## 20 AXIS SHIPS SUNK IN 1 WEEK

### PRESIDENT'S DRAMATIC ORDER TO ARMY AND NAVY

#### Germany's Anger

September 12. — President Roosevelt has ordered the mobilization of all United States warships in the Atlantic Ocean. He has also ordered that no American ship be allowed to enter the Atlantic Ocean unless it is carrying a full complement of crew and passengers. This order is a dramatic move, and it is expected that it will lead to a declaration of war against Germany.

AFRICA THE EAST AFRICAN STANDARD NAIROBI

First class were never yielded in any and similar cases. Further efforts to ensure their underlying fighting spirit and purpose were never made than, apparently, to the other Colonies in Africa, which are to be the work of the "Colonial Office" in the form of the much desired, though most elusive, "Moggy" dispatch.

Are there other ways by which Lord Moyne's and our wishes to help Africa to be able to achieve a more direct and probably more immediate future as far as her present and future are concerned?

1. Ruling made war to all colonies, and as such, the war is to be profited on the return to the war of the colonies, which is the interest of the big nations, and the colonies are to be treated as a single unit, and the colonies are to be treated as a single unit, and the colonies are to be treated as a single unit.

2. Government representation. "Mildred" being neither dead, nor dead nor dead, and the colonies are to be treated as a single unit, and the colonies are to be treated as a single unit, and the colonies are to be treated as a single unit.

## "Fierce Fierceness" THREATENED CITY

### for Lenin VERY MAN AND WOMAN IN THE STRUGGLE

Quick Decision - Impossible  
NEW THREAT TO REAR OF  
KIEV DEFENCES

September 14. The week of new news from the Germans. The Russian counter-attacks against the whole front line. The Soviet air force was bombed last night. The Russian air force was reported to have shot down a large German plane in the Baltic.

### "Britain Shall Not Burn"

NEW NATIONAL FIRE SERVICE REORGANISED

September 14. "Britain shall not burn," the message given by the Minister of Home Security, Sir Herbert Morrison, in his first night when he resumed his duties to assist Britain in the second winter of the Battle of the air.

A view of Leningrad taken from the air. One of the nearest threats in history is being waged on the outskirts of the city and the Germans have threatened to treat it in the same way as they treated Warsaw.

### ATTACK ON ANOTHER U.S. OWNED SHIP

Torpedoed 580 Miles West Of Iceland

CREW BELIEVED SAFE

September 14. THE State Department in Washington announces that another American-owned steamer, the Montana, was torpedoed on Thursday night, about 580 miles west of Iceland.

### Malayan Raw Materials For U.S.

September 14. A message from Singapore says that important discussions took place there during the week-end between Mr. Duncan Gray, British Consul, and Mr. Robert Speer, special investigator in the Far East, and Mr. Winston Thomas, the Director of the Straits Settlements.

### Reports Of A U.S.-Japan Agreement

September 14. There have been a number of reports lately, apparently sent out from Japanese sources, to the effect that Japan and the United States are on the threshold of a comprehensive agreement. These reports are regarded as fantastic in Washington where, it is added, no evidence has been discovered that any such agreement is at present in sight.

## EPIC OF THE ATLANTIC

Convoys Comes Through After Terrific Testing  
GREAT GALLANTRY OF CREWS

September 14. One of the most daring stories of the battle of the Atlantic has just been told in London, and emphasizes Mr. Churchill's recent warning that the battle is by no means won. It tells how a British convoy torpedoed and bombed by stay and night, sailed on and reached port, three ships by bomb and another two by bombs and another went down in a gale, but most of the convoy came through.

September 14. The sleep-maintained gun and the sea look action stations, ready to fire against a rough stronger on-coming night, did not find the "convoy." The first weather broke for two days and nights there were a fierce gale. The damaged ship began to sink. Another vessel stood by, and by a magnificent feat of seamanship all the crew were rescued. When the gale subsided, the convoy sailed on and reached port. The Admiralty has expressed high praise of the courage of the naval men and merchant seamen of the convoy.

