

ACKNOWLEDGEMENT

The assistance of Mr Kenneth K. Mbali in providing the initial data and the secretarial services offered by Judy W. Wambugu are highly appreciated.

We also acknowledge the support of Prof. Agnes Mwang'ombe, Principal, College of Agriculture and Veterinary Sciences, the Dean, Faculty of Agriculture, the Dean, Faculty of Veterinary Medicine and all Heads of Departments in the College.

WANGARI MAATHAI INSTITUTE

Prof. Wangari Maathai, Distinguished Chair,
Wangari Maathai Institute for Peace and Environmental Studies

MESSAGE FROM THE PRINCIPAL, COLLEGE OF AGRICULTURE AND VETERINARY SCIENCES A WORD FROM THE PRINCIPAL, CAVS

This is CAVS third Annual report after the first inaugural annual report of 2007/2008. I wish to take this opportunity to commend the college Academic Board sub-committee under the chairmanship of Dr. S. G. Kiama, Ag. Director Wangari Maathai Institute which has remained very committed to this task leading to the production of the third annual report 2009/2010.

The 2009/2010 was yet another successful year for CAVS. The academic function has continued to grow both in student numbers and quality of curricula content and delivery. The quality academic programs backed by well trained and committed staff are now attracting students not only from Kenya but also from the rest of sub Saharan Africa. To mention just a few the BVM and MSc. Programs continue to attract both national and regional students. The department of Land Resource Management and Agricultural

Technology (LARMAT) was recognized as the regional center of excellence in Dryland Agriculture and is now hosting a regional PhD program in dryland resource management. This program has been able to host the first group of PhD students drawn from East, Central and southern Africa. It is the first Phd Science based program in the University of Nairobi which has incorporated a one year taught course and designed to graduate students within three years. The program is sponsored by RUFORUM and her partners. These programs are supported by professional mentorship initiative in CAVS and enhancing capacities in PhD supervision by creating critical mass of trainers.

The research programs continue to grow and are clearly setting CAVS at a higher level in comparison to the other Agricultural institutions in the region. This portfolio more than tripled its revenue when compared to 2008/2009. This has not come by chance but due to the academic staff commitment towards research excellence. Teamwork, attitude shift and realignment towards multidisciplinary and transdisciplinary has greatly contributed to this success.

CAVS has been able to engage comprehensively with other institutions leading to creation of several linkages which have been able to leverage for funds to support activities of national interest in the area of food and nutrition insecurity and poverty reduction. Cross cutting issues such as gender, climate change, environment and HIV/AIDS are fully integrated in most of the research activities. The college was able to patent Biofix for legumes and operationalize the first private public partnership with MEA Ltd (leaders in fertilizers).

CAVS social responsibility programs are as diverse as the various scientific disciplines represented in this college. The food security program focused on promotion and supply of disease free sweet potato vines in Kiambu and Taita hills. The program has supported over 500 farmers at each site and have been able to produce both for home consumption and markets. CAVS continues to actively participate in the Nairobi International show through exhibitions and competing in various entries of farm produce/products. In 2009/2010 CAVS obtained several awards and trophies.

Student leadership continues to exhibit growth and has been able to serve as an effective link between administration and students fraternity. The college continues to give student leaders relevant skills for better service to the electorate. CAVS continues to host both professional, cultural and social activities with the aim of continuing to produce more holistic graduates.

Environment is embedded in our academic and research activities. Besides planting trees in Ngong hills, CAVS has initiated tree planting along the three riverines in Upper Kabete. In the 2009/2010, CAVS planted over 8,000 tree seedlings with 100% take off due to tender care accorded to them.

In brief, the outlined achievements have been made possible by being more people focused leading to unlocking the immense and diverse intellectual capacity at CAVS while providing an enabling environment for excellence to thrive and excel.

I wish to take this opportunity to thank all students, staff and stakeholders who made 2009/2010 to be a very fulfilling year.

**Prof. Agnes Mwang'ombe,
Principal, College of Agriculture
and Veterinary Sciences**

Principal CAVs receiving and Equipment to support the Africa Knowledge Transfer Partnership

WORD FROM THE DEAN, FACULTY OF VETERINARY MEDICINE

The Faculty of Veterinary Medicine is one of the oldest Faculties in the University of Nairobi having started training in diplomas in the 1940s. It later became fully fledged Faculty offering degrees in 1962 and will be celebrating its 50 years since inception in 2012. It has produced a large part of the alumni of over two thousand both undergraduate and postgraduate.

Currently, the Faculty has a teaching staff of 115, technical, secretarial and support staff of 140.

The Faculty currently offers three (3) degree programs namely; Bachelor of Veterinary Medicine, B.Sc. in Biomedical Technology and B.Sc. in Wildlife Management & related options. In addition, it offers over 20 M.Sc and PhD programs, a diploma, one (1) postgraduate certificate and one (1) certificate program.

Having undertaken to participate in achieving the vision 2030, it has joined the other stakeholders in developing the leather technology programs at diploma, B.Sc, M.Sc. and PhD levels and it is hoped that the course will be launched in this

academic year. A new program has also been developed in Natural Products and Bioprospecting at M.Sc. level and the first class was enrolled in 2010

The Faculty continues to participate in outreach and community services and Biennial conferences that attract local, regional and international participants. The 9th Biennial conference will be held in September 2012 and the Dean invites you to participate.

**Prof. Njenga Munene J., Dean,
Faculty of Veterinary Medicine**

WORD FROM THE DEAN, FACULTY OF AGRICULTURE

The Faculty of Agriculture was started in 1971 and on its inception, 41 students joined the Faculty. The aim then was to train personnel who were broadly knowledgeable in most aspects of agricultural sciences namely; soil, crop and animal production, crop protection, agricultural economics, agricultural engineering, rural sociology and extension, range management and food science. In addition to these subjects, basic sciences such as physiology, biochemistry, mathematics, botany and zoology were taught. Farm practice was also a component of this programme.

The role of the Faculty has been to produce graduates in the fields of Agriculture, Range Management and Food Technology and has since then, produced many highly trained specialists who are serving in Sectors of Agriculture, financial institutions, agro-chemical institutions plus feed and food processing companies among many others. At postgraduate level, many students graduate with various specializations namely; crop science disciplines, crop protection disciplines, range management, economics, soil science, animal production, food science and applied human nutrition, agribusiness management and agricultural education and extension. In addition, academic staff members are actively engaged in agricultural research activities thus contributing directly to rural transformation in this country.

Currently, the Faculty offers eight (8) undergraduate programmes. Seventeen (17) specializations in Masters of Science and Doctor of Philosophy degrees, two (2) Diploma courses and three (3) Certificate courses.

The Faculty in consultation with the stakeholders continues to re-organise various programmes as well as the accompanying activities in order to produce the right graduates who can be able to discharge their professional duties in any working environment including public, private, NGO or self-employment. The research activities the Faculty have been intensified while promoting outreach programmes among the prospective beneficiaries of the resultant technologies.

Prof. S.I. Shibairo, Dean Faculty of Agriculture

MESSAGE FROM THE DIRECTOR, WANGARI MAATHAI INSTITUTE FOR PEACE AND ENVIRONMENTAL STUDIES, UNIVERSITY OF NAIROBI

The process towards the establishment of the Wangari Maathai Institute for Peace and Environmental Studies (WMI) is well underway. On February 16, 2011 an independent and international Panel of Jurors announced the winning architectural design for the “Green” Campus that will host the Institute for Peace and Environmental Studies at the University of Nairobi. An initiative of the Noble Peace Laureate, Prof Wangari Maathai, head of the Green Belt Movement and Distinguished chair of the Institute, the Green Campus will be built at the UON’s College of Agriculture and Veterinary Sciences, Kabete Campus.

The Design competition had been endorsed by the Architectural Association of Kenya (AAK) and the Board of Registration of Architects of Quantity Surveyors (BORAQS) who took an active part in the final selection, which was done anonymously. Once completed, the winning architectural design is expected to meet stringent carbon foot print. The Campus will be self sufficient in terms of lighting, energy, waste management and water requirements as much as is practically possible. In addition to the physical facilities, it is also envisioned that on the 50 acre plot there will be a natural landscaped amphitheatre with a seating capacity of 2000 and demonstration plots covering different aspects of environmental restoration, protection and conservation.

Prof. Maathai has been honoured with several recognitions, awards and prizes internationally with the pinnacle of her accomplishments being the 2004 Nobel Peace Prize, which made her the first

African woman Nobel Peace Laureate. Since receiving the Nobel Peace Prize, Professor Maathai has been visualizing an institution that would primarily focus on changing the values, ethics and attitudes of key change agents, ultimately transforming them into better stewards of resources and agents of peace. This ideal was informed by her long experience in peace building through the conservation of the environment, which revealed that most of the on-going mismanagement of resources, poor accountability frameworks, greed, and the near non-enforcement of existing policies has largely been the result of persistent erosion of values, attitudes, and ethics across the population and the leaders.

The institute will spearhead holistic multi-disciplinary training, research, outreach and extension services in environmental and natural resource management, good governance and peace. Furthermore, it will institutionalize the experiences and values of Prof. Wangari through a permanent

exhibition of her works as well as develop regional and international partnerships and links. In addition, the institute shall provide a forum and platform for leaders to exchange ideas and interrogate issues that affect the socio-economic transformation of societies. The WMI campus is envisioned as a functional and inspiring hub of activities in the natural

resource management area and education for sustainable development and should therefore be particularly appealing in its aesthetics and environmental considerations.

