

Google Scholar training for College staff members

[CAVS](#) members of staff were trained on how to create accounts on Google scholar and ultimately enlist their research work. In line with the University's mission and vision, such an initiative will ensure that the researcher's publications are searchable and visible through the internet and are also traceable to the researcher.

Google Scholar is a freely accessible web search engine that indexes the full text or metadata of scholarly literature across an array of publishing formats and disciplines. The Google Scholar index includes most peer-reviewed online journals.

Researchers estimated it to contain roughly 160 million documents as of May 2014.
