

Free outlook for Kenya says minister

Standard Staff Reporter
Minister for Agriculture and Animal Husbandry, Mr. M. N. N. F. U. president

Mr. McKenney, who is in London for the conference of the International Coffee Organisation, warned that Kenya might be unable to maintain her quotas of 70,000 tons of coffee bags, and said: "We will be sorry if we go on to what we have got."

"Our trouble is that smaller quantities, mainly from West Africa and Central America, are feasible of Kenya. The increase in and over-quota based on an agreement formalized in 1962.

"They feel we were given far too generous quotas when we signed the agreement. The I.C.O. mission, after visiting Kenya, awarded an extra allocation, and in effect Kenya through hard bargaining had achieved 40 per cent increase."

Quotas too generous?

"The Minister commented: "The chips are down at the conference and it is only right that the country should know its outlook for the next year in advance. It is going to be a hard fight to keep quotas at their present level for the 1967-68 season, and we might be forced to accept a cut."

ARUSHA AIM NO EASY TASK

The Minister said the conference will be held in Arusha, Tanzania, from August 20 to 25. He said the conference was being held in Arusha because it is a neutral area. The Minister said that the conference would be a hard fight to keep quotas at their present level for the 1967-68 season, and we might be forced to accept a cut.

Pineapples 'under Ministry'

The Minister for Agriculture and Animal Husbandry, Mr. M. N. N. F. U. president
The effect of the declaration that pineapple is a fruit under the Ministry of Agriculture will have serious implications for the industry. The Minister will have to issue licences to all growers and to control the export and import of pineapples.

Health danger

The Minister of Agriculture has announced that a health danger exists in the area of the K. U. I. A. The Minister has ordered a health inspection of the area and has advised the public to avoid the area.

The weather

The weather in Kenya is expected to be hot and dry. The Minister of Agriculture has advised the public to take precautions against heat and dryness.

NO ENUGU OFF THE AIR AGAIN

The radio was picked up again yesterday afternoon after a second 15-minute outage. The outage was caused by a power cut in the Enugu area.

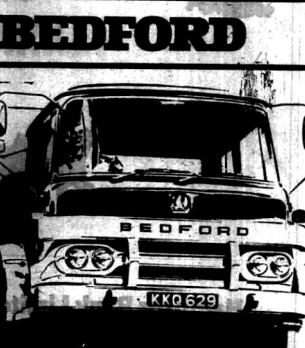

U That not going to O.A.U.

The U.N. Secretary-General, U Thant, will not attend the O.A.U. summit meeting in Kinshasa next week. The Secretary-General has announced that he will not attend the summit meeting.

Fire bombs thrown in Brooklyn

Police received 10 reports of fire bombs thrown in Brooklyn, New York, last night. The police are currently searching for the suspects.

DISCOVERING THE SECRETS OF THE PIT

ONE OF the earth's great secrets, the origin and nature of the **Valley** may be solved as a result of research being carried out by a team of British geophysicists. The peculiar nature of their experiments has led them into many adventures, which, along with what they hope to achieve, are described here by **MICHAEL BOYVILL**.

IT WAS a typical afternoon in the hot season at Barago. The brown waters were perfectly still apart from the occasional plop of fish, and in the distance the blue hills seemed to move slightly in the shimmering heat.

Suddenly the peace was disturbed by a deep rumble long and a felt plume of white spray rose dramatically from the surface of the lake bringing the water to a boil. The violence was only momentary. Within minutes the lake had returned to its former state of placid serenity.

But this is a group of British scientists gathered on a lonely, inhospitable island at the centre of the lake, the excitement was only just beginning. They were on the threshold of discovering one of the earth's great secrets—the origin and nature of Africa's Hill Valley.

The scientists geophysicists from the British and continental universities of Birmingham and London—were being perfected for use in a course for the first time on land outside the Great Lakes of America.

Appropriately enough, the problem they were trying to solve was one which, so they believe, had only occurred before in the ocean. The explosion at Barago, caused by a series of dynamic and recorded 12 miles away for three years of electronic instruments was the result of the work of Dr. Atab Khan, who

is in charge of Geophysics at Leicester University. The problem he set out to solve was one which has fascinated scientists but it had been studied because they felt the difficulties to be overcome were too great.

Basically the problem to which the scientists hope to have the full answer by this time next year is this: It has been established that the earth is divided into a series of plates, each of which moves in relation to the others. The uppermost mobile crust covers all the African continent, the Indian subcontinent, the Pacific Ocean, and the Atlantic Ocean, and 25 kilometres under the continent.

Earth's crust

The large slabs is referred to as the earth's crust, and that below at the mantle. In certain parts of the world, however, the speed in the mantle decreases from 8.1 kilometres a second to 7.8.

There are two areas under world-wide oceanic ridges which run across the Atlantic Ocean, the Pacific and into the Gulf of Mexico. On the crests of these ridges the mantle is thought to be the one in Eastern Africa.

but the location remained. In the East African Rift Valley of the same origin as those in the ocean? If it is, then it would appear certain that it too will one day constitute the centre of an ocean as yet in the process of formation.

The two main problems to be overcome are the inaccessibility of the terrain and local and governmental caution. To be successful the charges had to be placed in a series of 100,000 feet, or 30,000 metres, of the earth's crust. The only way this could be done was to establish a base.

Dr. Khan conceived his idea to test the semi-velocity in the Hill Valley during preliminary surveys three years ago. The methods of raising were well known from oceanic experiments, but no one had

got around to trying them on land. For it is not time to drop huge charges of dynamite from conventional ships, and quite another in very heavy loads and complicated equipment across country.

The two main problems to be overcome are the inaccessibility of the terrain and local and governmental caution. To be successful the charges had to be placed in a series of 100,000 feet, or 30,000 metres, of the earth's crust. The only way this could be done was to establish a base.

Undoubtedly, Dr. Khan began to look around the subject,

Intensely studying the results of the explosion at a testing station 12 miles to the north were Dr. Khan (seated) and Mr. Tom Reilly.

We have something that narrows the Atlantic 1,000 miles (Note its effect on the way to the-USA!)

The Manfreds crash back in ragtime

LAST week I mentioned among others, the new Manfred Mann single, *So Long Dad*, an unorthodox piece of pop with that grow-on-you sort of appeal that is the Manfreds' speciality. The first few plays meant nothing to me. But then, presto! The whole thing clicked. And it's a hit for Manfred and his men — pleasantly predicted.

A rousing ragtime piece, it is not the usual, and is lively. The whole thing clicked. And it's a hit for Manfred and his men — pleasantly predicted.

But for all this, the Manfreds are not to be taken too seriously. They are a pop band, and their music is not to be taken too seriously.

The MANFRED MANN lineup, with singer **Mike D'Aber** — their latest working line the record of a hit.

... and as well as picking out several of the really rapid dancers from further down the chart.

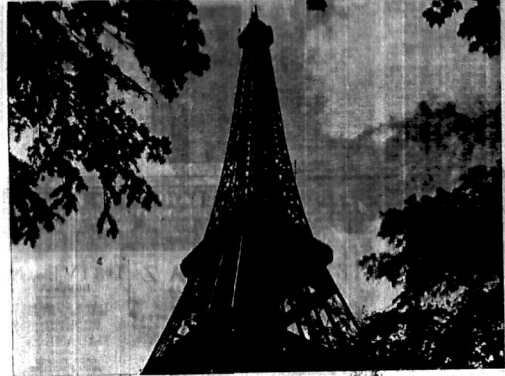

All Number One when they release the *Beats and Zips* EP. And it's not an approximation, as the name suggests, but a genuine hit, but never the bona fide hit.

The Shams have made a...

COLOURFUL LIFE ON AN ISLAND

SUMMER HAS GONE BY George Dallas White (Richmond, N.C.)

OLD Red, once the petting king of the Spanish Highlands, had now old, near blind, still proud, is the real hero of this delightful children's story.

He made the new hero, the boy who was to be the petting king of the Spanish Highlands, had now old, near blind, still proud, is the real hero of this delightful children's story.

He made the new hero, the boy who was to be the petting king of the Spanish Highlands, had now old, near blind, still proud, is the real hero of this delightful children's story.