Dr Kiama Gitahi
Ag Director, Wangari Maathai
Institute

The maintenance and Construction Manager, University of Nairobi, Dr. S. Masu explaining the proposed plan of the Wangari Maathai Institute to Prof. Maathai

INTRODUCTION

The College of Agriculture and Veterinary Sciences (CAVS) was established in 1985 by the University Act and is one of the six colleges of the University of Nairobi. The college comprises two faculties and one Institute; Faculty of Veterinary Medicine, Faculty of Agriculture and Wangari Maathai Institute for Peace and Environmental studies which were started in 1940, 1970 and 2009 respectively. The Faculty of Agriculture is made up of four (4) departments namely; Department of Agricultural Economics, Department of Plant Science and Crop Protection, Department of Land Resource Management and Agricultural Technology and Department of Food Science, Nutrition and Technology while the Faculty of Veterinary Medicine has five (5) departments; Department of Veterinary Anatomy and Physiology which is located at Chiromo Campus, and the departments of Animal Production, Veterinary Pathology, Microbiology and Parasitology, Clinical Studies and Public Health, Pharmacology, and Toxicology located in Kabete Campus. In addition, the College has several teaching and research farms and field stations located at Nairobi, Central, Eastern and Coast provinces. The college is situated about 14 kilometres to the north-western city boundary and can be accessed via Kabete Technical Institute/AHITI road, through the Naivasha road roundabout at Uthiru, onto the fly over past Ndumbuini shopping centre, off Kapenguria road.

CAVS has a population of 186 fulltime Academic Staff, who are engaged in teaching, research and outreach activities in diverse areas. The academic staff supported by an equivalent number of technical and support staff. CAVS academic research and

Prof. Maathai with Hilary Clinton when the latter visited UON to give a public lecture

outreach activities are focused around global, regional and national concerns and are leveraged on national goals as articulated in Strategy for revitalizing Agriculture and vision 2030 and other regional and global initiative such as Comprehensive African Agricultural Development Programme (CAADP) and Millenium Development Goals (MDGs). The College therefore aspires to contribute to eradication of extreme poverty and hunger, promoting gender equality and empowering women, ensuring environmental sustainability and fostering global partnerships/linkages for national development.

The student population is both local and International at all levels of training. In addition, the college routinely conducts skills enhancement courses which are either at certificate or simply tailor made for specific clients

Vision: To be a universal centre of excellence in training, research, outreach and consultancy services in agriculture, veterinary, biomedical, environmental and natural resource sciences in order to realize sustainable and secure livelihoods.

Mission: To pursue and maintain a world-class leadership role in the quest for knowledge by way of quality research, capacity building, consultancy and innovative outreach in order to contribute to agricultural productivity for poverty reduction and secure livelihoods through sustainable natural resources management.

Core Values:

The College of Agriculture and Veterinary Sciences is committed to realizing its vision and mission. It operates within certain treasured beliefs, which have contributed to its success. The college:

- Upholds professionalism and ethics in all its dealings with its stakeholders.
- Is accountable and transparent in all its operations.
- Upholds integrity, honesty and quality in training and all other activities.
- Promotes participatory management and effective teamwork in all its activities and operations.
- Promotes and maintains linkages with industry, other institutions and alumni.
- Upholds dignity of all members of staff and students.
- Recognizes noble ideas and promotes innovations.

ACADEMIC PROGRAMS IN THE FACULTY OF AGRICULTURE

UNDERGRADUATE PROGRAMS

The Faculty conducts eight undergraduate degree programs.

1. BSc. Agriculture
2. BSc. Food Science and Technology
3. BSc. Food Nutrition and Dietetics
4. BSc. Agricultural Education and Extension
5. BSc. Agribusiness Management
6. BSc. Range Management
7. BSc. Management of Agro-ecosystems and Environment
8. BSc. Horticulture

DIPLOMA

1. Postgraduate Diploma in Agricultural Information Communication Management
2. Postgraduate Diploma in Food Safety and Quality
3. Diploma in Crop Protection
4. Diploma in Phytosanitary Measures

CERTIFICATE COURSES

1. Agricultural Information Communication Management
2. Floriculture
3. Crop Protection
4. Phytosanitary Measures
5. Food Safety and Quality

POSTGRADUATE AND DOCTORATE PROGRAMS

The faculty trains students for Masters of Science and Doctor of Philosophy degrees in various fields of specialization

1. Food Science and Technology
2. Food Safety and Quality
3. Applied Human Nutrition
4. Plant Breeding
5. Horticulture
6. Agronomy
7. Agricultural Resource Management
8. Crop Protection
9. Plant Pathology
10. Agricultural and Applied Economics
11. Agricultural Economics
12. Agricultural Information Communication Management
13. Soil Science
14. Range Management
15. Land and Water Management
16. Sustainable Soil Resource Management
17. Livestock Production System
18. Poultry Sciences
19. Animal Nutrition & Feed Science
20. Animal Genetics & Breeding

ACADEMIC PROGRAMS IN THE FACULTY OF VETERINARY MEDICINE

UNDERGRADUATE DEGREE PROGRAMS

The Faculty conducts three undergraduate degree programs.

- Bachelor of Veterinary Medicine
- Bachelor of Science in Biomedical Technology
- Bachelor of Science in Wildlife Management and Related options

1.2.2. POSTGRADUATE DEGREE PROGRAMS

The Faculty trains students for Masters of Science (MSc.) and Doctor of Philosophy degrees in various fields of specialization.

- Veterinary Anatomy and Cell Biology
- Comparative Animal Physiology
- Theriogenology
- Veterinary Surgery
- Veterinary Medicine
- Wildlife Health and Management
- Natural Products and Bioprospecting
- Pharmacology and Toxicology

Diploma Courses

- Animal Health & Production

Postgraduate Certificate Courses

- Epidemiology & Disease Surveillance

- Reproductive Biology
- Biochemistry
- Veterinary Pathology, Microbiology and Parasitology
- Applied Parasitology
- Applied Microbiology (Bacteriology, Virology, Mycology, Environmental and Industrial Microbiology options)
- Veterinary Pathology and Diagnostics
- Clinical Pathology and Laboratory Diagnosis
- Fish Science
- Poultry Science
- Animal Genetics and Breeding
- Livestock Production Systems
- Animal Nutrition and Feed Science
- Veterinary Public Health
- Veterinary Epidemiology and Economics

CERTIFICATE COURSES

- Artificial insemination and fertility management
- Fish Hygiene and Inspection
- Poultry Management
- Dairy Management

CURRICULA REVIEWED WITHIN THE YEAR

- BSc. Management of Agro-Ecosystems and Environment;
- MSc. Crop Protection;
- MSc. Land and Water Management;
- Diploma in Crop Protection.
- MSc. Pharmacology and Toxicology
- MSc. In Veterinary anatomy and Cell Biology

Students of Food Science and Technology after a practical class

Participants at a Leather science curriculum stakeholders work

CURRICULA DEVELOPED WITHIN THE YEAR

- Diploma in Leather Technology
- Postgraduate diploma in Food Safety and quality
- MSc in Leather Science
- MSc Food Safety and Quality
- MSc Natural Products and Bio-prospecting
- MSc. Veterinary Surgery (MVESTSURG)
- MSc. Veterinary Medicine (MVETMED)
- MSc. in Theriogenology

NUMBER OF STUDENTS ADMITTED INTO EACH UNDERGRADUATE PROGRAM IN 2009/2010

FACULTY OF AGRICULTURE

1. BSc. in Agriculture	58
2. BSc. in Agribusiness management	32
3. BSc. in Agricultural Education and Ext.	28
4. BSc. in Food Sc. and Technology.	36
5. BSc. in Food Nutrition and Dietetics	32
6. BSc. in Range Management	10
7. BSc. in Management of Agroecosystems and Environment	29
8. Diploma in Crop Protection	6

TOTAL

231

FACULTY OF VETERINARY MEDICINE

1. Bachelor of Veterinary Medicine	101
2. B.Sc. in Biomedical Technology	20
3. B.Sc. in Wildlife Management	18
4. Dipl in Animal Health and Prod.	24
5. Certificate in Artificial Insemination	8

RESEARCH ACTIVITIES

1. Seed Enterprise management Institute (SEMI) Project. Olubayo F. and Mwang'ombe A. W.

The project to establish a Seed Enterprise Management Institute (SEMI) at the University of Nairobi (UON), College of Agriculture and Veterinary Sciences (CAVS), is an initiative funded by Association for a Green Revolution in Africa (AGRA). Collaborators include UoN, Iowa state University (ISU), International Maize and Wheat Improvement Center (CIMMYT), Kenya Seed Company (KSCo), Kenya Plant Health Inspectorate Services (KEPHIS) and other private and public institutions in the seed delivery systems. The role of SEMI is to build the capacity of the seed industry practitioners in sub-Saharan Africa mainly through training on seed systems management.

SEMI officially began operations in February, 2010. A series of meetings among them an inception and planning, and curriculum development meeting were held between February and March, 2010. In attendance in different meetings were UoN representatives, AGRA, ISU and other collaborators. In the inception and planning meeting the objective was to lay the foundation for the project to officially take off. Frameworks for SEMI operations and the short courses curricula were some of the major outcomes of this meetings. During the SEMI curricula development Workshops, six Short course curricula were developed and passed by the university administration. These include: I) Seed Production, II) Seed Drying, Processing and Storage, III) Seed Marketing, IV) Seed Business Management, V) Seed Quality Assurance, and VI) Seed Legislation and Accreditation.

Two courses, seed production and Seed Drying, processing and storage were conducted in May and June 2010. In total, 62 participants from 13 countries and 30 different seed companies were trained on aspects of seed production and processing. Participants not only got to learn the nitty gritty of seed production and processing in the lecture rooms, but also engaged in experiential training in the laboratories and in the field at seed companies in Kenya.

