Colonial Secretary will open the Muguga research headquarters

WHERE Mr. James Griffiths, Colonial Secretary, formally opens the Muguga headquarters of the East Africa Agricultural and Forestry Research Organisation on May 28 will be the culmination of a good many years' effort to provide the East African territories with adequate facilities for basic research.

Dr. R. K. Koen, F.R.S., Director of E.A.A.F.R.O., is charged with responsibility for a campaign to provide East Africa with basic knowledge about agriculture and forestry, which is now urgently required. It has been among the essential tasks of the problems of the territories, a practical work in the field.

The objects
In his own words the objects of the Organisation are: the conduct of research into those sciences bearing on agriculture and forestry and the dissemination of the practical knowledge now in the territories to the benefit of the people.

East Africa's first inter-territorial research headquarters at Muguga, Tanganyika, was found to be inadequate for the work of the Organisation. Additional laboratories had to be built and the buildings were in a very poor state of repair. It was decided that the new headquarters should be built on a site near the old headquarters at Muguga.

Valuable discovery
An example of the discovery of a new insecticide, which has been found to be highly effective against the pest of the cotton plant, has been made by a team of scientists working at the Muguga headquarters.

Finances
The Muguga headquarters is a rapidly rising building and other works. The scheme is financed by the Government of Tanganyika and the other territories.

At Subukia
At the other end of the district, Subukia, Mr. R. W. Johnson, District Officer, has been visiting the area to inspect the progress of the work.

Strong teeth kept strong because Kalyvos foam cleans

It's better to look that danger lies. That's where bacteria multiply and go to work—providing the acids that cause decay. "Kalyvos" foam prevents mouth-tooth contact that neutralizes the acids, drowns bacteria. Report laboratory tests have proved that "Kalyvos" cleanses up to 95 per cent of harmful mouth bacteria. "Kalyvos" helps to keep teeth healthy—keeps them wonderfully white and strong.
