Country Roads and Weather Report.

Mr. Galton-Penny writes as follows—

"There have been thunder storms in various parts of Uganda and Southern Tanganyika, but not a drop of rain in Kenya during the last week, and the country is burnt up and as dry as a bone. I can only advise the motorist regarding the long roads to suffer at the expense of, or although they are in full swing in Southern Tanganyika, they are very slow and a fortnight or 3 weeks late in arriving at Dodoma. This, of course, does not necessarily mean that they will be late in arriving in Kenya, but it rather points that way.

One great blessing, however, is that the locust invasion seems to whatever it may be, is only a temporary nuisance. This, of course, does not mean that they are very small amounts of locusts which he saw on the trip, in fact he could hardly believe that the reports regarding locusts in that District were true."

STREPTOCOCCUS CAMPAIGN

The Senior Cofee Officer has returned to Nairobi from up-country where he had been making various reports, explaining the application of the new law.

Reports have been received of inspection of 906 plantations. Streptococcus has been confirmed as positive on 20 plantations and is suspected in 17 others. The inspectors have been confirmed on 37 plantations and is suspected in 10 others.

The following diseases and pests have also been recorded—Lead Disease 802; Brown Lead Blight 231; Coffee Berry Disease 52; Lead Spot Disease 97; Root Diseases 4; Gum Scale 244; Brown Scale 33; Waxy Scale 24; Wasp Nests 12; Black Scale 15; Ascocarpium 17; Ichneumonidae 1; Comptosia 1; Mealy Bug 143; Root Mealy Bug 17; Mealy Weevil 19; Lead Spot and Bark eating beetles 67; Leaf eating Caterpillars 79; White Borer 14; Black Borer 6; Yellow Borer 1; Leaf miner 1; Leaf miner 1; Moth or Butterfly 213; Antestia 221; Thrips 111; Citrus 91; Aphid 11.

Since May 1922 Stephanoderes has been confirmed in 31 cases, and is suspected in 23 Long-corn diseases have been confirmed in 29 cases, and is suspected but not confirmed in 10 cases.

Notes from Njoro.

THE FARMER AND CONTROL OF PRICES.

"STANDARD" Co., Nairobi, Sept. 18, 1922.

Locusts and locusts are very much the concern of everyone at the moment, and great indignation is being shown by the farmer at the idea of Government wanting to fix the price of foodstuffs on a basis of Government control. It is the price especially to avoid undue fluctuations in the market. The farmer out of his legitimate and honest earnings, he has had to make a heavy sacrifice to avoid undue fluctuations in the market. The farmer takes a broad view of it and gives the farmer, reasonably, the Government prices for his goods, the farmer will certainly agree, the Government to subsidize him in a year when the demand happens to exceed the supply and he is unable to get the price which he would like to get. Every garden in the district was stripped bare last week by swarms of locusts, and one wonders what will happen if they come through here again when the supply is growing. The only hope, of course, is a good rainy season which will automatically dispose of them.

Government are in a bind, something something the 2500 to 3000 per day in trying to eradicate locusts. So far they have been able to admit that they have seen locusts (and those who have seen locusts have been unable to kill more than about 10 per cent of the locusts on the Northern Frontier and that there are still many thousands of square miles covered with them.

The Nairobi police officers are usually opened on Saturday and teams from Eldoret, Nairobi and Njoro are taking part in an open competition. The outcome is that the winner of the contest is given a detailed account will be given of it after the opening.

Nature's Chummy Phones.

CONVERSATIONS OPEN TO ANYBODY'S EAR.

"STANDARD" Co., Nairobi, Sept. 20.

The monthly meeting of the Nairobi Chamber of Commerce was held at the Nairobi Hotel on the 18th inst. Mr. W. J. Boswell, the President, was in the chair.

The Chairman reported that the work on Trunk Line telephone was proceeding very well and that the whole telephone system in Nairobi was in a most dependable and efficient state.

Mr. T. W. Gray and others were present on the subject, and it was decided to take the matter up with the Postmaster General.

The following resolutions were passed by the meeting—

The hour of service, which now ceases at 5 p.m., daily and does not terminate on Saturday or Sunday afternoons.

The excessive time taken in connect subscribers.

The fact that conversation between any two subscribers can be heard by any other subscriber who cares to listen to it.

It was mentioned by Mr. James that the Empress stand at the Post Office were doing their utmost to provide a service under conditions of the worst kind of expense, and all members were urged to do their best not to be with them.

Other matters discussed included the proposed extension of the Shige House Ordnance, Railway Co. and the proposed acquisition of the Associated Chambers' meeting at Mombasa.

British Trade in E. Africa.

LOSING GROUND IN COUNTRY MARKET.

A disappointing report of how British manufacturers of cottons and other goods are being ground in the East African countries is given in "Trade and Commerce of East Africa." The publication, which is made by the Department of Overseas Trade, covers the period ending September last. In cotton wares, edge tools generally, and building materials, Germany has overtaken Great Britain.

CORRESPONDENCE

THE BRITISH LEGION - NAIROBI BRANCH.

...this does not detract from the ability for the above mentioned... in these columns, and in all cases... necessary for publication but... a guarantee of good faith... Directly to save essential to... save ourselves.