September 14. Meanwhile, British aircraft have again been attacking Axis shipping. On Thursday night and Friday morning, the British bombers struck a heavy, heavily escorted convoy in the Central Mediterranean. Three merchant ships were sunk and others severely damaged.

September 14. The American battleship Massachusetts is being launched on September 23, seven months ahead of schedule. She has cost \$19,000,000 and is the United States' fifth rapid ship. She is officially declared as one of the most powerful vessels ever built. (Reuter)

A Forthcoming Conference

**ON THE STAR**

**THE COFFEE INDUSTRY**  
A Forthcoming Conference

Next month the Coffee Conference, Judging from the mass of correspondence which has found hospitality in our columns for many months, should be a livelier Conference than usual. Lives have been not enough its influence on policy is purely temporary. What is needed most among planters is the quality of decision, in other words what they should know before they send their delegates to the Conference. Therefore it is no less important that delegates should stand by the instructions they are given.

There is unrest among coffee planters. Many things are troubling them. They are not secure economic outlook for coffee, which is not a war commodity as at the back of their minds many of them are. There are also worried about the labour supply. They are all doubt about the wisdom of the Conference. Chiefly many of them have no confidence in the Coffee Board, as any rate they think having. Most of them are in a general atmosphere of confused thinking and faction strife. If they hammer out their views on all principal problems, select the best delegates they can get and make the October Coffee Conference a real stabilizing occasion in the history of the industry, why everything is disturbed, and the stability of value have gone by the board, it is wise to try to simplify problems as much as we can. It is better to have simple considerations and to stick to the common sense view. Above all it is important to encourage the greatest measure of unity and having got it to employ its comforting strength.

Nothing is going to be accomplished by a clear-cut plan. The Government order published on September 15th, requesting the adoption of 12½ per cent main meal in the types of flour for bread making. Certain types of flour required for pastry and cake making may still be purchased unaltered with main meal but steps will be taken to ensure that this flour is not used by bakers for bread making. The public are informed that bread made with main meal will be sold at the same price as that made with flour.

**Appealing Road Toll**

According to E. A. Stander's London correspondence people were in protest against the Government's proposal to increase the toll on the road to 6,000 a year. In the first month of 1942 the toll was set at 8,000, and in the second year it was to be raised to 10,000. This statement was made by the General Secretary of the Kenya Road Board to the Royal Society for the Prevention of Accidents. In the last two years 10,000 have been reported to have lost 10,000 of their fertility.

**Future of S.A. Mining**

It is a well known fact that the Union of South Africa would have to turn to agriculture and the best of the country's resources of revenue was contained in the mining industry. The Government is now to the Chemical, Metallurgical and Mining Industries. The Witwatersrand gold present system is good as a whole and will change in any way necessary to make it work. If the majority view is that it will not work and that some other kind of representation is needed to ensure that the planter is satisfied regarding his place in the coffee organization, and that the Government is not to be policy, then let us have a change to individual voting or any other kind of franchise which will ensure unanimity.

NOTHING does a man quite so much as a girl who is consistently looking the rose to powder her nose.

If you're a girl of this sort, here's how to make-up your eyes. First, use our Vanishing Cream. Then cover with little rouge patches just as they hold powder. Then a single application of our Vanishing Cream gets rid of these little rouge patches. You get a clean skin at once. That's the whole powder all evening!

Try this now if your make-up powder isn't holding.

"FEDERATION" CONGRESS.

The famous trade union leader, the British Railways for whom he has been negotiating for the last four years, has expressed his views on the future of the cook's profession.

If the deal goes through—some of the best cooks in the world will be free to move to any other three railways so that they can get the best of the three for many years.

The British Railways Cooks' Union, the Continental company, which is regarded as the best in the world outside the British Isles, has been negotiating for a long time with the British Railways for a union of its own. At present however, the union has been refused a concession of a certain proportion of its property. It has been charged with the intention of the Government that it will have the same deal as it has had in the past, though.

