UGANDA FACING THE "ECONOMIC BLIZZARD" Committee to Consider Means of Economy.

BALANCED MEMBERSHIP. Governor Sets Limit of Future Recurrent Expenses at £1,350,000.

Addressing his Legislative Council recently on the financial position, the Governor of Uganda indicated that in his view the extreme limit of ordinary recurrent expenditure for this financial year should be fixed at £1,350,000.

He has appointed a Committee consisting of three official members and the three principal members of Legislative Council with the Chief Secretary as Chairman to advise Government how economies can be effected and if any further sources of revenue can be discovered.

Despite all its difficulties, Uganda has a surplus balance of £1,087,965 at the end of 1930 and the Budget for the current year has been balanced.

Speech to Council. His Excellency Sir William Owen addressed the Legislative Council at a brief session last night in the presence of the members of the Executive Council.

The year 1930 opened on a record cotton crop. The record revenue in the history of the Protectorate and some £100,000 more than the previous year is being owing to the cotton crop which is the mainstay of the Government.

The policy that is being followed is to maintain revenue at the 1930 level, to reduce the cotton crop to the 1930 level, to reduce the cotton crop to the 1930 level, to reduce the cotton crop to the 1930 level.

Cabinet Office Comment. This policy, however, did not entirely commend itself to the Protectorate of Uganda, who are dissatisfied on the 1930 level.

It is worth noting the price of the cotton crop in 1930 was £14, for the first time since 1914, for the first time since 1914, for the first time since 1914.

MISSING PLANE FOUND. Forced Landing in the Desert.

A Difficult Take-off. The airplane belonging to the Shell Company of East Africa which was reported in the "East African Standard" yesterday as being missing has arrived safely at Nairobi, both pilot and passenger being well.

PASSENGER RESCUED BY THE DANIEL. The airplane belonging to the Shell Company of East Africa which was reported in the "East African Standard" yesterday as being missing has arrived safely at Nairobi, both pilot and passenger being well.

Removing Bombers. Wednesday night was spent by the British Legion in the removal of the bombers which were left behind by the Italian forces.

The income of the Government is being maintained by increased revenue, but the special expenditure is being financed from surplus balances.

At a meeting of the Executive Council held on Monday night, the Governor reported that the cotton crop for 1930 was £14, for the first time since 1914, for the first time since 1914.

TRANS-ZOIA FARMERS HELP THEMSELVES.

Investigations Into Their Own Problems.

A VALUABLE REPORT.

Mixed Farming Recommended in Present Crisis.

The Trans-Zoia farmers have set an example for farmers in other areas by forming a commission to investigate their own accounts into the problems which they are faced. Last November, the Trans-Zoia Farmers Association appointed a committee to enquire into the possibilities of mixed farming, in view of the present depression in the maize industry and the low average yield of the crop.

This committee made a very thorough investigation, and has issued a most comprehensive and valuable report on the subject. The report is a very lengthy document, but in view of the importance to the country generally it will be published in full in two instalments.

Below will be found the first portion of the report, in which the committee deal with the maize industry and also the recommendation that dairy farming combined with maize growing is essential to the ploughing of farming on a sound and safe basis.

REPORT OF THE MANURING METHODS.

It is not a crop that can be generally manured. In the limited area in which it will grow successfully it is considered a useful pasture. Some of other legumes play a part in the manuring of the soil. It is however questionable whether any will be of any use in the present depression. The committee have been sitting for the investigation of matters which have been referred to the Government. The committee had been sitting for the investigation of matters which have been referred to the Government. The committee had been sitting for the investigation of matters which have been referred to the Government.

The Present Position.

The first problem with which the farmer was confronted was the fact that the present low average yield of the crop was due to the fact that the soil was exhausted. The committee have been sitting for the investigation of matters which have been referred to the Government. The committee had been sitting for the investigation of matters which have been referred to the Government.

Artificial Manure.

There seems to be a general feeling of pessimism in the district and an opinion is expressed that the soil should be fertilized in many cases. It is possible to apply a heavy dressing of artificial manure to the soil. This manure is composed of various substances and is very valuable for the soil. It is possible to apply a heavy dressing of artificial manure to the soil.

MAJORA'S BLOODLESS WAR ENDED.

Marital Law Declared After Finding of Arms.

CIVIL GOVERNOR RETURNS

(THROUGH REUTERS AGENCY.)