2. An in Vitro System for Producing Low Cost Crossbred Heifers: Funded by Heifer Plan International. Okeyo Mwai, Mutembei Henry, Erastus Mutiga and Victor Tsuma

The Sexed *In-vitro* fertilization and Embryo Transfer (SIFET) project is piloting the production of female F₁ calves from ova harvested from selected Boran cows at the abattoirs and sexed semen from selected Ayrshire and Jersey bulls.

This project aims to assist the smallholder dairy cattle farmers in sub-Saharan Africa to:

- a) Match the available dairy cattle breeds/genotypes with different production environments (i.e. feed resource base, ambient temperatures, veterinary inputs and markets).
- b) Increase production and availability of the more desired female calves, thus increase the supply of dairy heifers, and consequently eliminating the costs of raising the less desired and uneconomical male calves.

The above processes would result in:

- A) Many and more affordable F₁ dairy heifers produced by commercial breeders or beef ranchers and available to the smallholders or by smallholders and are thus available other smallholders to buy

- B) More flexibility (options), in the production of replacement heifers including possibility of contractual agreements for commercial production of replacement crossbred heifers by beef and dairy cattle producers for smallholders.

The expected outcomes and impacts of these interventions are:

- better genotype/breed-and environment match at smallholder production systems level, thus higher returns on both land, labour and feed inputs
- more poor farmers engaging in dairy cattle farming and improving their livelihoods family nutrition, thus leading to significant reduction in rural and peri-urban poverty levels.
- Outputs: 15 calves have been born all of which are healthy and alive

3. Radiation Processing for Human Health. Edward G. Karuri, Dr. J. Kiragu, Dr. Patrick Kamau

This project has been active in several African countries including Egypt, Tunisia, Morocco, Algeria, Nigeria, Ghana, DRC Congo, Zambia, Sudan and Kenya. Major activities have been the promotion of Radiation processing in Agriculture, health care products and industry. The application has been demonstrated in gemstones value addition, sterilization of foods and pharmaceutical products, waste water treatment and natural polymers. The year 2009 and 2010 were characterized by low key activities. Kenya attended the Mid-term Coordination and Planning meeting in Khartoum, Sudan, and also a Training Course in Lusaka, Zambia on codes and practices of radiation processing; training workshop on safe operation of radiation facilities; regional training course on the optimal use of radiation processing facilities and marketing of irradiation services in Nigeria and Process Control & Dosimetry inter comparison Exercise, in Cairo Egypt.

Work is ongoing with students on cassava starch with the aim to study the visco-elastic characteristics of raw and fermented starches treated/modified with chemicals and to compare with irradiated starches using a cobalt-60 source. Kenya is still expecting

Seed companies participants with the Principal CAVS, Professor A.W. Mwang'ombe, EBS.

build a basic dosimetry laboratory to complement the TRC gamma cell facility at KARI Muguga. Ultimately, Kenya needs multipurpose commercial irradiation facility after several hurdles are overcome. Immediate among them are the sensitization process to convince potential end users about the benefits and the development of a critical mass in terms of human resource and infrastructure for sustainable implementation of the new technology. *Supported by the International Atomic Energy Agency.* Project ends in December 2011.

4. African Natural Products Research and Training Network (RISE-AFFNET). Kabasa J. D., Kiama, S.G. and Mdegere R.

Natural products (NP) value chain and technology is a multi- and interdisciplinary sciences that addresses the problems and issues associated with it. NPs have an immense potential to poverty eradication and sustainable livelihoods. However, the existing systems for their development as a resource and livelihood option are weak and fragmented. There are many NP related pressures facing the region, including knowledge gaps, biodiversity loss, insufficient human capacity, overexploitation, and the very real possibility of resource loss associated with climate change and population pressure. The development of African solutions to the problem of its natural industry is hindered by shortage of trained personnel, competent human capital and facilities, especially at high levels of academic and professional expertise, resulting into insufficient grass-root trickledown effect. RISE- AFFNET was established by the University of Nairobi, Makerere University and Soikoine University of Agriculture to bridge this gap. Currently the program has provided scholarships to three (3) PhD students and six (6) Masters of Science Students in Natural products. In addition, the program has also developed a Masters of Science curriculum on Natural products and bioprospecting. Supported by Carnegie-Regional Initiative in Science and Education (RISE) through African Natural Research and training Network (AFNNET); www.rise-afnnet.com.

Participants engage in experiential training at Leldet Seed company in Kenya

5. Botanical garden at cavs established under the research project on, ‘evaluation and commercialisation of medicinal plants’ extracts for improved livelihoods; a case study of east coast fever’. P.K. Gathumbi

Increased conservation and utilization of natural resources, including medicinal plants can be accelerated by research that harnesses Indigenous Technical Knowledge (ITK) in market driven product development initiatives. Kenya has a large diversity of medicinal plants used to treat animal diseases but these plants are diminishing through destruction of biodiversity and the associated ITK and cultures are also disappearing. This project aims to enhance the development and promotion of the utilization, access and commercialization of an affordable alternative East coast fever (ECF) treatment for increased livestock productivity, incomes and biodiversity conservation. The project is aligned with the natural resource management sector with a view to contribute to the goal of transforming Kenya’s integrated natural resource sub-sector into a commercially oriented economic activity for food and nutrition security, increased household incomes and employment creation for improved livelihoods by using natural resources and biodiversity sustainably. The project worked with community groups at Eldoret, Embu and Nyeri, which are distinct ECF-endemic areas where ethno-veterinary treatment of ECF is commonly used.

The entry point was a participatory identification of existing plants, technologies and strategies and the associated constraints and opportunities through a series of activities that enabled the generation of a priority issues in ethno-veterinary treatment of ECF. The most commonly used plants and associated Indigenous Technical Knowledge in traditional ECF treatment were identified. Better methods of propagation and conservation of target plants were investigated and validated with communities and a

Natural product research scientists' (UON) with practicing herbalists at Msambweni, South Coast, Kenya.

botanical garden of medicinal plant containing these and other medicinal plants was established at the College of Agriculture and veterinary Sciences (CAVS), University of Nairobi. Community groups working with the project at Eldoret, Embu and Nyeri were trained on better methods of propagation of medicinal plants and supported to establish on site tree nurseries. The groups were also trained best strategies to commercialize on plant propagation technologies and conservation activities. The project is a collaborative effort of different institutions and as part of this collaboration, an existing botanical garden at Egerton University was improved. The botanical garden comprises about 506 medicinal plants representing about fifty genera. The garden serves is now used as a teaching and demonstration unit of medicinal plants and a recreation facility. A Medicinal tree nursery established by the project is also ongoing. Funded by World Bank grant through Kenya Agricultural Productivity (KAPP)

5. Amaranth Grain Production and Value Addition for Improved Livelihoods in the Lake Victoria Basin (LVB) Dr. R. Nyankanga, Dr. D. Nakinbugwe (PI), Dr. J. Mugisha
6. Camel Productivity. Kenya Agricultural Productivity (KAPP) Project. Dr. C.G. Gitao.
7. Capacity Building Programme in Sustainable Soil Resource Management and Integrated Soil Fertility Management for Enhanced Agricultural Productivity and Food Security in East and Southern Africa” AGRA, Dr. R. Onwonga,
8. Centre of Phytosanitary Excellence-Eastern Africa (COPE) A project for development of phytosanitary curriculum. A collaborative project with KEPHIS, CAB International, and IPPC. Dr. J. Muthomi
9. Certified Bean seed multiplication: The University of Nairobi has over the last 15 years been involved in breeding common beans targeted for cultivation not only in Kenya but also for the different ecological zones in the region. Bean varietal improvement has been realized through partnerships with other institutions in the region. UoN &

CIAT, Prof. P. Kimani.

10. Characterization and development of an integrated management of *Fusarium* head blight of wheat in Kenya. Dr. J. W. Muthomi. (June 2008 –Nov 2009).Funded by the International Foundation for Science (IFS)
11. Co-Scientist and Investigator on Lake Victoria Research Initiative (VicRes) investigating “Impact of land use intensification on soil quality (Chemical, physical and biological)”. This project involves both Kenya and Tanzania. Kenyan component is being coordinated through the University of Nairobi by Prof Nancy Karanja
12. Creating wealth for smallholder farmers in arid areas of Kenya: The case of mukau (*melia volkensii*). KAPP, “Dr. R. Kinuthia Ngugi
13. Crop Production in water scarce environments: *getting the most out of localized drip irrigation system* Commission of Higher Education, Prof. C.K.K. Gachene
14. Development and evaluation of herbal anthelmintic drugs for ruminant animals. An innovation project funded by CHE training one PhD (UON) and three masters student. The research titles are: (a). Formulation, safety and efficacy of anthelmintic herbal products from selected plants in Kenya (b). Determination of *in vitro* anthelmintic activity and phytochemical studies of *prosopis juliflora (sw.) dc* (fabaceae). CHE, Dr. Gakuya
15. Development and upscaling of soil and water conservation technologies: The case of macro-contour lines in Kathekakai Settlement Scheme, Machakos District. National Council for Science and Technology, Prof. C.K.K. Gachene
16. Development of cultural strategies for management of *Thrips tabaci*, *Alternaria porri* and *Peronospora destructor* on onions in Kenya. Dean’s Committee, UON. Dr. R. D. Narla
17. Development of drought tolerant maize and sorghum varieties for arid and semi-arid areas. This project is utilizing molecular markers to hasten conventional breeding for drought resistance/tolerance through the use of marker-assisted selection (MAS), sponsored by ASARECA. E. Ngugi.
18. Development of integrated management of potato aphids and aphid transmitted viruses for seed production in Kenya. Dr. J. Muthomi, CHE
19. Diagnostic and control tools and strategies for *Taenia solium* cysticercosis funded by ASARECA. Prof. N. Maingi
20. Distribution of Potato Tuber Moth (*Phthorimea operculella* Zeller) and development of integrated management strategies for its management. Funded by the National Council for Science and Technology. Investigators: Prof. Florence Olubayo,
21. Effect of Border crop distance and seed degeneration on potato production. Funded by Deans committee. Follow up work on the potato research. Investigators; Dr. J. Muthomi
22. Effects of carica papaya seed extract on boar gonads – ongoing Dr. Kipyegon
23. Enhancement of sustainable productivity of Fish in lake Victoria through control of pollutants with emphasis on endocrine disruptors and microbial pathogens funded by The Lake Victoria Research (VicRes) Initiative Dr. P.G.Mbuthia
24. Enhancing competitiveness of canning navy bean in global and domestic markets, 2009 to date. Supported by National Council of Science and Technology, Dr. George Chemining’wa
25. Enhancing livestock productivity through control of Rift valley fever in East Africa – US\$ 60,000.00 awarded by RUFORUM Investigator: Prof. P.N. Nyaga
26. Epidemiology of gastrointestinal nematodes and efficacy of moxidectin and

