Exploration in British East Africa. (From the "Field").

Mr. D. H. Despollet has returned from his expedition between the Juba and Tan rivers of British East Africa. It has been a very hard journey, the heaviest he has ever undertaken.

It is hoped that all the very distant days will give an account of the expedition at one of the meetings of the Royal Geographical Society. Meanwhile, the very interesting information about one of the chief geographical problems of the Empire between the Juba and Tan rivers is contained in a paper which appears in the columns of the Society's Journal.

Mr. D. H. Despollet started on his expedition on the 1st of July, 1914, accompanied by Mr. C. W. Hayward, one of the Protectorate officers, and a party of porters.

As was pointed out in the Field, a few months ago, when Mr. Despollet started on his expedition, he was accompanied by Mr. C. W. Hayward, one of the Protectorate officers, and a party of porters.

The following are the names of the men who accompanied Mr. Despollet on his expedition: Mr. C. W. Hayward, Mr. J. H. G. Smith, Mr. J. H. G. Smith, Mr. J. H. G. Smith.

One evening I was sitting at my desk... On the other hand, the English language is not so exacting...

It is perhaps a common thing to find a word in a dictionary which is not in the dictionary... The word 'standard' is a good example...

Charging and Discharging.

Typical curves of charge and discharge of a single Allium Accumulator are shown in Fig. 1. The charging is complete in about seven hours and the discharge in about 16 hours.

P D IN VOULTS

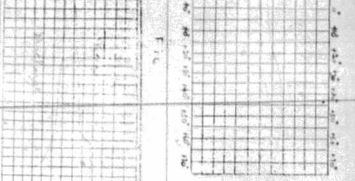

Fig. 2. The extensive use of the Allium Accumulator. On account of its small weight and its high efficiency...

Fig. 1. With reference to the charging curve the voltage at low currents for the first 5 hours is about 1.9 volts and only very slowly rises to about 1.97 volts at the end of 16 hours. The discharge curve is very similar to that of a lead accumulator, but the voltage never falls below 1.5 volts and remains constant to the end of the charge even if the accumulator is over charged. The rapid increase in the voltage serves as a guide when the charging necessary at any one time can be calculated, also after an incomplete discharge as mentioned in the previous section for the attendance of the Allium batteries.

Charging may be done at double normal rate by increasing the rate of the first 5 hours of the charging up to, until the rapid increase in the voltage has been reached. This rate of charging is particularly convenient as may be the case with the rest of the world. It is a very convenient device as may be the case with the rest of the world. It is a very convenient device as may be the case with the rest of the world.

There was much pleasure in accepting the invitation of Major Leggett to view the model of the "Llandoverly Castle," which is now on exhibition at the office of the B.E.A. Corporation, Mombasa.

This unique exhibit is splendidly set up in a large glass-plate glass room, and at once commands admiration by reason of the high quality of the workmanship which has been lavished upon it.

Last Tuesday night an interesting function was observed at Clarendon House, when Mr. and Mrs. J. P. de Salazar gave a dinner in celebration of the anniversary of this popular hotel restaurant...

In Somaliland. INTERESTING GAME HUNTING

The following very interesting account by "Delight" of sport and adventure in the Protectorate...

British Somaliland, or the Colonies of the Protectorate, occupies an area of about 100,000 square miles...

On one occasion, after a careful climb, on getting down into the valley I saw three bears, which, rubbing to the wind...

Quarterly when there comes no hills. In the afternoon, after a careful climb, I got within 100 yards of two of them...

I hadly expected the brush and found that the hills were steeply rising...

It seems to be remarkable that an extensive territory of such magnificent scenery should have been so long neglected...

Now the Commissioner having had a long talk with me on the 24th, he told me that he was not willing to do more...

THE KIBI. A PATRIOTIC FEELING. In an interesting article on "The Kibi" by "Maudslayi," appearing in the "Weekly Standard," we are treated to an interesting and concise summary...

At these references to the English section of that population which shares the Kibi, we are reminded of the fact that the article may be worth reproducing for the benefit of those who are not acquainted with the writer.

The Kibi then comes down to us through more or less troublesome times to this age of civilization, when, being no longer regarded as "heaving and groaning" advanced "people," it is now largely considered as a "backward" and "barbaric" schoolboy from wearing out the knees of his Scotch Gigs.

It is interesting to note that the Scotch Gigs, who were a few of the old tartan, and a few who were in a wad of the Scotch Gigs, and the Scotch Gigs, who were a few of the old tartan, and a few who were in a wad of the Scotch Gigs.
