TRUSTEESHIP IS UNWANTED

A retrograde step

BARBADOS SPEAKER SUPPORTS BRITISH DECISION

WE COLONIALS all say with one voice "We do not want to become trust territories with the British Government" and our difficulties are because any suggestion that the United Nations should go beyond the powers of the Charter as regards non-self-governing territories is as useless as we in the Colonies also say so.

Yesterday he asserted that Africans supported the British in not allowing any United Nations supervision and control over non-self-governing territories and accused the Russians of wanting the work of the Trusteeship Council.

STEEL FIRMS WILL KEEP THEIR NAMES

ABOUT 300,000 British iron and steel workers—three times the working strength of the entire industry which employs 80,000 people—will be State servants with the name of the non-published Government's nationalized industry.

"In fact, it would be regarded as a retrograde step. There is no one in the working strength of the entire industry which employs 80,000 people—will be State servants with the name of the non-published Government's nationalized industry.

The difference is that the State is not taking over the assets of the industry but is taking over the management of it. The State is not taking over the assets of the industry but is taking over the management of it.

MADE IN ENGLAND

The battle was not over

The Weekend Page looks to America—
—AND EXPLAINS HOW THE NATION CHOOSES ITS PRESIDENT

A CONFLICT of views among the Allied war chiefs on the eve of Hitler's V2 rocket campaign—between those who said flying bombs should be taken down and those who thought otherwise—was discussed for the first time in a despatch published in London this week.

The author of this article, Sir Roy Hines, who was commander of the air defence of London from November 1942 to October 1944 and who was in the command of the air defence of the city of London from September 1944 when the V2 rockets were first used against London, was the chief of staff of the Royal Air Force during the last months of the war. He is now a major in the RAF and is in command of the RAF School of Staff College at Cranborne, Dorset.

From Holland

Intelligence officers tell that as they stood at that moment we are ready to meet rocket attacks from Holland with the fact remains that the area from which rockets are launched is to remain in German hands for some time over the coming week.

On September 1, 1944 news was announced from the Ministry of Information that the arrival of the first V2's was expected in a few days. The Dutch resistance forces in the Netherlands had been informed that the first V2's would be expected in a few days.

Counter attack

The November 17th was the day the Air Ministry expressed concern that "comparatively little" was being done to counter-attack the launching sites of the rockets. The Air Ministry was concerned that the rockets were being launched from a wooded area near the Hague.

Modern practice

The election was held on the 15th November after the second round in the December following and the ballots were later sent to the States and opened on the 15th day of January.

'On my head'

The move itself was not explicitly disapproved by the Air Staff but it was considered that it should be held over the heads of the Air Staff.

In three days' time—on the first Tuesday in November—66 million United States citizens will cast their permanent secret ballot for the President of the United States. The year-old election process was set in motion by the death of President Franklin D. Roosevelt last June. The Republican candidate, Progressive candidate, or one of the other candidates will be elected.

The third step

First there are the primary or State party conventions where delegates to the national party conventions are elected or named. And then the national conventions themselves at which the party candidates for President and Vice-President are chosen.

APPEALS TO U.S. VOTERS

Quiet campaign over STOCK MARKET CHEERS UP: MORE LONG-TERM BUYING

THROUGHOUT the weekend candidates were wading up and down the country campaigning to persuade some 50 million potential voters that one of them to the Presidency of the United States.

By nightfall an American citizen could, if he wished, vote almost as many as 500 times for a candidate. The Republican Party, which has the lead in the polls, is expected to have a strong showing in the North Atlantic States and in the South. The Democratic Party, which has the lead in the South, is expected to have a strong showing in the North Atlantic States and in the West.

The campaign is expected to be a quiet one, with candidates concentrating on the campaign trail rather than on the radio and in the newspapers.