CLOSE UNION REPORT - NATIVE VARIATION.

To the Editor, "E. A. Standard." - Sir: - The Close Union Report in its section on Taxation on p. 27 gives a very wrong impression in the accompanying figure of taxation in Uganda and Kenya.

The "Total per adult male taxpayer" is stated: Uganda £2s. to £3s. Kenya £2s. to £3s. that is to say in Uganda there is only £1 and no half tax, whereas in Kenya there is both £1 and £1 1/2. A correct approximation could be arrived at by dividing the total of the figure for the adult male population... of the 227 of the Report... 1,201,560 and in Kenya 1,241,200. The population in Uganda is given as 3,129,061 and in Kenya 2,520,200. Further in Uganda Poll Tax begins at 18 years of age but in Kenya at 16 years.

If for the sake of argument we take it that the adult males represent one third of the total population (from high a figure for taxation purposes) then divide that into the £1 and £1 1/2 tax, we find that each adult male pays in Uganda 10s. while in Kenya the figure is 12s. 6d.

My distinct feeling is that the section on Taxation will offend the reader who has no intimate knowledge of local conditions.

There is in the Common Hall I happen to be one of those who hold that the economic policy of the Government is the policy of financial and occupational expansion advanced in the Report with the policy of a Common Hall. If it were not for the fact that the report is a mere compilation of facts, it would seem to follow that there is a case to be made for the fact that the Government is not only a common hall but also with regard to the franchise.

W. F. OWEN, Ambassador of Kaimosi, Maseso, Kenya, February 22, 1920.

To the Editor, "E. A. Standard." - Sir: - A Branch of the British Legion was formed in Nairobi and the Comptrolment Register has been opened in Nairobi. I think that the unemployed reserve force will be glad to hear that the British Legion is now established in Nairobi.

Of course this will be useless without the co-operation of the employers. Many of the firms in the district have agreed to give a vacancy upon a chance for applying to the British Legion to consider on their staff. It is a noble task to write to all firms so as to give them the opportunity of asking all employees of labour of all kinds to help the Legion.

I shall be only too pleased to forward particulars of any firm who so on the books, per return of post to my care who makes an application. The register will be open for names from 10 o'clock Friday from 1:30 p.m. on Friday to 10 o'clock on Saturday. The Registrar is Mr. C. E. COOKE, Secretary, British Legion, T. V. C. A., 11, Upper Circular Road, Nairobi.

With reference to the Branch we have over 100 names on the books but there is still plenty of room for more and it is hoped that every service man will join up and help the good work which is being done.

As you who have written me separately in H. M. Forces in England for me to let you know a letter branch is to be formed in Nairobi in the T. V. C. A. building a total first year sub of £170, subsequent years sub being £12s. 6d.

The work of the Legion at Home covers all types of cases of distress - pension cases, widows' pensions, care of children, school fees, clothing, hot meals at school etc. There are also quite a number of young men and women at colleges following the death of their fathers in the war. Others have been apprenticed but the Legion makes a grant to the apprentice to enable him to get into a trade to which the master will not have the ability to train him or her. Medical treatment is also given for the widows and families of the fallen.

The year as yet has been the work of the voluntary staff of the Legion, as all officials of the branches are

Of course we cannot hope yet to attract the attention of the older English branches, but we are writing to the older ones and we hope that the old report of the Legion will help to send the necessary funds to the new branches. Kenya into the new Army of France which is now being formed in the Legion - on any other ground than to give France and Belgium a square deal, and to give our old comrades the widows and orphans. Many disabled ex-servicemen and widows would have got far less than a square deal if it had not been for the Legion action regarding pensions.

May I in conclusion give you two types of cases which have come under my eye lately.

The first of these was in November 1918, the father in France. The case came under the notice of the Legion in 1920. This child had never walked although some 1000 miles in other ways. She was sent to the Royal Children's Hospital in London, her law and keep and other expenses paid for by the Legion, in all about £40. She is now 10 years old and a happy normal child.

Another type of case frequently met with in the Legion is that of a child who has been through the miseries of trench foot. Five doctors gave an opinion that the death was due to service but because the death was seven years limit the widow was refused a pension. She had a daughter of 14 years, an infant son of 10 years (two was to be born in a month) but at a cost of £100 per week and a rather long two years. The Legion took her case up and after three months of fighting got her a 75 per cent pension with 5 per week for the 24 normal children up to the age of 16 in the case of the girl and 14 in the case of the boy. The other child was granted 12s. per week for life.

I hope this letter will help to swell the number of names on the list of the Legion and I shall be only too pleased to answer any enquiries that you may care to ask. I am sure for your enquiries in publishing this letter.

Yours truly, C. E. COOKE, Hon. Sec. B.M. V.M.C.A. Nairobi, Feb. 22, 1920.

(Further Correspondence will be found on page 15).

Why You Hate Indigestion.