- albandazole on zero-grazed and free range dairy cattle, in Nyeri and Nakuru Districts of Kenya. University of Prince Edward, Prof. George. K. Gitau
27. Establishment of seed Enterprise Management Institute project, to facilitate capacity building and support quality seed production for increased food security and poverty alleviation. Funded by AGRA. Collaborating Institutions include: University of Nairobi, CYIMMT, AGRA and Iowa State University, USA. Prof. Agnes Mwang'ombe
 28. Evaluation and commercialization of medicinal plants' extracts for improved livelihoods: a case study of East Coast fever'. Kenya Agricultural Productivity (KAPP) Project Prof. P.K. Gathumbi
 29. Evaluation of pathogen attributes, resistant genotypes, and alternative cheaper fungicides in managing late blight in Kenya. IFS, Dr. R. Nyankanga,
 30. Germplasm Enhancement and Maintenance Based on X-ray Fluorescent Spectroscopic Criterion as a Crop Improvement Strategy in the African Leafy Vegetable Species Modeled on Participatorily Selected on-farm Solanum Leafy Vegetable Populations. Supported by International Atomic Energy Agency – CRP: Food and Agriculture. (Renewed). Investigator: Prof. Levi S.M. Akundabweni; Department of Plant Science
 31. Impact of climate change and land fragmentation on ecological vulnerability and adaptive strategies in agro-pastoral systems in South-Eastern Kenya”. National Council for Science and Technology Dr. M. Nyangito
 32. Improvement of food and nutrition security through promotion of vegetables (indigenous) and milk production for economic empowerment of farmers and HIV/AIDS affected families in Taita-District.: This project is aimed at enhancing dairy and indigenous vegetable production with emphasis on building capacity of beneficiaries for sustainability, value addition, market access and nutrition improvement within families. Irish AID Funding, Prof. A.W. Mwang'ombe
 33. Improving the quality of life by sustainable management of potato viruses and their major vectors, funded by the UK based Monsanto Fund. Investigators: Dr. Lesley Torrance; Scottish Crop Research Institute, Dr. Hassan Were; Masinde Muliro

Botanical garden of medicinal plants at CAVS field station established under the project

Medicinal plant tree nurseries at Ngong established under the project

University of Science and Technology, Dr. Florence Olubayo; University of Nairobi and Dr. John Kabira; Kenya Agricultural Research Institute.

34. Integrated Agricultural Research for Development activities, supported by NUFFIC., 2006 to-date
35. Leading integrated nutrient management part in the “Enhancing Competitiveness of Snap Beans for Domestic and Export Markets” project supported by ASARECA Prof J. Nderitu
36. Linking Functional Agrobiodiversity to Land Use and Nutraceutical-based Cropping as a Poverty and Hidden Hunger Reduction Strategy: A Pilot Study on Women Smallholders in the Lake Basin. Vices Project (Renewed). Prof. Levi S.M. Akundabweni; Department of Plant Science
37. Making the best of climate – Adapting agriculture to climate variability”. ASARECA, “Dr. R. Kinuthia Ngugi
38. Managing risk, reducing vulnerability and enhancing productivity under a changing climate”. IDRC - Dr. R. Kinuthia Ngugi
39. Methyl Bromide: The overall objective is to train and assist potential methyl bromide users in the horticultural industry to adopt effective and sustainable alternatives. A training centre has been set-up at the University farm to train small-scale farmers. Similar production units have been set up in Nanyuki and Naivasha for small-scale farmers engaged in the production of horticultural crops for export. UNDP/GTZ/ UoN, Prof. E.W. Mutitu
40. Mitigating Mycotoxin Harzards in Maize and Maize Products in Kenya. A collaborative project involving KARI, MoA, MoH, Kenya Maize Development Programme and UoN. KAPP, J. Muthomi
41. Modelling the potential impact of climate change on sorghum (*Sorghum bicolor*) and cowpea (*Vigna unguiculata*) production in semi-arid areas of Kenya using the agricultural production systems simulator (APSIM) RUFORUM, Dr. R. Onwonga
42. Occurrence and evaluation of maize germplasm to common rust disease in Kenya funded by the deans committee with collaboration from CIMMYT. W. M. Muriu

43. Processing and value addition of sunflower in Kenya. KAPP, Prof. J. Imungi
44. Promoting Excellence in PhD training in East Africa) under PREPARE PhD project funded by EU. Prof. L.C. Beboru.
45. Putting Nitrogen Fixation to Work for Smallholder Farmers in Africa (N2 Africa)” UoN in collaboration with CIAT: Prof. Nancy Karanja
46. Regional Initiative in Science and Education-African Natural Products Research and Training Network (RISE-AFFNET). The development of the Natural production industry is hindered by shortage of trained personnel and facilities, especially at high levels of academic and professional expertise. This project aims at training a cadre of staff at Masters of Science and PhD level who will promote natural product science and Technology. Carnegie Corporation of New York. Dr S. G. Kiama
47. Strengthening of university capacity for promoting, facilitating and teaching rural innovation processes (SUCAPRI) Project, supported by Edulink; led by Makerere University with University of Nairobi as one of the partner institutions and Team leader of University based learning cycle activity of the project. Dr. George Chemining’wa
48. Study of salt impacted soils in Mariakani, supported by the National Council of Science and Technology. Dr. Mwinyikione
49. The abundance and efficiency of rhizobia infecting green manure legumes in central Kenyan soils, Deans Research Grant, University of Nairobi. Dr George Chemining’wa
50. The enhancement of the camel milk chain; the case of Wajir and Garisa Districts in North Eastern Province. A project supported by World Bank under the Kenya Agricultural Productivity programme– Dr. C.G. Gitao.
51. The prevalence of bovine mastitis and usefulness of petrifilms as a diagnostic tool for determining potential treatment regime for pathogen causing mastitis in Nyeri and Nakuru Districts, Kenya. University of Prince Edward, Dr. Royford Bundi M.
52. The preventive and Integrated Management of pests and diseases for improved food safety and productivity of passion fruit in Kenya. Funded by Horticulture Crops Development Authority (HCDA). Investigator: Prof J. Kimenju,
53. Towards Increased Agricultural Productivity and Food Security in East Africa through Capacity building in Agro ecological Intensification McKnight Foundation,

Participants at a meeting organized by the Carnegie corporation of New York here in Nairobi

Dr. R. Onwonga

54. Urban and Peri-Urban Livestock Farming and the Risks to human health – Lake Victoria Research Initiative (VicRes). Prof. P.W.N. Kanyari.
55. Using improved pulse crop productivity to reinvigorate small holder mixed farming systems in Western Kenya. A collaborative project involving University of Cornell, Kenya Agricultural Research Institute (KARI), Egerton University, Moi University, CIAT and University of Nairobi. Dr. J. Muthomi

WORKSHOPS/CONFERENCES

1. Abong G.O. Scientific writing and publishing course; Training Centre for communication (TCC), School of Mathematics, University of Nairobi, 14 – 18 december, 2009.
2. Abongo G. O Curriculum development for Certificate, Post-graduate Diploma and Masters degree in Food Safety, University of Nairobi-UNIDO sponsored workshop, August 2009 Jacaranda Hotel, Nairobi
3. Abong', G. O., Okoth, M.W., Imungi, J.K and Kabira, J.N (2010). Characteristics of fresh ware potato traders in Nairobi and Nakuru towns, Kenya. 3rd International e-Conference on Agricultural Biosciences 2010 (IeCAB 304c) held on 1-15 June 2010. (Available online at: <http://www.e-conference.elewa.org/agriculture>).
4. Abong', G. O., Okoth, M.W., Imungi, J.K and Kabira, J.N. (2010). Consumption patterns diversity and characteristics of potato crisps in Nairobi, Kenya. 3rd International e-Conference on Agricultural Biosciences 2010 (IeCAB 304a) held on 1-15 June 2010. (Available online at: <http://www.e-conference.elewa.org/agriculture>).
5. Abong G.O. Workshop to improve Consultancies by University of Nairobi Staff through University of Nairobi Enterprises and Services, University of Nairobi, 9th April 2010 at Chiromo Campus, University of Nairobi.
6. Abong G.O. Harmonization of the East African Standards for Cassava and potato products, ASARECA Sponsored workshop held on 22-25 March 2010 Sports View Hotel, Kigali, Rwanda.
7. Abong G.O. Harmonization of the East African Standards for Cassava and potato and products, Kebs-ASARECA sponsored workshop held on 1-2 December 2009 at Park Palace Hotel, Nairobi, Kenya.
8. Abong G.O. Guidelines for proposal development (RUFORUM proposals), College of Agriculture and Veterinary Science, University of Nairobi, October 2009.
9. Abong G.O. Curriculum development for Certificate, Post-graduate Diploma and Masters degree in Food Safety, University of Nairobi-UNIDO sponsored workshop, August 2009 Jacaranda Hotel, Nairobi
10. Abong', G. O., Okoth, M.W., Imungi, J.K and Kabira, J.N. (2010). Characteristics

of the potato crisps processing industry in Kenya. 3rd International e-Conference on Agricultural Biosciences 2010 (IeCAB 304b) held on 1-15 June 2010. (Available online at: <http://www.e-conference.elewa.org/agriculture>).

