Tea Economy

The well made and efficient square shaped airtight Tea Tin as used by LIPTON'S is the successful result of years of careful tests and experiments by the world's greatest TEA EXPERTS. It is an incontrovertible fact that the air origin in tea introduced by the tin is fully maintained in order to pack, must immerse the fine Tea taken from various famous gardens, which all contribute their quota in making and maintaining Lipton's Teas AS The World's Most Popular Beverage.

KENYA HIGHLANDS

An English Orchard Set in Equatorial Africa

THE HISTORY OF A GREAT PROGRESSIVE INDUSTRY

AN AMERICAN AND THE KENYA HILLS

(By Mr. F. F. Fowler)

Mr. Broadhead, in the fourth of his articles related the story of the Man Far Orchard the large estate near Athi that Mr. Broadhead has been able to create and produce an English Orchard and flower garden, and describes the work at present progressing there.

On the very first point of the Kenya Highlands is a belt of hills of about 30 miles in length and 10 miles in width. This belt is the Kenya Highlands, and it is the only place in the world where you can see any thing of the kind. It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind. It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind.

It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind. It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind. It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind.

It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind. It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind. It is a very beautiful and fertile country, and it is the only place in the world where you can see any thing of the kind.

AFRICAN ECONOMIC CRISIS

Important Analysis of Home Views on Kenya

A COMMENTARY BY DR. H. C. MURPHY

ON HOME INDUSTRY AND EMPLOYMENT

Dr. H. C. Murphy, in his article on the African Economic Crisis, has pointed out the importance of home industry and employment in Kenya. He has shown how the Government's policy of encouraging home industry has led to the growth of a new class of industrial workers in Kenya. This new class of workers is the backbone of the Kenyan economy, and it is the Government's duty to protect and develop it.

The Government's policy of encouraging home industry has led to the growth of a new class of industrial workers in Kenya. This new class of workers is the backbone of the Kenyan economy, and it is the Government's duty to protect and develop it. The Government should take steps to ensure that the interests of these workers are protected, and that they are able to improve their standard of living.

The Government should take steps to ensure that the interests of these workers are protected, and that they are able to improve their standard of living. This can be done by providing them with access to education and training, and by ensuring that they are able to participate in the decision-making process of the Government.

This can be done by providing them with access to education and training, and by ensuring that they are able to participate in the decision-making process of the Government. The Government should also take steps to ensure that the interests of the general public are protected, and that they are able to improve their standard of living.

The Government should also take steps to ensure that the interests of the general public are protected, and that they are able to improve their standard of living. The Amazing Success Of Goodyear Belting

Several years ago the Goodyear Tyre & Rubber Company made a careful and painstaking survey of the problem of power transmission by belting. The result of this survey and the following exhaustive experiments was the perfection and production of Goodyear Belting. The success of this belting has been enormous, its rapid and general adoption in huge industrial plants of every description, as well as by thousands upon thousands of small outdoor portable and semi-portable power plants, is a striking proof of its superiority.

The transmission drives of Electric Power Stations, Flour Mills, Machine Shops, Sisal Factories and Agricultural Machinery are making those industries that have been analyzed minutely and accurately by the engineers and experts of the Goodyear Tyre & Rubber Company.

Their recommendations and the results of their experience are now available to you. If you want better belting at lower actual cost, it will send you to call, or write to the Goodyear Agent P. O. Box 844, Nairobi, who will give you all information concerning the Goodyear Analysis Plan of belt purchasing.

GOODYEAR BLUE STRAP BELTS

Goodyear Blue Strap Belts are the best transmission belts the Goodyear Tyre & Rubber Company makes for main drives and auxiliary drives with heavy intermittent loads.

They are constructed of a specially woven six-cord duck—pliable and strong but without excessive weight being added. This duck is impregnated with high grade rubber, tan-nuts and tough, which binds together the plies and gives them with such uniform strength and elasticity that the load is distributed equally throughout each ply as it forms the arc of contact with the pulley.

This construction reduces stretch to a minimum and increases strength to a maximum.

The friction surface kills slippage, the biggest thief of power. Goodyear Blue Strap Belts mean increased production. They deliver more power with less loss. They conserve energy, give continual service—and cost less than belting belting.

Goodyear Belting should not be confused with the ordinary canvas, hair, composition or rubber belting.