EAST AFRICA SEES SUN ECLIPSED

Day turned into night

OBSERVATION 'VERY SUCCESSFUL,' SAYS GREENWICH EXPERT

For a few fleeting and awe-inspiring minutes shortly before dawn yesterday morning the new day was away with a bright glow along the 30 mile wide strip of East Africa. A heavy and soft white lead. Early motorists switched on their headlights and were surprised to find that the sun had disappeared. Along the line of observation silent watchers felt the pulsations from the moon rolling steadily across the face of the sun. In its vicinity with inviting surroundings, trailing the dark cloak of night back again across the earth's surface. The watchers included laymen — one man travelled from the Mt. Kenya Hills to the Indian Ocean coast to witness the eclipse with camera and watches and other pieces of their personal equipment. There was a platoon from each of the East African forces with this eclipse to itself. The 1st and 2nd battalions of the 2nd East African Brigade and the 1st and 2nd battalions of the 1st East African Brigade were at the scene. The 1st East African Brigade was at the scene. The 1st East African Brigade was at the scene.

STRIKE-HIT FRANCE WAS QUIETER

Yesterday brought an easy reprieve in the strike-bound French conflict. It was All Saints' Day, a public holiday in France, and the quiet was in marked contrast with the bomb-busting and house-busting activities staged against non-strikers in the Douai area of the north at the weekend. In one incident a bomb placed outside the home of a miner who had returned work injured the wife and had not more than a million to his job. The Government continued to urge strikers to return to work and the railway unions to stop the general strike. RHODESIAN FAVOURS AN E.A. DOMINION

Asked for his views on the creation of an East African Dominion, Mr. T. W. Beadle, Southern Rhodesia's Minister of Internal Affairs, Health, Justice and Education, told a Standard reporter immediately before he left Nairobi for Salisbury yesterday morning. 'We would welcome anything that consolidates the British-Europeans position in Africa. Our Government would do anything it possibly could to encourage such a move.'

Searchlight will write the result in the New York sky

U.S. EXPECTS DEWEY TO BE THE NEW PRESIDENT

Advance survey forecasts big majority
A searchlight beam will tell tens of thousands of New Yorkers in the city's streets tonight the result of the Presidential election. From high atop the New York Times building in Times Square the beam will sweep to the north if Governor Dewey is judged and to the south if President Truman is elected. If the beam is steady to the north that will mean that Governor Dewey has been elected; similarly, if it is steady to the south, Mr. Truman will have won.

An eve of the election survey of 48 States indicated that Governor Dewey would be elected with a commanding majority. The survey gave Mr. Dewey 319 electoral votes from 39 States and Mr. Truman of the Democratic Party, 106 from 11 States. The survey also indicated that Dewey would be elected with a commanding majority. THE FIRST STEP
The Governments of East Africa have apparently solved the difficult problem of agreeing to unaccountably far-reaching changes in Customs duties. Yesterday, when they described as "substantial reduction" the duties on many commodities introduced. The sacrifice is estimated by Kenya at £1,000,000 a year. The reduction in the tariff on the suffering from lack of currency is a cost of living burden which is becoming increasingly heavy and will not fail to be gratefully received. Particularly they will be encouraged in the hope that the decision taken yesterday to reduce prices liberally taken in a new programme the aim of which is to force down living costs and reverse the present inflationary trend.

MR TRUMAN RE-ELECTED AS PRESIDENT OF THE U.S.

An unexpected victory

DEMOCRATS REGAIN CONTROL IN SENATE AND HOUSE

MR HARRY S. TRUMAN is again the President of the United States. His Republican opponent, Mr. Thomas E. Dewey, has been defeated in the closing stages of a fine of the election in United States history.

Mr. Truman's victory was a surprise to many observers. He had been widely expected to lose to Mr. Dewey, who had been widely expected to win a landslide victory. Mr. Truman's victory was a result of a combination of factors, including his unexpected popularity and the unexpected support of many voters who had previously supported Mr. Dewey.