11. Abong', G.O; Okoth, M.W; Karuri E.G; Kabira J.N. and Mathooko F.M. (2009). Influence of potato cultivar and stage of maturity and oil content of French fries (chips) made from eight Kenyan potato cultivars. African Journal of food, Agriculture, Nutrition and Development 9(8), 1667-1682. (www.adfand.net)
12. Abong'G.O., Okoth M.W., Imungi J.K. and Kabira J.N. (2010). Characteristics of the potato crisps processing industry in Kenya. 3rd International e-Enference in Agricultural Biosciences, 1 – 15 June, 2010.
13. Ambuko, J. All Africa Horticultural Congress, 31st August – 3rd September 2009, Safari Park Hotel
Ambuko, J. Muiuru, W., Chemining'wa, G., Magomere, T., SUCAPRI-EDULINK workshop, 14th to 20th March 2010, (AICAD) JKUAT
14. Ambuko, J., Muthomi J., Shibairo S.; 9th Horticultural Association of Kenya (HAK) Workshop on "Sustainable Horticultural Production in the Tropics", 1st – 4th December 2009, Arusha – Tanzania
15. Ayuke F. Attended and gave oral presentation at the Conservation and Sustainable Management of Below-ground biodiversity closing conference (17th to 21st May 2010, Nairobi, Kenya)
16. Ayuke F. Attended and gave a poster presentation at the Diversitas OSC2Conference in Cape Town, South Africa (13-16 October 2009)
17. Bebora attended a Training of Trainers (TOT) workshop for PhD supervisors-Moshi Tanzania September 7- 11, 2009
18. Bebora attended a training of trainers(TOT) workshop for PhD supervision at Golden Rose Hotel, Arusha, Tanzania sponsored by EU(Prepare-PhD project) from 5th – 7th January 2010
19. Bebora was a trainer in PhD Supervision Training Workshop at the College of Agriculture and Veterinary Sciences organized by Prepare- PHD Project from 2nd – 4th March 2010. She trained on Application of rules and regulations governing PhD training (lecture and Group work) and chaired Group presentations and Plenary Discussions.
20. Bebora was invited to attend a two day Regional Workshop on Poultry Biosecurity Guidelines in Bujumbura, 18th – 19th March 2010.
21. Chemining'wa G. Capacity building workshop on Rural Inovation Processes, 24th – 31st May 2010 in Uganda
22. Chemining'wa G. National Council of Science and Technology Supported Navy bean Project. 3rd November 2009, Agricultural Information Resource Centre-NARL, Nairobi.
23. Chemining'wa G., One Day Wrap-up Workshop of SUCAPRI's University Based Learning Cycle, 28th June 2010, Agricultural Information Resource Centre (AIRC), NARL, Nairobi
24. Chemining'wa G., Snap Bean Stakeholders Workshop, 2nd March 2010, Agricultural Information and Resource Centre, Nairobi Kenya.
25. Chemining'wa G.; Priority Setting for Non-staple Crops Programme Workshop; 13th – 17th July 2009, Entebbe- Uganda.
26. Chemining'wa G.; Professional Capacity – Strengthening programme for Learning Facilitators Workhop, 7th – 25th September 2009, Wageningen, Netherlands.

27. Chemining'wa G.; Snap Beans Stakeholders Regional Consultative Workshop 9th – 10th December 2009, Imperial Resort Beach Hotel, Entebbe, Uganda.
28. Gakuya The 44th Annual Scientific conference of Kenya Veterinary Association held on 21st to 23rd April 2010 at Almond Resort ,Garrisa ,Kenya.
29. Gakuya, Natural products curriculum stakeholders and Technical workshop held on 7th to 8th December 2009 held at KCB Leadership Centre, Karen.
30. Gathumbi P. K. attended Wangari Maathai Institute – University of Copenhagen (WMI- UC LIFE) workshop on 20th to 23rd March 2010
31. Gathumbi P. K. was a trainer in PhD Supervision Training Workshop at the college of Agriculture and Veterinary Sciences organized by Prepare – PhD project from 2nd – 4th March 2010. He trained on,” being a highly efficacious supervisor “ and facilitated during the opening ceremony, group presentations and plenary discussions.
32. Gathumbi P. K., Prof. P.N Nyaga and Prof L.C. Bebora and Dr. C.G. Gitao, participated in Regional Platform for climate change and transboundary animal diseases sponsored by RUFORUM at Imperial resort Beach Hotel, In Entebbe, Uganda 13-16 October 2009
33. Gathumbi P. K.attended a training of trainers(TOT) Workshop for PhD supervision at Golden Rose Hotel, Arusha, Tanzania sponsored by EU(Prepare-PhD project) from 5th – 7th January 2010
34. Irungu, P., B. Bett, S.G. Mbogoh, T. Randolph, S.O. Nyamwaro and G. Murilla (2009). Determinants of cattle market price volatility in Maasailand: A GARCH-M application. A paper presented at the Regional Symposium on Livestock Marketing, KCB Leadership Centre, Karen, 20-24th October, 2009.
35. Irungu, P., B. Bett, S.G. Mbogoh, T. Randolph, S.O. Nyamwaro and G. Murilla (2009). Determinants of cattle market price volatility in Maasailand: A GARCH-M application. A paper presented at the Regional Symposium on Livestock Marketing, KCB Leadership Centre, Karen, 20-24th October, 2009.
36. Irungu, P., L. Ndirangu and J.M. Omiti (2009). Livestock productivity in the Nile basin: A Malmquist Approach. A paper presented at the Regional Symposium on Livestock Marketing, KCB Leadership Centre, Karen, 20-24th October, 2009.
37. Irungu, P., L. Ndirangu and J.M. Omiti (2009). Livestock productivity in the Nile basin: A Malmquist Approach. A paper presented at the Regional Symposium on Livestock Marketing, KCB Leadership Centre, Karen, 20-24th October, 2009.
38. Kanja W. International Symposium on Field Toxicology held in School of Veterinary Medicine – University of Zambia on 14 – 16th October 2009. Paper presented ‘Organochlorine Pesticide residue levels in Landed Nile Perch (*Lates Niloticus*) from Lake Victoria’.
39. Kanja W. . Consultation on Workshop on Women Scientists of University of Nairobi. Held on Wednesday 14th July, 2010 at the Council Chamber.
40. Kanja W. Inception workshop for the sub-regional UNEP/GEF project “Supporting the Global Monitoring Plan on POPs in the Eastern and Southern African region” 26-29th January 2010, Nairobi, Kenya
41. Kanja W. PhD Supervision training workshop held on 2-4th March 2010 at CAVS, University of Nairobi.
42. Kanja W. Stakeholders’ workshop on knowledge management of the effects of pesticides to wild pollinators held on 25th November at Practical Training Centre (PTC), Thika.
43. Kanyari, P.W.N., Kagira, J.M. and N. Maingi (2009). Towards effecting

The Distinguished Chair WMI, Prof Maathai with stakeholders who participated at the strategic planning writing meeting for the Institute

Acting Director WMI, with members of the Millennium Development Group and Secretary General United Nations

School Children being shown how to plant a tree by staff from the college

- management of Human and animal trypanosomosis in East Africa using multi-stakeholder involvement. RUFORUM Regional workshop, Entebbe, Uganda. 13th to 16th October, 2009.
44. Karuri E.G. - Development of Defensive driving Training Programme for Kenya. Sponsored by DIT, Ministry of Labour. Lake Elmentaita Country Lodge 17-19 September, 2009.
 45. Karuri, E.G. Conference on “Addressing National Priorities Through Nuclear Science and Technology” KICC, Nairobi, Kenya, 4-5 Aug. 2008.
 46. Kathumo V.. GIS for Higher Education: 15th – 17th May 2010 at ESRI Centre, Nairobi
 47. Keya S . Africa Rice congress in Bamako, Mali: March 22 – 29 2010
 48. Kiama S. G.. Workshop on Non Violence and peace building for Public University administration officials ARC Hotel, Egerton University, Nakuru10th – 14th May 2010
 49. Kiarie Njoroge; Curriculum development in natural products technology and value chain management; 8th December 2009 in Nairobi (KCB KAREN)
 50. Kilalo D.C., E. M. Ateka, F. M. Olubayo and J. M. Kimenju. Occurrence and detection of passion fruit virus diseases by Eliza and RT-PCR methods in Kenya. African Crop Science Society Conference, Cape Town in Sept 28th to 1st Oct 2009.
 51. Kimani P. M. Ngugi, E., Narla African Bean Consortium (ABC) Workshop and training course 17th – 21st May 2010 Tanzania, Sokoine University of Agriculture, Morogoro
 52. Kimani P. M.; Bean Research Workshop (PABRA), 25th to 28th January 2010, Kampala, Uganda
 53. Kimani P. M.; Bean research workshop, 15th to 19th February 2010, Arusha, Tanzania
 54. Kimani P. M.; Bean Researchers and Technicians Training Workshop, 2nd to 4th June, KIE, Nairobi
 55. Kimani P.M.; Harvest Plus Project Review and Planning Bean workshop, 11th to 12th February 2010, Kigali, Rwanda.
 56. Kimani P.M.; Southern Africa Bean Research Network (SABRN) conference; 12th – 16th October 2009, Johannesburg, South Africa.
 57. Kimani, P. M. ; Annual Review and Planning Bean workshop, organized by WECABREN, 18 to 19 January 2010, Accra Ghana
 58. Kimani, P. M., Annual Review and Planning Bean workshop Durban, South Africa 22nd – 24th March 2010.
 59. Kimani, P.M. Bean Research Work Workshop 5th – 7th May 2010, in Cali, Colombia
 60. Kimenju J. W.; Nematology Society of Southern Africa Symposium, 17th – 21st May, Hazyview, South Africa.
 61. Kinuthia Ngugi Regional Scientific Writing and Oral Communication Workshop in Kigali, Rwanda from 26th to 31st July 2010
 62. Kipyegon Mammalian ano-genital development, current advances by Ashley W. Seifert Ph.D. University of Florida, Department of Veterinary Anatomy & Physiology 14th July 2010
 63. Kironchi G. . Workshop on “Exploring the Future of Climate and Development: Research, Communication and Capacity Building in Africa”, Dar es Saalam, Tanzania: 16th – 17th June 2010
 64. Kironchi G. Natural Resource Management Textbook Writeshop to produce the final manuscript of a postgraduate level textbook to be used in Eastern and