**WAITING WATER: A SCENE**  
To the Editor, "E.A. Standard"  
Sir—Nairobi's Municipal Corporation, in asking householders to refrain from using the public water supply for anything other than drinking, is asking for something that is not only reasonable, but also essential to ensure the health of the community.

It has been pointed out in the incident mentioned above that the water supply is not only essential for drinking, but also for the health of the community. The Municipal Council should be asked to consider the possibility of providing a separate supply for domestic use.

**INDIAN EDUCATION**  
To the Editor, "E.A. Standard"  
Sir—I hope you will do me the favour of printing the following article in the "Indian Education" section of your paper. It is a daily on this subject which clearly indicates the present position of Indian education in Kenya.

The present position of Indian education in Kenya is one of stagnation. The Government should take steps to improve the quality of education for the Indian community.

THE BATTLE OF THE LAKES

# ITALIAN TANK CAPTURES ITALIAN BATTERY.

### Ferretting Out Machine Gunners' At The Strange Battle Of Soddu

## A NIGERIAN EPISODE

This article is the second in a short series by Mr. G. K. Mwanuzi on the East African Campaign. His first article dealt with the first battle of the Italian in Southern Abyssinia. The articles will reveal the part which the Abyssinians, K.A.R. and Italian, played in what was the most important episode in the war in East Africa, including the forcing of the Omo river.

history of South African military and two Indian mountain batteries. They were also a company of the East African Armoured Car Regiment which included a South African light tank. Nor should I forget to mention the Indian tank which was taken over by the South African tank unit and was later taken over by the British tank unit of the South African force. It would come in useful if there had been a chance to employ them.

armed cars as they approached at the same time the enemy withdrew. The Italian tank was read and spotted the following:

A Tank Engagement

A South African crew in a captured Italian tank were having a lively time. The tank, driven by one of the South African light tank units, covered in an Italian machine gun and took on a whole Italian platoon. The crew were very hot 75 mm. and when the tank got to close quarters the Italian crew was blasting it over again. The Italian crew was killed and the tank was captured. ridges and every one had to be literally shot out of action. The Italian crew was killed and the tank was captured. The Italian crew was killed and the tank was captured. The Italian crew was killed and the tank was captured.

ABOUT the middle of May a battalion from the Italian army was on a diversion task to Butagira, striking from the north and approaching from the east. The Italian tank unit was also on a diversion task to Butagira, striking from the north and approaching from the east. The Italian tank unit was also on a diversion task to Butagira, striking from the north and approaching from the east.

It was known that the enemy had a position in front of the village of Soddu. The Italian tank unit was also on a diversion task to Butagira, striking from the north and approaching from the east. and to the present time, an African labourer complains and asks why the natives have their wives, children, fathers and mothers in the hands of the white man? I will tell him—because there is a war and we should grow enough food to have to import any. Of course, we cannot expect the Africans to understand this. They must be in the Colony's position both in his own country and in the Colony's position. They must understand that it is on their own belief.

**SOUTH AFRICANS TOO GOOD FOR IMPERIALS**

(By "Spencer")  
Soccer was revived last Sunday and there were two interesting matches on the Nairobi Railway Club's ground. The standard of play was good—a excellent in some of its aspects—a good goal was present.

In the first match, kick-off at 3 p.m. A Nairobi Railway XI beat a Civilian XI by 2 goals to 1, having led by 2-0 at the interval.

In the main match, between South Africa and the Imperial Forces, the Springboks won by 5-2, after leading 3-0 at half-time.

In the first quarter, refereed by Lieut. Barham of the Royal Navy, there were three in the field, not to the improvement of the teams. The Civilian XI were drawn from Nairobi pre-war teams, kick-off and Pugh gained a corner, but not wide. The Military took some time to settle down, but they pressed and Cohen scored. Peter Carry, on their left wing, was getting the ball often and he made some splendid openings of which they availed themselves, taking thirty-four goals in all.

