

Donation of State of the Art Haemostasis Machine by World Federation of Haemophilia (WFH)

Warfen the distributors of IL laboratory equipments has donated a state of the art haemostasis machine 'Elite Pro' to the Department of Human Pathology. The donation was made through the WFH. The machine was handed over to the Department by Mr. Robert Barnes managing director of Technomed. Technomed is the local agent of IL . The machine has given the Department capacity to carry out a wide range of haemostasis tests rapidly and accurately. The equipment was received by the Principal of CHS, Professor Isaac Kibwage. Noting that the machine will improve the care of patients living with haemophilia at the Kenyatta National Hospital, Prof. Kibwage thanked Warfen, the WFH and Technomed for the generous donation
