NO ORDINARY typewriter can do the handiwork of the explorer's life. That's why nearly every explorer carries a Corona in preference to any other machine.

Corona went to Africa with Col. Roosevelt in 1909 and to Brazil in 1916 when he explored the "Mystery River". Corona was with Dr. Ernest Shackleton on his last fatal day for the polar and spent 270 days under ice and snow with the MacMillan Arctic Expedition.

IF you want a typewriter that will stand hard treatment, buy the one typewriter with proved durability—Corona. Please see for a demonstration. E.A. STANDARD Ltd. P.O. Box 188 NAIROBI.

STRANGER than FICTION. No ordinary typewriter can stand the work of a professional's life. This is why nearly every editor carries a Corona in preference to any other machine. Corona was first made with Col. Roosevelt in 1890 and in Brazil in 1916 when he explored the "Mystery River." Corona was with Sir Ernest Shackleton on his last fatal dash for the pole and spent 270 days under ice and snow with the MacMillan Arctic Expedition. If you want a typewriter that will stand hard treatment, buy the one typewriter with proved durability—Corona.

STRANGER than FICTION

NO ORDINARY typewriter can stand the hardships of the explorer's life. This is why nearly every explorer carries a Corona in preference to any other machine. Corona was born in Africa with Carl Roosen in 1907 and in Brazil in 1916 when he explored the 'Mystery River'. Corona was with Sir Ernest Shackleton on his last fatal dash for the pole and spent 270 days under ice and snow with the MacMillan Arctic Expedition.