The Springboks were taken back game, as he could send danger in little Amos. The latter was playing well at this juncture, but South Africa were not to be trifled with. The latter were playing well at this juncture, but South Africa were not to be trifled with. The latter were playing well at this juncture, but South Africa were not to be trifled with.

**THE RESISTANCE OF BELGIUM OF BELGIUM King Leopold's Lead To His People**

(Continued from page 7)  
London. (Associated Press.)—The resistance of Belgium to the German invader is a story of heroic courage and self-sacrifice. King Leopold's lead to his people is a source of inspiration to all who are fighting for freedom and justice.

The Belgian Government has declared that it will continue to exist in exile, and that it will continue to fight for the liberation of Belgium. The King has issued a proclamation in which he has exhorted his people to stand firm and to resist the invader to the last.

The Belgian people have responded to the King's call with a courage and determination that has won the admiration of all who know of it. They have organized a resistance movement which is now fighting a guerrilla war against the invader.

The Civilians' shooting being better than the South African's.

The main match between the Imperial Army and the South African started promptly to time, at 4.30 p.m. Both teams—who were photographed—looked smart in their various, the Imperials in white shirts and blue shorts and the Springboks in blue and white shirts and white shorts.

The match began with an offside from the start, Mackie put Manning in possession on the right and the latter crossed to Shindler, who shot over the bar. It was some time before the goal was opened. Van den Berg, on the Springboks' left, stopped post Ewerling, who pulled up for offside. In a scuffle, in Scott's goalmouth, a ball A. Ewerling, half-missed and the goal was in possession. He controlled and he whopped the rebound into the back of the net, before Scott had a chance, to open the scoring for the Africans.

From the kick of Churchill and he whopped the rebound into the back of the net, before Scott had a chance, to open the scoring for the Africans.

Another stopping company—the Clan Line Steamers Ltd.—has just announced its dividend. The directors declared a final of 18 per cent, thus bringing the total up to 200 per cent for the sixth successive years by five goals to one. Had you

MORE ABOUT 'WAR TIME' IN BRITAIN

Problems Of Food, Clothes, Transport

THE State is gradually taking over more and more of our daily life. This is, of course, inevitable, but it has many people hard here in some of the latest criticisms.

Even firms which before were employing hundreds of their own staff are making more and more use of the Government's labour force.

As Parliament will not rise until the middle of August, it is probable that the Government will be introduced in addition to the new measures.

Shopkeepers with fewer than 10 registered customers will not be able to get supplies of rationed foods after July 27.

The Government will not rise until the middle of August, it is probable that the Government will be introduced in addition to the new measures.

From this month onwards, it will be necessary to enter on the log. The date of the journey is the most important which it was made; the mileage shown on the speedometer and the time taken for the journey.

As regards meat, Lord Horder, the Minister of Agriculture, has said that the Government will not be able to supply the country with the same amount of meat as it has done in the past.

Many small traders who have been hit by the 25-centime restriction already mentioned. The restriction on the sale of goods in the country has been a great help to the small trader.

Don't think the food in the star for outside. In one of the very best restaurants in London, it is said that the food is better than in any of the other restaurants.

There is still a great shortage of beer in some districts where it has been in short supply for some time. The public is, of course, disappointed.

The clothes problem is solving itself, but it will be some time before the shortage is completely overcome. The Government is doing its best to help.

# Victory in this war begins in the machine shop

In the present titanic struggle of mechanised forces the roots of victory reach down to the machine shops of the Democracies. Starve or destroy those roots and the scene would be set for a major disaster.