BRIDGE by Alan Trussett A tactical necessity

TODAY deal from the recent World Team Championship deals weigh in the arguments of those who claim that the increased prevalence of individualism is a sign of a new era in the history of the world.

THE title of the book is probably the German word for bridge, which is a tactical necessity.

THE title of the book is probably the German word for bridge, which is a tactical necessity.

THE title of the book is probably the German word for bridge, which is a tactical necessity.

THE title of the book is probably the German word for bridge, which is a tactical necessity.

Branches at Mombasa, Malindi, Kisumu, Kilifi.

Why are 90 out of every 100 Land-Rovers in East Africa fitted with AVON tyres?

because of what people ask Land-Rovers to do.

Fully-loaded or empty, fast or slow, cross-country, road or track, Land-Rovers sturdily meet every demand made of them in a rugged country. This sort of driving is the greatest test a tyre can have. That's why 90 out of every 100 Land-Rovers are fitted with AVON TYRES.

AVON - FOR BUSINESS AND SAFETY

TEACHERS IN 'SECURE' POSITION

The secretary-general of the Kenya National Union of Teachers, Mr. Stephen J. Kioko, said at a meeting of the union's executive committee that teachers were now in a more secure position since the establishment of the Teachers' Service Commission.

Mr. Kioko was addressing a meeting of the executive committee of the Kenya National Union of Teachers, which was held at the P.O. Secretariat, Nairobi, on Monday. He said that the Teachers' Service Commission, which was established in 1962, had now taken over the recruitment and appointment of teachers.

Mr. Kioko suggested that the Government should consider a wage scale for the teachers based on the review of the public employees' wages and salaries. He said that the Government should also consider a wage scale for the teachers based on the review of the public employees' wages and salaries.

NEW DESIGNS WANTED FOR HOUSE SCHEME

The town engineer, Mr. H. Aggarwal, has submitted to the Social Services and Housing Committee of the Nairobi Municipal Council the design for proposed low-cost rental houses, some of which would be reserved for the Council's junior staff.

He told the Council that the estimated cost for semi-detached houses with an area of 500 sq. ft. was £250, and suggested that details should be worked out on each site. He recommended that £12,000 be utilised towards the construction of 40 houses in the Baituri Moyo area.

The committee recommended that the design should be altered to provide detached houses on each site, and recommended that £12,000 be utilised towards the construction of 40 houses in the Baituri Moyo area.

A competition for tractor ploughing organised by the Agricultural Society of Kenya in conjunction with the Agricultural Department was held in Nairobi in Kenya District. Fifteen drivers took part, and the winner was a Mr. Murgoy who drove a Massey-Ferguson tractor. The winner was a Mr. Murgoy who drove a Massey-Ferguson tractor. The winner was a Mr. Murgoy who drove a Massey-Ferguson tractor.

— K.N.A.

Mr. Murgoy was interviewed by the town engineer, Mr. H. Aggarwal, who said that the design for proposed low-cost rental houses, some of which would be reserved for the Council's junior staff.

DRIVE TO SELL MORE KENYA COFFEE

By **MICHEL HUAS**
 In France, the third coffee-importing country in 1960 are estimated to be 22,000 tons imported by the U.S.A. and 278,000 tons by Germany. The annual per capita coffee consumption of approximately four kilograms in France compares with the record of nine kilograms in Sweden.

Industry increasing at great speed

This total number of retail and wholesale sales points in France increased by 4,231 units in 1960 compared with 6,000 units in 1959, according to the latest survey made by the French Association for Commercial and Statistical Research (AFRESCO) on the evolution of the commercial situation in France.

 Wine Wholesaler Throughout East Africa

The reason of the present high reputation of the French Coffee is well known and the reason for the particular drive for Kenya Coffee, initiated by SOCFINAF, is Kenya's unique position as a world-class coffee producing country. The quality of the coffee beans is excellent, and the coffee is known for its strength and its ability to stand up to the most rigorous roasting processes. This is a great asset for the coffee industry, and it is one of the reasons why Kenya Coffee is so popular in France and other markets. The coffee is produced in the highlands of Kenya, where the climate and soil conditions are ideal for coffee cultivation. The coffee is harvested and processed in a way that preserves its natural flavors and aromas, making it a truly exceptional product.

These figures are most encouraging but they represent only the direct trading from Kenya. France, due to the long history of commercial importation of coffee and tea, has a large market for these products. Kenyan coffee markets in Italy and throughout the world are also growing rapidly. Nevertheless, Kenyan coffee is not just a commodity, it is a product of a country that has a rich cultural heritage and a strong sense of national pride. The coffee industry in Kenya is a vital part of the country's economy, and it is one of the reasons why Kenya is so well-known around the world. The coffee is produced by small farmers who work hard and with care to create a product of the highest quality. The coffee is then exported to various countries, where it is enjoyed by millions of people. This is a testament to the skill and dedication of the Kenyan coffee industry.

Mr. Huas is manager of SOCFINAF, the biggest coffee producers in Kenya.

Made completely anonymous for an increase of 1,000 units in 1960 compared with 2,300 units for retail trade. A figure of 10 per cent which underlines the considerable increase in stationary retail trade.

Kitchen and table measures in special and different in every respect. Coloured, transparent or opaque.

Trade mission happy to assist businessmen

FRANCE'S Trade Mission in Nairobi is at the disposal of any businessman, importer or exporter who is interested in developing trade relations between East and Central Africa and France.

Among those who will be pleased to supply information to businessmen who write, telephone or call at the mission are the three officers pictured here, the Commercial Attaché, Count Renaud de Laforce and M. Gerard A. Roussier, and the Commercial Secretary, M. Adrien A. Gassiot.

M. Adrien Gassiot

Renaud de Laforce was born in 1926 and holds a degree of Doctor in Law (University of Toulouse) and a diploma in Political Science and International Law from the Sorbonne.

Gerard Roussier was born in 1941 and was educated at Le Havre and graduated from the Ecole Supérieure de Commerce. He joined the service in 1962.

60 YEARS OF SERVING EAST AFRICA'S PORTS

COMPAGNIE des Messageries Maritimes, the oldest French line calling regularly East Africa, has established in Paris its new service in East Africa.

Mombasa was the Dinnaah on January 21, 1956, the same vessel called again at Mombasa on her return trip to France.

Through its constant action over the past 60 years Messageries Maritimes have continued the expansion of East Africa countries and its contribution to uphold this policy.

Centuries of wine

WE are now living in a golden age of wine. You are able to buy wine from all over the world. You can buy wine from the most famous vineyards of France.

France produces more wine than any other country in the world. The wine is of a high quality and is well known all over the world.

The most important wine of France is the wine of the Chateau de France. It is a wine of a high quality and is well known all over the world.

An example of the extent of the new French motor vehicle factories in one month of the year compared with the year before.

For industry A motor revolution

1968 was a record year for the French automobile industry. In every indication that this year's output of motor vehicles was produced in the highest rate in the corresponding period of the post-war era.

The French automobile industry produced nearly 5 per cent more cars and commercial vehicles in 1968 than in 1967.

Some 171,000 new cars and 111,000 in the previous April. Vehicles decreased by just over 1 per cent.

Despite growing and making encountered by French producers in many foreign markets because of a decrease in the demand of the international economy, export figures have continued to be satisfactory.

During the first quarter of this year exports of the French automobile industry totaled 218,170 vehicles (according to figures published by producers) compared with 187,555 vehicles during the first three months of 1968, including special vehicles (compared with 170,000) and light industrial vehicles (compared with 21,000).

For the first quarter of 1967 imports of foreign motor vehicles totaled 48,531 vehicles, compared with 34,228 in the previous year.

The decrease in the production of utilitarian vehicles remains the most depressing element in these figures — 12,877 utilitarian vehicles and buses produced last April compared with 20,271 in April, 1967.

The recent decrease in the production and sale of these vehicles is attributed by the Federation of Automobile Producers to a decrease in the activity of the construction industry and to the expiration of certain application of the new fiscal tax regime.

The Federation has just made an estimate of the number of vehicles in

France in 1968. The total number of vehicles in France is estimated to be 11,000,000.

