NYASALAND TRANSPORT. Committee Report.

The principal recommendation of the Department's Committee is pointed out in 1916 by the Colonial Secretary, and the various matters connected with the improvement of communication in Nyasaland have been made public, but it is understood that the report will not be published, as it deals with confidential matters. The recommendations that have been made have been given in the form of a memorandum to the Secretary of State, and the Secretary of State has agreed to the various matters connected with the improvement of communication in Nyasaland.

To report to the Zambesi bridge committee above the view that has been consistently put forward in this Department, and has also been supported recently by Mr. Graydon, after a personal examination of the problem in situ, and Lord Lugard in the address to the Nyasaland Association, and a copy of the report of the Engineer in Charge of the Zambesi Railway, and a copy of the report of the Engineer in Charge of the Zambesi Railway, and a copy of the report of the Engineer in Charge of the Zambesi Railway.

It is hoped that an early solution of the problem will be reached. The Committee has been for some time in the process of preparing a report on the subject, and it is hoped that an early solution of the problem will be reached. The Committee has been for some time in the process of preparing a report on the subject, and it is hoped that an early solution of the problem will be reached.

LAKE ETHERIA

In the case of the proposed extension of the railway to Lake Etzera the committee recommends that further consideration should be given to the possibility of a route which would connect Lake Etzera with the Victoria Nile, and it is suggested that a survey should be made of the route.

BOOKS WORTH READING.

A GAME HANGERS NOTEBOOK

By **Blaylock Percival.**
 It is doubtful whether anyone has ever had better opportunities than Mr. Percival for studying big game in the East African mountains. In these days, in Kenya Colony, for over twenty years, his opportunities have been both varied and varied. Mr. Percival's book is packed with information on the habits of the quarry, which will be of interest to the student and the sportsman alike and simple. The photographs by himself and Mr. Stephen Johnson, which the book is illustrated—on pages—
 Price Shs. 20/-, Posted Shs. 20/0

MOTOR

IMPROVING THE CAR.

Importance of Valve Adjustment.

Working Together.

INSURANCE COMPANIES.

KEEPING RATES DOWN.

Developing Extra Power.

One of the most prominent defects in a motor car is the lack of power. This is usually due to the fact that the valves are not properly adjusted. The valves are the means by which the fresh air is drawn into the cylinder and the burnt gases are expelled. If the valves are not properly adjusted, the engine will not run smoothly and will not develop its full power.

The valves should be adjusted at regular intervals. The first step is to check the valve clearance. This is done by turning the engine over and measuring the gap between the valve stem and the valve seat. The clearance should be .005 to .010 inches.

Next, the valves should be adjusted. This is done by turning the valve adjusting screw. The screw should be turned until the valve is just closed. Then, the valve should be opened and the clearance should be checked again.

It is important to note that the valves should be adjusted in pairs. If only one valve is adjusted, the engine will not run smoothly. Also, the valves should be adjusted in the order in which they are numbered on the cylinder head.

"SCISSORS AND PASTE."

While you may think you will not use it, this device should be in every home. It is a simple device which will cut and paste anything you wish. It is made of metal and is very durable. It is also very easy to use. You simply place the paper in the device and push down on the handle. The device will cut the paper and paste it together.

It is a very useful device and should be in every home. It is also very cheap. You can get it for only a few shillings.

It is estimated by the Ministry of Transport that the losses of more than a million multiplied motor vehicles equipped on December 31 in Great Britain.

In Germany, motor-vehicles under 1000 cc and four-wheeled under 200 cc are taxed at the rate of 10/- per year. The German authorities order the two-wheeled motor-vehicles under 500 cc to be taxed at the rate of 5/- per year.

At the moment, the tax on motor-vehicles is a very important source of revenue for the Government. It is also a very important source of revenue for the local authorities.

The valves should be adjusted in pairs. If only one valve is adjusted, the engine will not run smoothly. Also, the valves should be adjusted in the order in which they are numbered on the cylinder head.

It is important to note that the valves should be adjusted in pairs. If only one valve is adjusted, the engine will not run smoothly. Also, the valves should be adjusted in the order in which they are numbered on the cylinder head.

BOOKS WORTH READING.

A GAME RANGERS NOTEBOOK
By
A. Blagden Parnell.

It is doubtful whether anyone has written a better sportsman's notebook than Mr. Parnell's for reading by game in the East African forests. As Game Ranger in British Colony for over twenty years, his experiences have been both interesting and varied. Mr. Parnell's book is packed with information on the habits of his quarry, which will be of interest to the naturalist and the sportsman both. The photographs by himself and Mr. Martin Johnson which adorn the book are excellent—very good.

THE CONSCIENCE OF GAVIN BLAIR.
By
W. E. Morris.

"Through the sudden death of an uncle Mr. Blair has come into a large fortune. Subsequently a letter is found in which the uncle expresses his intention of leaving the bulk of his own estate to Gavine. The latter's legal rights are to be investigated to see if he has any claim on the inheritance of his uncle's estate and to see if he has any claim on the inheritance of his uncle's estate."