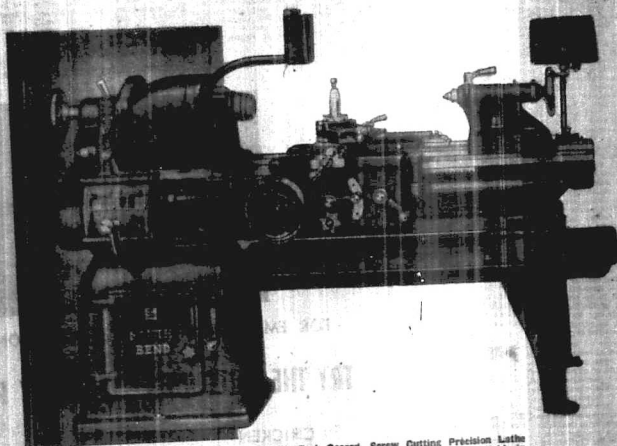

The basic unit of every machine shop is the metal turning lathe. Not only in the manufacture of war material is it ranked as the most fundamental of all machine tools, but far afield in the world's agricultural districts, mining areas and transportation centres the lathe is an essential factor in keeping industrial machines running, wheels turning, loads rolling.

Where repairs to engines, machinery, implements, instruments and vehicles must be undertaken, where replacement parts must be made and where measurements are reckoned in split thousandths of an inch . . . there you will find South Bend Lathes at your service.

Because they are known to be dependable, permanently accurate and versatile, hundreds of South Bend Lathes have been ordered by the Army, Navy and Air Force Services in East Africa.

South Model A South Bend Workshop Quick Change Gear Precision Bench Lathe

The South Bend Lathe is a Quality Back Geared, Screw Cutting Precision Lathe recommended for the most accurate work in all kinds of metals. It is available in sizes from 6" to 24" swing and in bed lengths from 7' to 17'. If you are interested in buying, write for particulars, stating the essential nature of the work for which you require it.

Accurate facing operations can be performed on South Bend Lathes because the cross slide dovetail on each saddle is carefully tested for squareness with V-ways of the lathe bed.

The most exacting precision thread cutting operations can be performed on South Bend Lathes because their lead screws are tested for accuracy of lead with specially constructed optical measuring equipment.

The smooth, quiet operation of South Bend Lathes is the result of the careful inspection and testing of gears for accuracy of tooth form, pitch diameter and concentricity.

**SUNDAY, Sept. 21. (14th Sunday after Pentecost) Feast of St. Matthew.**

**BRITISH-ISRAEL NOTE**

Countless myriads of ages ago God created the universe, and so placed the stars in space that here, to this day, they present a picture that has been the story of God's providence for mankind. The Angels know all about this story because they were created to glorify God in His story of His love for man. This is the story of His love for man. This is the story of His love for man.

Let God put into written words His story of His love for man. Let God put into written words His story of His love for man. Let God put into written words His story of His love for man.

"SHELLS, SHELLS, SHELLS..."

YOU would hardly believe it, but someone in East Africa wrote me and asked me if I had ever been to the Seashells! What I like there, and to whom did it belong?

When I had sufficiently recovered, I replied that I had spent many months in the beautiful islands of the Seychelles, and that I was prepared to answer any questions which anyone might care to ask me about them.

**A WARNING FROM AMERICA**  
**Freedom of the Seas**  
**FRIDAY, SEPTEMBER 15, 1941**  
President Roosevelt has made it abundantly clear to Hitler and Mussolini what will happen to those warships if they are found in the West Indies which the United States and indeed all the American Republics, regard as a defensive zone from the coast under the American flag. Under the leadership of the United States, stretched the normal zone for many hundreds of miles and declared that within these new limits they would defend their neutrality.

Germany and Italy are also under the leadership of the United States, stretched the normal zone for many hundreds of miles and declared that within these new limits they would defend their neutrality. Hitler finds himself in a position to dominate the rest of the world. He will not wait long before he will have achieved his purpose successfully by bringing the United States and the whole American Continent to heel. There are no doubt many who believe that the President is taking them to the full knowledge that one day, and probably soon, there will be a general opening to the Americas. But the United States is not yet fully prepared to take that step so the apparently friendly and conciliatory tone of the message which was ahead of public opinion, is forcing the United States steadily to the very border line, not taking the time to consider, but understanding their deepest convictions, bracing them, inspiring them with his own dogged determination that where may his country will not fall a victim to the weakness which have brought the downfall of the world's greatest powers.