HOW TO RELIEVE IT. When food enters your stomach, large quantities of acid-bearing gastric juices are secreted. If too much gastric juice is secreted, the food becomes a sour, fermenting mass which may remain in the stomach several hours, causing great pain and distress. Instant relief can be obtained in cases of this kind by taking half a teaspoonful of Bismarck's Magnesia powder or two or three tablets in a little water immediately after eating or whenever pain is felt. This acid, sour and equally noxious mucus which stops the fermentation, softens and kills the indigestion causing living, and at once restores natural and healthy digestion. Get a package of Bismarck's Magnesia from your chemist today. Use as directed, and you can laugh at digestive troubles.

Topics for the Motorist.

Road Signals and Etiquette.

Simple Rules which Tend Towards Safer Motoring.

The Degree of Latitude.

When a beginner travels in a car headed by a skilled or experienced driver, he will be surprised to find that the most important thing to be able to convey information to the driver of another car is to take it in, as soon as possible from other cars from the points of view.

Although the official signalling system is very simple, it is not to be taken for granted that the driver of another car will be able to take it in, as soon as possible from other cars from the points of view.

When the car is about to turn to the right, all the driver has to do is to hold out his right arm horizontally. It is not a question of simply extending the arm or hand, but of giving a clear and definite signal which cannot possibly be misunderstood.

In spite of a signal having been given, it is not to be taken for granted that the driver of another car will be able to take it in, as soon as possible from other cars from the points of view.

Many cars are fitted with a mechanical or electrical signalling device, and many drivers consider that the provision of such mechanical appliances is more than sufficient to ensure that the driver of another car will be able to take it in, as soon as possible from other cars from the points of view.

There is a clear and definite difference between the position of the arm when giving a signal and that adopted to indicate that the car is about to turn to the right. If the car is slowing down, the driver of another car will be able to take it in, as soon as possible from other cars from the points of view.

Now we come to the question of traffic control. It is essential that the driver of another car should be able to take it in, as soon as possible from other cars from the points of view.

By obtaining your supplies at the Ukamba Transport Company, you will be able to take it in, as soon as possible from other cars from the points of view.

from behind him must stop, while the cross-arms of traffic in both directions may proceed. The first reason for the use of a signal is to divide the road at a curve or a corner into two separate portions, one for the use of traffic in one direction, the other for that going in the opposite direction, and it is imperative that the off-side (right-hand) wheels of the car are not allowed to cross the line.

Other signs likely to be met with in motoring are a red triangle on a pillar or board, which means immediate danger, and is used as a curve, cross-road or corner at which one should be warned.

There is another difficult point in town. Supporting the arm of the policeman, A and B, holding up the north and south lines of traffic, the east and west lines following during the process. When the right moment comes, the policeman will move out to the position necessary to stop the cars from north and south, but the east and west traffic and release those from north and south, but the driver of the car that has been stopped should not move on the moment the policeman moves, unless definitely signalled to do so, as it may be necessary to stop the east and west traffic before the other lines are allowed to go.

On approaching a point where the road is narrow, it is desirable to signal in which way the driver wishes to proceed. For instance, the car is to pass straight on, the driver should point straight ahead as soon as possible, the policeman's eye, if on the other hand, the car is about to turn to the right, the signal for that evolution should be given in plenty of time. If this is not done, the policeman cannot be expected to give that car a free and quick passage.

Where great difficulty arises for the driver at the junction of more than four roads. Each policeman will have a pair of two arms, and a signal with the hand, to that the lines of traffic to be controlled. It is essential that the policeman should know what the signal means to the opposite of another car, and the driver of another car should be able to take it in, as soon as possible from other cars from the points of view.

Many cars are fitted with a mechanical or electrical signalling device, and many drivers consider that the provision of such mechanical appliances is more than sufficient to ensure that the driver of another car will be able to take it in, as soon as possible from other cars from the points of view.

There is a clear and definite difference between the position of the arm when giving a signal and that adopted to indicate that the car is about to turn to the right. If the car is slowing down, the driver of another car will be able to take it in, as soon as possible from other cars from the points of view.

Now we come to the question of traffic control. It is essential that the driver of another car should be able to take it in, as soon as possible from other cars from the points of view.

THIKA, MAKUYU AND DONYO SHUKA WEAVER REPORT.

More Support for Attitude of the Elected Members.

LORD FRANCIS SCOTT'S EXPOSITION.

Liaison Committee Appointed to Keep Veterans in Touch with Member.

Another settled area has backed the Member's attitude of opposition to the Closer Union Report. Thika, Makuyu and Donyo Shuka, at a joint Thika meeting ratified Lord Francis Scott's action and approved the cable recently sent to London.

He asked that the Imperial Government give the Kenya settlers a chance. They would provide for people who would deal justly towards all races, and keep the scales balanced. He felt strongly that the Commission had not succeeded in accounting the cleavage between white and black by the economic and political divisions in the Report.

The district also decided to appoint a liaison committee of two delegates from each area who will keep the constancy in touch with its member and appoint a substitute for Lord Francis Scott who is going Home in a few months.

A DEBATE ON FOOD CONTROL.

Thika, February 25. A joint meeting of the District Associations of Thika, Donyo Shuka and Makuyu was held at Thika Sports Club on Wednesday, February 25, when Lord Francis Scott addressed his constituents on the report of the Hilton Young Commission and the problems of Closer Union.