DEMOCRATIC POWER IN CONGRESS

MEMBERS choosing their new President the people of the United States have elected Mr. Truman to a second term. The Democrats have also gained control of both the House and the Senate.

The Democrats' victory in Congress is a significant development. It means that the President and the majority in both houses of Congress will be of the same party. This is a situation that has not occurred since the Reconstruction era.

Day of Drama

IT HAD BEEN a dramatic day for the United States. Mr. Truman, instead of the expected Mr. Dewey, had won the election. The results were a surprise to many observers.

The election was a day of drama. It was a day when the American people showed their support for Mr. Truman. It was a day when the Democrats regained control of Congress.

THE NAME OF THE WINNER IS IMMATERIAL

THE VIEWPOINT OF BRITAIN—and, indeed, of the world—is that the name of the winner is immaterial. What matters is the result of the election.

The name of the winner is immaterial. What matters is the result of the election. The name of the winner is immaterial. What matters is the result of the election.

No landside after all

SIGNS OF OIL

In the Kalahari Desert

The Kalahari Desert may have valuable oil deposits, according to Mr. A. P. Auda, mining Commissioner, who has just returned from an extensive trip deep into the heart of the desert. The discovery of the Kalahari Desert is a matter of some importance, as it is one of the largest areas of oil-bearing rocks in the world. Mr. Auda has been exploring the desert for several months, and has discovered several promising oil fields. He has also discovered several other valuable minerals, including uranium and copper. The discovery of these minerals is a great boon to the country, and it is hoped that they will be developed in the near future.

'AIRMAIL IS QUICKER THAN A WIRE'

'Starboard' Dies of Salmon

AFTER hearing a complaint by a member that it is often quicker to send an airmail letter than a telegram, the Starboard Chamber of Commerce decided to try to arrange delivery of postal delays and discrepancies. The President, Mr. A. T. Berridge, has arranged for the Starboard to be delivered by air. This will ensure that the letters are delivered as quickly as possible. The Chamber of Commerce is always interested in improving the efficiency of its services, and this is a step in the right direction.

THE TERMITE PEST

Now a danger to the Union

FIRST found in an office desk in Durban in 1918, the South African dry-wood termite has multiplied so rapidly in Durban and along the coast that it is now a national danger. It is a pest that is very difficult to control, and it has caused considerable damage to buildings and furniture. The Government has issued several notices regarding the termite, and it is hoped that these will help to control its spread. It is important that all citizens be aware of the danger and take the necessary precautions.

CORRESPONDENCE

DEPT OF LIFENS

To the Editor, "E. A. Standard,"—In welcoming this morning's announcement of the right direction to make the road to the right, I am glad to see that you have not only a new program but also a new spirit. It is a sign that the Government is taking a forward-looking view of the future, and it is to be hoped that this will lead to a more prosperous and stable country.

HOSPITAL TAX

To the Editor, "E. A. Standard,"—The Government's new hospital tax is a most unfortunate measure. It will place a heavy burden on the shoulders of the poor, and it will do nothing to improve the quality of the services provided. The Government should consider other ways of raising revenue, and it should not place such a burden on the most vulnerable members of the community.

Famous British artist visits Kenya

One of Britain's best-known artists, Frank Brindley, is to spend a few weeks in Kenya. He will be visiting the various reserves and national parks, and he will be painting the beautiful scenery. His work is well-known throughout the world, and it is hoped that his visit will bring more attention to the beauty of Kenya.

OVERSEAS MAILS

The following are the dates of the overseas mails: London to Kenya, Nov. 10; Kenya to London, Nov. 15; London to Kenya, Nov. 20; Kenya to London, Nov. 25. It is important that all letters and parcels be sent in plenty of time to avoid any delay.

TEA & COFFEE PRICES

The prices of tea and coffee have risen sharply in recent months. This is due to a combination of factors, including a shortage of supply and an increase in demand. It is hoped that the prices will stabilize in the near future.

