

Community Outreach at the University of Nairobi – Ngong Forest Station

Communities living around the University Ngong Forest Station near Kiserian were supplied with indigenous tree seedlings to plant in their farms. Four villages were represented.

A total of 350 seedlings were given to the community while 50 seedlings were donated to Naserian Primary School.

The University team was led by Mr. Henry C. Kahi (*3rd Right*), Principal Technologist-
[Department of Land Resource Management and Agricultural Technology](#).
