Inner Cleanliness comes first for health and is the basis of all health and vitality. A single health care is worth remembering - and that is the fact that the only way to keep the body clean is to keep the inner organs clean. This is the new Andrews Cleanse - the only one that cleans the inner organs and the blood.

NEXT - Andrews treats the stomach and corrects acidity, the chief cause of indigestion.

THEN - Andrews tones up the liver and cleanses the system.

FINALLY - Andrews purifies your blood, cleanses your arteries, and restores your vitality.

HOMES FOR THE PEOPLE

The end of the war has found East Africa facing a problem of housing that is becoming more acute every day. In the larger centres overcrowding is already a serious problem and in the towns immediately surrounding the war-torn Government Authorities were compelled to consider assuming heavy financial burdens in association with the erection of new houses to provide some solution. However, the Government has not yet entered into building programmes to solve the housing problem and in our view, that a solution of the problem of housing of all races in the urban areas is among the first necessities of all post-war planning.

The problem has been complicated by factors additional to the war over which we have little control. Not the least of these has been the rapidity of the growth in the last two years of the larger towns. The Government has a responsibility, not easily avoided, of attempting to cope with this growth. The need for hurriedly modernising housing in the larger towns should have been spread over a much longer period. The removal of the old type native locations and their replacement by the modern type is only temporary, the improvement of the bazaars, the provision of good housing for the rapidly increasing African population and the opening up of new and widespread European residential areas are essential. The Ministry of Health has been particularly active in this respect, straining all the resources of State and municipal authorities to a sudden stop. But the Government has not been able to accelerate and there is a possibility of a sharp increase in the number of people and the possibility of a very high mortality rate if the normal methods.

One of the results is the present unsupportable rise in the value of housing. This has caused a great increase in rents by varying degrees, despite the fact that the Government, the certainty of a sudden rise in the cost of living and the additional inflationary symptoms of increasing prices of raw materials, and the possibility of a very high mortality rate if the normal methods.

The urgency of the situation is increasing. Africans are continuing to enter the towns where already thousands have no homes. The population is growing steadily and we are planning for the future. Large numbers of people are entering the towns from the United Kingdom and elsewhere during the winter months. The fact that they have to live in East Africa. There are thousands of inquiries at the London Office and the Governments of every Dependence are being flooded with inquiries. Large-scale schemes are being contemplated and it is essential that the Government should be able to meet the needs of the people.

Some ten days ago we published the details of a plan which had been designed and built in Nairobi. It was a plan for a small residential unit in building costs today, and though it was originally intended for African use it was obviously capable of meeting the needs of the grounds that food was in short supply and housing accommodation was congested. It will be difficult, perhaps impossible, to maintain that argument against the pressure exerted by the Government and the development needs and potentials.

Problems of Returning African Soldier

HIS FUTURE DISCUSSED BY ROYAL EMPIRE SOCIETY

PROBLEMS involving the return of African troops used in the important theatre of war who had experienced the stimulus of travel and observation of conditions outside their own country, are being discussed at a meeting of the Royal Empire Society in London recently.

Our African soldiers occupy a very large share of the attention of the Royal Empire Society, and their future plans, their education, their employment, and their social position are being discussed at a meeting of the Royal Empire Society in London recently.

In their discussions there is a large element of uncertainty as to the future of the African soldier returning from the war. African soldiers have been trained as soldiers of war and their education is limited to that of a soldier.

It is this lack of education which has made it difficult to find a place for the African soldier in the civil life of his own country. The Royal Empire Society is doing its best to help him.

Alarm At Increased Expenditure

£800 p.a. FOR "UNTRAINED FIELD OFFICERS"

ALARM at the growing increase in Government Expenditure

Without a corresponding increase in the farming, trading, and revenue producing members of the community was tabled in a question by Mr. J. E. Lusk at the opening session of the Legislative Council.

One of the main reasons for the alarm is the fact that the Government is spending more on the "untrained field officers" than it is on the "trained field officers". This is a matter of great concern to the community.

A Merry Christmas, 1918

THIRTY years of war and a host of "holidays" which Mr. Kerry, as he is called, has had to see, have not been so much an end to his life as Christmas and the days following. He has seen the war, the peace, the reconstruction, the depression, the war again, and the peace again. He has seen the world change and the world stay the same. He has seen the world become a better place and the world become a worse place. He has seen the world become a more beautiful place and the world become a more ugly place. THE EAST AFRICAN STANDARD

There is no lack of imagination of the average man. It is not the average man who is responsible for the trouble in the world today. Why these war-torn times and the millions of African dead and maimed, all interests, imperial projects, and the world's peace, are being sacrificed? All these things are the result of the actions of a few men, who are the only ones who are responsible for the trouble in the world today. "A Farm For You"

(CONDENSED FROM A BROADCAST BY MR. J. F. LEWIS, COMMISSIONER OF AGRICULTURE, EUROPEAN SETTLEMENTS).

On November 24, 1934, the Governor announced that the Kenya Government had approved by the Colonial Office, the settlement scheme for a certain farming scheme which is particularly designed for the Government, and an African Settlement Scheme, in which the Government will give the settlers the land, and will also give them the capital to enable them to do so at a rate of interest that can be afforded by you.

The full facts and figures of the Scheme, as accepted, are given in detail on a pamphlet which is being printed, and which will shortly be placed in the hands of every man who has applied to a Postoffice Proprietor for a Farm. It is a very important document, and one which you should read before you apply to a Postoffice Proprietor for a Farm. It contains the full details of the Scheme, and also a list of the names of the settlers who have already been selected for the Scheme. Carries Good Health in the Ends of the Earth

From pole to pole the distribution of Eno's Fruit Salt has followed the activities and progress of mankind. From the ice-caps of the North, down the length of the Sahara, from the humid wastes of the South, across the deserts, and through the jungles of the tropics, it has followed the demands for food and necessities of man and beast, and the progress of civilization.

It stimulates the digestive and other secretions of the body in general, and natural action, and thus profits the individual, coming to the whole system, and leading to a delightful sense of physical well-being. Its action is to improve and regulate the action of the system. It is the only salt that can be used.

BACK TO LIVESTOCK

While the war-time farmers in this country were busy with their own affairs, the livestock industry in this country was largely neglected. As a result, the supply of livestock has fallen to a very low level, and the price of livestock has risen to a very high level. It is now time to get back to livestock, and to produce the livestock that we need for our own use, and for the use of our country.

The Moscow Talks

The four-column communique
regarding the Moscow decisions
will be welcomed with considerable
relief throughout the world.
It provides evidence that, however
difficult the situation may be,
there is a common goodwill and
a common sense of responsibility.

New procedure has been laid

peace treaties with Italy,
France, and Germany's Balkan
satellites. It is understood that
France, under General de Gaulle,
should protest against exclusion
from some of these talks but it
is not likely that any such protest
will be made.

the early return of political

of the earnestness with
which the Chinese people

He said that the Government

CORRESPONDENCE

THE NON-PARLIAMENTARY

To the Editor, "E.A. Standard"—

It is all this nonsense? The Administration should devote a certain amount of space in providing service conditions similar to those existing in Government departments, which would introduce a new element of interest and bearing in mind the present day living conditions of the people. The Kenya Railway Union, after chief a representative survey of the railway staff particularly in the railway section, has been engaged in a long struggle for the past 18 months drawing attention to the fact that the railway staff, comprising of grade IV and V, are not receiving the same benefits as the staff in other sections of the railway. It is not only the railway staff but also the staff in other sections of the railway who are not receiving the same benefits as the staff in other sections of the railway.