Councillor J. L. Leventhal presided. Lord Francis Scott most handsomely outlined the attitude of the Elected Members towards the Report of the Hilton Young Commission which had led to the sending of a cable of protest by them to the Secretary of State for the Colonies.

Lord Francis, in the course of his speech, said that the Report was the result of the labours of

It is certain that its natural line of political development will be in the direction of representative institutions in the form of which these have been developed in European countries.

"I see," said the speaker, "what is their proposal? It is that it is not in the interest of the natives that they be represented? They say the Government will not have anything to do with them unless they have their say long as they do not interfere with our interests."

He said that the Government had agreed with this demand but where we differ is in the practical application, and in this we have on our side the Chairman who announced that the idealistic solution of his colleagues did not fit in with the practical application of the situation as it is. The majority report is very strong in its view that not only must we not look forward to Representative Government in any appreciable period of time but that no steps must be taken now which would create any circumstances likely towards such a realization of our ambitions. He then Young disagreed with Responsible Government.

"We do not see an advance towards Responsible Government," because, we represent the whole of this country which alone has the capacity to govern. The reason is that two-thirds of the population has developed the political instinct for governing over a period of many years. The Southern Rhodesians have put this claim and in all probability, they will require assistance just to look after the health of all our native labour. If we were as selfish in our outlook as the Report says, we would be if given more power, we should have demanded that Government grant half hospitals in all the settled areas before the native reserves. It is not we who force the opposition because we believe it is the right thing and what is most required for the country as a whole.

This is the vital and fundamental principle embodied in the report, that the white community here is not to be treated, and every detail is to be planned to give to the natives the right to vote to present up getting over the future of our country, though the white and coloured people are not to be placed in vital to our interests. We know better than any one that an administration based on injustice to the native must be in the end fatal to our own interests, and

nothing is so foolish as to think that we can have a good government without that.

Ample Redegans.

The Kenyan argues that it is the duty of the Government to ensure the maintenance of the minimum, and that the Government should not be allowed to take the law into its own hands. He said that the Government should not be allowed to take the law into its own hands. He said that the Government should not be allowed to take the law into its own hands.

Another argument is that we should have some form of Responsible Government unless the native reserves. It is not we who force the opposition because we believe it is the right thing and what is most required for the country as a whole.

The Associated Chambers' Mochi Session.

The Branch of the Association of the African Chambers of Commerce and Industry in East Africa, which has been organized since the commencement of the present year, has held its first meeting at the Mochi Hotel, Nairobi, on Monday, February 27, 1928.

The meeting was presided over by Mr. J. W. Milligan, who presided over the meeting in a most able and interesting manner. The meeting was held in the evening, and was attended by a large number of members of the Association.

The first business of the meeting was the reading of the minutes of the meeting held on January 15, 1928, which were approved.

The second item of business was the report of the Executive Committee, which was read by Mr. J. W. Milligan. The report dealt with the work of the Executive Committee since the last meeting, and was most interesting and informative.

The third item of business was the report of the Finance Committee, which was read by Mr. J. W. Milligan. The report dealt with the financial position of the Association, and was most satisfactory.

The fourth item of business was the report of the Publicity Committee, which was read by Mr. J. W. Milligan. The report dealt with the work of the Publicity Committee since the last meeting, and was most interesting.

The fifth item of business was the report of the Social Committee, which was read by Mr. J. W. Milligan. The report dealt with the work of the Social Committee since the last meeting, and was most interesting.

The meeting closed with a vote of thanks to Mr. J. W. Milligan for his able and interesting presiding, and to the Executive Committee for their work during the past year.

that some Chambers of Commerce have ever had an opportunity of discussing the Closest Union Committee's Report were adequate reasons for the very wise decision of the Conference, as suggested by the Chairman, to refer to that detailed one. It is not possible to do justice to the views of different sections of the East African Chamber of Commerce but in the main the opinion of the majority in connection with the recommendations and implications of that document. Sufficient has been said and done to suggest the value of the meeting and the views of different sections of the East African Chamber of Commerce but in the main the opinion of the majority in connection with the recommendations and implications of that document. Sufficient has been said and done to suggest the value of the meeting and the views of different sections of the East African Chamber of Commerce but in the main the opinion of the majority in connection with the recommendations and implications of that document.

Obituary.

Mrs. HARRY MARSH
MRS. HARRY MARSH, widow of the late Harry Marsh, died at her residence, 15, St. James' Street, London, February 27, 1928, at the age of 75 years.

Mrs. Marsh was born in London, and was the daughter of Mr. and Mrs. John Marsh. She was married to Harry Marsh in 1855. They had three children: Harry, George, and Elizabeth. Mrs. Marsh was a devoted wife and mother, and was well known in her neighborhood. She was a member of the Church of England, and was a devout Christian. She was buried in the Kensal Green Cemetery, London, on February 28, 1928.

RAILWAY TO BE EXTENDED TO NANYUKI.

K. U. R. Authorities Ask Colony to Bear Loss as Well as Interest.

WORK MAY BEGUN IN JULY.

Government Seeking a Uniform Financial Policy Regarding Branch Lines.

The lack of financial enterprise on the part of the Administration in connection with the construction of branch lines was criticised in Kenya Legislative Council on Friday when the extension of the railway from Nanyuki to Nairobi was approved.

