The dog was a dog and therefore had a shepherd. The dog was a dog and therefore had a shepherd.

DISTRICT COUNCILS CONFERENCE

BRITAIN'S BLACK-OUT TO BE RELAXED

We in this land may well echo the expressions of relief and thanksgiving which have characterized the British people's reaction to the fairly complete, if momentarily partial, lifting of the black-out over the United Kingdom. And we thought that the lights of London which give us an insight into the life of the people who have been so long out of the world to contend with this depressing necessity in addition to all the other sacrifices demanded and trials brought by modern war.

The relaxing of the black-out regulations is of course the perfect symbol, speaking of the hope of speedy victory that is shining brightly today as it has not shone during the preceding weeks. The black-out in 1940, and which, incidentally, was the last, is to so many other nations, the darkest period in their history. As we look back over the dark and terrible days of the black-out, we can see that, though we could hardly see the lights of the black-out, it is a true symbol of the darkest period in our history. As we look back over the dark and terrible days of the black-out, we can see that, though we could hardly see the lights of the black-out, it is a true symbol of the darkest period in our history.

"Good equipment makes a good farmer better"

Last month I was fortunate enough to spend three consecutive weeks in three very beautiful gardens—most of the amount of bird life I saw during these visits was considerable. I am using the word "beautiful" here, in no limited sense, and am including rivers, forest, and woods (please). From each of these gardens I received a different outstanding memory, which I feel is too good to keep to myself, so am putting it on to you.

The first garden lies under the majestic canopy of the Magnolia liliifera tree in the middle of lovely country, it is a fascinating garden of lawn, forest and garden paths. The birds, forest and garden paths led to hidden

with a soft rust from the dry leaves there is a taste to eat and the bird is a little. White-crown, Red-tail, Green, the Blue Thrush and others.

The Future Of The African

By GEORGE RICKARD After The War—What?

It will be impossible, I think, to overstate the importance of the many letters which have appeared in the columns of the Standard since the publication of the Government's white paper on the subject...

There are of us who have lived with the war since the very beginning to respect him for the good fellow he is...

In no less sweep the War has eliminated almost every trace of that racial prejudice which has been the bane of this country...

Generally in five or six years we shall have a new generation of Africans who will be free from the shackles of the past...

The day will dawn, perhaps not long hence, when our African friends will not see our white friends as their enemy...

The Committee will meet in the course of several months for the purpose of finalizing the constitution...