London, May 4. Although Majora's bloodless war has ended the population of the island is living in a state of siege. Martial Law has been declared by the restored Civil Governor Simeon Almeida Calson (who, only a day or two ago was a prisoner in the hands of the rebels), following the discovery of bombs and other arms which had been distributed by the rebels to civilians. The said Governor, Sousa Pizarro, and his leading officers have been arrested. Sousa Pizarro, others have said in a speech in the British and Brazilian Consulates in the hope of ending the emergency. Despite the bombarding there were very few casualties among the troops or other sides during the operations and none among civilians.

Evidence on Behalf of the Tanganyika Residents.

When the Joint Committee resumed its activities after the Easter Holidays the first witness before the Tanganyika settlers' representatives, Messrs. Lead and Bown whose evidence was received with consideration in the very congenial atmosphere.

Major Lead said that Tanganyika settlers still desired close economic union, if it could be introduced without great expense. He also informed the Committee that in Tanganyika the settlers felt they were becoming less closely associated with the Trusteeship of the Native and that Major Bown had placed great emphasis on their belief that the best interests of the Native could be best served if the Tanganyika settlers were more closely associated with the administration of the country generally.

Major Bown declared that the White Paper had suggested a misinterpretation in England and the settlers desired to point out that although they had transferred their dwelling places to East Africa, they had not given up their status as Englishmen or forgotten their duty.

The Chairman (Lord Addison) said he thought the vast majority of Englishmen had confidence in their fellow-countrymen and the influence for good which the white population in East Africa had exerted had exceeded by far the advantage of a 'legacy' of white settlement which must be honoured.

The witnesses adversely criticised the spirit of the White Paper and the assumption that the Mandate principle would be automatically applied to other Territories if Tanganyika were to be returned to Union. They also pointed out that in East Africa the British Government had taken over a 'legacy' of white settlement which must be honoured.

"Still Englishmen."

WEDNESDAY, MAY 6, 1931.

Government acted with wisdom in its decision. The low price ruling for cotton encourages the exportation that the revenue position will be little better than it is today and a reduction of the 10 per cent (theoretically) duties was an essential preparation for a policy of importation that year in anticipation of the 1932 Budget. The official advisers in connection with the plans to balance the financial programme for the current year, is of great interest to Kenya to learn that he proposes to share with them the responsibility for equipping the much more difficult problem of the Government's expenditures for 1932 and the coming years. It is also interesting to note that the Government's expenditure will come within the limits of the budgetary estimates of the Department. His Economic Committee will complete its findings and these findings will be presented to the Legislative Council with the Chief Secretary in the chair. Government in the chair. FARMING PROBLEMS IN THE TRANS-NOZIA.

Further Report by Committee of Investigation.

CO-OPERATIVE SOCIETY NEEDED.

Fencing and Dipping Strongly Recommended.

Below will be found the concluding portion of and the subsequent discussion of the report of the committee appointed by the Trans-Nozia Farmers' Association to investigate the question of raised farming as a means of alleviating the present serious situation in the maize industry.

The report expresses the opinion that a policy of mixed farming is much overdone in that area, and advocates an immediate change to a co-operative policy.

The greatest delaying factor in adopting dairy farming is East Coast Fever, and the committee therefore recommends the district to take immediate steps to have the Cattle Cleaning and Fencing Ordinance applied.

The formation of a co-operative society for the dairy industry is also recommended as an absolute necessity.

Mixed Farming Long Overdue.

The following is the substance of the conclusions of the report of the committee appointed by the Trans-Nozia Farmers' Association to investigate the question of raised farming, the first portion having been published previously.

It is considered that pigs and poultry are the best means of raising a mixed income, and the committee recommends that the area should be divided into small units, each of which should be adapted to the raising of these animals.

It is recommended that the area should be divided into small units, each of which should be adapted to the raising of these animals.

Fencing and Dipping.

The greatest delaying factor in adopting this policy is the necessity of fencing and dipping the cattle and sheep.

A Co-operative Society.

It is recommended that a co-operative society be formed to manage the dairy industry, and that the Government should provide the necessary assistance.

DEATH OF TWO FAMOUS ARMENIANS

TERRIBLE FLIGHT DISASTER IN NATAL.

Lt. Commander Glen Kidston and Captain T. A. Gladstone Killed.

PLANE CRASHES DURING GALE.

Passing of Pioneer of East African Air Mails.

(THROUGH REUTERS AGENCY.)

Cape Town, May 5.

It is reported from Van Renssen in Natal that an airplane in which Lieutenant-Commander Glen Kidston and Captain T. A. Gladstone were flying, has crashed and both were killed.

The reports of Lieutenant-Commander Glen Kidston's death were received from a store keeper at Maiba, 16 miles from Van Renssen, who told the Magistrate at Van Renssen that he had seen a plane crash near his station.