The proposed extension which involves an initial outlay of £21,000 was welcomed on economic and social aspects requiring further relief may be employed on construction.

The extension of Government was drawn to other areas requiring similar railway development, and a statement in regard to the present difficulties involved in the making of economic surveys was made by the Director of Agriculture.

The Acting Colonial Secretary announced that financial relief to branch lines was under consideration and it was hoped to place a definite uniform policy before the House before long.

CAPITAL COST \$2,200,000. ANNUAL BURDEN £5,000.

The Acting Colonial Secretary reported the following statement to the Legislative Council on the subject of branch lines during the session which closed on Saturday last.

That the following table represents the estimated expenditure of the Government on branch lines from 1914 to 1919, and the total amount of the same during that period.

Estimated expenditure on branch lines from 1914 to 1919, and the total amount of the same during that period.

RAILWAY TO BE EXTENDED TO NANYUKI
(Continued from page 6.)

The subject had been brought under review by the railway department from time to time, but it was made a few months ago by the British Legation, Nairobi, that the British that in view of the not-unlikely development of the Kenya Colony that one such should be extended.

There was another branch line in the office which a request for a survey might be made as early as possible.

It would like to give the impression that the officers of the Department of Agriculture were not willing and desirous that they may not be able to complete it. He thought they felt for it, however, that the Department was not so satisfied and efficiently to meet the demands of such a line.

There were two or three hundred special services of that kind. There was a number of other possible officers in the Department who were not prepared to do work of that kind and upon those officers for special services of that kind. He was not very heavy indeed.

He hoped and believed that the case for any of the branch lines which had hitherto been discussed was not prepared by the member for Nanyuki or the Member for Uasin Gishu, but the support of any of his colleagues being almost any day. He would like to give their conditions the assurance that they were not in any way responsible for the delay in the matter which he said and which the member would be well advised to consider when it was that the railway would be made in the future.

He applied to the members not to be premature in their advice surveys to be made in the future.

He was not very heavy indeed.

Landing Licenses.
The Acting Collector, Nanyuki, has issued a notice in the Standard in relation to the landing of goods in the district of the Kenya Colony in connection with the possibility of the railway. He has thought it well to give a little more enterprise. Mr. T. O. S. (Haines) has issued his notice to the effect that for an early start with the railway which will be made in the future.

The Hon. Colonel Lesley was given work for the railway in the future. He has issued his notice to the effect that for an early start with the railway which will be made in the future.

He has issued his notice to the effect that for an early start with the railway which will be made in the future.

E. A. COMMERCIAL CONFERENCE DISCUSSES CLOSER UNION.
(Continued from page 1.)

A resolution by the Mombasa Chamber of Commerce regarding the keeping up of the road between the Mombasa and Nairobi was discussed.

The Association also adopted the following resolution of the Mombasa Chamber of Commerce:

"That this Chamber, in view of the increasing trade and commercial interests and the need for a closer union between the Mombasa and Nairobi, be requested to the Government to consider the possibility of a closer union between the Mombasa and Nairobi, and to take such steps as may be necessary to bring about such a union."

Field Crops.
The Mombasa Chamber of Commerce has issued a notice regarding the field crops in the district of the Kenya Colony. It is requested that the members of the Chamber should be prepared to give their views on the subject of the field crops in the district of the Kenya Colony.

Diplomatic Staff Proposed.
It was agreed with one object in view, that the Diplomatic Staff of the Kenya Colony should be increased to include a representative of the Government of the Mombasa Chamber of Commerce.

has been taken over by
MADAME PERIGUEUX
(late of Ritz Valley Sports Club).
The Hotel has been renovated and refurbished.
FRENCH CUISINE. SPECIAL ATTENTION
Close to the Station.

They Stand the Punishment

THINK, the next time you are driving over a particularly rough stretch of highway, of what punishment your tubes must stand. Think how they are required to take the varying pressures caused by irregularities in the road. Think how they are obliged to receive the bulk of every blow, yet must retain their full volume of air. Goodyear Tubes are built to withstand such gruelling service. Cured on a circular mold, they conform naturally to the shape of the cover, and so fit perfectly. Thus may they be relied upon to carry a full volume of air and to hold it - unflinchingly.

CORRESPONDENCE

The editor does not accept responsibility for the views expressed by his correspondents in these columns, and in all cases the names and addresses should be sent accompanied by letters, and not necessarily by post, but as a guarantee of good faith, directly to the editorial office.

Spiralists.

To the Editor, "H.E. Standard."—Mr. Sharpe Hillman's suggestion that Spiralists should be judged by the failure and not by the success of the earth is a very old scientific mistake...

Yours,

ARTHUR CONAN DOYLE.

To the Editor, "H.E. Standard."—Perhaps Mr. O'Brien has had good success in his quest for an explanation of the "mystery" of the Chinese...

Speaking on the question of Communism, Mr. O'Brien recently acquiesced in the address which he made in the Indian Congress...

The question of Communism has been mentioned in the Indian Congress for many years. Mr. O'Brien has been mentioned as a supporter of the Communist movement...