The total number of vehicles in France is estimated to be 11,000,000.

DOWN THROUGH THE DECADES

PEUGEOT MOTOR ENGINEERING

HAS BEEN UNSURPASSED LOOK TO

THE FUTURE WITH MARSHALLS

clever—elegant—original

The Renault 16 is the result of revolutionary automobile design and thought; safety, comfort and elegance being primary considerations. Technically the Renault 16 is a masterpiece of engineering. Its powerful 1500 cc engine attains speeds of over 100 m.p.h., with amazing acceleration. The Renault 16 is suited to long-range fatigue-free travel. The car has independent suspension on all four wheels, differential, air conditioning and the sumptuous reclining seats fit snugly to your body. The interior of the car can be ad-

justed to seven different positions. Each position either enlarges or shortens the boot space depending on your requirements. The new Renault 16 has passenger-car comfort with station-wagon utility. By driving the new Renault 16 you will discover the real pleasure of traveling. The car has exceptional road holding, front-wheel drive, top safety brakes and panoramic visibility. With the Renault 16, Renault France has opened the road to progress and inaugurated a new era of motoring where the car has been made to measure

up to "the man of today's" requirements.

Test drive the Renault 16 today at the Motor Service Co. Ltd. or any branch of the Motor Mart Group.

Sur les routes de France

Above, the purposeful lines of the Citroën DS19 convertible pictured against a typical French background.

Below, the Simca 1501 which will be on sale at the Nairobi Show later this month at the Rootes (Kenya) Ltd stand. The new model is longer than its predecessor and has greater luggage capacity.

Left: The luxurious interior of the Citroën DS19, with the distinctive steering wheel and fully equipped front panel.

Right: The new Simca coupe 1200 S, which can reach a speed of 120 m.p.h., was recently demonstrated on the race track at Montlhéry. It features two separate braking circuits.

An aerial view of the huge Simca Automobiles factory at Poissy.

SIMCA FROM THE HEART OF FRANCE

One of the most outstanding ranges of cars in East Africa today

Simca automobiles are first and foremost a complete range of fine motor cars, appreciated by customers the world over; Simca 1000, Simca 1301, Simca 1501, in their many models. But Simca Automobiles is also the name of one of the largest industries in France: over 1,000,000 square metres of plant, nearly 23,000 employees, over 6,500 distributors and service centres in France and 130 export countries.

Simca's ultra-modern plant is located on the banks of the Seine at Poissy, and the manufacturing techniques applied in the Poissy plant are the surest guarantee of the quality of the products from SIMCA AUTOMOBILES.

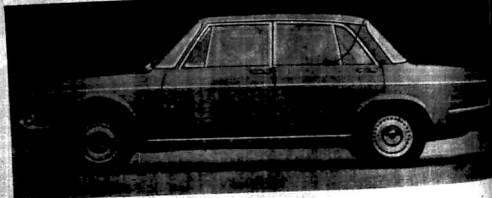

SIMCA 1000. The 1000 with all the extras. • Four doors. • Plenty of room inside. • Fold-down rear seat. • Four-speed, all-synchromesh gear. • Five-bearing crankshaft engine whisks you up to 83 m.p.h. • It's a pleasure to appreciate the safety of the brakes and the comfort of the suspension. Prices: LS. £775. GLS. £825.

SIMCA 1301 and 1501. More beautiful than ever with their new European line, and big, long, low, with all road visibility. Built for speed, they have been designed for long-distance driving. • Four-speed all-synchromesh gearbox. • The suspension is an ideal combination of flexibility and smoothness, comfort and road-holding ability, allowing you to drive tirelessly and safely at high speeds, on bad surfaces, and even in heavy rain. • Disc brakes in front, drum brakes at the rear. • Two engines to choose from. Take your pick: it's all a matter of performance. The Simca 1501 gives still more acceleration and even zippier starts. But both engines are equally sturdy (five-bearing crankshaft) and thoughtfully designed with a 1.2-gallon fuel tank giving them long-range capacity. Prices: 1301 LS £1,030. 1501 GL £1,130.

Simca's ultra-modern plant on the banks of the Seine at Poissy.

Finished

France's silk industry has grown steadily since the end of the war. The production of raw silk in France in 1954 was 100,000 metric tons, compared with 80,000 metric tons in 1953. This represents an increase of 25 per cent over the previous year.

The silk-making industry is a specialized industry, requiring a high degree of technical skill and also in artificial silkworms. The production of silk is a labor-intensive process, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

Linens industry

Mention should also be made of the linen industry, which is the second largest in the world following the U.S.A. In 1954, the linen industry in France produced 1,000,000 metric tons of linen, compared with 900,000 metric tons in 1953. This represents an increase of 11 per cent over the previous year.

France's linen industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

Special ideas

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

CO-OPERATION NEEDED IN AIRCRAFT DESIGN

Continued from Page 10
IV, and new ideas are appearing with the new Mirage IV. All the same, the development of new aircraft requires a new type of co-operation between the manufacturer and the military.

Present S.E.P.R. activities prevent stable liquid projects, especially promising ones. The military is responsible for the manufacture of the aircraft, and the manufacturer is responsible for the design and development of the aircraft.

Cotton areas

It mainly on the cotton industry that the plan region begins to make its mark. The cotton industry is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

Nordway capital

The textile region of the north of France is concentrated particularly on wool. The production of wool is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

France's textile industry is therefore in a position to meet special requirements for special fabrics. The production of these fabrics is a highly specialized industry, and it is estimated that it takes 100,000 silkworms to produce one metric ton of raw silk.

**New nature parks
 for recreation
 and preservation**

FRANCE is establishing regional nature parks in the terrain aims of protecting wildlife and providing open spaces where people can breathe fresh air and relax away from big cities with their petrol fumes and noise.

The idea of national parks in France was first proposed in 1907. It was a group of naturalists who were concerned about the destruction of the natural world. They wanted to create a network of parks that would protect the most beautiful and interesting parts of the country.

In March of this year the Government passed a law which created the first of these parks. The law gave the Government the power to buy land and to create a national park. The first park to be created was the Parc National de la Vanoise in the French Alps. It is a beautiful and majestic landscape, and it is a source of pride for the people who live there.

'BELLY OF PARIS' TO DISAPPEAR

PARIS will carry out its most ambitious reconstruction scheme for 100 years when Les Halles, France's biggest food market, moves from its present site in one of the capital's oldest, seediest and most colourful districts.

The new market carries the hopes of a new era of better eating habits and a new era of better living. The market will be a modern and beautiful building, and it will be a source of pride for the people who live there.

and maybe listen to it as well!

Chautious approach

The City Council, aware of the new opportunities offered, is adopting cautiously towards its final choice of plan and architecture.

The Project of Paris, who wears the main planning responsibility, is making process earlier than most by saying that the new market would be a "frame" of a new era of better eating habits and a new era of better living.

Then...

Come and make a sensible enquiry of the FRIMATIC. You'll want to trade in the old one straight away. Don't afford it! But just!

LOOK AT THESE PRICES!

Single door 5 cu. ft. (table top) 1,110/-; 5 cu. ft. 1,450/-; 6.5 cu. ft. 1,650/-; 12 cu. ft. 1,900/-; 15 cu. ft. 2,150/-; two-door 10 cu. ft. 2,100/-; 12 cu. ft. 2,300/-; 15 cu. ft. 2,500/-; refrigerator-freezer 8.0 cu. ft. 2,100/-; 10.0 cu. ft. 2,300/-; 12.0 cu. ft. 2,500/-.

The FRIMATIC is a masterpiece of refrigeration engineering and sophisticated design. (Your factor, for instance, in ready to spread out over the nearest bread.) And the goodness will be guaranteed for five years. But sorry, no pictures. They couldn't possibly do justice to the FRIMATIC. We'd much rather have you come and see the goods.

Total Hour in Harbors is symbol of the up-to-date approach of the oil group's activities in Africa

French group's place in future of oil industry

WORLD oil production in 1960 reached the impressive figure of 1500 million tons. According to leading economists, should rise to some 1500 million tons in 1965.