- Southern Africa and beyond, KCB Training Centre: 21st – 30th April 2010
65. Kiruthu W. Z and E. G. Karuri. Role of Private Sector towards compliance realization. Pan African Agri-Trace Conference – Red Court Hotel 13-15 October 2009.
 66. Kitaa Continuing Professional Development. 13th-15th November 2009. Leisure Lodge Resort, Diani.
 67. Kitaa J.M.A., Abuom T.O., Gitonga P. and Muraya J. Chronic pododermatitis in a Great Dane. Kenya Veterinary Association Annual Scientific Conference April 2010 Garissa.
 68. Kitaa Kenya Veterinary Association 44th Annual Scientific Conference. 21st – 23rd April 2010. Garissa Kenya.
 69. Kunyanga C.N., Strum S., Graham S., Sipitick, J and Imungi J.K. (2009) 'Physico-chemical methods for preservation of quintia cactus fruit syrup.' Empowerment of Masai Women in Laikipia, Kenya. African Crop Science Society Conference, 28 September – 1 October, 2009, Cape Town.
 70. Kunyanga C.N; Strum, S; Graham, S; Sipietek, J. and Imungi J.K. 2009. Physico-chemical methods for preservation of opuntia cactus fruit pulp: Empowerment of Maasai women in Laikipia, Kenya. Presented in the 9th African Crop Science Conference, Cape Town South Africa. 28 Sept – 3 October 2009.

CONSULTANCIES

1. Gitau G. K– Training Somalia veterinarians on disease surveillance and control, livestock production and marketing in Somalia – African Development Bank, 2009.
2. Gitau G. K.- Development and establishment of disease free zones in Kenya. A project preparatory mission to assess the needs and other details for the establishment of a DFZ in the Coastal area and Isiolo-Lakipia areas of Kenya
3. Gitau G. K. - United States Aids for International Development/Land O'Lakes (Ongoing) Kenya Dairy Sector Competitiveness Program for small holders Dairy farmers in Gatanga Milk Shed. Funded by USAID through Land O'Lakes.
4. Ideal Matunda Ltd - Analysis of Avocado oil for various parameters (11/08/2009)
5. Karuri E. G. - Scale-up of baculovirus – based bio-pesticide production in Kenya. Sponsored by PIP/COLEACP for Kenya Biologics Ltd, Thika. Aug/Sep 2009.

6. Karuri E.G. - Scale-up of baculovirus – based bio-pesticide production in Kenya. Sponsored by PIP/COLEACP for Kenya Biologics Ltd, Thika. Aug/Sep 2009.
7. Kinama (Dept of Plant Science) – Analysis of cyanide in cassava tubers and Leaves (02/02/2010)
8. Kirlsmart Laboratories - Analysis of Trypsin inhibitors in food samples
9. Kogi-Makau W. and Kenny Selvester Pilot Project to strengthen emergency nutrition training in pre-service and in-service training courses. May 16th – 2th 2010. Funded by the Office for US Disaster assistance (OFDA), USAID.
10. Mbugua S. K. – Application of starter cultures and fermentation in the enhancement of food and nutritional security. Teque Afrique Ltd Analysis of Ghee for energy and proximate composition (14/01/2010)
11. Mugivance F. I. – Consultancy on curriculum review for Bukura Agricultural College
12. Munyua S. – Consultant FAO Somalia – End of Term evaluation: EC funded Somali Meat Project.
13. Munyua S. – Consultant RRRRLP-WB project-FAO Somalia – Support to fodder production and slaughter facility design.
14. Munyua S. J. – Environmental and assessment of the proposed “ Edible Oil Production in Wachu Ranch, Tana Delta District, Kenya- Feb. 2010.
15. Munyua S. J. - Environmental and social impact assessment of the proposed “Borama and Bosasso Slaughter facilities in Somaliland and Puntland RRRRLP WB-FAO Nov 2009 – Jan., 2010.
16. Muthike Kiburi (School of Bio. Sci. UoN) – Analysis of Larvae of darkling beetle for proximate and energy composition, (09/02/2010)
17. Nyaga P. N – Meeting on Rift Valley Fever (RVF) with Ministry of Livestock Development.
18. Nyaga P. N. – Rift Valley Fever (RVF) with the Ministry of Livestock Development. (17/05/2010)
19. Nyaga P. N. – Rift Valley Fever (RVF) with the Ministry of Livestock Development. (25/05/2010)
20. Nyaga P. N.– Invitation to attend the Rift Valley Fever Preparedness meeting on 25th May 2010, with Ministry of Livestock Development.
21. Nyaga P. N.carried out consultancy assignment for FAO/ECTAD on human resources assessment for highly pathogenic avian influenza and other transboundary animal diseases in laboratory activities for Kenya, Ethiopia, Rwanda and Uganda in May 2010.

List of Members of Staff and Students who attended Competency and skills development conferences, workshops and seminars in 2009/2010

Several members of staff and students continue to benefit from competence development attendance of conferences, workshops and seminars. During these quarter several members of staff both teaching and non teaching have benefited from skills development such as First Aid etc

SNO.	NAME	DESTINATION	DATE
1.	Prof. Olubayo	Distance Learning, Chiromo	27 – 31/07/09
2.	Dr. J. Muthomi	Distance Learning, Chiromo	27 – 31/07/09
3.	Dr. Devi Narla	Distance Learning, Chiromo	27 – 31/07/09

INTERNATIONAL LINKS AND COLLABORATIONS

The following linkages have been established.

- Agreement between the Government of Finland and the Government of Kenya on the Cooperation in building capacity to improve safety in the feed – dairy chain, with special focus on health risks associated with biological contaminants.
- Agreement between the Ministry of Livestock Development, University of Nairobi and Kenya Forestry Research Institute
- Collaboration with the University of Bonn (UOB) Germany
- Colorado State University/Department of LARMAT.
- Continued with the linkage with CDC-Kenya on Rift Valley Fever Herd Immunity project. Prof. P.N. Nyaga –
- Department of food, Agricultural and Resource Economics (FARE) University of Guelph and University of Nairobi (UoN), Department of Agricultural Economics
- Edulink -SUCAPRI - Makerere University (MAK), International Centre for Development oriented Research in Agriculture (ICRA), Commonwealth of Learning (COL), National Agricultural Research Organization (NARO, Uganda), Kenya Agricultural Research Institute (KARI), Kenyatta University (KU), Jomo Kenyatta University of Agriculture and Technology (JKUAT) and Egerton University. EU funded. Dr. G. Chemining'wa and Dr. Florence Olubayo
- Exchange students/lecturers programme between Department of Agricultural Economics (Agricultural Extension and Education) and Bridgewater University, USA.
- Iowa State University – USA, CIMMYT, AGRA on the establishment of a Seed Management Institute/Department of Plant Science & Crop Protection.
- Iowa State University/University of Nairobi, Department of Veterinary Pathology, Microbiology & Parasitology.
- KARI/LARMAT in the Steering Committee of Kenya Arid and Semi- Arid Lands Research Programme (KASAL).
- Lund University, Department of Sociology, LUND, Sweden and the University of Nairobi through the Department of Agricultural Economics
- Memorandum of understanding between the University of Nairobi and The Energy Resource Institute (TERI) New Delhi, India.
- Ministry of Livestock and University of Nairobi.
- Ministry of Livestock Development, Department of Veterinary Services through the RUFORUM project Dr. Mbutia
- One World One Health – Africa/USA Integrated Disease Management Network (AFRUS-IDM) Makerere University and South Dakota
- Partnership with World Society for Protection of Animals (WSPA)
- Partnerships with donkey Sanctuary UK
- RUFORUM and the University of Nairobi
- The African Economic Research consortium (AERC) and the University of Nairobi through Department of Agricultural Economics.
- The US Geological Survey of the Department of the Interior Government of the United States and the University of Nairobi.
- University of Cornell
- University of Ibadan and University of Nairobi.
- University of Nairobi & Faculty of Medicine University of Camerion, Italy
- Washington State University

- WSPA/Clinical Studies link.
- Exchange students/lecturers programme between Department of Agricultural Economics (Agricultural Extension and Education) and Bridgewater University, USA.