Mr. O'Brien has very peculiar views on Communism. He would not have it at any cost; in fact he agreed with everybody else. But on the other hand he has been mentioned as a supporter of the Communist movement...

What a hopeless of lies and distortions. Yours, etc.

INDIAN

Nairobi, Feb. 25, 1920.

THE GLOBE UNION REPORT. To the Editor, "H.E. Standard."—The "Globe Union Report," at length, in both news columns, has been and is being read by many people...

Mr. Newman suggests that I should not be so much as to publish the letter which I forwarded to you for publication. You will observe that the date clearly was given as February 1. That you did not publish the letter and the whole correspondence I want to say is not my fault.

In the second and third paragraphs of Mr. Newman's letter, it is suggested that Major O'Brien was under the impression that I represented Mr. J. C. O'Brien's Committee. It would appear that I represented the conditions of the Indian Secretary...

To the Editor, "H.E. Standard."—The "Standard" has been making use of my name and address in its columns, and I have not delivered a good dinner on public notice...

Here, in Kenya, several newspaper editors have not noticed the "Standard" report, judging from what has been written in the press.

Needless to say, however, the "Standard" report has been widely disseminated, and many people are being misled by the "Standard" report...

It is not that the "Standard" report has been so widely disseminated, and many people are being misled by the "Standard" report...

It seems to me ridiculous for a newspaper to publish a report to lead as Mr. O'Brien, speaking at the Indian Congress, the largest community meeting in Kenya...

It seems to me ridiculous for a newspaper to publish a report to lead as Mr. O'Brien, speaking at the Indian Congress, the largest community meeting in Kenya...

Crawford's LIQUEUR
SCOTCH WHISKY

Special Reserve
The Standard Blend of Quality which never varies. Follow to the palate, but with the fine, full flavour age alone can give.

Old Liqueur
Keeps a little longer! It is the one whisky for special occasions because it is very old and scarce.

Sold by Discriminating Merchants.
A. & A. CRAWFORD,
LEITH - SCOTLAND.

In short, design with model threads in quite large and very effective pattern. The black of a wrap of this kind is one of the most striking features. If it is washed merely as a light pretension it can be used without any being, so smoothly and evenly are the colors. There is to be a great scope for such patterns. The women of the world are wonderful, and they will themselves when asked to give an introduction, and some of the most lovely effects are being obtained with floral patterns on blue and silver woven grounds.

So far as new colors are concerned, there is much talk of the coming popularity of rather cool gray, a pale apple green, and pastel shades generally. Black-and-white for an evening frock is always a safe choice. Nothing looks better than the really good black frock, no matter what the age of the wearer; while it is quite as popular and now that the better frocks have become (unfashioned, quite as becoming) gray. These "off-white" tones, as the dressmaker describes them, give over the woman with a smaller complexion an opportunity of appearing in a white dress dress.

TEAT EVERY NOSE!
(By Dorcas Dawson)

If you people (nobody) had the power to nose that would produce every feature of the nose, so that we need to despair. A little persistent effort can do a thing more so it can improve that other animal fact to form a pharmlad herper. The fact, in fact, is a much easier process than the

WORTH, Shs. 9/35

It seemed as though nothing could possibly be better than the material in vogue during 1908. Values reached the stage when a length of it could be drawn with ease through a wedding ring. Basic black is as bright as coffee and nearly as transparent. Blue could be added to a length little larger than a pocket handkerchief, and, while green-grey was delicate as a lady's veil, even de olive was laid to rest.

What more could we desire? Yet even softer stuffs are now to be had for the asking!

The foundation is suitable! Not, perhaps, the really spotted material of Victorian days, with its frog, rail moment and the air of romance. But, much more after still, still and woven with threads of gold and flecks of silver.

Two outstanding features of the gown are emphasized in the pretty home gown; silk matching stockings in close robe, and the fitting lace bodice. The frock is in every way exquisite and the stitching is a night by lighter. Some of the same color.

Don't be afraid, however, of the adjective "superficial" in relation to a thoroughly good soap. That is quite a different matter. With the soap, use rain-water whenever possible for the alkalinity of the face and nose. Hot water feet, and a subsequent brisk splashing with cold. And, when drying, rub the cheeks briskly and round in a circular direction from the ears to the nose, with hands slightly detached. Afterwards, apply lotion to the face with a thoroughly dry towel. Frequent sprays during the winter with hot or cold water vapor is the further advantage of the beauty specialist.

Picturesque Effects.
Some of these studies are so woven and decorated that they suggest "more and less—very simple" as that they may be beautifully draped; but even more attractive are the silk material for afternoon dresses, which have shimmering floral patterns in color worked into them.

And all these gowns there is an alternative class of pretty patterned frocks and halides in sherry red, and blue-green. Brown and blue butterflies in this season of choice have dignified a foundation of very pale yellow; there are last designs traced on pastel grounds, and there are those which Oriental motifs and squares in very bright and gay colors. The delicate thought of all is one of delicate shading and design, and there are, in a black frock.

And For Wraps.
In the wrap there is a slightly heavier material, ground, woven

For the afternoon, a most becoming little dress in long and even white, made with lace over the shoulders and long to regulate the shape of the bodice and with a three-quarter skirt, such her skirt with long, not very long. Similar would continue the gray and black and is used for the two belts, so around and end in the hip.

