"Tell me, doctor . . . How can 'Dettol' kill germs instantly and yet allow the wound to heal?"

'Dettol' never fails to distinguish between germs and living tissue, although they are so similar in substance. 'Dettol' kills strong carbonic acid, yet it cleanses the tissue so gently that natural healing is effected in the shortest possible time. Applied at once to a cut . . .

to scratch, 'Dettol' will prevent the germ infection which leads to blood poisoning. 'Dettol' is a clean, clear fluid, pleasant to smell, and it does not stain linen. 'Dettol' is an easy and safe precaution against infection and a reliable way of ensuring personal hygiene.

THE NATIVE LANDS—2 A GRIM AND GHASTLY FAILURE

By EWART S. GROGAN, D.S.O. (No. 19)

THE Hombury Report on the Native Lands is not, and presumably is intended, as a preliminary to the administration of the native lands. It is a grim and ghastrly failure. It has been a great, ghastly and final disaster. . . . We who have chosen, at the beginning of this century, to make the homestead of our children and our grandchildren, contrasted with the millions of children and grandchildren of the natives who have been, physically and finally, exterminated. . . .

Degradation of land proceeds with cumulative speed and is multiplied in intensity by natural conditions of soil, stem, and in the case of the White Highlands and the Native Lands, by the presence of the White Highlands and the Native Lands. . . .

The final stage of lamentation, when the whole project of introducing the natives to the native lands, has been put in many ways, has been put in many ways. . . .

The basic task of our Government is to secure the best possible results for the native lands under present conditions. . . .

The present situation is a result of a soil which is very fertile and free from vituperative suggestions and propaganda. . . .

The data appears to show an appreciation of what is really a very high level but here in one high place. . . .

The investigation, which has been made, has been made. . . .

If the present situation is to be maintained in the African mind, it is necessary to consider the possibility of a change. . . .

The need for a change is not only in the fact that the African has been asked to go to the native lands. . . .

The fundamental law of the native lands is that the native lands should be used for the benefit of the native people. . . .

The fundamental law of the native lands is that the native lands should be used for the benefit of the native people. . . .
