

## **MCQ marker in department of surgery operational**

The department of surgery is pleased to announce the launch of its electronic MCQ marker. This marker was availed to the department courtesy of the office of the Dean of the Medical School earlier this year. The software has finally been installed and the system is operational. This will no doubt reduce the workload associated with marking of MCQs within the school

The facility is available for use by all departments. In this regard chairmen are advised to nominate champions who can access to this marker on their behalf. The department will shortly call a training session to orientate users on requirements to fully utilise the marker.

This marker becomes the second within the College, the first being located within the department of Medical Physiology

We wish to thank the Dean for this facility
