

The Area Manager for the [De Lorenzo Company](#) Mr. Roland Ruhumuriza visited the department. He toured some of the laboratories within the department and met with the Head of Department Prof. Ouma during his visit.

De Lorenzo is the Italian leading Company and among the first in the world in the design, development and production of technical and vocational training equipment. De Lorenzo operates internationally through its own Companies or through exclusive agents and distributors in almost every country in the world.

[De Lorenzo](#) has developed individual equipment or complete laboratories and the range include, but not limited to: Electrical Engineering (e.g. installations, electrical machines laboratories and workshops, electrical power engineering, etc.), Basic Electronics, Power Electronics, Industrial Electronics, Telecommunications, Pneumatics, Hydraulics, Automation, Automotive Technology, Renewable Energies, Energy Efficiency, Cathodic Protection, Thermotronics and other technical disciplines that are studied in technical/vocational Institutes and in Universities all over the world.

Mr. Roland hopes to provide the department with various De Lorenzo solution, which will help students to carry out their laboratory experiment. He also hopes to establish a much closer collaboration with the University.
