IF YOU PLANT PLANT WELL!

With the Start of the Railway Construction Works an important local market for maize has been created. Take advantage of this by producing a remunerative crop promising a quick return. With the past dry season behind us we can look forward to plentiful rains in the future ensuring abundant crops if properly planted.

THE NEW HOOSIER PLANTER is the implement to use to secure satisfactory results, because (1) The grain will be dropped uniformly at any spacing required (2) It is light in draft and consequently permits the small East African Ox to plant a large area in a minimum of time. (3) It is strong and fool-proof suited to inexperienced Native labour. A special leaflet will be sent on request.