This means that during the next years, the oil industry will have to make further investments in order to provide more facilities for production, transportation and refining of crude oil and finished products.

Furthermore, the supplies of oil are becoming increasingly scarce and the oil industry is developing extensive programs to obtain oil from places which were not attempted as such in the past.

This is the case during the development of an industry. The scale of the Total Group investments must be correspondingly increased. The group has had a tradition of being a pioneer in the oil industry.

Only treasury The only treasury which can be used as a means of production and population (especially in the light of rapidly increasing change demands).

At the end of 1964, the total value of these investments amounted to \$1.7 billion. The group's production of oil is estimated at 1.2 million tons per day.

At the end of 1964, the total value of these investments amounted to \$1.7 billion. The group's production of oil is estimated at 1.2 million tons per day.

At the end of 1964, the total value of these investments amounted to \$1.7 billion. The group's production of oil is estimated at 1.2 million tons per day.

Planned two hundred years in the French chemical industry developed fairly quickly in the last twenty years.

It would seem that such a development on an international level, and not only in the oil industry, is being maintained as a well-balanced program. This is not only in the oil industry, but also in other sectors.

France's oil industry is well advanced in the oil industry. The group's production of oil is estimated at 1.2 million tons per day.

It would seem that such a development on an international level, and not only in the oil industry, is being maintained as a well-balanced program. This is not only in the oil industry, but also in other sectors.

Balance upset

The market shock of the past few days has been a major factor in the oil industry. The group's production of oil is estimated at 1.2 million tons per day.

France's oil industry is well advanced in the oil industry. The group's production of oil is estimated at 1.2 million tons per day.

Largest natural gas plant in Europe

The Leca industrial complex, the largest in Europe and the largest plant in the world.

SYMBOLS OF A NATION'S PROSPERITY

ONE in every two French families owns a motor car and a refrigerator.

This is revealed by a series of surveys conducted throughout the country by the national Institute of Statistics and other public bodies.

These surveys have also shown that France has enjoyed an immense boom in consumer household appliances and luxuries in the past few years.

Efficient and reliable household appliances are a symbol of a nation's prosperity.

One of the most popular household appliances is the refrigerator.

LEADERS TO MEET TO BAY Bill to help Africans join trade

LEADERS TO MEET TO BAY Bill to help Africans join trade

LEADERS of the African National Congress (ANC) and other African nationalist groups are expected to arrive in Kenya today for a meeting with the President of Kenya, Mr. Moi, to discuss the proposed Bill to help Africans join trade.

Mr. Mathiba, speaking to members of Nairobi Rotary Club, said the Bill had been in the face of lack of co-operation from some non-African, and citizens of non-African origin.

THE Government is to introduce a Trade Licensing Bill designed to speed up Africanisation in the private sector of commerce. It was announced yesterday by the Permanent Secretary to the Ministry of Commerce and Industry, Mr. Mathiba.

...the that's the trouble. Direct
...the we can get our leader up to it.
...Other leaders discussing
...the situation with a frequent address.

All that's better. It won't be long now.

THE men of Nairobi Fire Service got the fire yesterday — blowing.

But it took them more than two hours before they did. They were misled by the fire. The engine got to the scene's embracing the beauty of the scene.

It all seemed so simple. The fire service would bring their turn-table leader and the whole operation would be under a matter of minutes... at least that's what they and the press thought.

So the old fireman Herman Maska of the Kenya Society for the Prevention of Cruelty to Animals, who was on hand the operation.

Only on the spot, however, the firemen, led by Divisional Officer James, ran into a few problems.

First of all the fire engine with the turn-table leader could not get into the grounds of the museum.

Then the crew tried the extending leader from the street outside.

The leader was swung into position, the leader was ex- hausted enough but it could not be maneuvered within 200 ft. of the "rotating" platform.

Story — DAVID JONES... Pictures — JARED OYMBERRO

D.O. Isabou scratched his head thoughtfully.

"I'll have to go back to the station for another leader," he decided.

Up over the ladder, up the ladder went D.O. Isabou and down came the water. One, two, three till to the ground —

Then another fireman, Sub-Officer James, had a go at reaching the fire-removing water with a short crowbar. He poked at the water until they were crumpled and still, but with them came the only obstacle of the operation — three fire-fighting appliances.

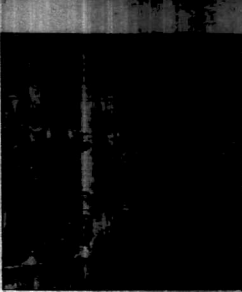

Chief Insp. Maska picked them up. "They're dead," just before.

As that had remained to be done was to hose down the water problem number three.

Top of the fireman took a firm grip on the nozzle of the jet and grimly they aimed it at the platform, and they waited. The water was turned on at the platform, but they waited and waited.

"Hops" would asked one fireman. "Hahawa," said the other.

A second fire appliance, with a 40-gallon water tank attached, was hosed down successfully, the fireman, as far as possible and the museum committee members were content.

Left: It would be easy if only we could get our fire engine through the gate, but it's just that little bit too big. Above: Never mind. We'll try it from over the wall. We, there's no good other. Let's break up.

Above: I said we'd make it. Look out below! Here they come.

Left: How to clean up the job. Wait a minute — where's the water. This just will not do. Right: Operation successful — or let D.O. Isabou and Insp. Maska examine the casualties — three fire-fighting appliances which died when the water was broken.

IT PAYS TO ADVERTISE IN THE EAST AFRICAN STANDARD

The unsolicited testimonial printed below refers to an advertisement designed and placed by Advertising Associates of Nairobi, consistently in the "East African Standard" recently, and is the exact text of a letter written to Advertising Associates by the advertiser concerned.

September 7, 1967

"Dear —

I write to tell you how pleased we are with the success of the advertisement you placed in the "East African Standard" on our behalf. To date, nine days after the first insertion we have had replies, in addition to those from Nairobi, from Mombasa, Nakuru and Kisumu; no fewer than ten companies have responded, 13 private individuals have evinced interest and our volume of business has increased considerably. Though it is difficult to estimate the financial advantage to us, the contract alone currently completed is worth net, some thirty times the cost of the advertisement."

We estimate that 100,000 readers will see this.

IT COULD HAVE BEEN YOUR ADVERTISEMENT!

HELPING AFRICA

Research projects expand

Research projects in Africa are expanding rapidly, according to a report from the United Nations. The report states that the number of research projects in Africa has increased from 100 in 1950 to 1,000 in 1960. This increase is due to the growing interest in Africa's natural resources and the need for scientific research to develop these resources. The report also notes that the United Nations is providing technical assistance to African countries in the form of research projects. This assistance includes the provision of equipment, training, and the services of experts. The report concludes that the expansion of research projects in Africa is a positive sign of the continent's development and progress.

attached to all side given. That is, the side given must be the side of the triangle which is opposite to the angle given. The provision of this information is essential for the solution of the problem. The side given must be the side opposite to the angle given. This is a fundamental principle of trigonometry. The side given must be the side opposite to the angle given. This is a fundamental principle of trigonometry.

ANGORA WOOL AN UNTAPPED POTENTIAL

An article in the September issue of the *Journal of the Agricultural Society of Kenya* discusses the untapped potential of angora wool in Kenya. The article states that angora wool is a valuable resource which has not been fully exploited in Kenya. It notes that the angora goat is a hardy animal which is well adapted to the Kenyan climate. The article also discusses the various uses of angora wool, including its use in the textile industry and in the production of carpets. The article concludes that the development of angora wool production in Kenya is a promising prospect for the future.

Cardinal relations

Relations with other organizations have been improved, where donors have been given, who don't give equally well. The article discusses the importance of maintaining good relations with other organizations, particularly in the context of international development. It notes that donors who are given the opportunity to contribute to a project are more likely to do so if they are given the opportunity to see the results of their contribution. The article also discusses the importance of transparency and accountability in the management of donor funds.

Most Africans preferred goat meat to mutton or beef. In Kenya, a good quality goat could be raised on a small scale. The article discusses the importance of goat rearing in Kenya, particularly in the context of rural development. It notes that goats are a hardy animal which is well adapted to the Kenyan climate. The article also discusses the various uses of goat meat, including its use in the food industry and in the production of leather. The article concludes that the development of goat rearing in Kenya is a promising prospect for the future.

