LIME YOUR LAND.

Many farmers in Kenya poopoo the idea of fertiliers and to crown their arguments that they are unnecessary, they will show you the virgin bush in all its glory, fine trees and good grass. Does that land look as if it needs manure they ask. Naturally it doesn't because nothing is being taken off the land.

When you start taking crops off you must add NITROGEN. LIME converts the combined Nitrogen into available Nitrogen. There is plenty of nitrogen in the soft BUT NO LIME !! of Kenya.

Nakuru, Saturday
The Bift Valley constituents meeting with their Member, Lord Delamere at Nakuru this afternoon

WEDNESDAY, JAN. 16, 1929. The Fable of the Man-Eating Lions. It is no doubt a very great pity. from the point of view of the fiction writer, that Kenya possesses no man-eating lions. For many months, as the Game Warder shows in an article in another of the Romance of Africa has been freely and liberally exploited. By the ready pens of the story tellers, the elastic limits of fiction have been enlarged and all the arts of the sub-editors of sensational journalism utilised to make the man-eater of Kenya a really live lion is credited in the columns of sedate monthly journal with devouring ninety four men and women. His "stealthy mate" slew forty seven more! We read, too that the position became desperate when "massed troops of these monstrous brutes assailed 'the veld village in the small eleven dairy centres were operat. hours of a moonless night. A somewhat unexpected result was an added daring on the part

and selected number of Masa have been given back their spears and have been organised as sors of tribal police force to assist authority against game. It may be that the economic development of the Masai people does not hold the Spirit of Romance suggested by the man-eating lions beloved of the propagandist but it is a definite and infinitely more valuable contribution to the regeneration of a people whose virility was undermined by the policy of abolishing the warrior class in the tri-bal constitution. No same person would be prepared to agree that the old conditions of life could be permitted to remain in any Colony brought under the civilising influence of British administration What have been the results of the policy? At the end of 1926 dive dairy huts had been completed in Kajiado producing ghee valued at Shs. 9,000/- and in Narok a year earlier the dozen dairy centres produced ghee valued at Sha, 40,300/- In 1927 in Kajiado area ing and the produce was valued 4t Shs. 40,700/- as compared with year. In 1923 the number of plots in the Masai Reserve occupied as trading centres was 63. In 1927 the number had grown to 147. Setting an entirely new, a revolutionary, style-introducing what will unquestionably be the trend of smart body-design during the next several years—the new Bodies of the Silver Anniversary Buick are enjoying universal acclaim as the most original and distinctive, as well as the finest and most beautiful ever created by the

world-famous Fisher organization ! Here is not only a new car but a new vogue—a vogue of symmetry, born of gently rounded contours instead of plain straight lines—a vogue of dis-tinction, derived from sparkling colors, brilliant chrome-plated nickel

and arresting new roof, radiator and fender design-a vogue of tasteful luxury, artistic hardware and fitments and new appointments of comfort and convenience not to be found in any other automobile—

and the vogue is proving so popular—the motoring public welcoming it so enthusiastically—that this beautiful new Buick continue to outsell all other cars above the very lowest price field by an overwhelming margin

SENIOR COMMISSIONER'S CRITICISMS.

23,000 Unpaid Native Workers; Water

Something of the strenuous character of the Locust campaign in Kitui—and something too of the feeling and heart-breaking hopelessness which must sometimes attack those who are trying to deal with the menace, attack those with all through the senior Commissioner, Mr. W. F. G. Campbell, in an interview accorded to the "East African Standard."

But the Senior Commissioner has also some criticisms. He points out that 23,000 natives are doing unpaid work for eight hours a day and he questions whether they will continue to do it much longer without complain. He also complains of the lack of attention given to the work by those who are critics of such things as the pay of a Locust Officer.

No sooner are areas cleared of locusts than they are infested worse than before by fresh swarms.

DODGE BROTHERS by

WALTER P. CHRYSLER

The corps of technical experts di-rected by Fred M. Zeder. Vice-President in charge of engineer-ing for all Ehrysler companies, has completed its very exhaustive study of Dodge Brothers products.

Their findings have more than confirmed my personal knowledge of the soundness and integrity of Dodge Brothers methods.

While certain changes have been made in conformity with Chrysler ideals of luxury and style, Chry-sler engineers found that Dodge Brothers three new Sizes the

original and exclusive advantages in construction, is today one of the truly great cars of the world.

In fact, every one of these cars proves beyond the shadow of a doubt that Dodge Brothers policy of building well is today most rigidly in force than ever; and that Dodge ruggedness and Dodge ruggedness of bodge up-endability can be successfully expressed in terms of flashing performance and advanced style.
