THE EAST AFRICAN STANDARD WEDNESDAY, AUGUST 15, 1934.

The session of the First Legislative Council which took place at Government House yesterday afternoon had a more constructive purpose and effect than was anticipated. It is at the close of last week is indicated the long talk of the members of the Government and people of this Colony who are so anxious to see the Government's financial situation of the country improved. The Government's financial situation of the country is a matter of great importance to the people of this Colony. The Government's financial situation of the country is a matter of great importance to the people of this Colony.

Despite the high rate of unemployment in Kenya, it is for the public and its leaders to show that it can be done. We believe that the Government should take steps to reduce unemployment. FORD POWER PLANT

THE first model T Ford engine was made in 1908. It was the perfected development of Henry Ford's motor inventions dating back sixteen years to 1892 when he built his first little one-cylinder motor or.

During that sixteen year period Ford Cars were made in many models from little two-cylinder "chuggers" to big six-cylinder, high-priced cars.

But in 1908 the crystallized results of all those years of experience and study was the model T, the Ford power plant of to-day.

And since 1908, thirteen years of test under every condition of use in peace and war, in every nook and corner of the globe has shown not a single weakness nor a need of improvement, nor of additions to the power plant which drives half of all the cars on earth.

The wonderful durability and power of the Ford engine, its SIMPLICITY OF OPERATION and ITS ECONOMY IN FUEL AND REPAIRS, are reasons why the Ford car should be a good car for you to own.
