THE CHURCH CELEBRATES ITS 100th YEAR IN KENYA

Commemoration of Dr. Krapp's Landing at Mombasa

(FROM A CORRESPONDENT.)
The significance of a date sixty years ago in the history of Kenya is commemorated in a special issue of this East African Standard on May 7. It was on that day that Dr. Krapp landed at Mombasa, the first of the missionaries of the Society of African Missions to establish their work in Kenya.

(FROM A CORRESPONDENT.)
The Church in Kenya, His Grace the Archbishop of Canterbury, is commemorating the centenary of the landing of Dr. Krapp at Mombasa. The Archbishop of Canterbury, who is the spiritual father of the Church in Kenya, has appointed a committee to prepare a message of good wishes to the people of Kenya on this occasion.

Dr. Krapp's landing at Mombasa in 1844 is a landmark event in the history of the Church in Kenya. It was the beginning of a long and fruitful mission that has led to the establishment of the Church in Kenya as a vibrant and growing community.

The Archbishop of Canterbury, who is the spiritual father of the Church in Kenya, has appointed a committee to prepare a message of good wishes to the people of Kenya on this occasion. The committee has decided to publish a special issue of this East African Standard to commemorate the centenary of Dr. Krapp's landing at Mombasa.

SANATOGEN

The True Tonic Food

Life today demands more energy, more vitality than nature alone can provide. That is when Sanatogen is needed. Sanatogen is the most highly concentrated source food. Daily Sanatogen gives the health and vitality necessary to carry you through stress and worry.

HALZANA

The Mineral Food for Bitter Health

A shortage of calcium in the system causes lack of appetite, nervousness, irritability, indigestion, and constipation and tooth decay. Doctors everywhere recommend Halzana as calcium in the form most easily absorbed by the body. Unlike all calcium by salts.

FORMAMINT

The Germ-Killing Throat Tablet

Formant Tablets kill the germs in mouth and throat, and if taken at the first sign of a sore throat, prevent dangerous infectious diseases. Formant does not irritate the inflamed tissues of mouth and throat.

It is reported that the conditions have almost returned to normal in the distribution of Sanatogen, Halzana, and Formamint and they are, therefore, in short supply. All who wish to order, should apply to the nearest British Colony agent, or to the nearest branch of the nearest British Colony agent, or to the nearest branch of the nearest British Colony agent.

TALLY-HO! IN NAIROBI
Fugitive "Goes To Ground" In Sewer

Early on Wednesday morning two men were seen by the Nairobi Police on duty outside the premises of the Kenya Club. One of the men was wearing a dark coat, and the other was wearing a light-colored coat. They were seen to enter a sewer and to remain there for some time. The police were alerted and searched the sewer, but the men were not found. The police are now searching for the men and are offering a reward for their capture.

Points on Fats Coupons

As there has been an improvement in the position of the butter ration for the month of May, it will return to the figure of 1 lb. per week.

There has been a deterioration in the position of the ration of edible oil, mainly due to the fact that the ration of edible oil has been reduced to 1 lb. per week. This is due to the fact that the ration of edible oil has been reduced to 1 lb. per week.

Under The Standard Clock

GRAIN CONDITIONING
In view of the incidence of various diseases in grain, it is essential that the grain be conditioned before it is used for human consumption. This is done by the use of a grain conditioner, which is a machine that treats the grain with a special solution. This solution kills the germs and makes the grain safe for human consumption.

He Went Through the Air

"STANDARD" COMMENTARY

A description in a London newspaper of a man who had been seen flying through the air. The man was seen to be flying through the air and was seen to be flying through the air. The man was seen to be flying through the air and was seen to be flying through the air.

Tyre mileage diminishes rapidly as tyres are loaded beyond rated capacity. Overload causes fast tread wear by increasing the load per square inch of contact area. It also causes irregular or cupping wear due to excessive irregularities in tread. Never overload your Giants and your tyres will last longer.

THE AIRBORNE TROOPS WILL HAVE BIG PART IN INVASION

Widespread interest has been aroused in Britain by the report on food consumption here in Britain, the United States and Canada. A Department has been issued by the Combined Food Board on which all food requisitioning is based. It was the first time that the food requisitioning of the United States and Canada has been included in the report. The report is a continuation of the food requisitioning of the United States and Canada which was published last year. It is a continuation of the food requisitioning of the United States and Canada which was published last year. It is a continuation of the food requisitioning of the United States and Canada which was published last year.

Kenya Spinning Knees In Ethiopia

By **Guendoline Hoey**

I have been asked to write an account of a visit I made to Abhinaba, the first of the Ethiopian women of Addis Ababa, wife of a former British Minister in Addis Ababa, with the object of teaching members of the Ethiopian Women's Association to spin and weave wool and afterwards to weave into material suitable for blankets, shawls and towels.

