**DODGE BROTHERS MOTOR CARS**

The following is a copy of a letter received from a client, the original of which can be inspected in our office:

"You will be glad to know that my new Dodge Brothers Touring Car, purchased from you in December last, is giving us even more satisfaction than my previous Dodge. Increasing the weight of the rear axle has improved the riding qualities of the car considerably, and the general finish is excellent. My farm is 30 miles from Nyeri, and on the last trip to Nairobi, I very carefully measured the petrol used and over the 126 miles of hilly and dusty road, the car consumed exactly five gallons of petrol, averaging between 750 and 1,000 miles per gallon, and the 32 x 4 Cord Tyres show no sign of wear. I have no objection to your using this letter if you wish.

**REDUCTION IN PETROL**

Obtained by users of Cox's "Almon" Carburetors recently advertised by us has brought to our notice the fact that reduction may be obtained in other carburetors instead of the genuine Cox's "Almon."

If you experience any difficulty in obtaining the Cox's "Almon" Carburetor may we not that you will communicate with us?

**They Now Have Heavier Sidewalls**

The new Goodyear Tyres have been still further improved by making the sidewalls thicker and tougher. Ruts and Stones need not be feared if your car is tyred with Goodyears.

And the new rubber compound recently discovered by Goodyear Chemists is so tough that its resistance to rough road wear is nothing short of phenomenal.

Fit them to your car and see for yourself how they outperform any tyre you have ever tried before.