POSTGRADUATE TRAINING COMPLETED

Faculty Of Veterinary Medicine

Doctor of Philosophy Thesis Published

Kagira John Maina	Characteristicx of production systems and trade, epidemiology and control of parasites in pig farms in Busia District Kenya
Davis Njuguna Karanja	Etiology, clinical and pathological presentation of edema and edema disease-like syndromes observed in Kenyan pigs
Orenge Caleb	Expression of trypanotolerant quantitative trait loci in a boran based backcross under natural tse tse challenge

Acting Director WMI meeting with Dr Pachauri, the Chairman of the Intergovernmental Panel on Climate change and the Director, Energy Research Institute, New Delhi

Mutua Florence Kanini	A study of opportunities for improved rural pig farming in western Kenya; feeding productivity marketing and public health.
Ithondeka Peter Maina	Global animal health standards and their effects on the livestock and meat product exports in Kenya
Lewa Ann Katunge	Evaluation of animal health care delivery systems in West Pokot and Turkana Districts of Kenya

A PhD student carrying out a research project of natural products

Masters thesis published

Master Of Science in Veterinary Pathology and Diagnostics

Chivatsi Daniel Chai Effects of Rosiglitazone on the pathology of endometritis in baboons

Master of Science in Clinical Pathology and Laboratory Diagnosis

Kibebe Herbert Point of care testing in diabetes patients: The use of glycated haemoglobi and blood glucose assay at Nyeri provincial hospital and their application in diabetes mice model

Master of Science in Fish Science

Mathenge Charles Prevalence, intensity and pathological lesions associated with helminth infections in farmed and wild fish in upper river Tana basin, Kenya

Master of Science in Veterinary Epidemiology and Economics

Ojigo David A survey of the socio-economic characteristics of the urban dairy farming in Dagoretti Division, Nairobi, Kenya

Maritim W. The seroprevalence and risk factors of contagious bovine pleuropneumonia in the North-Western area of Turkana District, Kenya

Kimutai

Assava Lucas Luvai	A survey of human Taeniosis/Bovine Cysticercosis in Northern Turkana District, Kenya
Alexander Kuto Kiprono	Studies in the epidemiology and control of tick-borne diseases with reference to East Coast Fever: Perceptions of the pastoral communities in Northern Rift Valley Province, Kenya
Kiema Edward Kisenge	The prevalence and risk factors of Hydatidosis in man, sheep and goat in North Western Turkana District, Kenya
Gachohi John Mwangi	Estimating seroprevalence of East coast fever and determination of associated risk factors in the cattle population of Mbeere district, Kenya
Rono Bernard Cheruiyot	Comparison of effects of two contagious bovine pleuropneumonia on lung lesions and seroprevalence in cattle under the Maasai ecosystem
Olwande Portas Odula	Assessing the productivity of indigenous chicken in Southern Nyanza, Kenya
Monda J. Gwaro	Environmental transmission pathways of <i>Cryptosporidium parvum</i> in urban small holder dairy production, Dagoretti Division, Nairobi

Master of Veterinary Public Health

Lyweyero Jane Khayesi	A comparison of sensitivity of test kits used for diagnosis of human brucellosis in Kibera, Nairobi, Kenya
Nyongesa Concepta Nafuna	Health risk posed by calves in transmission of zoonotic <i>Cryptosporidium parvum</i> in urban smallholder dairy production in Dagoretti Division of Nairobi Kenya
Kinjanjui Wamalwa	Assessment of hygiene of meat produced in some Somaliland slaughterhouses

Master of Veterinary Pharmacology and Toxicology

Koros Kipsengeret	Assessment of heavy metal concentrations in ash from incinerators and its environmental implications in Nairobi, Kenya
-------------------	--

Master of Science in Animal Nutrition and Feed Science

Bororot Tabitha Jepchirchir	Effect of Different Levels of Poultry Waste and Mulberry Leaves with or Without Formic Acid or Molasses on Napier Grass Silage Quality.
Syomiti Margaret Muteng'e	Evaluation of Feed Additives for Improving the Nutritive Value of Maize Stovers Under Field Conditions in Kenya.
Katiku Paul Nzyumo	Application of Models in Prediction of Dairy Cattle Productivity in Mbeere District, Kenya.
Njiru Antony Ngungi	Evaluation of Dual Purpose Sorghum Varieties for Animal Feed in Semi-Arid and Arid Areas of Kenya.

Master of Science in Animal Genetics and Breeding

Wasike Selieli	Genetics Characterization of Selected East African Indigenous Cattle.
----------------	---

Odhong' Charles Genetic Evaluation of Kenyan Boran Herds and Kenya Boran
Owino Embryo Export in Kenya.

Faculty of Agriculture

Doctor of Philosophy

Nyoni Nessie Effect of Biocontrol Agents with Compatible Cultural Practices for
Luambano Root-Knot Nematode Management in Tomato

Njuguna Esther An evaluation of the effects of information and technology
Mwihaki characteristics on technology choice and adoption: the case of
striga and stemborer control technologies in maize production in
Western Kenya

Muriungi S. J. Molecular characterization of *Rhizoctonia solani* strains causing
tomato (*Lycopersicon esculentum* Mill) damping off and its
management

Mwaniki Effects of Abiotic Factors on Entomopathogeni Nematodes and
Shelimith the Nematode Potential against the Sweet Potato Weevil *Cylas*
puntiocollis Boheman

Master of Science in Applied Human Nutrition (Dissertations)

Mungai, Beatrice Infant feeding options and implications on the nutritional status of
Wanjiku children 0-6 months born to HIV positive mother in Nairobi slums,
Kenya

Sakwa-Madete, Provision and perceptions of nutrition education for people with
Emily HIV/AIDS at the public comprehensive care clinics: A study of
Nairobi District clinics in Kenya

Mutwiri, George Dietary diversity and nutrient adequacy among non-breastfeeding
Mutembei children (2-5 Years) in Mbooni Division, Kenya

Okuku, Aska Effect of food supplementation on nutritional and morbidity status
Akumu of HIV infected adults receiving antiretroviral therapy in Kenya

Wambua correlation of camel milk consumption with symptoms of food
poisoning among children and young adults in Isiolo, Kenya

Nyirahabineza, Utilication of national guidelines for food nutritional support and care
Alphonsine for people with HIV/AIDS in Rwanda: A case study of IntraHealth
International/Capacity Project supported health centres

Githinji, Factors associated with overweight and obesity among school
Millicent children aged 11 to 14 years in Nairobi, Kenya

Maritawa, Knowledge and practice of nutritional principles and association
Zipporah with nutritional and mobility status of people living with HIV/AIDS

Odwori, Dietary intake of iron and zinc and the nutritional status of
Immaculate children aged 6-11 years in schools with and without school feeding
Akumu programmes in Kawangware, Nairobi West District.

Ombongi, Gladys Contribution of sugar sweetened beverages caloric and vitamin C to
Mogoi Arandi Dietary intake and nutrition of school children aged 10-13 years in
Westlands, Nairobi.

Oritcho, Hague Isaac	Household food and nutrition security in association with HIV progression: A comparative study of Coastal highlands and lowlands in Wundanyi Division, Taital District.
Mbela, Gloria	Diet and nutritional status of women living with HIV/AIDS in Nairobi, Kenya.
Momanyi, Clare Kerubo	Nutritional impact on women aged 20-49 years with HIV/AIDS and phas eout structures of a supplementary feeding programme; A case study of comprehensive care programme at Thika District Hospital in Kenya.

Master of Science in Soil Science

Ichami Stephen Muhati	“Diagnosis of soil and plant nutrient constraints in small-scale groundnut production systems using infrared spectroscopy in Western Kenya”.
Emerita Ndwiga Njiru	“Assessing the impact of climate variability and change on maize performance in semi-arid Eastern Kenya”.
Anne Nyambura Karuma	“Effects of legume cover crops and sub-soiling on soil properties and maize growth in Machakos District, Kenya”.

Master Of Science In Range Management

Everlyne Cheptarus Kirwa	“Impact of land use change on ecology, resource productivity and adaptive strategies of smallholder agro-pastoralists in Machakos-Makueni Districts, Kenya”.
--------------------------	--

Master Of Science in Agricultural and Applied Economics

Echoka Jackson Opati	Analysis of Determinants of Agricultural Credit performance in Kenya: The case Agricultural finance corporation Uasin Gishu District.
Hitayezu Patric	Determinants of Farm households participation in the rural nonfarm labour markets in Rwanda: The case of Gisagara District
Karanja Lumumba Tabby Njeri	Adoption and profitability of smallholders dairy goat production in Kenya: The case of Meru South and Meru Central District.
Kipkoech David Nyamasia	Determination of efficiency and factors influencing it among the small scale ware potato producers in Kenya.
Mogaka Violet Moraa	A comparative analysis of costs and benefits of Jatropha, maize and orange production in Kenya: Case of contracted farmers in Shimba Hills.
Muange Elijah Nzula	Effect of farm income risk on smallholder production decisions in the Highlands of Machakos District Kenya: The case of Kauti irrigation scheme.
Mugane Anthony Nyotu	Competitiveness of rice production systems in Mwea irrigation scheme.
Mwangi Samuel Chege	The effects of market reforms on Irish potato price volatility in Nyandarua District Kenya

Namai David Makau Kalia	Determinants of choice of improved maize seeds in arid and semi-arid areas of Kenya: The case of Yathui Division of Machakos District.
Ngigi Marther Wanjiku	Urban consumers perceptions and willingness to pay for food safety: The case of peri-urban leafy vegetables in Nairobi
Otieno, Zipora Awuor	The role of varietal traits on the Adoption of improved pigeon pea varieties in Kenya.
Kiio Jacqueline Muendi	Analysis of factors affecting production and marketing of sorghum in Mwingi District, Kenya
Komen Mathew Kipchumba	An Empirical Analysis of the factors that influence beef cattle marketing behavior in pastoral areas of Kenya with special reference to the impact of livestock market information.

