BEST LARGEST, BEST

Details of various parties are appearing the report that our milling plant is "antiquated." This is quite untrue. Certainly we have been established for over 18 years but the new four rolling machinery installed by us this year, last year, and in 1921, has a larger capacity than that of any other mill now running or being erected in this country. And in planning our new plant we had the advantage of 18 years experience of local conditions and local wheat.

Recognition

Even before the tea, for the tin that has appears above the horizon, a sailor is said to recognise a ship by the "cut of her rig". The same Brooke Brand is recognised everywhere as the clearest sign of good tea, for the tin that bears that name is vacuum-packed. It preserves all the strength and freshness of the tea inside—good when it started, just as good when you get it.