Training of elephants for farm work suggested

It is suggested that wild animals such as buffaloes and elephants which were in large numbers in Tanganyika should be trained for use on farms. The article discusses the potential of wild animals for farm work, particularly in the context of rural development. It notes that buffaloes and elephants are hardy animals which are well adapted to the Kenyan climate. The article also discusses the various uses of buffaloes and elephants, including their use in agriculture and in the transport of goods. The article concludes that the training of wild animals for farm work is a promising prospect for the future.

Umoja wa Wanawake

The Umoja wa Wanawake (Women's Union) was addressed by Tanganyika annual conference in Dar es Salaam on the Arusha Declaration. The article discusses the role of women in the development of Tanganyika, particularly in the context of rural development. It notes that women are a vital part of the workforce and are responsible for the production of food and other essential goods. The article also discusses the need for women's organizations to provide support and training to women in order to improve their living conditions.

CHILDREN'S ART CONTEST

Children's art contest was held in Dar es Salaam. The article discusses the results of the contest, which was held to encourage children to express their creativity and to learn about their own culture. The article notes that the contest was a great success and that many children participated. The article also discusses the importance of art in education and in the development of children's self-esteem.

Buffalo used for such work as agriculture

The buffalo was used for such work as agriculture and transport. The article discusses the various uses of buffaloes, including their use in agriculture and in the transport of goods. It notes that buffaloes are a hardy animal which is well adapted to the Kenyan climate. The article also discusses the importance of buffaloes in the Kenyan economy and in the lives of the people.

Training of children

Training of children in the use of tools and equipment. The article discusses the importance of training children in the use of tools and equipment, particularly in the context of rural development. It notes that children who are trained in the use of tools and equipment are more likely to be successful in their work. The article also discusses the need for training programs to be designed to meet the needs of children in rural areas.

TRAINING OF ELEPHANTS FOR FARM WORK SUGGESTED

It is suggested that wild animals such as buffaloes and elephants which were in large numbers in Tanganyika should be trained for use on farms. The article discusses the potential of wild animals for farm work, particularly in the context of rural development. It notes that buffaloes and elephants are hardy animals which are well adapted to the Kenyan climate. The article also discusses the various uses of buffaloes and elephants, including their use in agriculture and in the transport of goods. The article concludes that the training of wild animals for farm work is a promising prospect for the future.

The Umoja wa Wanawake (Women's Union) was addressed by Tanganyika annual conference in Dar es Salaam on the Arusha Declaration. The article discusses the role of women in the development of Tanganyika, particularly in the context of rural development. It notes that women are a vital part of the workforce and are responsible for the production of food and other essential goods. The article also discusses the need for women's organizations to provide support and training to women in order to improve their living conditions.

CHILDREN'S ART CONTEST Children's art contest was held in Dar es Salaam. The article discusses the results of the contest, which was held to encourage children to express their creativity and to learn about their own culture. The article notes that the contest was a great success and that many children participated. The article also discusses the importance of art in education and in the development of children's self-esteem.

Buffalo used for such work as agriculture The buffalo was used for such work as agriculture and transport. The article discusses the various uses of buffaloes, including their use in agriculture and in the transport of goods. It notes that buffaloes are a hardy animal which is well adapted to the Kenyan climate. The article also discusses the importance of buffaloes in the Kenyan economy and in the lives of the people.

Union head takes up challenge

The general secretary of the Mombasa Dockworkers' Union, Mr. Juma Boy, said yesterday that he would accept any challenge to show that union officials and Executive members had not been elected constitutionally. He was commenting in a statement circulated by the Union Group within which he holds the post of leadership was unconstitutional. He said he would accept the challenge with thanks provided that the present executive union constitution was followed. He wanted to make it clear to the group that the union was not an organization for the purpose of a voluntary organization of workers protected by a registered constitution. As far as the 21 members of the Executive Committee were concerned, the Union Group was a random to the Minister of Labour and was unconstitutional. The union had held its annual meeting recently at Mombasa and it was his responsibility to call any general election.

You can't buy better soup than Knorr-Swiss

Trust Farley's Infant Foods to make your baby strong!

Three wonderful foods for your very important baby. They're specially packed for tropical climates in moisture-proof tins so you keep fresh until you need them.

Farley's Milk Food gives him a wonderful start! This famous baby milk is fortified with vitamins A, C and D and iron and specially prepared for babies in tropical countries.

Farley's Rusks are the ideal introduction to mixed feeding! Young babies can easily digest a piece of nourishing Rusk mixed with a thin cream of milk, either fed from his bottle or from a spoon. Later on, older babies love to eat a crisp Rusk on its own.

Farlene is the complete high protein Baby Food! Farlene is one-quarter protein, richer than a healthy animal. It also contains Vitamins A, B, C and D, iron, calcium, carbohydrates and fats. A well balanced, nourishing and pre-cooked diet for a growing baby. Add Farlene to his Milk Food from about the age of two to three months. Later on, it can be mixed with soups, gravies, and sweets for variety.

Rush to get on the voting list

A very large number of voters yesterday registered at the D.C.C. office on the first day for registration. They were outside the D.C.C. office, in Sangaria Avenue, Nairobi.

VISITORS FOR THE MAYOR

Left: The Nigerian High Commissioner, Mr. Harroun (right), signs the visitors' book during a courtesy call on the Mayor of Nairobi. Looking on are the Deputy Mayor, Ald. M. W. Kaprono, and the Mayor, Mr. J. L. Loope.

Right: The Soviet Union Ambassador in Kenya, Mr. D. Goryunov, greets paid a courtesy call on Mr. Loope. The Ambassador extended good wishes from the Mayor of Moscow to the Mayor of Nairobi. To the right, the Ambassador, the Mayor and Ald. Kaprono.

...to the High Commission to Kenya. Mr. Harroun, reportedly in a friendly mood, said that the Nigerian crisis was not a local affair. He said that the Nigerian crisis was not a local affair. He said that the Nigerian crisis was not a local affair. He said that the Nigerian crisis was not a local affair.

Mr. Harroun said that it had come to the notice of the Federal Government that individual initiatives from the Western bloc were already supporting the secessionist régime. He said that his Government had advised Western diplomats not to sell arms to the Federal Government. Mr. Harroun said that his Government knew that the Eastern Nigerian régime had dollar credits in Switzerland although the American, British and French Governments had indicated that they did not support secession. He said that mediation was possible only if Eastern Nigeria renounced secession, all parties went to the conference table, and Col. Ojukwu resigned.

CENTRAL BANK CELEBRATES

Members of the Central Bank of Kenya today celebrated the 10th anniversary of the bank's establishment. The bank was established on May 11, 1961, and Mr. Njuguna stated that the board would soon issue the bank's annual report. Mr. Njuguna stated that the bank's first anniversary had been observed in Nairobi. He said that the bank's public transactions had shown a healthy condition as far as the economy of the country was concerned.

COFFEE OUTLOOK

KENYA SEEMS TO HAVE COME OUT of the London conference of the International Coffee Council much better than had been expected.

The decision in London in favour of the smaller producing countries was really a victory for common sense. Their coffee is in demand again with the exportation of 150,000 tons of non-quota markets in the last.

Together the three countries were able to fight the adverse workings of the exportable system, which has had changes in the system will be made which will in future have the reverse effect.

The picture, which Mr. McKenzie was "pride" before the conference, is now brighter. This is partly due to the partnership which resulted between Kenya, Tanzania and Colombia.

Kenya has been brought several ideas back from the visit to Colombia which are thought to improve the efficiency of the Kenya coffee industry. He spoke of new methods which would not only be a better harvest, these would involve not only a better spraying of the plants under the present system.

The whole will thus need very careful consideration, but any idea which will improve coffee industry should be adopted if Kenya is to continue to hold its position as a major coffee producer.

More dogs than dog-lovers

SERIES OF LETTERS from readers have recently drawn attention to the danger created on the roads by dogs whose owners neglect to take any precautions to avoid them.