GOODYEAR KINGLITE BELTS

The rapid adoption of power for agricultural purposes has led to the demand for a belt which will transmit all power, which will grip, will neither stretch, stretch, and will wear long. Goodyear Kinglite Belts are the pioneer results of this vital need.

They are made of high grade 20-ounce duck and thoroughly waterproof, friction-surfaced, supple, requiring no breaking-in. Goodyear Kinglite Belts have demonstrated that they not only enable tractors and other agricultural machinery to deliver their full horsepower, but also that they will neither rot, stretch, nor stretch unduly when exposed to varying conditions of weather.

In addition to being of ideal construction they are the standard of the agricultural market. Goodyear Kinglite Belts are adapted for use in industries of every nature. Their service does not demand belting of Goodyear Blue Strap or Goodyear Blue Strap construction.

GOODYEAR GLIDE BELTS

Machines with small, high-speed pulleys—often heavily crowned and with quarter-turn—present one of the most difficult problems that transmission belting engineers have to contend with.

Such operating conditions call for belts pliable enough to conform to the small pulleys, yet having the strength to deliver their full rated horsepower. Goodyear Glide Belts are built of specially woven six-cord duck to meet the exacting demands of this type of drive. They combine great strength with extreme flexibility. The rubber union between the pulleys of belts used on small, high-speed pulleys.

Last, but not least, Goodyear Glides is a friction-surfaced belt, reducing slippage to a minimum. This friction surface is a permanent gripping power—a wonderful advantage with high-speed, intermittent loads where belt slippage means a burnt-out belt.

B. C. Gillies Agent for The Goodyear Tyre & Rubber Company. (Opposite p. 100-110)

SAUCE

THE ORIGINAL

'A SCAP OF PAPER'

MR. GORRELL AND A KEVIN, BIRMINGHAM.

In the House of Commons recently Mr. Dudley Clark asked the Secretary of State for the Colonies whether it was intended to give to the Legislative Council of the Straits Colonies an advisory authority to advise the Government in matters that have been referred to the Council, and the proposed amendments to be formally submitted to the Council, or whether the British High Commissioner would be empowered to advise the Government with reference to the Council's action in the administration of the Straits Colonies.

Mr. Chamberlain: In 1910 legislation was enacted in Kenya and Uganda providing for the establishment of advisory councils in those territories, and the Government is now considering the advisability of providing similar councils for other territories.

Mr. Chamberlain: In 1910 legislation was enacted in Kenya and Uganda providing for the establishment of advisory councils in those territories, and the Government is now considering the advisability of providing similar councils for other territories.

ARE YOU driving with the correct tyre?

TRY the U.S. NOBBY Tread

Where the going is specially heavy with mud and sand, in hilly country where maximum traction on the road is a factor, no other tyre tread yet devised is quite so effective, or so wholly approved by motoring opinion, as the U.S. Nobby Tread.

Its very simplicity—diagonal rows of oblong studs, interlocking in their grip on the road—is the result of all the years of U.S. Rubber experience with every type of road the world over.

FORESTRY IN KENYA

An Important Report by Professor R. S. Troup

THE DANGER OF RENOVATION

CENTRAL AGRICULTURE PROGRAM

(From Our Correspondent.)

Based on a visit to the forests of Kenya, the following report by Professor R. S. Troup, Director of the Forest Department, is published in the Kenya Colony Year Book for 1922. It is a valuable contribution to the study of forestry in Kenya.

The forests of Kenya are situated in the highlands and are of great importance to the Colony. They are being rapidly depleted and it is necessary to take steps to renovate them.

The forests of Kenya are situated in the highlands and are of great importance to the Colony. They are being rapidly depleted and it is necessary to take steps to renovate them.

Tea Economy

The efficient packing of good Tea is of the utmost importance, BUT it is the CONSUMER who pays for this packing and every cent spent deprives you of the same value in TEA

LIPTON'S popular square-shaped airtight Tin fulfils the most exacting demands for a perfect Tea packing whilst the nominal cost following on mass production allows the higher TEA VALUE. ALWAYS ASK FOR LIPTON'S TEA.

The forests of Kenya are situated in the highlands and are of great importance to the Colony. They are being rapidly depleted and it is necessary to take steps to renovate them.
