would be fair to expect that the present Government should have had a better knowledge of the needs of the people.

UNRIVALED for Heavy Duty Service

For rough and rugged service, the Goodyear Heavy Tyre combines traction and long wear.

Its live, resilient rubber, expertly compounded, affords far longer wear.

Its famous All-Weather Tread provides maximum driving power and safety.

Its tremendous capacity for long, slow, even wear, of both body and tread, is your final assurance of lowest cost per tyre mile.

Where heavy loads must be carried and where rough, rugged service is necessarily encountered, your car or lorry will do its best on Goodyear Heavy Duty Tyres.

Fit Goodyear Tyres.

OUR WOMEN'S PAGE

A Letter from Paris

(By Miss Dora)

The whole effect was one of smart simplicity.

A machine industry is explained one or two smart items given. Cut close to the back of the throat in front, the line widens slightly over the shoulders and develops a band of material that outlines the neck a short V as has been the vogue. In fact, it is loose how at the waist, the neck hangs to the vest.

The little cape is in great vogue. Sometimes it is cut in one with the yoke of a waistcoat; other times it floats on its own. Pretty little "capote-croquis" dresses "brocade"; they serve no purpose other than the pleasure of wearing them. They were worn there by getting in the way when we danced.

The Mafici collar has been revived by a thoughtful designer for the benefit of the middle-aged clients. Impressed in fine lines, embossed, or brocade double cloth, lightly wired it makes a cozy frame for neck and face.

The correct position for the evening gown is still used on day and evening occasions. They are very graceful, especially the wide ones, and I should not be surprised to find them with us three or four months hence. A fitted frock, therefore, may prove quite a good investment.

By the way, it is decreed that the smartest shoulder straps for a dress which evening gowns are called "petal" straps. And long, thin, shapely, reaching well above the chest, an inconspicuous complete thin chair Maggie theme.

Big gloves are again in vogue, so platinum, are worn with the fashionable short ones. "Huge" evening rings look fascinating with these gloves, but are entirely out of the date of the day, evening gown type.

Diaper jumpers are worn in vertical horizontal stripes of various

The simplest of these frocks may well be the most becoming as the dainty little model proves. It is executed in fine colored satin brocade, and the draperies are laid over the top by a semi-circular top edge.

Shirts, with lines of metal between the stripes. They are so attractive that many women wear them with short house frocks. Wood lace is another good thing in vogue lately.

A new hair-dressing vogue appeared at a recent dinner. The girl had even her hair, very high over her head from the right side to the left and arranged, if in a loose coil just behind the left ear. The girl with this growing hair into a coil in the shape of the neck, but this coiled idea was quite new to me.

HOME-MADE BOOKER

Each cup success at better taste a pound of butter into a spoonful of castor sugar and a teaspoonful of essence of vanilla. Into one gill of sour milk mix a teaspoonful of essence of vanilla, and add this to the flour stirring well to form a soft dough. Turn the mixture on to a floured board, shape into a round, and bake for fifteen minutes in a good oven. The pastry with which these scones are prepared, and topped with toward dropping them is effect very illustrated both in the story and in the arrangement of the scarf.

OMINOUS LOCUST POSITION IN TANGANYIKA.

Big Swarms Pass Over the Kenya Boundary.

NIA HILL FRUIT TREES DAMAGED. Further Infestation Near Fort Hall and in the Kapisa District.

Locusts are no respecters of boundaries and the latest official reports from Tanganyika state that the outlook there is ominous.

It is reported that the areas between the northern boundary of Tanganyika and the Central Railway will be involved.

Meanwhile in Kenya swarms are within measurable distance of Nairobi. One has reached a point five miles from Fort Hall and another settled a few days ago on the Maa Hills where damage was done to maize and fruit trees.

POSITION IN THE NORTH UNKNOWN.

It is a long story and still under investigation. A large swarm of young locusts arrived in the Sabana Valley.

The Chief of the anti-locusts passenger service published the following information about the locusts.

The locusts are reported to be in the neighbourhood of the Victoria Nile and the Central Railway will be involved.

Improvements in 1928 The Silence and Flexibility of Modern Engines.

The outstanding feature of the new Year Ten is reduced noise and vibration, due to the fact that the majority of modern cars built with unity of the 1928 model. The "Motor" line, says engineers, is the most important improvement in the remarkable progress which has been made in the department of modern passenger cars in the past twelve years.

It was at moderate prices that the "Motor" line has made its mark in the "Motor" line, says engineers, is the most important improvement in the remarkable progress which has been made in the department of modern passenger cars in the past twelve years.

The Year Ten is somewhat different from the cars of the past because of the high power output for which it is designed. It is not a car to be driven with any less loss of fuel than a car of the past. It is a car that is designed to give a reasonable amount of power and economy. It is a car that is designed to give a reasonable amount of power and economy.

Front-wheel Drive.

This complete revision of the front-wheel drive system is represented by front-wheel drive. The front-wheel drive system is represented by front-wheel drive. The front-wheel drive system is represented by front-wheel drive.

Braking system.