Potential Lull Dyes
I was fortunate in being able to travel to Addis Ababa with a party. The hotelier engaged by the Ethiopian Women's Association was able to identify some of the dye plants which are now being found in Ethiopia. We found rubia, a yellow dye, and the red dye which is extracted from its roots. The plants were shown to me and Mrs. Davidson who has started an industry outside Addis Ababa for making henna fibre mats, carpets and curtains. In the past they have used imported materials such as red wool, rubber, blue and yellow from Jamaica and a brown fibre from India. We obtained shawls and huaracas from the Italian Consulate in Addis Ababa. Mrs. Davidson and the Chairwomen of the Ethiopian Women's Association notes on the preparation of these dyes in connection with the

These looms can be seen in use... three looms can be seen in use... the machine is operated by hand... the process is very simple... the looms are used for spinning wool... the wool is spun into yarn... the yarn is then woven into cloth... the cloth is then finished... the finished cloth is then used for blankets, shawls and towels.

Cirde and Stalls

During my visit to Ethiopia I was treated with the greatest courtesy by the Ethiopian Women's Association and all with whom I came in contact. It is true that my visit will prove to be of some benefit to them.

Friction the Chief Enemy Of Your Tractor

A name famed throughout the World...

QUITE recently we published an article on the maintenance and repair of tractors. Mr. C. Bagshot of Nairobi has written us on the subject and in an interesting letter he makes the following points which we can:

Replaceable Cylinder Linings

The reason given for most tractor engines, but not motor car engines, being fitted with replaceable linings is excessive wear due to poor vaporisation of the fuel.

The real reasons are two. Firstly, replaceable linings add to the cost and are not necessary in cases where they are usually designed for a life of up to 100,000 miles with proper care and no major over-heating. They are rebored and fitted with new piston rings on the other hand in damaged condition to do at least ten to twenty hours' work; most of them do 15,000 or many more hours of work before 100,000 miles is reached.

The number of tractors in the country is sufficient evidence of that fact.

Expensive wear applies to a less important factor - the number of hours - up to 10,000 hours before replacement of the lining.

The writer is, however, correct in stressing the importance of looking after the engine properly before the wear gets to the point where attention should also be given to the condition of radiator shutters and of heat control valves in the manifold.

Fuel Economy

The statement that the best fuel economy is obtained by running the engine slowest is possible in certain cases, especially in the case of a tractor. It is true that as the speed of the engine increases, the fuel consumption also increases. However, it is also true that the efficiency of the engine is also affected. The result is that the fuel economy is not necessarily the best at the slowest speed. The tractor engine is designed to run at a certain speed for the best fuel economy. It is important to run the tractor at this speed. If the tractor is run too fast, the fuel economy will be poor. If it is run too slow, the engine will wear out more quickly.

COOPER'S COMMUNIQUE

AGROSAN "G"

Limited stocks of Agrosan "G" for seed dressing are now available from the Kenya Farmers' Association (Co-operative) Ltd., Nairobi.

Dressing seed with Agrosan "G" destroys the spores of all seed-borne diseases. And at the same time, every grain of seed is covered with a fine protective layer. It means that the seed is not only freed from all spores of disease, but it is also protected against re-infection during storage, while you are planting or sowing, and until the grains have become healthy seedlings. In addition to this, the seed treated with Agrosan "G" germinates earlier, more evenly and in greater percentage. It ensures more vigorous and disease-resistant seedlings.

For further particulars write to:-

 BOX 308, NAIROBI.

For Better, Easier, More Profitable Dairying obtain a new McCORMICK-DEERING CREAM SEPARATOR

If your cream separator is losing money by wasting butterfat at the skim-milk stage, it is high time to invest in a new McCormick-Deering Ball-bearing Cream Separator. A Ballcock test of the skim-milk will tell whether you are able to continue using your old cream separator.

The McCormick-Deering is the closest-kimling cream separator on the market. It is easy running, easy to clean, and will give many years of good service. It is built in four sizes—capacity from 500 to 1,250 pounds of milk per hour. It can be operated by hand or by belt power. Limited stocks now available. Apply to your Production Sub-Committee for necessary purchase permit.

To avoid misunderstandings or disappointment at a later date, we would call the attention of prospective purchasers to the fact that we do not give a warranty of any kind, nor accept responsibility of any sort for I.H.C. Products assembled or distributed by firms who are not our duly appointed dealers.

S. Africa's Seed Position Is Good

(FROM A SPECIAL CORRESPONDENT)

Protea

Seed production has now developed to such an extent that not only in position to supply itself, but in some cases to export surplus to other neighbouring territories. It is important in the present state of the world, compared with 600 tons in 1920. Earlier in the year, South Africa had great difficulty in obtaining sufficient seed, but now as the result of scientific research, the problem has been overcome.

