DEPARTMENT OF AGRICULTURE. ANNUAL REPORT.

Progress of Kenya Colony in 1923.

450,000 ACRES OUT OF 7,000,000 AVAILABLE. ADMITTED TO EUROPEANS.

Summary of Fourth Annual Land Census.

COUNTRY'S PRODUCTIVE POWER AND THE FRUIT OF EXPERTISE IN HANDLING IT.

An interesting journeying to the "E. A. Standard" summary, Mr. R. Harrison, Acting Director of Agriculture for Kenya, has just completed his Annual Report of the Department for the year 1923...

The agricultural year 1923 was well up to average in yields of crops, but many of the principal crops were small. As this year under ordinary conditions and the same progress to the full percentage of a above average to be maintained...

In the year of the Kenya survey there was a long and arduous journey which was a very difficult to estimate, but it is necessary that the production of the Colony in the present year and foreign's annual to anticipate the current year...

Table with 2 columns: Agricultural Crops, Total. Rows include Wheat, Maize, etc.

The fourth annual census for 1923 of the Kenya Colony is published in the Annual Report...

An appended table gives a more complete account of the conditions which were observed in various parts of the Colony...

From the table mentioned the number of days of rain in 1923 had the same amount of rainfall as in 1922...

Table with 2 columns: Districts, No. In. Rows include Embu, Meru, etc.

The average for individual crops shows that wheat, maize and wheat as a whole are the three main crops in which surplus has been made...

An interesting article about the progress of the Department of Agriculture for the year 1923...

The total value of crops in 1923 was estimated at K2,100,000...

It is a fact that a considerable amount of land is available for settlement in the Kenya Colony...

In the course of the year 1923 the Department of Agriculture has been busy in many ways...

THE E.A. COMMISSION. Lord Southborough is able to tell us some of the reasons why the Commission appointed by the Colonial Office to investigate the position of Kenya...

The people of Kenya have no personal knowledge of Lord Southborough, but they had still sympathy with the Secretary of State for the Colonies in his laudable endeavour to discover a man who, while unbiassed, possessed the virtues of experience necessary to the proper conduct of the very serious task set before the Commission...

There are every man in France who should read the statistics, and then only vaguely and indistinctly to see the individual substance.
