

The Department of Environmental and Biosystems Engineering was represented by Mr. Antony Karimi ( Farm Mechanization Technologist) in a mission for FACASI PROJECT from 20<sup>th</sup> to 24<sup>th</sup> April, 2015 in Bungoma and Laikipia counties in Kenya.

The objectives of the mission were:

- to collect data from farmers on gross margins for main crops and determine farm types
- to collect data from service providers on the current operations, revenue generated, custom hiring charges, maintenance and other cost
- to collect data on work rates for the various machines
