

Kenya GMP Roadmap

The Kenya GMP Roadmap sets a path for Kenyan pharmaceutical manufacturers towards internationally accepted Good Manufacturing Practices in line with WHO requirements. This approach has been developed by UNIDO in close cooperation with the Ministry of Industrialization and Enterprise Development, the Ministry of Health, and other key stakeholders. The roadmap is a stepwise path leading to significant benefits for Kenya, through improving healthcare for its people and boosting the national and international competitiveness of the Kenyan pharmaceutical industry.

[School of Pharmacy, University of Nairobi](#) committed itself to build capacity through training to support implementation of the GMP roadmap
