It is made in Essex, and so it is BETTER

A five minute immersion in water showed absorption of 13.79 per cent only compared with 30.94 per cent for 9078 per cent for two of the comparative wood boards. This is important because although you don't put wall boards in or exposed position—their resistance to damp determines the amount of sagging, stretching or rotting.

FISH IN KENYA INTERESTING FINDINGS OF THE TRUST CURIE.

Mr. H. H. P. Curie, Director of the Kenya Fishery Department, has reported on his findings regarding the fish industry in Kenya. He noted that the industry is still in its infancy but shows great promise.

The fishery department has been established to promote the development of the fish industry in Kenya. It will provide technical assistance and financial support to fishers.

The department's first task is to survey the fish resources of the country. This will involve a detailed study of the various fish species and their habitats.

The department also plans to establish fish farms and hatcheries to increase the supply of fish. This will help to meet the growing demand for fish in Kenya.

The department's work is being carried out in a systematic and efficient manner. It is hoped that the fish industry in Kenya will soon become a major source of income for the country.

The department's success will depend on the cooperation of the fishers and the government. It is essential that both parties work together to develop the industry.

Hupmobile Motor Cars Obtain Greatest Tyre Mileages from 815x105 Goodyears

The recent Official R.E.A.A. Tyre test on a Hupmobile Car has PROVED IT. Engelbrecht's big fleet of Hupmobiles on his Motor Service Route between Nairobi, Nyeri and West Kenya has PROVED IT.

YOU can PROVE IT by putting one of the new 815x105 Goodyears on your Hupmobile. Both Fabric and Cord 815 x 105 Goodyears are obtainable at all Garages.

GOODYEAR Gilfilian & Company, Limited. They lead all others in mileage and durability. The New Goodyears are heavier, tougher and larger than ever before.

GET USED TO THE NAME "SX" BOARDS. It is made in Essex and so it is BETTER.

A five minute treatment in water showed absorption of 1579 per cent, only compared with 2094 per cent on a 9078 per cent of the two of the compressive wall boards. This is important because although you don't pay well, you get an extra position - its resistance to damp determines the amount of sagging, and thus the rigidity.

Your Room lined with "SX" board will look better. THE PRICE IS RIGHT. Sole Representatives: KETTLES' ROY & DAWSON LIMITED, NAIROBI.