75 learn on route

Seventy-five people have been trained on the new route between Durban and the interior. This is a great achievement, and it will help to improve the transport services in the region.

Rapid breeding

The breeding of the termite is rapid, and it is a cause for concern. The Government should take steps to control its spread, and it should ensure that all citizens are aware of the danger.

TEA & COFFEE PRICES

The prices of tea and coffee have risen sharply in recent months. This is due to a combination of factors, including a shortage of supply and an increase in demand. It is hoped that the prices will stabilize in the near future.

Another opinion

The late Sir Thornton Redwood, who served Africa as a viceroy, has expressed his opinion on the future of the continent. He believes that Africa should be developed as a single unit, and that it should be governed by a single authority. He also believes that Africa should be free to trade with other countries, and that it should be able to attract foreign investment.

One of benefits

Mr. Berridge suggested that the benefits of the airmail service should be made known to the general public. He believes that this will encourage more people to use the service, and that it will help to reduce the cost of postal services.

Britain builds more ships

Britain has built more ships in recent years than it has for many years. This is due to a combination of factors, including an increase in demand and an improvement in the shipbuilding industry.

THE WORLD OF SPORT FOOTBALL IS BOOMING IN BRITAIN JUST NOW

London Correspondent COMMENTING on the Daily Mail on the present Soccer boom, which he regards as the height of Geoffrey Hampton writes:

They don't call Arsenal the Bank of England least for nothing. The Football League champions have come out again with another six points for a total of £21,645 and a story of status property and financial strength to tell to their shareholders at the annual general meeting on November 11.

Twenty-nine years have gone by since the first Soccer League club began to pay dividends. The club which has done this is Arsenal, which has paid £1,000,000 in dividends since 1947. The club's profits are £1,000,000 a year, and its assets are £10,000,000.

The Arsenal club is not alone in this. Tottenham Hotspur has paid £1,000,000 in dividends since 1947. The club's profits are £1,000,000 a year, and its assets are £10,000,000.

Transfer fees

Football clubs these days are generally by money. Clubs are prepared to pay large sums for players. Arsenal in the transfer market has been the most active. The club has paid £1,000,000 for Bobby Charlton, £1,000,000 for Denis Law, and £1,000,000 for Peter Beardsley.

SCOTS ON THE WARPATH: SPIRIT OF RUGBY

Kenya's Governor, Commissioner, and the Kenya Police Sports Association are holding a competition in the form of the experimental XI which defeated Wales on October 22 at Cardiff. Scotland may well make a bold bid this season to challenge and break England's supremacy in the international championship.

Rugby scene

Writing on the present trials in their football in the Sunday Express, Mr. Marshall expresses the view that the British Union will be able to come straight back to the world's sporting stage. The spirit of the game is still there, and the fact that the distance between the two continents has been almost non-existent. Time and again there are men mentioned who have been in the game for many years, and who are now playing at a high standard. The fact that the game is still being played in the same spirit is a tribute to the character of the game. K.N.F.U. holds its first annual conference at Nakuru

PRESIDENT SAYS UNION IS BANNER OF AGRICULTURAL UNITY IN THE COLONY

SOME 100 delegates representing all parts of Kenya filled the Municipal Hall at Nakuru for the first annual conference of the Kenya National Farmers' Union on Tuesday. Mr. Will Evans, first President of the Union, was supported by members of the Interim Council, as well as by Mr. J. K. Knowler, General Secretary of the British N.F.U., and Mr. Caldecott and Major Riley, Kenyan Members of Parliament. Captain F. O. Wilson, Chairman of the Kenya Board of Agriculture, was on the President's right hand.

In his speech Mr. Will Evans referred to the K.N.F.U. as the banner of agricultural unity in Kenya.

"In view of the history of Kenya agriculture was passed that day," he said, "by the first annual conference of an Organisation of which membership was open to the whole agricultural community."

