

## Centre For Biotechnology and Bioinformatics Career Development Meeting

### ***Dr. Hazel McCullough giving her presentation during the CEBIB Career Development***

Career development is a vital component in enhancing one's ability to satisfactorily contribute to the overall development of oneself and the organization. Consequently, career development assists an individual to have a wide range of choices in terms of career transitions. The Center for Biotechnology and Bioinformatics, CEBIB career development meeting which began on May 25<sup>th</sup> 2015 is fulfilling this goal of equipping students and other participants with information and opportunities in Biotechnology and Bioinformatics.

The Career Development was held at CEBIB. Those present included Director of CEBIB Dr. George Obiero, Deputy Vice-Chancellor RPE Prof. L. Irungu, Dr. Hazel McCoullough, Dr. Isabella Oyier and Dr. Bernard Kulohoma among others.

In her presentation, Dr. Hazel McCoullough took the participants through career development and opportunities available for students pursuing higher education in Biotechnology and Bioinformatics. She explored research funding options for students pursuing masters and postgraduate studies. Dr. Isabella Oyier outlined the steps involved in assessing postgraduate students. She explained

that since the center started admitting postgraduate students, the rate of graduation has been dismal but the center is determined to revise this trend by ensuring all students joining the postgraduate studies are able to complete their studies on time and without disruption. Further, she thanked the Center administration specifically the Director, George Obiero, Vice Chancellor RPE, Prof. L. Irungu, College Principal, Prof. Aduda for supporting the center in all its activities.