It is not only that the dogs will be killed but that in trying to avoid them drivers are liable to crash into them.

At the secretary of the K.S.P.C.A. Mr. Procter, has pointed out, the owner is on species of domestic pet and to let them run at large is their duty to stop, send for help and wait till all comes.

At the secretary of the K.S.P.C.A. Mr. Procter, has pointed out, the owner is on species of domestic pet and to let them run at large is their duty to stop, send for help and wait till all comes.

The distressing suspicion arises, however, that many people who keep dogs in Kenya do not do so out of love for the animals but for purely selfish reasons.

It is not only that the dogs will be killed but that in trying to avoid them drivers are liable to crash into them.

It is not only that the dogs will be killed but that in trying to avoid them drivers are liable to crash into them.

Programmes that never were

On Sunday the July General Show failed to materialize and was replaced by a lively, but somewhat unimpressive, musical. On Monday a Spy was the main attraction, but a "killer" about a billion advertisements over the Alps. Tuesday was a general service, Wednesday a general service, Thursday a general service, Friday a general service, Saturday a general service, and Sunday a general service.

Stronger team

For nearly two hours there was a general service, but it was not as strong as the previous one. The team was made up of several well-known names, but they did not seem to be working together as well as they should have.

One local programme is always enjoyed when it gets into the time to register. It is a very popular programme, and it is always well attended. The programme is always well received, and it is always a success.

THE HOUSEHOLD

...the wife of the Ambassador in Kenya, Mrs. Ferguson, demonstrates the use of a waffle iron.

...the wife of the Ambassador in Kenya, Mrs. Ferguson, demonstrates the use of a waffle iron.

...the wife of the Ambassador in Kenya, Mrs. Ferguson, demonstrates the use of a waffle iron.

From hot dogs to the famous waffle

IN THE United States the climate varies from State to State, each one being noted for its specialties, rather than a wide group of foods being considered "American," says Mrs. Patricia Ferguson, wife of the American Ambassador in Kenya.

With the completion of her husband's post in Kenya, Mrs. Ferguson says, "I have been to many well-known resorts and have seen the waffle iron in use in every State."

The wife of the American Ambassador, Mrs. Ferguson, demonstrates the use of a waffle iron.

Obtainable from appointed local stockists or
HOWSE & McGEORGE LTD.
 General Agents for Elizabeth Arden

Who should control the purse strings?

AT THE beginning of this century, when women remained in the villages and grew all their food, the man was wholly responsible for providing the money for whatever the woman could not produce from the soil.

He also cooked the family and educated the children. In those days, women did not even ask their husbands how much money they earned a month, whether as waitresses, shop girls or civil servants.

The man, on the other hand, had the money, and he decided to spend it as he saw fit.

The economic revolution in Great Britain has worked its way from front to back down to the very women both literate and illiterate, working girls and housewives, and the man has been left in a predicament. There are several families in which the wife earns a higher salary than the husband. These women occupy responsible positions in occupational firms and in the civil service.

The man married to a literate woman is kept in a dilemma as to how to manage the money. He usually advises his wife to take a higher salary than the husband. This means occupying responsible positions in occupational firms and in the civil service.

The man married to a literate woman is kept in a dilemma as to how to manage the money. He usually advises his wife to take a higher salary than the husband. This means occupying responsible positions in occupational firms and in the civil service.

AN ALL-TIME FAVOURITE

(From Oct. 3)

A man whose wife is a housewife is usually advised to take a higher salary than the husband. This means occupying responsible positions in occupational firms and in the civil service.

The man married to a literate woman is kept in a dilemma as to how to manage the money. He usually advises his wife to take a higher salary than the husband. This means occupying responsible positions in occupational firms and in the civil service.

Application of marriage laws

WHOLESALE violation of the law of marriage and divorce, reported by the existing courts, will not result in any legal action, the Government was stated by the Deputy Town Clerk of Kisumu, Mr. J. W. Ouyangwa Otiemo, when he gave evidence before the Commission on Marriage and Divorce at Kisumu.

Government to give famine aid in Kitui

THE Provincial Commissioner, Eastern Province, Mr. E. H. Mahala, said during a tour of Kitui District that the Government was aware of the famine situation in the low and relief measures were being taken. But he warned the able-bodied people that they should not entertain the idea that the Government would "give them food".

The P.C. said that the need for relief was acute and that the Government was aware of the famine situation in the low and relief measures were being taken. But he warned the able-bodied people that they should not entertain the idea that the Government would "give them food".

Three months' jail for assault

HE treated the people that the Government would "give them food". The P.C. said that the need for relief was acute and that the Government was aware of the famine situation in the low and relief measures were being taken. But he warned the able-bodied people that they should not entertain the idea that the Government would "give them food".

Have you discovered this amazing new long-life blade?

Incredible New Gillette Super Silver shaves day after day, for so many days you lose count. And every shave throughout its long life is as smooth, as clean and as close as the first. Why? Because it's made from a new kind of steel, Gillette Super Silver, an alloy of steel and titanium.

Gillette Super Silver is treated with EPR, a polymer edge treatment, invented by Gillette. It eliminates razor drag, gives even smoother shaves. Gillette Super Silver gives more shaves than any blade you've ever used.

Gillette SUPER SILVER

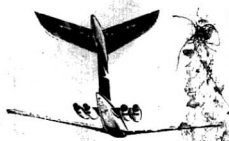

At no extra cost

This is the world's best jetliner

You can say that again! The BOAC VC10 is better than anything else in the business. Look at the facts.

It takes off sooner, flies faster, lands slower, leaves its own shadow behind! Superb. And it has a crew to match. You won't feel a thing except pampered until you reach customs.

ALL OVER THE WORLD BOAC TAKES GOOD CARE OF YOU

BOAC survey means new time for departures

IN a bid to find out what is the most popular time for departures from London and other centres, and also to meet favourable departure times from East Africa, BOAC has been conducting flight group surveys.

This has involved considerable research. The information obtained will help BOAC to make changes to the choice of departure times. It is estimated that 245 hours will operate from Nairobi daily, except Sunday.

That means that passengers arriving from East Africa will arrive in London in the early evening, which is convenient for those who wish to continue on to New York, Montreal, San Francisco and Los Angeles.

From September 1 to May 31, 1960, the present will be replaced by a new schedule. It can be seen by BOAC to the United Kingdom, and the following economy-class fares:

Nairobi-London, £200, return. Dar es Salaam/London £220, return.

These fares carry the following conditions:

There is no charge for a rest. Excursion fares can only be combined with domestic fares. Stay in the United Kingdom for a minimum period of 10 days and not less than 15 days from the original departure date.

From September 1 to May 31, 1960 any person who has at least six months can by BOAC to London on a 30-day return.

The special fare carries similar conditions with a 10 to 90-day stay. A residential certificate can be obtained from travel agents or Bureau and Co. Ltd. (London).

NEW HOTEL IS OPENED NEAR CATWICK

A new 100-room hotel has opened at Crawley, only a few minutes drive from the increasing traffic of the airport, 27 miles south of London.

The hotel is situated on a road between the hotel and airport, and is a convenient place for travellers to stay.

The hotel has 100 rooms, 100 bathrooms, and is equipped with radio and television. Adjoining the spacious main hall is a cocktail bar, reached by an arched bridge spanning a small pool fed by a waterfall.

The Airport Hotel has a restaurant, bar, and a bar. The hotel is a convenient place for travellers to stay.

'INTERCEPTED' MESSAGE SENT AIRSHIP HOME

By LARRY RUDOLPH

It has been quite a few years since Sunday afternoon motorists in Dar es Salaam drove around looking for airship mooring masts. But it is a fact that in the First World War there was a plan to send an airship to Dar es Salaam, in what was then German East Africa.

In 1916, Dr. Karl Goerner, the chief medical officer in the German Colonial Force in East Africa, was later ordered to Germany in a passenger aircraft. He was to be used to take urgent medical supplies to the Dar es Salaam hospital in the German East Africa.

The German High Command agreed to the plan, but added they would want to send other and more offensive supplies.