GYMKHANA CRICKET CLUB.

Six Centuries Scored During the Past Season.

BOWLING AND BATTING AVERAGES FOR 1924-1925.

Gymkhana Cricket Club has concluded its most successful season. Out of the 22 matches played, they have lost five and drawn four. They have scored 1,117 runs in 22 matches, giving an average of 51 runs per match. Their opponents scored 1,833 runs, their average being 83 runs per match. They have bowled 1770 overs at the average rate of 22.5 overs per match. The best bowling performance was made by the Gymkhana bowlers. The batting averages are topped by H. Walter, who has scored 600 runs in the aggregate of 10 matches. Next comes J. D. Malindi, who has scored 450 runs in 10 matches. The wicket-keeper, J. D. Malindi, has scored 450 runs in 10 matches. The bowlers have taken 100 wickets in 1770 overs, giving an average of 17.7 overs per wicket. The best bowling performance was made by the Gymkhana bowlers. The batting averages are topped by H. Walter, who has scored 600 runs in the aggregate of 10 matches.

Table with columns: Name, Runs, Overs, Average, and Wickets. Includes names like Walter, Malindi, and others.

Next to professionals on these football season games. It is a fact that the football season has been the most successful in the history of the game. The players have shown a high standard of play, and the spectators have enjoyed the games to the full. The season has been a success in every way, and it is hoped that it will be a harbinger of things to come.

PARKLANDS SPORTS CLUB.

Improvements Effected in Past Season.

A DIFFICULT PERIOD.

A happy season for the future was outlined at the annual general meeting of the Parklands Sports Club which was held last week. Financially speaking, the club has been successful in its improvements which have added to the pleasure and health of the members. The club has a fine ground, and the improvements which have been effected will make it a more attractive place for the members to play on.

The committee of the club has been successful in its efforts to improve the ground. The improvements which have been effected will make it a more attractive place for the members to play on. The club has a fine ground, and the improvements which have been effected will make it a more attractive place for the members to play on.

Club Improvements. Mr. Park expressed his appreciation of the work done by the committee in the past season. He said that the improvements which have been effected will make it a more attractive place for the members to play on. The club has a fine ground, and the improvements which have been effected will make it a more attractive place for the members to play on.

MORE MONEY NEEDED FOR EAST AFRICAN PUBLICITY.

Commercial Conference Discusses the London Office.

TANGANYIKA FINANCIALLY STABILIZED.

Retention of Coercion with the D.O.T. Again Supported.

Publicity for East Africa in London was discussed at Tuesday and a half hour by the Association of East African Chambers of Commerce at Mombasa last week.

The Conference adhered to the view that the office should not be divorced from the Department of Overseas Trade but that more money should be spent on the provision of a specialist staff to popularize East African produce.

The Tanganyika Government were also asked to provide more adequate finance for publicity.

Some delegates were of the opinion that the money spent in the London Office was sufficient.

Practical Results are the Deciding Factor

The all-in costs of maintenance—a high standard of tractor efficiency—and the ability to work continuously on heavy loads are facts which have established the superiority of Cross Power Kerosene. Practical tests are the proof—here is a typical example—

"We can confidently recommend 'Cross' Kerosene to any one requiring a fuel where the utmost power is required."
 "Cross Kerosene has proved, after years of service in our tractors, to be the ideal fuel and having all the characteristics peculiar to a first grade fuel."
 "We also notice that the purity of Cross Kerosene has overcome the usual trouble of Crankcase dilution and this in itself is proof beyond all question that Cross Kerosene is a product which cannot be surpassed."

MORE MONEY NEEDED FOR EAST AFRICAN PUBLICITY.
(Continued from page 1.)

Mr. Burgess thought that the total contributions from East Africa to the London Office—£2800—was entirely inadequate for the purpose of pushing East African products in the world's markets. The whole thing hinges on the question of publicity and trade information. The agricultural officer was not sure, however, in this connection as the publicity man. He suggested that an even or over position of the territories should increase their subscription in order to provide for the engagement of an adequate person to take up the work of exploring better marketing facilities.

Mr. Collivance (Mombasa) would not agree that it was necessary or desirable to spend more money in that way. Merchants interested in East African produce were, in their own selfish interests, continually seeking every possible avenue of trade. He thought it would be much better if the London Office concentrated on the encouragement of the right type of settlers and the sale of British produce in East Africa.

Tanganyika's Position.
Mr. Meakin (Dar-es-Salaam) said a little time ago the Dar-es-Salaam Chamber received an enquiry from the Government as to whether there was any desire for a change in the constitution of the East African Office. The Chamber felt that no change was desirable at the time. It was true that Tanganyika hitherto had had very little value from the London Office, but that was not surprising in view of the Territory's contribution which amounted only to £500 a year. It was suggested by Legislative Council recently that the contribution should be increased, but the Government stressed it down. At present the London Office is doing a great deal for Tanganyika in the way of publicity work in connection with the forthcoming Exhibition.

