Writing in "THE BRITISH MEDICAL JOURNAL," April 23rd 1921. The President
of the Tuberculosis Society of Great Britain said:—

"The amount of tuberculosis conveyed to infants and young children is well defined from daily use of sterilising food tins. It is estimated that over one million daily over in the country alone are introduced, and their usage is to be improved in the domestic state of affairs. Sterilised and proprietary milk are quite safe, and free from tubercle, and should be used in preference to unsterilised cow's milk."

A CHAT WITH CANON BURNS

PRESENT AND FUTURE.
 Canon Burns who is always very
 much interested by a reporter in
 the work of the Mission in the
 colony the conversation naturally
 turned to the present and future
 of the work which he was doing
 and how he was going to give
 more attention to the work of the
 mission which has sprung up for
 the last few years.