It fell to the German Naval Air Corps to undertake the mission. The aircraft was a Gotha, a four-engine biplane, with a range of over 5,000 miles. It was to be used to take supplies to the Dar es Salaam hospital in the German East Africa.

The ship had been in the air for under three days and covered some 4,000 miles.

Plan known

Had the ship been successful in its mission it would have undoubtedly increased German capacity and will to resist. That the mission was brought to an abrupt end was further in the line of British intelligence.

About from the start the British knew about the plan from Germany to send a great airship to East Africa.

Two pioneers

Two great airship pioneers, Hugo Eckener and Reinhold Messner, were chosen to lead the mission. They were to be used to take supplies to the Dar es Salaam hospital in the German East Africa.

The plan was to send a Gotha to East Africa, and then to East Africa to Khartoum, and then to Khartoum to Cairo. The ship was to be used to take supplies to the Dar es Salaam hospital in the German East Africa.

The ship was to be used to take supplies to the Dar es Salaam hospital in the German East Africa.

SYMBOL OF

Pakistan International Airlines is, by international judgment, the most outstanding symbol of Pakistan's achievements in the field of independence.

The PIA's growth inspires respect and admiration in the international aviation circles. Inside Pakistan, PIA is today acknowledged as the jewel in the crown of the country.

It is the fact that the PIA has worked in East Pakistan with the help of the helicopter. This is a very interesting phenomenon in the aviation world because of the fact that it has begun to work in East Pakistan with the help of the helicopter. This is a very interesting phenomenon in the aviation world because of the fact that it has begun to work in East Pakistan with the help of the helicopter.

From the beginning, PIA's performance has been a model for other airlines. It has been a model for other airlines. It has been a model for other airlines.

New services

When the jet age dawned, PIA was among the first Asian airlines to equip its fleet with jet aircraft. In 1962, PIA was among the first Asian airlines to equip its fleet with jet aircraft.

In 1964, PIA took another important step towards fast modernization by buying British Trident 1s. These aircraft, with a speed of 410 miles an hour, are now being used on the Karachi-Lahore route.

They are also operating on the newly introduced services to Dhaka, Doha, Bahrain, Kuwait and the United Arab Emirates.

This expansion in the fleet has enabled the airline to spread out its international and national routes in all directions. The expansion in services is also being achieved through a 50 per cent jump in PIA operations over the past year.

It has been able to increase its weekly flights to London to ten, adding new cities to the network including Paris, Lubbock, Madrid, Cairo, Kuwait, Doha, Dubai and Bahrain. These flights already passed through Tehran, Beirut, Bombay and Karachi.

PIA has also started a two-way service from Karachi to Nairobi in East Africa. The latter addition to the network is a two-weekly Boeing 707 service from Dhaka to Bangkok. In addition there are several other services.

These flights are being operated by the PIA's fleet of Boeing 707s, Douglas DC-8s, Lockheed L-1049 Super Constables, British Trident 1s and Fokker F-27s.

PIA is also starting a two-way service from Karachi to Nairobi in East Africa. The latter addition to the network is a two-weekly Boeing 707 service from Dhaka to Bangkok.

PIA is also starting a two-way service from Karachi to Nairobi in East Africa. The latter addition to the network is a two-weekly Boeing 707 service from Dhaka to Bangkok.

PIA is also starting a two-way service from Karachi to Nairobi in East Africa. The latter addition to the network is a two-weekly Boeing 707 service from Dhaka to Bangkok.

PIA is also starting a two-way service from Karachi to Nairobi in East Africa. The latter addition to the network is a two-weekly Boeing 707 service from Dhaka to Bangkok.

PIA is also starting a two-way service from Karachi to Nairobi in East Africa. The latter addition to the network is a two-weekly Boeing 707 service from Dhaka to Bangkok.

A Boeing 707-420 being examined by the manager of Karachi Airport.

Importance of the freight factor

By a Special Correspondent

EAST AFRICA is believed to be one of the central points on the globe for all future planning and progress. The importance of the technical side, but on the economical sector.

During the last few months, the importance of the freight factor has been highlighted. It is an obvious argument for all concerned parties to provide better facilities in the region to cope with all air-freight matters.

Due to this fact more and more forwarding agents are specialising in air-freight and cargo shipments also in East Africa.

In external trade more and more exporters have taken up the advantages of sending their goods by air.

All airlines prefer that their shipments are more or less guaranteed, through advance payments, which saves them money and work.

Though the normal freight rates are somewhat high, the advantages are self-explanatory. They are: reduced shipping risk, simpler shipping procedures, warehouse, low insurance rates, prompt delivery, no interest, shorter transit times, no need for bonded and insured transport, and, of course, fast delivery to the consignee and commodity.

The problem of the 'jumbo jets'

ALTHOUGH the world's major airlines are creating big problems at the world's major airports, the biggest obstacle to the 'jumbo jets' are the difficulties that are having to be faced wherever these giants are expected.

It is estimated that in 1970 more than 400,000 jumbo jets will fly between the world's major airports, and unless something is done to facilitate the ground traffic through the airport controls they may be spending longer getting off than they do in flight.

Great burden

It is wonderful to shorten the flying times from slow to fast by introducing faster aircraft, but the increasing number of aircraft on the ground is a major problem. A number of associations, including the International Air Transport Association, are working to solve the problems ahead and trying to devise ways of overcoming them.

But with aviation heading toward the supersonic age and the probability of vertical take-off planes coming on the scene, the problems of the years from now is something which probably would assist the world's best aircraft.

Joseph P. McCann, Secretary of the International Civil Aviation Organization (ICAO) in Montreal this year, said that unless the world's best aircraft are developed, the world's best aircraft would have to face the consequences.

Classic example

The technical innovation would add to the complexity of airport planning and would require expert knowledge which many developing nations did not possess.

Mr. Muzik considered a plan on foot throughout the answer to some extent. The newer aircraft would use a greater amount of fuel and this contributes to the expense.

AMERICANIZING THE FUTURE

The technical innovation would add to the complexity of airport planning and would require expert knowledge which many developing nations did not possess.

Mr. Muzik considered a plan on foot throughout the answer to some extent. The newer aircraft would use a greater amount of fuel and this contributes to the expense.

AIRPORT ON THE SEA?

The jet engines shown last week at the Los Angeles airport are the first to be used in a service of the Boeing 747 when the aircraft is scheduled to be delivered in 1970.

A preliminary study of an offshore airport for Los Angeles has concluded that it would be possible to construct a fixed base runway system capable of supporting 747s and SST operations. The proposed runway platform would be five miles long and two miles wide with four 12,000-ft runways in addition to a survey fleet and a terminal building. A service deck and transit deck for passengers and cargo. High-speed links would be by underwater tubes, cables and balloons. Even though the scheme appears attractive to Los Angeles, it would require state and federal funds. Construction is estimated to cost \$1 billion, no funds have been allocated for further study or building.

aircraft hour of the day

hour of every day somewhere in the world, less than 100 hours of business planes are actually flying or in the air. In 1948 there were 70,000 passenger, 73,000 tons of cargo, and 17,000 tons of mail carried to 2104 millions. These vital statistics were extracted from the annual report of 1948.

WEIGHT AID DEVELOPED

The Aerojet Development Corporation has developed a new electronic device which will aid in the weighing of aircraft parts. The device is a similar electronic system which will indicate proper weight for the Lockheed C-124 transport.

The number of passengers carried showed an increase of 23,000 over the previous year, and the number of kilometers served 72 times in an average in all countries.

During the present month, the number of flights was 172, and the number of kilometers served 172 times.

There was a new record set by the Lockheed C-124 transport, which flew from Seattle to London in 17 hours and 15 minutes. The plane was piloted by Capt. Robert G. Hoover, and carried 100 passengers and 100 tons of cargo.

Mr. F. W. von Boehmer, Lockheed's Director of Research and Development, said that the new electronic device will aid in the weighing of aircraft parts, and will be particularly useful in the case of the Lockheed C-124 transport.

Here are some more delays

Mr. F. W. von Boehmer, Lockheed's Director of Research and Development, said that the new electronic device will aid in the weighing of aircraft parts, and will be particularly useful in the case of the Lockheed C-124 transport.