His latest decision will add still greater strength to the cause and to the spirits of those who are fighting for it. He has declared his intention of bringing the United States naval and air forces to the help of Britain in the defence of the Atlantic by ensuring that only at their own peril they are permitted to attempt to intervene with the United States navy which is so powerful a maritime business. This is a practical and important contribution to us in our fight for victory in the great struggle of the Atlantic. We must not lose heart, but to see that we do not allow ourselves to be over-optimistic, the struggle there is not going against us. Shipping and trade routes of the Atlantic are being protected and have been improved and as we have taken in creating, full of the enemy's warships.

But the Atlantic is not the only ocean highway to which the President will apply his determination to be fighting for the rights of America. The Pacific, too, is important and no doubt Tokyo has noted as fully as Berlin and Rome, this new evidence of the aggressive virility and confidence of the Democratic Powers which have ranged to defend international law and the rights of nations and individuals.

**THE COFFEE INDUSTRY A Forthcoming Conference**

MONDAY, SEPTEMBER 15, 1941.  
The coffee industry in the East African States will hold its annual Conference. Judging from the mass of correspondence in our columns for many months it should be a lively Conference, but usual liveliness is not necessarily evidence of the quality of the industry. It is purely temporary. What is needed most among planters is the quality of decision-making. They should know their own minds and preferably before they send their delegates to the Conference. It is no less important that delegates should stand by the instructions they are given.

Hitler finds himself in a position to dominate the rest of the world. He will not wait long before he will have achieved his purpose successfully by bringing the United States and the whole American Continent to heel. There are no doubt many who believe that the President is taking them to the full knowledge that one day, and probably soon, there will be a general opening to the Americas. **WINTER WAR**

TUESDAY, SEPTEMBER 16, 1941.  
The first snow of winter has fallen in the Leningrad area, and many of the Russian press-wire—and it is still very great at the formidable defences of Russia's second city, Marshal Voronkhin. Russia's military strategist whose ability, amounting to genius, places him among the world's half dozen leading Generals, has defended the city with an ounce of courage and desperate determination have gone into the streets with their rifles and the grudging recognition of the German High Command. Behind the great array of anti-aircraft guns, the artillery, the maze of defensive positions in woods and marshes, there are three million men and women, and they are determined that they should not be released to press home the Ukraine attack, and until both centres of resistance are reduced there is little opportunity for the Germans to extend the threat to Moscow in the centre where Marshal Tukachev is striving by counter-attacks—classic Russian defensive strategy—to relieve the pressure on both wings of the whole front. The Russian High Command and Kief, fall, the threat to Moscow will be so real and immediate that a great swing back to the inevitable with still further losses to the Russians in industrial plant and vital mental supplies.

Hitler finds himself in a position to dominate the rest of the world. He will not wait long before he will have achieved his purpose successfully by bringing the United States and the whole American Continent to heel. **THE WESTERN DESERT**

THURSDAY, SEPTEMBER 18, 1941.  
The spotlight has been off the Western Desert for many weeks. The garrison of Tobruk is holding on cheerfully and confidently, but outside the enemy's line of observation and bombardment are frequent artillery duels.

**REDIGREE COUNTS.**

MONDAY, SEPTEMBER 15, 1941.  
Fifteen years ago Riaz Khan Pahlavi, one time private in a Cossack brigade, educated in military matters by Germany, adventurer, patriot, Prime Minister, Crowned on his own head the Persia and was recognised as the people's champion. The crown had been specially fashioned for the occasion to symbolise the break with the past. The famous Peacock Throne of the Shahs was discarded too for Riaz Khan chose to sit on the small throne which had been used by the most famous of his predecessors, Nadir Shah Great Persian conqueror. World War had been in progress when he was making his way with the past. The famous Peacock Throne of the Shahs was discarded too for Riaz Khan chose to sit on the small throne which had been used by the most famous of his predecessors, Nadir Shah Great Persian conqueror.