The braking system in general showed considerable improvement during 1928, mainly in respect of the operating gear comping. The front-wheel drive system is represented by front-wheel drive.

to be checked. An increasing number of firms producing modern bodywork with the aid of stering assistance, in semi-detachable form in the form of a compartment built in the body to take the stering assistance, in semi-detachable form in the form of a compartment built in the body to take the stering assistance.

Another tendency which became strong in 1928 and is expected to be the abolition of the open body, the body being now brought down outside, the car being the "shanty" type, that is, the body being now brought down outside, the car being the "shanty" type, that is, the body being now brought down outside.

Engineering Victory of the Decade

Dodge Brothers Victory Six is the only car of its kind in the world.

In chassis frames is the full width of the body—for the first time in motor car history! And the body has only 6 major parts!

A car that is lighter, yet sturdier—softer, yet stronger—simply better in the end design—the most remarkable engineering Victory of the decade!

Transmission System.

Turning to the transmission system, the motor cars have in many instances been greatly improved during 1928 by better methods of gear construction and mounting, so that in general they now give a more efficient drive than was the case a few years ago. The most notable feature of 1928 from the transmission point of view is the introduction of the automatic transmission, which has been widely adopted in the motor cars for many years.

A Letter from India.

Indian National Congress—Mrs. Bennett's attitude towards the Khajuri Conference—A form of slavery—All Parties Conference—The Indian Commonwealth—Khabir's form.

Monday, Jan. 30.
 At the Indian National Congress meeting held at the Hotel Cecil, Bombay, on the 29th inst., Mrs. Bennett's attitude towards the Khajuri Conference was discussed. The Khajuri Conference is a form of slavery, and it is not for the strength that it follows. A resolution for the complete and continued boycott of the Khajuri Conference was passed by the Indian National Congress. The Indian National Congress is a body of free men, and it is not for the strength that it follows. A resolution for the complete and continued boycott of the Khajuri Conference was passed by the Indian National Congress. The Indian National Congress is a body of free men, and it is not for the strength that it follows. A resolution for the complete and continued boycott of the Khajuri Conference was passed by the Indian National Congress.

The question whether it should be asked to take active part in the Indian politics was naturally raised. It was held that he had no such intention. An interesting report of the Congress resolution to invite non-co-operation in Mrs. Bennett's return was given. It was held that the Indian National Congress is a body of free men, and it is not for the strength that it follows. A resolution for the complete and continued boycott of the Khajuri Conference was passed by the Indian National Congress. The Indian National Congress is a body of free men, and it is not for the strength that it follows. A resolution for the complete and continued boycott of the Khajuri Conference was passed by the Indian National Congress.

of the inhabitants have been shown by lack of grain to cause the loss of many lives. The secondary trade in liquor, though there have been no onerous duties imposed upon the migration and arrangements which it is hoped will be satisfactory, have been made under which the migrants pay for their passage to the coast of their own country.

ADMINISTRATION IN NORTHERN TURKANA.

Hostility Between Tribes Removed.
THE PROGRESS.

The Native Affairs Department might even in a preliminary report a review of that most interesting period in the history of civil administration which marked the beginning and maintenance of relations between the British tribes in Northern Turkana. The annual report of the Department details only two paragraphs to this development which established friendly relations between some of the tribes and stopped marauding raiding.

The dominating factor in Northern Turkana during the year has been the shortage of rain. The native population that the drought has been the most serious experience for thirty years. The efforts have been full particularly in Turkana districts where it has been necessary to organize a relief fund for the first half of 1928. No harvest can be expected until July at the earliest.

The Liberal Federation.
 The decision of the Congress has its effect in winning the support of the Liberal Federation for Congress. The Liberal Federation for Congress was formed at Allahabad and intended by some of the leading politicians in India to hold high positions both in press and in public life.

The Liberal Federation.

The Liberal Federation.
 The decision of the Congress has its effect in winning the support of the Liberal Federation for Congress. The Liberal Federation for Congress was formed at Allahabad and intended by some of the leading politicians in India to hold high positions both in press and in public life.

Of the Southern Turkana there is little to report. The natives are given little trouble, but while their condition is improving they are far from a permanent state which has stopped their raiding and raiding has in the past cost many thousands of heads of cattle an amount for which the British and a new military taxation.

Among the Suk the drought has caused heavy mortality in cattle. It is estimated that the West Suk lost 40 per cent of their stock from starvation, and it is probable that the losses among the East Suk have been almost as heavy. One severe element in the situation has been the high price of hides which has been maintained and has enabled the natives to procure the necessities of life. In both Northern and Southern Turkana the losses in stock have been heavy and a considerable

AFRICAN STANDARD

UGANDA AGOUR.
TUESDAY, JAN. 20, 1930.

An East African Veterinary Research Centre.