He rushed to the spot and found the two occupants of the plane killed. He found a waiting car on one body, marked "Lieutenant-Commander Glen Kidston." A gale was blowing and raising clouds of dust rendering visibility bad in the mountainous country where the plane crashed.

The bodies were laid in charge of a European pending the arrival of the District Surgeon and Magistrate.

Johannesburg, May 5.

Lieutenant-Commander Glen Kidston was not flying the airplane in which he established the record from England to South Africa but in a Puma Moth belonging to a local firm.

Arrangements for his next venture were practically completed, namely a long hop flight from Nairobi to London in two days, stopping at Otrero and Rome.

(STANDARD CORRESPONDENT.)

Durban, May 5.

Lieutenant-Commander Glen Kidston and Captain T. A. Gladstone were flying from the Rand to Durban in a Puma Moth when they crashed in a gale while crossing the Drakensberg Mountains. The death of both pilots was instantaneous.

Instantaneous Death.

The late Lieutenant-Commander Glen Kidston had one of the most remarkable records in the world. He was the first man to fly from England to South Africa in a Puma Moth, a distance of 7,000 miles, in six days and ten hours. He was also the first man to fly from South Africa to England in a Puma Moth, a distance of 7,000 miles, in six days and ten hours. country that aviation is profitable in this country, and that it is a business proposition. What today is looked upon as an amazing performance may at one time be regarded as an ordinary occurrence.

Captain T. A. Gladstone.

The late Captain T. A. Gladstone, A.F.C., was well known in East Africa, and will always be remembered as the pioneer of the Puma Moth in East Africa. The suggestion that an air service should be instituted between Khartoum and Broken Hill was first made in November, 1924 by Captain T. A. Gladstone. It was in the course of his work for the British Overseas Airways Corporation that he brought the project to the attention of the Government. Captain Gladstone was killed in a crash landing near Durban on May 5, 1951.

Not a "stunt."

Shortly after his arrival in South Africa on the completion of his record flight, the late Lieutenant-Commander Glen Kidston was the guest of honor at a luncheon given at the Messia Hotel in Johannesburg.

"Nothing was further from my mind," he said. "I simply want to do what I can for the benefit of my country."

In November, 1925 an agreement was made between the Government and the late Lieutenant-Commander Glen Kidston for a preliminary service survey of the Khartoum-Kimberley route.

Protest by the Manchester Exchange.

(THROUGH REUTERS AGENCY.)

London, May 5.

A remarkable meeting of 8,000 representatives of Lancashire cotton interests was held in the room of the Manchester Royal Exchange on May 5 when a resolution protesting against the Indian boycott and the increased import duties on cotton goods was passed unanimously. A counter-blast is made from Bombay where Mr. Mody, the Chairman of the Millowners Association declared that Lancashire stood in need of close thinking.

India's Reduced Purchasing Power.

(THROUGH REUTERS AGENCY.)

London, May 5.

A counter-blast to this is provided from Bombay by Mr. Mody, the Chairman of the Millowners Association, who is a member of the Royal Exchange Conference, who in an interview with Reuters declared that Lancashire stood in need of the effect of India's reduced purchasing power. A resolution which India would not surrender the right to use the tariff concession. He also stated that the Government to procure a remedy.

Mr. John Carberry uses Goodyear Airwheels exclusively on his planes. These Airwheels carrying only five pounds air pressure enable the plane to takeoff or land safely on the roughest or most uneven ground surface.

This great soft pillow-like tyre shown above is the Goodyear Airwheel for aeroplanes.

It is shown you simply as an example of how Goodyear keeps ahead of world needs.

Less spectacularly, but none the less surely, Goodyear's work of improving the tyres for your motor car goes on.

That is why you can expect something extra in Goodyear Tyres, although they cost no more.

That is why, too, Goodyear Tyres lead all other tyres in the world in sales.

And that is why, finally, it will pay you to resolve "I WILL BUY ONLY THE LEADING MAKE OF TYRE!"

### Two Reasons Why Goodyear is the Leading Make of Tyre

**1** Only Goodyear offers: Outside—the sure safe grip of the All-Weather Tread for quick stopping, holding on hills and sharp turns, pulling out of slippery ruts, in addition to smooth quiet running, easy steering, long even wear, handsome appearance.

**2** Only Goodyear offers: Inside—the extra-staic Supertwist Cord Carcass with up to 60% greater give-and-comeback for cushioning your riding, absorbing hard blows and delivering the maximum mileage in carefree travel.

The following authorized Nairobi Goodyear Dealers will supply you.
