Enhancing System Security in the University

Staff members have been trained on Information Security. The training emphasized on email security owing to the high number of suspicious emails received from undefined resources. During the one day training held on June 18, 2015, emphasis was made not to share passwords or disclose personal information via the email.

Mr. Elijah Tenai, Deputy-Director Network Infrastructure Services said that the interface between security and systems lies with the human interface. This, he said while introducing members of staff from ICT who were training College of Biological and Physical Sciences staff; Mr. Joram Kinuthia, Ms. Janet Maranga and Mr. Paul Kimemia.

The Principal CBPS, Prof. Bernard Aduda heightened the importance of staff to implement what they have been trained in their day-to-day tasks while using the University systems.

Other training topics included: Trends in ICT, Handling Computer Crimes, ICT regulatory framework in Kenya and mitigating risks and threats of the University of Nairobi's Human Resource Management System.

The training which was organized by Information, Communication and Technology Center (ICTC) took place at the School of Physical Sciences.
