**Fellowship Curriculum Development and Review Workshop (UHV Fellowship)  
20-26 July 2014 Great Rift Valley Naivasha Kenya**

### **Curriculum Development and Review Workshop**

Prof. Isaac Kibwage, Principal College of Health Sciences, officially opened the Curriculum development and review workshop for the UoN HIV Capacity Building Fellowship at the Great Rift Valley Lodge, Naivasha. The workshop took place from 21<sup>st</sup> July – 25<sup>th</sup> July 2014.

The objectives of the workshop was to acquire knowledge and skills to develop curriculum, to review the fellowship curriculum for the current tracks which are: Health Economics, Health Informatics and Program Management.

The workshop would also have the opportunity to develop curriculum for the two new tracks which include: Epidemiology & Biostatistics and Monitoring & Evaluation.

“This curriculum development and review workshop is going to be a pillar in the presentation of the UoN HIV Capacity Building Fellowship, because what you come up with is what is going to give the program direction,” emphasized Prof. Kibwage.

The Principal also urged the delegates that as they think through the curriculum, they should also consider the needs of the participating Local Partners (PLPs).

He also acknowledged the impact of the previous fellows in the various organizations they were attached to. ‘The managers of the institutions where some of the fellows were attached to, were very appreciative of the kind of knowledge and skills they were getting from the fellows and the value that they were adding to the operations of their employers and organizations,’ he pointed out.
