### CRICKET AT NAKURU.

Naiyasha Beats Highlands Capital.

A CLOSE FINISH

[By "LAKSHIDE"]

An interesting cricket match between Nakuru and Naiyasha which resulted in a most exciting finish took place on the Nakuru Sports Club ground on Sunday, August 21st.

Writing as a Naiyasha man I should like to state that the match was a very fair one for the visitors. It was a victory for the visiting team since from Nakuru district.

However the sporting spirit displayed by the captains and members of the Nakuru side came to the fore, and the two wickets in one of the innings were shared by the team were able to fill by Sutton and Barret, and the services of three others were obtained at the last moment. So eleven men actually took the field.

The Nakuru captain was the best but very generously put us in, and George and Chapman were first for the visitors. The first six wickets fell for little over forty runs between Sutton and Agnes—earned the score to 110. When the latter was dismissed by Frisick his place was taken by Barret but Sutton soon afterwards had the misfortune to be run out and the innings closed for 186.

POULTRY NOTES. Foster Mothers and Their Management.

If the foster mother is hatched by means of a lamp, the lamp should be lighted at least going for two or three days before the chicks are due to hatch and the temperature regulated in the nest machine the incubator inside the lid of the lamp should be kept at 98 degrees.

As stated above, the chicks are very delicate and require a lot of care. If they handle up together in one nest, they will be crowded and they will not be able to get warm enough. If they spread out on one floor with their feet tucked, then they are not too crowded. If the chicks are not tucked, they will spread out over the floor, looking somewhat uncomfortable.

Answers to Correspondents. B. I. I think there is no doubt that the chickens are suffering from scabies and I have just you the best treatment.

Money Back. Some firms offer you your money back if you're dissatisfied, — some don't. Of the former, some charge efficient for their goods to cover the loss on returns; others give such good value that there are no returns.

We prefer this method. Our money-back guarantee on vacuum-packed tea comes nothing—either to ourselves or to the public.

Brooks Bona tea in the wrapper will not cost you more than any other tea, and it is any cost to you. In either case you get the best tea in the best condition.

**Construction of the Nyeri Railway to be Commenced at an Early Date.**

The farewell dinner given to Sir Charles Bowring at the New Stanley Hotel on Tuesday under the auspices of the elected members of the Legislative Council, the Convention of Associations, and the Association of East African Chambers of Commerce brought together one of those representative gatherings that were unusually rare in our country.

The general arrangements made on behalf and in the name of the Government were of a most excellent character and it was a matter for congratulation that His Excellency the Governor—who had previously announced his intention of speaking at some length—was able to take part in the proceedings.

The management of the New Stanley Hotel was commended at the highest degree to the success of the evening's entertainment.

**CONTINUATION OF THE CHIEF VETERINARY OFFICER'S REPORT FOR 1922.**  
**Diseases in the Native Areas.**  
**DANGER OF PLEURO-PNEUMONIA PROMISING WIDESPREAD IN THE NORTHERN FRONTIER DISTRICT.**  
 (Continued from Monday.)  
 "During the latter part of the year a Veterinary Officer was stationed in the Masai Reserve and in the course of his duties he was invited to visit a herd of cattle owned by a Masai herdsman in an area close to the Masai border and adjacent to Nairobi. The herd was situated in the Nairobi district. This disease is still present in most parts of the Masai Reserve but the losses suffered during the period under review are reported to be less than those of the previous year. In the past the disease was reported to have been prevalent against any veterinary interference with their stock; it is therefore satisfactory to note that in the opinion of the Veterinary Officer-in-Charge this epidemic is rapidly disappearing.  
 Veterinary surveys were carried out in the Masai Reserve and in the Kamauia Reserve during the year, and as a consequence of Pleuro-pneumonia was discovered, the precautions imposed on these areas were raised. Ten thousand head of cattle were imported in the former area and six-and-a-half thousand head in the latter.  
 Moyo and Isalo.  
 "A severe outbreak of Pleuro-pneumonia occurred near Moyo on the Abyssinian border in June. Over three hundred head of cattle were involved and one hundred and thirty were reported to have died. From information since received it is gathered that the disease had appeared in both Abyssinia and Moyo at least a month previously and it is highly probable that it had been present at Moyo for some time before it was discovered. Immediate steps were taken to stop the cattle movement Southwards from Moyo but by the time this was effected the disease had spread along the main trade route north as the Quarantine Station at Isalo and elsewhere situated in the Somburu and Mura districts.  
 One mob of five hundred head were found to be infected on their arrival at Isalo and since then nine-thirty deaths have occurred in the herd.  
 "The number of cattle in the Somburu District is estimated at one hundred and fifty thousand head and in November it was reported that five Nanyatta were infected. A Veterinary Officer, who visited the area and vaccinated about 2,000 head, reported that in one infected Nanyatta where there had been 200 cattle he had seen seventy at remaining and most of these were sick; in another Nanyatta it was stated that nine head had died and that the disease had spread to other parts of the district. From the West it will run from Mura. The Somburu natives have asked for veterinary assistance but it is reported that none can be afforded at present through lack of staff. It is feared that Pleuro-pneumonia will rapidly become widespread in the Northern Frontier District as owing to the scarcity of water, the herds graze over vast areas and consequently in large numbers at the waterholes which are few and far between.  
 M. "The outbreaks in the Mura district appear to have originated from the infected cattle in the Isalo Quarantine area either through Isalo."  
 Class Error in strength.  
 Sufficiently Not exceeding 10 per cent. correct. 11 per cent to 20 per cent wrong. Dangerous. Knowing 80 per cent. Total No. Samples Analyzed.  
 "The Cattle Clearing Station still remains in abeyance. The Testing Station at Kamili was closed down in August for financial reasons.  
 "An opportunity arose during the year to demonstrate the value of dipping to the Masai tribes in connection with the sale of sheep imposed on an area shortly being closed in an area shortly infected with East Coast Fever and also being reported as a case of enzootic tank and 'hand-dressed' under the supervision of a Veterinary Officer. It is hoped that this demonstration will result in the natives being induced to appreciate the value of dipping.  
 Feet and Mouth Disease.  
 "As mentioned in a previous report, Feet and Mouth Disease re-

Mr. Brown thought the proposal of a House would also be an excellent one and pointed out that there was a possibility of a compromise between the two proposals, the tax being the larger, as for the usual method of raising the tax, the public would not suffer as far as their transport and their transport would be improved if the tax was raised.

# The policy of hand-making

When cigarette makers are in a hurry to produce a new variety of cigarettes, they often resort to the use of hand-made cigarettes. This is because hand-made cigarettes are easier to produce and can be made in a variety of shapes and sizes. Hand-made cigarettes are also easier to pack and transport.