'Good of Kenya'

On November 11 last year had been held the inaugural conference signed by the Member for Agriculture and Natural Resources, who had said it could only be for the good of Kenya to have a strong and united farmers' union.

The Interim Council then appointed a committee to consider the question of a permanent body to be formed in place of the Interim Council. This committee has since held several meetings and has been busy in organizing the various branches of the Union. It has also been busy in organizing the various branches of the Union. It has also been busy in organizing the various branches of the Union.

Too early

Speaking of the Agrarian Bill and the President's complaint, Captain Wilson said that it was too early to say anything about the bill. He said that the bill was a good one and that it was a banner of agricultural unity in the colony.

'Our doctrine'

The continued fact that it is a good bill, he said, is that it is a good bill. He said that the bill was a good one and that it was a banner of agricultural unity in the colony.

Sound basis

It was essential to increase production by increasing the yield per acre. He said that the bill was a good one and that it was a banner of agricultural unity in the colony.

Before the war

Captain F. O. Wilson, speaking at the conference, referred to the fact that Kenya farmers were not doing as well as they should. He said that the bill was a good one and that it was a banner of agricultural unity in the colony.

SUNBELT

PORTABLE CYLINDER GRINDERS

The Sunbelt Cylinder Grinder produces a smooth, round hole every time, and has built the cylinder in tapered, uniform, one piece.

It is guaranteed to remove cylinders of all sizes with the crankshaft as the original size of the cylinder is not affected by any wear during the grinding process.

It removes from two to four thousand grits of metal with a minimum amount of pressure. It is simple to use, and setting any heavy duty grinder with it will operate the Sunbelt Cylinder Grinder.

The Standard Model handles any job from 2 1/2" to 4 1/2" and the Junior Model from 1 1/2" to 2 1/2".

Stations can be changed from roughing to finishing in 20 seconds. Sunbelt Grinders are made in the United States of America by the Sunbelt Grinding Machine Co. of Chicago, Illinois. They are the best in the world in the class, including 1/4" and 3/8" grinding wheels. Write for Catalogue and Price List.

DIARISTS POSE A PROBLEM IN PSYCHOLOGY

THE writers of diaries and letters pose a problem in psychology which is as interesting as it is difficult to answer. How much do they write of true observation and how much is the true personality of the writer in the eighteenth century. He is to a large degree a reporter of his own life. In the great epoch of letter-writing, it is assumed that "you are what you write" with one eye on immortality. The nineteenth century this tradition had found its best use in the diary. The diary was a private thing, and it was assumed that the letter was a public thing. The diary was a private thing, and it was assumed that the letter was a public thing. The diary was a private thing, and it was assumed that the letter was a public thing.

'Scottish' means 'from Scotland'

One in Scotland gets the natural conditions perfect for making Scotch whisky. Only Scotsman working under these conditions has skill and knowledge for the task. There is no whisky like Scotch whisky, and 'Johnnie Walker' is Scotch whisky as it is called. Nowadays you may see it able to get it as often as you would like, but it is worth waiting for.

A chronicle from Scotland

HERE in Scotland, an October moves towards its close, we are having a real 'Old Lady's summer' for as though there is that sign in the air with occasional frost at night which heralds the coming winter, we are seeing more of the sun itself than we saw throughout the summer months.

And while this is very pleasant news to the country, where it has been so long since it has had a serious situation created by the summer drought and stored water.

The present Lord Provost of Edinburgh Mr. A. H. Murray is showing himself to be a forthright outspoken man on the part of such a prominent figure may not be too popular in some quarters, there is little doubt that it is one of the brightest signs of the times in this country today.

Pain speaking

Regimentation, discipline, controls and an ever-increasing civilian population, there may be little doubt at least for the time being but that these things in turn should be carefully controlled and made to give account of their stewardship, by strictly enforced discipline.
