INFANT MORTALITY IN KENYA.

Memorandum For The Commission.

HANDICAPS TO HEALTH.

The following memorandum on the subject of native health conditions was submitted to the E. A. Parliamentary Commission by Mr. James McCrea, Loughborough, on behalf of the Nairobi Mothers of the Districts meeting last week.

The appalling state of affairs in the infant mortality in Kenya is well known. It is known that in the Central Kenyan Districts, where a great part of the Country's labour comes from, for each 1,000 infants born, 400 of them die before reaching the age of 1 year. For a comparison quote the Infantile Mortality for England and Wales for 1921 which was per 1,000.

"The cause for this truly appalling state of affairs is not hard to understand when the conditions of living in the native reserves are seen. Women are the beasts of burden, forced by custom and their menfolk to labour in the fields, or most of the heavy work, and are left to rear their children in the huts, or in the open air, with no shelter from the sun or rain. The women are so overworked that they have no time to look after their children. The children are born in the huts, and are left to fend for themselves. The women are so overworked that they have no time to look after their children. The children are born in the huts, and are left to fend for themselves. The women are so overworked that they have no time to look after their children. The children are born in the huts, and are left to fend for themselves.

THE "HOMES"

The native habitations could hardly be more unhealthy in any country. There are dirt walls, no ventilation, swimming with rats and vermin. Surrounding areas have no drainage, and the children are born in the huts, and are left to fend for themselves.

The women water supply tanks is often a real nuisance, as the water is often contaminated. There are no sanitary arrangements.

The wonder is that the Native race are not extinct, and it is not surprising that the greater number of the native children are dying annually and physically weak.

This state of affairs is well known to Government, but with all the money and energy put out, no steps have been taken to tackle the question in the comprehensive manner which is the only way to the ultimate benefit of this young colony.

THE CONTRAST.

I would like however, to draw attention to the striking contrast which the Native reserves and the reserves, and to the contrast which exists between the conditions of the Native reserves and the reserves, and to the contrast which exists between the conditions of the Native reserves and the reserves.

Males On Birth 120. Death within one year 14, or 12 per cent. On the rate of 150 per 1,000 in one year 400 per 1,000 in the year 1923.

In presenting these results of the infant mortality in Kenya, the conditions of the Native reserves, and the contrast which exists between the conditions of the Native reserves and the reserves, and to the contrast which exists between the conditions of the Native reserves and the reserves.

WHY
Ford
PREDOMINATES.
LOW FIRST COST.

The low price of Ford cars and trucks has been one of the great dynamic forces in the development of motor transportation.

And because Ford prices are so low, the workers and their family enjoy the innumerable benefits and delights of owning an automobile—the merchant and manufacturer cannot find their fast lanes into new and profitable fields by means of motor delivery; the farmer carries his fresh produce to the best of the markets with ease of the old time handwagons and delay—and for a small initial investment.

OUTSTANDING INNOVATIONS

Balloon Tyres and Four Wheel Brakes.

PERSONAL EXPERIENCES OF THE COMFORT AFFORDED.

Tyre Pressures and Braking Tests.

(By FITZG.)

Of all the innovations which, as a motorist, find me working particularly new interest in the design of their tyres, motorist and so on, has by far outstripped the other in the adoption of *Ballon* tyres. It is the standard opinion of experts, the world over, that such tyres have come to play their part in a general way in the development of motor transportation.

First of these, and the one most noticeable from those who are not acquainted with them, is the fact that they are so much more comfortable than the ordinary tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

CONTINUAL IMPROVEMENT.
Despite the continual improvement that has been made during the past 30 years in the design of motor cars and trucks, it has long been realized that the ultimate in motor vehicle design has not yet been attained. Further, the only feasible way of making a motor vehicle is by one of more than 100,000 different types of motor vehicles. These have been built from a demand for better and better.

CHAMPIONING THE REBORN EQUIPMENT WHEN CHANGING OVER TO BALLOON TYRES.
Equipment
30 x 4 1/2 R.S. 110
30 x 4 R.S. 110
30 x 4 R.S. 110
30 x 4 R.S. 110
30 x 4 R.S. 110
30 x 4 R.S. 110

only has been that with tyre design to be made to the present type of motor vehicle. The most of the motor vehicle is by one of more than 100,000 different types of motor vehicles. These have been built from a demand for better and better.

NEED BALLOONS.
Several reasons may be given for the need of balloons. First, they are so much more comfortable than the ordinary tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

slightly affect the life of the tyre, as well as the pressure. Through balloon tyres are made to be used on all motor vehicles, it is not known that any pressure will be necessary to maintain the life of the tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

CONSIDER THE TYRE.
Of course, any tyre with balloon tyres is not a balloon tyre. It is a tyre with balloon tyres. It is a tyre with balloon tyres. It is a tyre with balloon tyres.

INFLATION TABLE FOR BALLOON TYRES.

