Maize, Posho and Crushed Maize
To all Employers of Native Labour
 Why not make forward contracts to meet your Maize and Posho requirements for the next six or twelve months?
 By so doing you will not only be insured against fluctuations in the Grain Market, but you will also be enabled successfully to estimate the cost of your main items of working costs, which you cannot possibly otherwise do. The advantage of this method over that of buying from hand to mouth should be obvious.
 The B.E.A. Farmers' Association has only a limited supply available, and employers are urged to make contracts now in order to save future disappointment.

Maize, Posho and Crushed Maize To all Employers of Native Labour.
 Why not make forward contracts to meet your Maize and Posho requirements for the next six or twelve months?
 By so doing you will not only be insured against fluctuations in the Grain Market, but you will also be enabled accurately to estimate use of your main items of working costs, which you estimate monthly. The advantage of this method over that of buying from hand to mouth should be obvious.
 The B.E.A. Farmers' Association has only a limited supply available, and employers are urged to make contracts now in order to avoid future disappointment.
 For quotations and all other particulars apply.

Maize, Posho and Crushed Maize

To all Employers of Native Labour

Why not make forward contracts to meet your Maize and Posho requirements for the next six or twelve months?

By so doing you will not only be insured against fluctuations in the Maize Market, but you will also be enabled accurately to estimate one of your main items of working costs, which you cannot possibly over-estimate. The advantage of this method over that of buying from hand to mouth should be obvious.

The B.E.A. Farmers' Association has only a limited supply available, and members are urged to make contracts now in order to save future disappointments.

Maize, Posho and Crushed Maize
 To all Employers of Native Labour

Why not make forward contracts to meet your Maize and Posho requirements for the next six to twelve months?
 By so doing you will not only be insured against fluctuations in the Grain Market, but you will also be enabled accurately to estimate one of your main items of working costs, which you cannot possibly otherwise do. The advantage of this method over that of buying from hand to hand should be obvious.
 The U.S.A. Farmers' Association has only a limited supply available, and employers are urged to make contracts now in order to save future trouble.

For quotations and all other particulars apply,

Maize, Posho and Crushed Maize
 To all Employers of Native Labour

Why not make forward contracts to meet your Maize and Posho requirements for the next six or twelve months?
 By so doing you will not only be insured against fluctuations in the Grain Market, but you will also be enabled accurately to estimate one of your main items of working costs, which you cannot possibly otherwise do. The advantage of this method over that of buying (Grain) need to month should be obvious.
 The B.E.A. Farmers' Association has only a limited supply available, and employers are urged to make contracts now in order to avoid future disappointment.
 For quotations and all other particulars apply, The Secretary