'Taxi' service grew into major airline

DURING the last 30 years, Sudan Airways has changed from an six-seat service between Khartoum and a number of major towns into an international airline, flying modern aircraft and operating a regular route to Europe, Africa and the Middle East.

It is estimated that the airline has carried more than 100,000 passengers and 10,000 tons of cargo since its inception. The airline is now operating a regular service between Khartoum and London, with a stop at Cairo.

The airline is now operating a regular service between Khartoum and London, with a stop at Cairo. The airline is now operating a regular service between Khartoum and London, with a stop at Cairo.

Value of goods on freight

The value of goods on freight is increasing rapidly, and is expected to reach a record in the next few years. This is due to the increasing volume of international trade.

BEA fly more people to more places in Europe than any other airline

BEA

7,300,000 happy travellers. That's how many flew with us — last year — on British European Airways. All over Europe — to 86 destinations. Gateway to Paris, Rome, Lisbon, Vienna and Athens — to mention but five. All over Britain — in and out of London. Fly in fine, big, beautiful Rolls-Royce powered BEA Trident jets. South, west and inland as you can go. And Sovereign Service — yours to enjoy.

India happy if Britain joins E.E.C.

INDIA'S Deputy Premier and Finance Minister, Mr. Moraji Dasai, yesterday said India would be happy to see Britain join the European Common Market, because this would strengthen the Commonwealth.

Mr. Dasai, speaking to a group of students at the Commonwealth Prime Ministers' conference in Port of Spain, Trinidad, said Britain's application to join the European Community was in the interests of the Commonwealth.

He added that he would like to see the Commonwealth programme as that in time the institution could spread into a commonwealth of world nations.

The Trinidad Prime Minister, Eric Williams, stressed to Mr. Dasai that Britain's efforts to join the European Community were causing "stresses and strains" in the Commonwealth.

Mr. Williams was elected conference chairman after the Governor-General, Sir Solomon Hochoy, opened the meeting, said there was "understanding" in some areas of the Commonwealth that such a possible effects of such a move would be "A-F-A"

Kenya urged to boost trade with Belgrade

Trade between Kenya and Yugoslavia had increased ten-fold in three years, a Yugoslav businessman revealed yesterday in Nairobi. He said Kenyans should take steps to boost their exports to Yugoslavia where they should exhibit at trade shows.

Mr. Dragan Bogdanovic - a representative of the Yugoslav Federal Chamber of Commerce - told a Press conference that three years ago Yugoslavs used to buy more from Kenya than she exported to him.

The position had now been reversed. "This is not the fault of Yugoslav exporters, but rather the result of too meagre activities by Kenya businessmen. Increased activities to create a better customer would give very good results."

"We are very interested in your steel and four other types. We would also be interested in importing buses and trucks," Mr. Bogdanovic pointed out that a number of threemonthly important trade shows were held annually in his country.

As far as he knew, Kenya had not yet exhibited at any of these shows. He agreed that Yugoslavia is aimed at the increase trade with Kenya.

Mr. Bogdanovic also mentioned the organization of the Nairobi Show which he intends to visit during his three-week stay in Kenya.

Israeli progress mirrored in Nairobi Show

ELIYAHU TABORI, General Secretary, Israel Pavilion, Nairobi, writes on Israel at the Nairobi Show:

ISRAELI relations with Kenya and its people started long before Uhuru. It was through a common background and destiny that both countries came to know each other. There is an amazing similarity in the problems that the two countries are facing.

Both Israel and Kenya emerged as independent nations after a long period of British rule. The two countries have made outstanding endeavours in finding diverse communities into one nation. Both countries are determined that true independence is attainable only through fast economic growth and cultural development.

Samson keeps wheels rolling everywhere

SAMSON (via its rolling along the roads and over the fields in 13 countries in three continents, in tough competition against competitors in its major countries they live up to their Biblical name and are known for their strength, reliability and quality with their high quality.

Export figures show that approximately 1,200,000 in 1962 in 1963 and 1,100,000 in 1964 and it is anticipated that the same figure will be passed this year. (Represented in Kenya by Ivey Distributors, P.O. Box 2309, Nairobi)

Only recently industrialized, Israel has gone through the growing hardships of a young developing state determined to achieve economic independence. Constant of this important has embarked upon an extensive programme of co-operation with Kenya as well as with other newly independent nations in Africa.

More than 200 Kenyans have been trained in Israel in different skills and professions and about 200 Israeli technicians worked during the past years abroad to provide the necessary technical aid to Kenya.

This is the fifth year in which the Israeli Pavilion has participated in the Nairobi Show at Fairland Park. This year the Israeli Pavilion has been extended to accommodate a greater number of products of the kind which may be useful to Kenya in her dynamic development process.

Israel's increased participation in the Show reflects the people's strengthening trade relations with Kenya. Indeed the volume of trade between the two countries has increased in the last four years.

In this year's Show particular stress has been put on plant and equipment which are regarded as particularly suitable for Kenya.

The bottle is placed on the table under the host SOLAR SURPRISE FOR SUNSHINE CHEFS

A COOKER that operates on the side of the pot instead of the bottom—having its heating coil below the pot. None of these past efforts has been a commercial product.

The R.P.L.I. therefore analysed the situation and set itself the task of designing a cooker that would overcome the weakness of previous designs.

The result is a new cooker made entirely of non-wood and tubes, with the reflectors in its all-steel frame of copper plate, aluminum and copper backed for long life. The cooker should last for many years with its lining left continuously out of service.

The cooker has been tested under laboratory conditions—where it was found to deliver more than the standard 500 watts, and to hold a litre of water in about 11 minutes.

Only a very small part of the population at present cooks out of doors—when they have a successful solar cooker could be a real boon. These are in sunny regions where cooking is normally done in the open air on fires with wood or animal manure as the fuel and where wood is either scarce or has to be bought in some African areas. Fuel will spend as much as 25 per cent of its income on wood for cooking.

Solar cookers have been built in the past but were usually unsatisfactory; some were not sufficiently durable others did not prove durable

WATER

The main problem of the irrigators' organization has been the lack of funds for the purchase of irrigation equipment. The organization has been studying in Israel methods of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment. The organization is also studying in Israel methods of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment. The organization is also studying in Israel methods of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment.

Special interest is given to coffee, citrus, cotton, pasture crops and other particularly high crops in the Ravi Valley. The organization is also studying in Israel methods of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment. The organization is also studying in Israel methods of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment.

Agribusiness experts have advised a kind of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment. The organization is also studying in Israel methods of water conservation, such as drip irrigation, which saves for the farmer the cost of water and the cost of the equipment.

Poultry systems big export item

Kenya's poultry industry is showing a steady upward trend, with exports reaching a record high of \$1.5 million in 1969. The industry is expected to continue to grow, with exports projected to reach \$2 million in 1970. The main reason for this growth is the increasing demand for poultry products in the United Kingdom and other European countries.

NECESSARY is the mother of invention and it was the need to expand as rapidly as possible the quantity of locally produced foodstuffs immediately following the establishment of the State of Israel which led to the foundation and success of the poultry equipment industry. The results of that need now represent a healthy export item. Israel's poultry equipment industry includes automatic feeders and deep-litter systems are now helping increase the output of eggs and poultry in many countries throughout the world. The advantages of raising chickens in batteries is, mainly, that the birds are cleaner and less exposed to contamination. Various innovations have proved that chickens in battery cages will produce 15-20 eggs more per year compared to average floor birds. For 16,000 hens, this means an additional 12,500 dozen eggs a year. The amount of feed required, the amount of labor that can be withdrawn, so that there are no "free fowls". The Central Company for Import and Export Ltd., which handles marketing for the three largest poultry equipment firms in Israel, is confident that batteries will now be added to the Eastern European countries which purchase

Did you seriously consider going another way to Israel?

We don't believe you have to be lured on board our planes with irresistible descriptions of our food or our service or the width of our seats or the angle of their recline. Being on board a jet that is operated by the people of Israel bound for Israel transcends talk about food and smiles and pillow-puffing. See your travel agent about getting on board one.

The airline of the people of Israel.