The President said the recent demand from America and Canada for Kenya coffee was directly attributable to the work of the London Office in connection with the Coffee Planters Union. He was of the opinion that the work of an individual who would concentrate on the opening

up of new markets for East African produce was necessary. He said it was quite true that every agent in England did his best to sell East African produce. At the same time it must be remembered that there were a great number of agents in Brazil and it was not desirable in keeping up the price of East African produce so that although it might be necessary to advertise now, it would be necessary to do so in the future. He thought that it was necessary as the result of the efforts of the London office there had been enquiries from Italy for East African coffee.

Mr. Hinson (Arusha) said it should be the aim to have Kenya coffee known throughout the world and he was of the opinion that the present means of advertising was not sufficient.

Mr. Hove (Kitale) was in agreement with Mr. Collivance that the present facilities were quite adequate for the moment. He added: "If there were held in the whole of East Africa where one can get a decent cup of coffee. The greatest advertisement coffee producers can have is here on the spot and it is the worst possible advertisement."

Money Emigrants

Mr. Burgess said the London office functioned in two ways. Firstly, it had been established for the purpose of assisting colonists and the production of the right type of settler. Secondly, it was established for the purpose of publicity and he did not think £2,800 was sufficient to enable both parts of the work to be carried out satisfactorily. South Africa had made wonderful strides in these directions and only recently Colonial Banks had stressed the need for white colonists of the right type. He thought it was for a proper man to do this work. He was not sure whether or not we shall get full value for our money today.

Mr. Meakin was in entire agreement with the last speaker. It was just as important that a country should advertise as that a commercial should do so and proper advertising involved the expenditure of money. The Tanganyika Chamber had been extremely generous in the matter and he hoped there would be a

substitution of the best commercial. It was probably more commensurate with their policy of the Territory that they did not consider to open up.

When the committee resumed its normal sitting Mr. Burgess moved the following resolution which was passed *unanimously*:
That this Association reaffirms the resolution passed at the annual session at Mombasa in July, 1930 in respect of the East African Representatives Office and requests its approval of the views expressed by their report of the Executive, 1930 since they meet the Kenya Agricultural Office and requests it add that further financial provision should be made by the committee concerned for the employment of an adequate specialist staff to assist commercial houses in popularizing the products of these territories in the world's markets.

On the proposition of Mr. Meakin the following resolution was passed—
That this Association considers that the contribution by the Tanganyika Government is inadequate for the publicity of the Territory and that a substantial increase be made in order to provide for better publicity services for the country.

STANDARD STATIONERY STORES, NAIROBI.

Has to the power unit... the most important part of an engine... is the piston and connecting rod.

Four-Wheel Brakes... The most serious defect of an automobile is the lack of stopping power.

Self-Energising Brakes... The new device... is a motor body, and usually has also a connecting shaft.

Advantages Claimed... The advantages claimed for it appear to be an automatic safety device in case of any mishap or physical failure of the part of the car.

What Stops the Car... Now what is it that actually stops a vehicle when we pull the brake lever?

Friction between road and tyre... Certainly not the brakes, but the friction between road and tyre through the medium of the brake.

Brake Mechanisms... Engineers have used the screw for braking purposes, through the medium of air pistons, all kinds of friction devices and vacuum pumps.

Self-Energising Brakes... The new device... is a motor body, and usually has also a connecting shaft.

The editor does not accept responsibility for the views expressed by his correspondents in these columns...

THE GLOBE JOURNALS REPORT

To the Editor: "E.A. Standard" Sir—When I saw your report...

Whether the common or garden reader will be taken in...

Whether the common or garden reader will be taken in...

Whether the common or garden reader will be taken in...

A proportion similar extended by advertisement... The editor does not accept responsibility...

I submit, Sir, that here we have the root trouble of our rapidly diminishing exports...

This is a sufficiently obvious example for a moment to recall...

So the "E.A. Standard" Sir—I have been awakened...

But what do we find here in 1877? I was "not" in 1877...

There are many in the young eye and untrained tongue...

INSURANCE AGAINST LOCKUP STRIKES

To the Editor: "E.A. Standard" Sir—I was suggested in your paper that funds being spent...

It is most important that the former should be able to insure against such a strike...

It may be felt that rather than give a guarantee Government might as well do the insurance itself...

There are many in the young eye and untrained tongue...

THE FOOD CONTROL BOARD

To the Editor: "E.A. Standard" Sir—The Board of the standard of meals for "British rule" Government...

The obvious course is to buy up the quality of the material...

Further correspondence will be found on page 113.

A Bankrupt's Employing

POSITION IN RELATION TO UNPAID WAGES

Interesting points in a case in which a Bankrupt's employing for fourteen days simple implement for withholding wages due to a sacked employee were raised when the appeal from the sentence was made...

The appellant, J. T. Terrey, a contractor living at Nakuru, was sent to prison on January 24 last for non-payment of wages.

Mr. Hopley's contention was that the sentence under which appellant had been convicted did not apply to this case. The sentence there was for non-payment of wages of such servant without reasonable and probable cause for believing that the wages at which he was employed were not really due. The substance was that the wages were owing but the amount paid was not sufficient to pay the wages of such servant without reasonable and probable cause for believing that the wages at which he was employed were not really due.