KENYA ARTS AND CRAFTS SOCIETY

To the Editor, "E.A. Standard"

Sir—In your edition of April 21 you were kind enough to include a short notice on an Exhibition to be held in July, and perhaps you will be so good as to publish this letter which amplifies that notice.

The Kenya Arts and Crafts Society was founded in 1925 with the objects of recording, drawing, painting, sculpture, photography and handicrafts through the medium of exhibitions, courses, and similar means, and to bring the public into contact with the art of the craftsman.

In 1930-1932 farmers in the Lamicho-Thomson Falls area, who are now included under the Sultan Hamud, insisted that the Sultan's title be made a link in the chain of what to make a link.

The Kenya Arts and Crafts Society will have to compete with the Kenyan Agricultural and Horticultural Societies, in which both these have been much more successful than in our agricultural products, so that our society has no way of showing that it is an economic unit in the eyes of the Government.

Considerable men placed on small plots will soon be made to hold a financial audit. Many will be put into the hands of the Government.

This is one of the main objects of the society, to be made to hold a financial audit. Many will be put into the hands of the Government.

This is one of the main objects of the society, to be made to hold a financial audit. Many will be put into the hands of the Government.

In 1935-1938 farmers in the Lamicho-Thomson Falls area, who are now included under the Sultan Hamud, insisted that the Sultan's title be made a link in the chain of what to make a link.

The Kenya Arts and Crafts Society will have to compete with the Kenyan Agricultural and Horticultural Societies, in which both these have been much more successful than in our agricultural products, so that our society has no way of showing that it is an economic unit in the eyes of the Government.

Considerable men placed on small plots will soon be made to hold a financial audit. Many will be put into the hands of the Government.

This is one of the main objects of the society, to be made to hold a financial audit. Many will be put into the hands of the Government.

To the Editor, "E.A. Standard"

Sir—Major J. J. Sharkey of the Thomson's Falls Association did not serve to Kenya in the year 1921 as stated in your issue of the 22nd inst.

It is understood that the late Mr. J. J. Sharkey was born in 1878 and died in 1921. He was a member of the Thomson's Falls Association and was active in its work.

The Thomson's Falls Association was founded in 1921 and has since that time been active in the development of the area.

The late Mr. J. J. Sharkey was a member of the Thomson's Falls Association and was active in its work.

Support in the past has been most generous, and it is hoped that membership will increase. The Society's records contain many members who are lovers of art, but who are not themselves artists. All well-to-do people who are interested in art and who are able temporarily, at least, to spare some of their means to support the work of the Society are especially welcomed.

The Society has a fund for the purchase of art objects, and has already been successful in this regard. It is hoped that you will be able to help in this way.

Yours etc.

BETTY MONTGOMERY, President.
Kenya Arts and Crafts Society.
Nairobi.
May 5, 1944.

SOLDIERS OR FARMERS?

To the Editor, "E.A. Standard"

Sir—Many of us in Kenya are perturbed at the large number of young men we see released from the armed forces to go to the farms.

We ask ourselves who is responsible for a state of affairs that looks very much as if the need for "production" takes priority over a man's duty to fight for his country.

It is clear that the number of those released have in the first instance been claimed by local production and Manpower Committees of the district. These are made up of a generalist, some with the fighting eye, to say nothing of other virtues, why not best? The farms being still in a state of flux, it is to be expected that many of the latter are, moreover, thousands of Italian prisoners fully competent to assist the farmers if the need is there.

The fact is that farming communities, such as ours, bring in a country as far removed from the War as people imagine that it is. It becomes an obsession which, if unchecked, will later on have unfortunate consequences, not only to those who forsake fighting for farming, but also to those who have inherited the young men to be sent to the farms.

It is in the interest of the general public, in other words, always with the same urgency, that we should consider this question.

Let us hope we shall see no more of these releases and that local Manpower Committees will realize that only in the event of the most exceptional circumstances should they seek the release of any man capable of bearing arms. It would be a boon to the man himself, and to the country, if he were allowed to continue to serve in the armed forces, or in the air force.

Yours etc.

A. C. LEWIN.
Nairobi.
April 28, 1944.

LAND CONTROL BILL

To the Editor, "E.A. Standard"

Sir—The new Land Control Bill has been introduced in Kenya, and it is to be expected that it will be passed by the Legislative Council.

The Bill is a very important one, as it will give the Government the power to control the land market in Kenya.

The Bill is a very important one, as it will give the Government the power to control the land market in Kenya.

THE MARKETING OF COFFEE

To the Editor, "E.A. Standard"

Sir—One day in 1941, walking along a road in the Sultan Hamud, my attention was attracted by the sight of a road, and I immediately speculated on the subject.

It was, as it turned out, a very interesting one, and it was very much to be expected that it would be passed by the Legislative Council.

The Bill is a very important one, as it will give the Government the power to control the land market in Kenya.