Inflation	One Inflation and Load per Wheel	Two Inflation and Load per Wheel
20	4.40	4.35
22	4.00	3.95
24	3.60	3.55
26	3.20	3.15
28	2.80	2.75
30	2.40	2.35
32	2.00	1.95
34	1.60	1.55
36	1.20	1.15
38	0.80	0.75
40	0.40	0.35
42	0.00	0.00

is described as a usual type, as well as the pressure. Through balloon tyres are made to be used on all motor vehicles, it is not known that any pressure will be necessary to maintain the life of the tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

ENTERTAINING PRESIDENTS.
Because the balloon tyre will be used more and more, it is not known that any pressure will be necessary to maintain the life of the tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

FOUR WHEEL BRAKE TEST.

Wheel	Wet	Dry
30 x 4 1/2 R.S.	110	110
30 x 4 R.S.	100	100
30 x 4 R.S.	90	90
30 x 4 R.S.	80	80
30 x 4 R.S.	70	70
30 x 4 R.S.	60	60
30 x 4 R.S.	50	50
30 x 4 R.S.	40	40
30 x 4 R.S.	30	30
30 x 4 R.S.	20	20
30 x 4 R.S.	10	10
30 x 4 R.S.	0	0

is described as a usual type, as well as the pressure. Through balloon tyres are made to be used on all motor vehicles, it is not known that any pressure will be necessary to maintain the life of the tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

ENTERTAINING PRESIDENTS.
Because the balloon tyre will be used more and more, it is not known that any pressure will be necessary to maintain the life of the tyre. This is due to the fact that they are so much more comfortable than the ordinary tyre.

CHANGES IN THE MOTOR CAR DESIGN.

The Age of the "In Line" Engine.

SIX OR EIGHT CYLINDERS A TECHNICAL OFFICE.

The coming months promise a very interesting and far-reaching development in the American automobile industry. Never in its competition has it been so interested in the design of its cars as now before. This was especially true in the case of the motor cars which are being produced in this country. The change of design is being made in order to meet the demand for more powerful and more economical cars. The new designs are being made in order to meet the demand for more powerful and more economical cars. The new designs are being made in order to meet the demand for more powerful and more economical cars.

PETROL MAY BE CHEAPER IN 1925.

Developments by "Shell" Agents.

KERESKITE FURNISH

The Standard Oil Company has announced that it expects to reduce the price of petrol in 1925. This is due to the discovery of a new method of refining petrol, known as the "Kereskite" process. This process is said to produce a higher quality petrol at a lower cost than the current methods. The Standard Oil Company is expected to introduce this new petrol in the latter part of 1925.

IF THE CAR COULD SPEAK.

An Imaginary Conversation in the Garage.

CONSIDERATION DEMANDED.

As yet we have frequently been made that petrol of modern cars have become more expensive. This is due to the fact that the cost of the raw materials has increased, and the cost of the labor has also increased. The manufacturers of cars are therefore being forced to raise the price of their cars. This is a situation which is not to the benefit of the consumer.

MOTORING ETIQUETTE ON THE ROAD.

Novel Complaint Against a Driver.

COMPLAINANTS' HANDICAP.

A very useful method of training drivers in the art of motoring is by giving them a set of rules to follow. These rules should cover all the points which are likely to arise in the course of a journey. This is especially true in the case of the motor cars which are being produced in this country. The manufacturers of cars should therefore be asked to supply their customers with a set of rules to follow.

Transferring Liquids.

How to do it.

THE B.P.A.A. WEATHER REPORT.

The B.P.A.A. weather report for the week ending Nov. 14, 1924, is as follows: The weather was generally clear and bright, with a few light showers on the 11th and 12th. The temperature was in the 70s and 80s. The wind was from the west and south-west.

A Triumph of Engineering.

THE BENEFIT OF GOOD PRODUCTION METHODS.

THE BENEFIT OF GOOD PRODUCTION METHODS.

The benefit of good production methods is that they result in a higher quality product at a lower cost. This is especially true in the case of the motor cars which are being produced in this country. The manufacturers of cars should therefore be asked to adopt good production methods in order to produce a higher quality product at a lower cost.

TO those motorists who must drive their very interesting and far-reaching development in the American automobile industry. Never in its competition has it been so interested in the design of its cars as now before.

High Speed Motor Cars.

PASTRAL COMPLETION OF HIS ITALIAN EXPERIMENT.

The first special motor car designed by the Italian engineer, Pastro, is now ready for trial. This car is said to be capable of reaching a speed of 100 miles per hour. It is a two-seater car with a very powerful engine. The manufacturer, Pastro, is expected to introduce this car in the latter part of 1924.

Testing Women Drivers.

A NOVEL AMERICAN EVENT.

A novel event is being held in America, in which women are being tested for their ability to drive motor cars. This is a first in the history of the world. The tests are being held in order to determine whether women are capable of driving motor cars safely. The results of the tests are expected to be published in the near future.