The Committee appointed by the
Imperial Government, after the
Colonial Conference, for the
purpose of investigating the subject of
veterinary research and adminis-
tration in the non-self-governing
territories of the Empire has recom-
mended a comprehensive scheme
for co-ordination and organiza-
tion. The intention of the scheme
is to make the Colonial Veterinary
Service a first class one likely to
attract young and capable men
who will give their energies to the
great field research which will
enable their investigational expe-
rience. The Imperial recommendation
is that the Imperial Council of
Natives be established in London
on the lines of the valuable and
successful School of Tropical Medi-
cine and also the establishment of
a similar central research station in
the tropics, preferably in East
Africa. It will be readily remem-
bered that the proposal to establish a re-

Campbell, who died at Mid-
loth, Perth, on January 26th,
1928.—Mary.

search station at Kenya was made
a few years ago by the Conference
of East African Governors. The
present suggestion by Lord Lever's
Committee would carry the pro-
posal to an important stage further
and create in East Africa a central
research centre for the tropical
empire. The East African Govern-
ment Conference resolved that original
work with regard to Veterinary
Science as regards the East African
Dependencies, should be contin-
ued at Kabete with branches at
other suitable points in the terri-
tory under the control of the land-
search staff. They also recom-
mended that the Veterinary In-
spection work at Kabete should be
under a Director whose services
should be available for the various
East African Territories in the
same way as those of the Director
General of Health. The latter staff
was selected, with the support and
management of the East African
Parliamentary Commission, for
centralized agricultural research
and statistics has been adopted
as the centre of the British Gov-
ernment's work in connection
with Empire Affairs. Following upon
the recommendations of the League
of Nations International Sleeping
Sickness Commission. Best al-
though a number of years have
passed since the three-fold research
scheme was created, the veterinary
science on a large scale has been
undoubtedly it is therefore
important to recognize the value
of the present report now given to
the public by the Imperial
Council of Natives. We have seen
it stated in a recent and authori-
tative publication on stock-
disease in which the East
African territory in Kenya took
up certain steps which have been
the last means of assistance. They
were surprised to discover the
nominally large, but gratifying
outcomes of the active peoples. The
establishment of a first class
centre for the practical research
and the Imperial Council of Natives
in the African Dependencies
which would be organized in
accordance with the early days

of colonization. The explanation
of this important histor-
ical fact lies in the
reluctance of the Colony
to continue the process of these large
investive funds. It is, despite the
fact that the colony has been
ravage of caterpillars—the under-
growth and it will have lesser
due to East Coast Fever and
other stock diseases, suggests that
the East African conditions are
remarkably suitable to the raising
of stock. We are well aware of
the very great difficulties which
have faced the establishment of
a dairy industry. But it cannot
be maintained that the conditions
under which the veterinary service
of the Colony has been subjected
to the control of a large depart-
ment of Government have been
mutually beneficial to the stock
industry and the proposed exten-
sion of research service. If gov-
erned, should give a new im-
pulse to stock raising. One of the
most obvious difficulties facing
Kenya today is the immovable
block represented in the matter
of single crop farming. There are
certain crops—wheat, maize, rice
and such—upon which a certain
amount of research is being
carried out, but it is not sufficient
for development, on self-
sufficiency. It is, therefore, a
great mistake to suppose that
the sound agriculture which
is needed, can only be laid in relation
to the present situation. It is
impossible to recognize the value
of the present report now given to
the public by the Imperial
Council of Natives. We have seen
it stated in a recent and authori-
tative publication on stock-
disease in which the East
African territory in Kenya took
up certain steps which have been
the last means of assistance. They
were surprised to discover the
nominally large, but gratifying
outcomes of the active peoples. The
establishment of a first class
centre for the practical research
and the Imperial Council of Natives
in the African Dependencies
which would be organized in
accordance with the early days

of the Imperial Council of Natives.

**IMPARTIAL AUTHORITY NEEDED
IN EAST AFRICA.**

(Continued from page 7.)

be given to the white areas would
be a step in the direction of
despatch.
In view of these difficulties, we
think the Government should
say of the territories into which
it has divided the white areas
as the right line of advance under
present conditions.

Reservation of Subjects.
It was pointed out by the
European members that they
were not prepared to accept
control of the natives, and it
was suggested that the Govern-
ment should not do anything
to the detriment of the natives
in the event of a change of
policy.

The first is that native policy
is intrinsically inseparable from
the economic development of the
country, and that the Govern-
ment should not do anything
to the detriment of the natives
in the event of a change of
policy.

A second difficulty is establish-
ing a basis for the reservation
of certain subjects, and it was
suggested that the Govern-
ment should not do anything
to the detriment of the natives
in the event of a change of
policy.

Question. The question naturally
arises whether it is possible
to reserve a number of
subjects in certain parts of the
country, and it was suggested
that the Govern-ment should
not do anything to the detriment
of the natives in the event of
a change of policy.

The question which naturally
arises is whether it is possible
to reserve a number of
subjects in certain parts of the
country, and it was suggested
that the Govern-ment should
not do anything to the detriment
of the natives in the event of
a change of policy.

It is necessary further that the
territory should be reserved in
such a manner as to be
conducive to the economic
development of the country,
and it was suggested that the
Government should not do
anything to the detriment of
the natives in the event of
a change of policy.

It is necessary further that the
territory should be reserved in
such a manner as to be
conducive to the economic
development of the country,
