

Dissemination of Operations Research Findings

Dr Faith Thuita as principal investigator and study team leader provided leadership in the conduct of a landscape analysis (Focused Ethnographic Study) commissioned by the Global Alliance for Improved Nutrition to inform design of nutrition interventions in three counties in Northern Kenya; Isiolo, Marsabit and Turkana. Research findings were disseminated to the 9-5-2 USAID partners and health and nutrition stakeholders in Isiolo county. As part of feedback to communities in the county, Dr Thuita participated in a live telecast on radio (Isiolo FM) alongside GAIN country director, the African Development Solutions (ADESO) Chief of Party and the REGAL-IR behaviour Change Communication Officer.