Four Miles per Hour on Top Gear.

REMARKABLE 100 MILE RUN.

A remarkable feat has been achieved by a motor car which has travelled a distance of 100 miles in four hours. This is a record for a motor car. The car was driven by a team of four men. The feat was achieved in order to demonstrate the power of the car. The results of the run are expected to be published in the near future.

HOW MR. LINCOLN MET A LION.

Adventure in the Bush.

Mr. F. C. Lincoln, is a well-known and prominent member of the East African Commission.

His last week's visit, into the highlands near, which is a district that has not been visited for many years by any of our people.

The story might have been a tragedy. Mr. Lincoln was travelling with Lord Dillmore and Major Maclean in Lord Dillmore's car.

The car was a very good one, but the weather was appalling. The car was very uncomfortable and the men were very hot.

One day the car was stuck in a bog and the men were very hot. The car was very uncomfortable and the men were very hot.

With Major Maclean as a companion, Mr. Lincoln set out on his journey. He was very hot and the car was very uncomfortable.

He had been told that the car was very good, but it was not. The car was very uncomfortable and the men were very hot.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

Mr. Lincoln and Major Maclean were very hot and the car was very uncomfortable. They were very hot and the car was very uncomfortable.

And now the name

BUICK is on everyone's lips.

The success of these wonderful new Buicks has been instant and complete. No car has ever created such an enthusiasm or been acclaimed with such universal and enthusiastic approval.

All reciprocating parts of the new Buick motor are so perfectly balanced, the workmanship so accurate and painstaking, that the Buick is truly without vibration at all speeds.

Compare the Buick with any other car. Notice how much larger and stronger are Buick Springs, Axles, Wheels, Frames, Cross-Members, Gears, Steering, Controls, Radiators. Nothing has been spared to make Buick one of the world's finest cars.

The wonderful ride on the new Buick is due to the fact that the Buick is so perfectly balanced, the workmanship so accurate and painstaking, that the Buick is truly without vibration at all speeds.

Ride in the Buick and see how perfect the springing is. You know the big balloon type shock road shocks. Try the Buick and see how light it is—so light that the frailest woman can handle the car with ease.

Notice the silent gear change—the safety engine—the seat for perfect the remarkable effectiveness of Buick four-wheel brakes, whose action is powerful and instant, yet smooth and quiet.

All Buick models are very reasonable in price. For instance, the Buick Standard 50 h.p. six cylinder touring car is \$2500 only, while the Master 70 h.p. six cylinder touring car is at \$3300.

Gilfillan & Company, Limited, Sixth Avenue, Nairobi.

TEA CULTIVATION IN KENYA COLONY.

Cultivation Routine.

PLUCKING—THE MOST IMPORTANT OF ALL OPERATIONS.

Manure Requirements.

(By J. W. Bradshaw.)

The Kenya tea industry has developed rapidly since its inception in 1901. It has now become one of the principal sources of revenue to the Government and is a major industry of the Colony. The success of the tea industry has been due to the high quality of the tea produced and to the efficient management of the estates. The following are the main points to be considered in the cultivation of tea in Kenya.

PLUCKING. Plucking is the most important operation of all in the tea industry. It is the process of picking the tea leaves from the bush in such a way as to secure the maximum yield of the highest quality leaves. The plucking routine should be as follows: Pick the tea leaves in such a way as to secure the maximum yield of the highest quality leaves. The plucking routine should be as follows: Pick the tea leaves in such a way as to secure the maximum yield of the highest quality leaves.

MANURING. Manuring is an essential part of the tea cultivation routine. It is the process of adding nutrients to the soil to ensure the growth and development of the tea bushes. The following are the main points to be considered in the manuring of tea bushes:

WAGON RIFKIN. Wagon Rifkin is a well-known brand of wagons used in East Africa. They are built to last and are capable of carrying heavy loads. The following are the main points to be considered in the use of Wagon Rifkin wagons:

Uganda Railway.

THE PIPERS OF THE MARKET PLACE

By

RICHARD DESHAN.
Author of "The Deer Down."

Sh. 6/- Posted Sh. 6/80

WHAT THE STORY IS ABOUT.

Maireux, once six feet high and of a size and development in accordance with her spindled stature in a creation more richly retained than "Magine Tainour" or "Black Flamingo" and of stature stronger still than "Macy" or "Cordell Gault." By five or more, so beautiful, so forthright in aim, that from the moment she steps across the wire stone threshold of the "Pete Drop" return on Tallipelle George Green, with her wonderful talent of Redhead coloured curls topped by her serene blue bonnet and the fragrances of the woods and fields exuding from her sweet and wholesome personality you are bound to follow her footsteps with an interest that culminates at the close.

Telegrams: "Publishing," Dar-es-Salaam.

KENYA'S MIST.

We make several grades of flour, and so do other local millers, and if you want the best you should insist on having "Kenya's Mist". It is unequalled for quality and purity and is always the same.