MSc in Crop Protection

Stephen Mwalugha Mcharo	Gray leaf spot disease of maize in Kenya: occurrence, distribution, pathogen, variability and host plant resistance
Karanja Catherine Njambi	Integrated Disease Management Strategies for Groundnut Rosette Disease
Benard O. Mware	The transmission and distribution of cassava brown streak disease in Kenya
Kinyungu Teresa	Effect of distance of maize border crops on the management of viruses infecting Irish potatoes
Gachu Sarah Muthoni	Evaluation of Vegetable Intercrops for Management of Thrips and Diseases in Onions (<i>Allium cepa</i> L.)
Munyambo Juliah	Developing a sustainable integrated production system for indigenous leafy vegetables for small holder farmers in Taita district
Eddie Birnie S. Hasheela	Evaluation of Trap Crops and Varieties for Management of Diamondback Moth (<i>Plutella xylostella</i> L) on Cabbage (<i>Brassica oleracea</i> var. capitata)
Ottilie Shirolo	Integrated Management of the Two spotted Spider-mite <i>Tetranychus urticae</i> , Pest of French Beans, <i>Phaseolus vulgaris</i> in Kenya
Chirchiri Alexandar	Plant Parasitic Nematodes Associated with sugarcane in Western Kenya and their management using host resistance and crop mixtures

Msc Plant Pathology

Ocheya Assanga	Combining ability among early quality protein maize inbred lines under stress and non-stress environments
----------------	---

MSc Agronomy

Anna Itwari Felix	Influence of supplementary irrigation, organic manure application and soil type on micronutrient density in common bean (<i>Phaseolus vulgaris</i> L.)
-------------------	---

MSc Agricultural Resource Management

Beatrice Nyamwamu	Soil quality, water use and socioeconomics of small holder irrigated agriculture in Mashuru, Kajiado district
George Moses Odero Olulo	An evaluation of substrates, their optimal liming and supplementation levels for oyster mushroom (<i>Pleurotus ostreatus</i>) cultivation
Mary Mpinda Mutembe	Causes of post harvest losses and laboratory investigations on anthracnose in avocado
Mwangi David Kamande	Evaluation of the diversity and abundance bee pollinators in hedgerows in the Kakamega farmlands
Musyimi, Scholastica Leah	Management of <i>Fusarium</i> Head Blight of Wheat Through Host Resistance and Biocontrol Agents

EXHIBITIONS WHERE THE COLLEGE PARTICIPATED

- 2nd National Agricultural Sector Conference & Exhibition: Transforming agriculture for productivity, agribusiness and markets – Safari Park, Nairobi - 9th – 12th November 2009
- Public Universities Exhibition, Nyeri: March 2010
- All Africa Horticulture Congress,, 31st August –3rd September 2010.
- District Stake Holder Field Day Exhibition 14th September 2010 – Ndeiya, Limuru
- Sarit Centre Exhibition – 11th –14th March 2010
- Commision of Higher Education Exhibition – 23rd – 28th March 2010 (Outspan Hotel Nyeri)
- University of Nairobi Open Day – 16th –17th April 2010 (Main Campus)

AWARDS WON BY THE COLLEGE AT NAIROBI TRADE FAIR

- Best Stand/Display Trophy at 2nd National Agricultural Sector Conference & Exhibition: Transforming agriculture for productivity, agribusiness and markets – Safari Park, Nairobi - 9th – 12th November 2009. DFSN&T displayed a number of pilot plant products and won two awards in the cheese category
- CTA/FARA/RUFORUM/ANAFE/AGRA/NEPAD Africa Wide Women & Young Professional in Science Competitions:2009-2010 Women in Science Competition
- 5th Prize: Ms. Eunice Wamuyu Githae (PhD in Dryland Resource Management student) for her work on ‘Genetic diversity of gum Arabic-producing *Acacia* Senegal varieties in Kenya using inter-simple sequence repeats (ISSR) and chloroplast simple-sequence repeat markers’.
- 2009-2010 Young Professionals Competition
- 2nd Prize: Mr. Kevin Zowe Mganga (MSc Range Management - graduated September 2009) for his work on ‘Reseeding – a gateway to rehabilitation success, food security and sustainable rural livelihoods in drylands Africa’.

OUTREACH AND COMMUNITY SERVICE

1. ACCA project; training farmers on water harvesting techniques in dryland areas of Eastern province.
2. Mentor for young women scientists with the CGIAR, AWARD Programme
3. Irish potato outreach – farmer awareness in aphid transmitted virus diseases in major potato growing areas, Mt. Elgon, Molo, Timau, Njabini and Kiambu.
4. Technology transfer – sweet potato, tissue culture bananas and indigenous

vegetables production.

5. Development and dissemination of integrated pest and disease management strategies in the production of seed potato in farmer-managed seed production system. A total of 83 farmers were trained on potato aphids and virus recognition, spread of virus diseases, management of potato aphids and virus diseases, selection, harvesting and grading of seed potato. All the trainings were farm-based such that the farmers were involved in direct observation and evaluation during the crop growth until harvesting. Researchers, technicians and extension officers from the Ministry of Agriculture were involved in training for sustainability.
6. Training farmers in Katulani – water challenge programme as part of IAR4D initiative
7. World Rabies Day and Zoonoses Scientific conference – 24 -27 September, 2009. (Western and Nyanza Provinces).
8. Sweet Potato Project in Kimende
9. Sweet Potato Project in Ndeiya from 28/09/09 – 1/10/09.
10. Establishment of Seed Enterprise Management Institute (SEMIs).
11. Herd health at Kibwezi from 8th – 10th May, 2010.
12. All Africa Horticulture Congress at Safari Park Hotel – 31/08/09 – 3/09/09.
13. Second Kenya Education Stakeholders’ Conference and Exhibition at Sarit Centre – 14 – 16/08/09.
14. Nairobi International Book Fare at Sarit Centre – 22 – 27/09/09.
15. Annual Sports Day, Saturday 5th December 2009
16. Visit by St. Joseph’s Girls High School, Kibwezi.
17. Visit by Pangani Girls, Nairobi visit on 12th March, 2010
18. The 12th Nairobi International Education Fair, 11th – 14th March, 2010.
19. Annual Tree Planting Day – 16th April 2010.
20. Commission of Higher Education Exhibition, Green Hills Hotel 23rd to 28th March, 2010.
21. Tree planting in Ndeiya, - 4 /07/2010.
22. A community outreach veterinary medical camp was carried out at Kibwexi Dryland Station

TEACHING/RESEARCH FACILITIES ACQUIRED DURING THE YEAR

1. New Sony VPL-LCD Projector
2. Washing Machine
3. One incubator – Soil Microbiology Lab
4. Deep freezers 3
5. Refrigerators 3
6. Computer
7. New equipment: New Sony VPL-LCD Projector

New farm implements are received at the Field Station procured through SEMIS project funded by AGRA

Pathology Building

VISITORS TO THE COLLEGE

Name	From Where	Date

COLLEGE COMMITTEES

1. College Academic Board (CAB)

The Principal - Chairman
Deans of Faculties
All Chairmen of Departments
All Professors and Associate Professors
One Faculty representative
College Librarian
One Postgraduate students
One student representative from each faculty
College Registrar – Secretary

3. College Procurement Committee

Principal/Chairman
Dean, Faculty of Agriculture
Dean, Faculty of Veterinary Medicine
College Registrar/ Secretary
College Bursar
College Internal Auditor
College Procurement Officer

5. College Health & Safety Committee

Dr. S. Kiama - Chairman
Prof. N. Munene
Prof. J. Nderitu
Prof. C. Gachuiiri
Prof. E. Maingi
Dr. K. Ngugi
Prof. F. Olubayo
K.K.Mbali
Mr. J.A.Okora

7. College Disposal Committee

Dr. F.M. Olubayo Chairman
Mr K. K. Mbali
Mr. G. M. Ndiritu
Mr. K. Gitau
Mr. James Munyithya

9. College Exhibition Committee

Dr. J.N. Chege- chairman
Dr J. N. Kinama
Mr. K. K. Mbali
Dr. M. Nyangito
Mr. M.M. Nyamu
Mr. D. Chemboi

2. College Management Board (CMB)

The Principal - Chairman
Deans of faculties
The College Registrar - Secretary
The College Bursar
Chairmen of departments - in attendance
Internal Auditor - in attendance

4. College ISO Committee

Prof. J H. Ndiritu - Chairman
Dr. S. G. Kiama
Prof. J. Wabacha
Prof. F.Olubayo
Mr. K. K. Mbali

6. College Library Committee

Dr. S. G. Kiama - Chairman
Mr K. K. Mbali
Mrs Grace Irura
Dr A. M. Mwangi
Dr V. Narla
Dr. A.G. Thaiya
Dr. A.N. Makanya

8. College Annual Report Committee

Dr. S. G. Kiama - Chairman
Prof. M. W. Okoth
Prof C. M. Mulei
Prof. J. Ombui
Prof. F.M. Olubayo
Mr K. K. Mbali

10. College Waste Management committee

Mr J. A. Aura- Chairman
Chief and Principal Technologists
ICT – in-charge
Halls officer
Assistant Registrars
Mr D. K. Macharia- Secretary

11. College Show Committee

Dr. D. W. Gakuya – Chairman
Dr J. N. Kinama
K. K. Mbali

Dean, FVM and PS Ministry of Livestock in Leather Curriculum workshop

CAVS Student Leadership

The College management supported and facilitated and nurtured students' leadership which was very diverse and included SONU, KUSCO and several professional and faculty based organizations. The college organized student leadership training for the newly elected leaders to clearly expose them to their new roles and provide them with skills to enable better service to the students' community. During the academic year 2008/2009 the newly elected student leaders underwent a training course that was held at Karen, KCB Training Centre. The students at CAVS were actively engaged in academic, social and professional activities.
