

UoN partners with NIP

(Left) Mr. Harold Kaura, General Manager, Technical Operations, NIP and Prof. Bernard Aduda, Principal, College of Biological and Physical Sciences exchange signed copies of the MoU at the University of Nairobi.

The University of Nairobi (UoN) and Namibia Institute of Pathology (NIP) have entered into a partnership that will see the two administer academic programmes, information and technology exchange in the field of pathology.

During the signing of the Memorandum of Understanding, it was revealed that since UoN already has an established academic programme in human pathology offered at the College of Health Sciences (CHS), Department of Human Pathology, NIP students will do their theoretical, practical and experiential training at the University.

Speaking on behalf of the Vice-Chancellor, Principal, College of Biological and Physical Sciences, Prof. Bernard Aduda welcomed the initiative noting that the University of Nairobi is keen on partnering with African institutions in key areas of development within the continent.

Representing Namibia Institute of Pathology, Mr. Harold Kaura, General Manager, Technical Operations, said that since the establishment of the institution, capacity development has been a challenge. He noted that through partnership with the University, the training of pathologists will improve on efficiency and service delivery at NIP.

Prof. Isaac Kibwage, Principal, CHS, Prof. William Ogara, Director, Centre for International Programmes and Links and Prof. Grace W. Kitonyi, Chairman, Department of Human Pathology, are among those who witnessed the signing of the MoU.
